97/98 Update		
Bit of a long shot but about 4 years ago when I did CM3 Project for 0102 John Locke gave the player files exactly from CM 9798 & another chap inserted them into 0102. He didn't use a blank db & those clubs not with played in 9798 ended up with players in their late 40s or 50s.		
Anyone have a copy of that db or the JL 9798 extracted squad files?		
hinking of my next project & this will be it if anyone has those files & can start a fresh with a blank db & just plonk them in.		
had the files on my old PC but long gone & only got the 95/96 squad files. JL also uploaded the 9697 squad files at same time which could be another project \bigcirc

hi guys, first of all, thank u for that update;I was really looking forward this update, so I fixed it a little this week: -there were almost 1500 players born 11.4.1954, I fixed most of them but t (the fact that I don't know their real birth date means that they were not tra	here are still 300 players who I don't know their birt	

-many players had their afghani/zairean duplicate; I erased all the wrong duplicates;

-many players (exp. scottish, dutch...) had wrong nationality (afghani or zairean), fixed it;

-I created about 70 players that are missing in the update because too young back then(ex. Ibrahimovic, Terry...) or bacause playing in small clubs (ex. Martin Palermo, Fabio Grosso)(most of those I created are italian players not so famous)

-the birth date of ALL players is wrong, postponed by 1 or 2 days; I fixed few of them but I couldn't fixe that for all the players, they are too many.

I made all the adjustment in the Official Editor. if someone is interested in the data, just tell me

bye

I tried to upload the data on this link, never done before I hope it works		
http://www.filedropper.com/2_26		

I created almost 200 players (rogerio ceni, eto'o, mexes... and others you will enjoy to discover), most of them are italian or played in italian leagues. Unfotunately sometimes when I load the game few of them are not in the position I put them, I don't know why, but now they seems to be all in their right role... I noticed that it may depends on the league you select at the start of the game... it seems a little random so it may happen again (to me that happens with Tiribocchi: the

game put him as a defender... even if I don't use him it still makes me little nervous!).

Apart from birth date, I didn't modify attributes of players that were still present in the update, but I could not resist to do few: -wilfred bouma was a striker, I put him as a left wing and strengthened a little, as well as 3/4 other players.

If someone of you want to improve the data, you may: -adjust the birth date of most of the players (is wrong for 90%of players) -many club' squad are still very thin (brazilian teams, turkish and in general lower division's teams), you may thicken those roses

hope you enjoy

ops guys,		
I made a mistake! I am so sorry! due to that problem that I had with "execute as admin" I uploaded the wrong data (well, they were correct but many players are missing). In fact the file I uploaded on monday was NOT the latest update: there awere only 70 new players there.		
this is the latest data update:		
http://www.filedropper.com/update199798		
I created more than 200 players here, about 130 players that in the other file are missing for example david villa, eto'o, juninho pernambucano and many others		
enjoy

Hi guys, I noticed that there were issues in the last update, so I tried to fix them and did other changes: -many players (about 500) had potential ability 155, even if they were a lot stronger (Vieri, Beckham, Ballack the players that deserved; -most of the players of Atletico Madrid were on free transfer list (ex. Vieri, Fortune), I put them back to AM -I fixed some birth dates and created history for few players (Shearer, Maradona and few others); -I created other 180 players that were missing in the previous update overall (considering the previous char extended the players' db with more than 380 players that were missing (some of them are Valderrama, Nakat a famous player that retired in the summer of 1997, I set a retirement date to him but you are still in time to here are the data, enjoy it: http://www.filedropper.com/update9798_1	squad; nges that I made; a, Petrov) als) I so created

Thanks!!! You database season 93-94, 94-95?		
		#19
28-04-14, 06:41 PM		
savixa o Youth Team Player	Join Date: Posts:	25-06-12 16
no I don't, I just edited this season because it is my fav of all time. I was too young back in 94, and I'm not really interested in it.		

danisabio you crack me up, you've asked 3 times about 93-94, 94-95 in it's own thread then asked about it in a 9798 thread.

Enthusiasm is good tho but don't think 93/94 is a goer. Your best chance is to hope one was made on an FM forum then if see if anyone clever can extract the data for you, Unlikely but worth a try.

Criginally Posted by Cam F	then asked about it in a 9798 thread.	

And by PM! 😂 Sorry dani, i don't have any CM01/02 database for 93-94, 94-95 or anything else 😂 I actually thought you were meaning CM1 in your pm rather than a data update for CM3,01/02

hi, I wonder if anyone can help me. I have 2 problems with my last update: first: if I load all the league the game doesn't run and gives me this error: database..cpp 399 it's not a great problem, it is just to know, because I usually load only 16 countries and it works normally; but now I tried with all the countries and it gives me that error and the game crashes. second: when I create a player sometimes he is not in the position I put him, for example now I just load the game and Davor Vugrinec, who I created as a striker is an offensive midfielder (right) 🙆, I load it again and he is goalkeeper 🖲; but if you look at the editor I set attack: 20 and central: 20, and I set all the other positions and zones to 1; so why the game doesn't consider him a stricker? any idea? ✓ Page 1 of 4 1 2 3 4 ▶ Last ▶ « How can I stop database clashes? | Player Histories » **Posting Permissions** ^ You may not post new threads BB code is On You may not post replies Smilies are On You may not post attachments [IMG] code is On [VIDEO] code is On You may not edit your posts HTML code is Off Forum Rules

Don't worry i've had the re-assigned positions issue before.

Just run 'cmdbsort.exe' after every time you edit, it is in the downloads section.

I was starting to work on a 1997-98 database for cm0102 based on the original data of the game. I ch the career stats up to 1997 thanks to the new app from Archibald. Next step is to convert non-players and the right teams alignement for each league. Since there's a cm9798 edition, is it possible to extrat database or I have to do it manually in the editor? Just to know if there's a faster alternative. I'll be cu version made by Savixa but the links are dead.	to players and get the rig ct only that information in	ght squad nto my

Criginally Posted by Pucellab <i>I was starting to work on a 1997-98 database for cm0102 based on the original data of the game. I changed a career stats up to 1997 thanks to the new app from Archibald. Next step is to convert non-players to players a right teams alignement for each league. Since there's a cm9798 edition, is it possible to extract only that infor have to do it manually in the editor? Just to know if there's a faster alternative. I'll be curious to compare it to but the links are dead.</i>	and get the right squad and t mation into my database or .	the I
Before you go ahead and put further work into your DB, just make sure that the years have definitely The Updater is still very much untested (note there was a minor bug with v0.0.1 so I hope you used very with some years that haven't been changed then drop me a PM and I'll do my best to help fix it.

I had hoped to do this myself if JL had found the squad files but guess he hasn't had any luck on his of	d pc.	
Anyway, I have the 9798 version somebody did the same time I did CM3 Project about 5 years ago 🤤		
Unfortunately he didn't take my advice and quite a lot of players in their 40s however all the 9798 play requires some work to remove the oldies - https://www.sendspace.com/file/1gar2n	vers are there and right a	iges, just

I used the version 0.0.2. So far so good, I didn't check all the players in the game yet but quite a few up to date (as 1997 with the tapani patch 2.19). Since I've used the 2001-02 database, they should be that the 2001-02 has the correct birth year for every player then?

Thanks for the database. I'll take it a look. Was it made like I'm trying to do it or was it made by extra version of CM? I saw on a website dedicated to cm 1997-98 edition that they've put the original database any help to do this? http://www.cm97-98.eu/mediapool/66/6 Databases.zip	5	

http://www.cm97-98.eu/mediapool/66/6..._Databases.zip

It was with the exact data extracted from CM2 (9798) kindly done by John Locke. He converted all the clubs into club files then the person who did this injected them into a blank 0102.

Actually started looking at it today with 0001 in mind and can see he hasn't injected all the teams, some minors ones missing and has amended some of the data but looks good.

Best bet would be if anyone had the squad files JL created back in the day if not then use the data folder I loaded earlier.

Since I've used the 2001-02 database, they should be all good, based on the premisse that the 2001-02 has the correct birth year for every player then?

Yeah if it has done a couple of staff correctly then it'll have done them all correctly. I think the issue might arise where very early 20th century records/cup winners might not be correctly adjusted. I fixed this in v0.0.2 but I haven't yet double-checked that I haven't missed any other tables where pre-1901 dates are possible. It's a minor point and is fixable in the event I did miss anything.

I'd be curious to know this as well. I'm looking for the oldest completed database project. I found some 91/92 and 95/96 I think it was, but I'm not sure they are fully updated.

Anyway, a huge thanks to you guys for even taking these massive projects on! I'm hoping to find the time to do one sometime. I'd love to get back to early 90s!

I am still working on the 91-92 project, but it will take me a while yet, but I will get it to as a completed state as I possibly can.

Hi Cam F, thanks for your reply regarding the 1997/98 database. I was not being rude to you it was for the previous message by Fodster. If you have the 9899 database that would be great.

1997/98 backdated database		

Has anyone ever created a backdated database for the 97-98 season so basically cm2 running on cm0102. I've looked through the forums and someone mentioned somebody who done it but I can't find the link anywhere. Can anyone help. I'll even pay someone lol.

was just wondering is there a DB for 97/98 season so I can use to play in Championship Manager 01/02	?	
tried playing/setting up 97/98 but was a nightmare.		
eally appreciate the help 🙂

Hi Cam, am I right in thinking this is the closest I'll get to a good 1997/98 DB for CM 01/02? If so would you possibly be able to reupload it please? As the link seems to have expired!

tokyochojin •Join Date:05-04-12Youth Team PlayerPosts:2

Cam F provided one above, plays okay. Just missing a few players and some like Keiran Dyer are 47 and will retire at the end of the season.

t's a mess, i wouldn't bother and i didn't create a 0102 9798 db, i have only don't CM3 & 0394 for 0102.		
here were some chaps doing one a 9798 for 0102 on here but they have gone quiet bout it.
