CM3 Project by Cam F

I always dreamed of playing CM3 (9899) on 0102 & thanks to JL I have taken the players from CM3 & inserted them into 0102.

It picks the exact data ability, mental & player stats that was in CM3.

I've used the player config & euro files from CM3 also.

Here is my DB -

<https://www.sendspace.com/file/kzxtsm>

John Locke is the person who made this possible so GREAT thanks go to John.

Note If you use a Tap patch to put year back to 98, you can't use Scotland or any other nation that had league reconstruction from 98-2001, so I guess Brazil & Argentina would be counted out also also people have said France a no no.

I don't use a tap to change the year so I it doesn't affect my game.

-

Excellent work! I loaded the db and it's amazing: 18-year-old Owen with injury prones=1, Ronaldo with pa=200 at his best and Maradona on free transfer!
By the way, is a lot of work to create a database like that using JohnLocke's tool? I was thinking it would be great to create a DB from cm0001 too, I like that update very much, but cm0001 is inferior to cm0102.
Cheers!

Quite a bit but took me just a few hours to add the players of CM3 but then you need to amend the clubs, staff...etc

These were the leagues available in CM3 so you know which ones to include. I would also include the MLS as they had done that just not added the league yet to the game.

You can e-mail SI & let them know they got it wong, was the exact data copied over from CM3.

i'll see what exactly i will bother to do about it. as mentioned it probably won't change the meta game much anyways. After having played it for a little today i must say that i'm impressed by how good it feels to play cm3, 0102 style☺ big creds!

Hi,
thanks a million for this.

But is this really from the original database, that came with the first CD?

I ask because I remember (and I am very conscious to the fact it came out a long time ago 😊) some aspects to the game that aren't on this database.

I'll run through a couple of them and see what people think.

1. Peter Prospar. I never actually got around to signing him because I always played in the English leagues and could never get a work permit. But he was a legend on the game from somewhere in the Caribbean. When I started this database in the England he wasn't on the game.

2. Lizarazu. In the original game you used to be able to buy Lizarazu for a bargain £2.5m or thereabouts. He was a must buy for any team who could afford. In this version I doubt I could buy him for less than £10m.

3. Robbie Keane. In the game I remember Robbie Keane was one of the best youngsters on the game. He was another must buy, even at a whopping £12m from Wolves.

4. Silvio Maric. I remembered Maric still playing for Zagreb and not having moved to Newcastle United yet. Another great buy for the record.

5. Players positions. There are a few instances where the players positions are different. For example:

Michael Twiss (Man U) is a FLC in this version, rather than an AM/F LC as I remember him

Carlos Trezzi (Inter) is an MR, rather than MC.

Robbie Keane (Wolves) is an FC, rather than AM/F C

I could understand some of these changing when the data is put into a different system (like Twiss or Keane), but I couldn't see it happening with Trezzi.

Thanks again for putting this database on CM 01/02. It just seemed off to me, and I'll be interested what others think of the differences I pointed out. I wonder if the original game data could be found anywhere and if anything could be done with it. I loved CM3 and when I found out it wouldn't run on my new computer (I'm guessing it was Windows 2000 or XP) I seriously considered keeping my old one as a stand alone computer just for CM3.

All those are differences between the game CM3 & 0102.

The DB is the exact db from when the original game came out in 98, not a later patch which may have had players at different clubs or PAs.

If you put the DB back into CM3 the positions would be as CM3, in 0102 they change to the different positions.

It is all to do with how 0102 interpretes the data. What OP do you use, as CM3 works fine on XP & Win 7.

Peter Prospar, some obscure country, I maybe missed him tbh if he was in an obscure nation, thought I had done them all but not a biggie tbh.

1. Peter Prospar. I never actually got around to signing him because I always played in the English leagues and could never get a work permit. But he was a legend on the game from somewhere in the Caribbean. When I started this database in the England he wasn't on the game.

□

Added along with his squad. Anymore missing, let me know. I wouldn't even know where to find a lebanese team so not surprised they are missing but added now. He is a belter I agree. Offer him £40k a week & he will get a work permit 😊

2. Lizarazu. In the original game you used to be able to buy Lizarazu for a bargain £2.5m or thereabouts. He was a must buy for any team who could afford. In this version I doubt I could buy him for less than £10m.

That's just 0102, different game engine & higher values & clubs pay more than CM3

3. Robbie Keane. In the game I remember Robbie Keane was one of the best youngsters on the game. He was another must buy, even at a whopping £12m from Wolves.

Checked, he is exactly the same stat wise & with a -2 potential

4. Silvio Maric. I remembered Maric still playing for Zagreb and not having moved to Newcastle United yet. Another great buy for the record.

Checked, even in the CM3 demo (released before game) he was at Newcastle

5. Players positions. There are a few instances where the players positions are different. For example:

**Michael Twiss (Man U) is a FLC in this version, rather than an AM/F LC as I remember him
Carlos Trezzi (Inter) is an MR, rather than MC.
Robbie Keane (Wolves) is an FC, rather than AM/F C**

That was as I was saying earlier today how the game interperetes the positions.

Trezzi is just a midfielder with no sides given, in 0102 it must default to MC but in CM3 must have defaulted to MR.

Updated DB with Ansar club added with Prospar.

Hi,

Thanks for replying to my post and clearing up my questions.

Clarifying the issue of Carlos Trezzi's position was particularly useful. I don't know the game engine really, so I couldn't understand how he could be a MC on CM3 and a MR on CM0102 without an error. But that has now been cleared up.

Thanks also for the Peter Prospar database

Also, just wondering, have you ever found a way of playing the game with the original CD on Windows 7?

Yup, install the final 3.04 patch, if you don't have it let me know & can send you it. Then follow the same things you do to get 0102 to work on win 7.

Also, if you want the original db, make a copy of the db, patch it then replace the db with the original db.

Hi

I download a patch off of the internet, 3.04e. Would this be the correct one?

I ran the patch and changed the compatibility settings, as on CM0102.

The patch seemed to work as I was able to get to the Menu screen fine, but when I tried to Start New Game, it came up with many errors. Then when I selected English leagues it closed the program down.

Any quick suggestions?

thanks

24-10-12, 07:19 PM

#28

Cam F

My compatability is set to win 98/me for CM3. Is there maybe a hidden CM folder in the envernonmental variables you need to delete?

□

As you can see works fine on my Win 7 pc...

Hi

thanks for the reply.

I was able to get it to work!

I tried to install it on another laptop and it worked fine, but for some reason not on my usual one. Then I started a new User Account on my usual laptop and it worked there, but not on my current user account. I'll mess about with it later and get it working.

Thanks for the help, because this CM was top class, I'm so looking forward to playing it. Although I still love CM0102, I really enjoyed the game engine of CM3 as well. I can't really believe that I could have been playing it for the last few years with the patch. I've asked on forums before and people seemed to accept that it just wasn't playable on recent versions of windows, no matter what was done.

The issue with Lizarazu was something that obviously couldn't be transferred just by a data exchange. He was brilliant, but for some reason he would always want to move and you could get him so cheaply

[LizarazuStats.jpg](#)

[LizarazuTransfer.jpg](#)

The issue with Trezzi was the one that really confused me. I didn't know that he could be just a midfielder with not R/L/C assigned. I've started 2 CM3 games and he has been 2 different positions.

What is good about having the original game is the ages are all correct.

[17yoProspar.jpg](#)

[JamieMc.jpg](#)

Even

[14yoRooney.jpg](#)

It was a strange database the more I look into it. The Saudis had some stunning players

(My screenshots are too bit to upload, but check out Sulaimani (DL) and Gahwaji (AMF/c LC) if you're interested.

DO you play this game regularly? Whats the deal with training and tactics, the same as CM0102 or different? I remember 5-3-2 with wing backs being a really good tactic on this game, but that wasn't wib-wobbled so I'm not really sure.

Where there any cheat tactics?

thanks again for all the help.

This is edited in. For some reason I can't post anymore screen shots. But in the original game Brian Laudrup is at Chelsea and in the version for 0102 he is at Kobenhavn. Just wondering on your take on that.

Original game Laudrup was at Kobenvaven, as it was released before Christmas he had already moved irl by then. I always moved him back when I played it.

The lack of seeing career history totals always annoyed me & your players mostly got rubbish ratings, even if your team was unbeaten.

I play my CM3 project, I think it's amazing but I would.

I converted a few of the good tacs on here for when I played CM3 or 99/00, I will have a look when I get home but should still have them with the games.

I play 0001 everyday, then I play 0102 as one of my drinking games but the main 1 is 0001. I find the match engine & difficulty of that best imo.

Might be an idea to update your first post of this thread (the one below Pat's) so that it includes the latest Database and the tactics folder for people to download at a glance?

#

Was created on 3.68. You should only be using the leagues in CM3 - Arg, Bra, Bel, Eng, Hol, Fra, Germ, Ital, port, Sco, Spain, Den, jap, norw & USA.

Also was it a clean install? Tap patch would work but don't change the year to 98 as it will crash if you use Fra, Arg or Sco league, sure this is all mentioned on page 1 tho but glad to help as i get no error messages at all.

01-12-12, 09:23 PM

#43

Ofen0men0
Unattached

yeah I figured it out right after the post and it's working perfectly (my bad as I chose "select all" leagues), thanx a lot for the awesome db

01-12-12, 10:26 PM

#44

Ofen0men0
Unattached

actually i never used the tapani patch coz i don't want to change the rules from what it was back in 01/02, so can i use the tap patch to change only the starting year and nothing else?

02-01-13, 01:46 AM

#45

316'sRegen
Unattached

gonna use this as the next scenario save.

Will it be OK to run 98/99 season as long as FRA ARG or SCO are not active?

No idea tbh, would of thought so but it is lightening even with the leagues I said due to the size of CM3 DB.

Hi,

I've followed these steps:

1. Overwrite your 98/99 DB in my CM01/02 folder.
2. Use CMStaff to decrease player's year of birth and contracts 3 years.
3. Use Tapani's Patcher 3.12 to set start year as 1998.

Then I start a new game selecting only Spanish league and it's crash 😞

You can't really set the year to 98 as it will crash due to changes in the league structures of game in 98 & 99, the furthest back you can set it is 2000 but apart from that if you download the db & play 0102 it will be good to go.

Superb work Cam Im playing as Lazio resigned Signori made him captain and sold alot of stars in the first season to rebuild the squad how I wanted it.I was so close to being sacked for being 3 pts from relegation then Cragnotti said I had to beat Empoli or he will consider my position, we won 5-1 😊

I asked for more time to rebuild the team the board said they will give me time and for some reason the team started playing we avoided relegation.Now in the second season sitting in 3rd place after 10 games and looking strong with a rebuilt team!

One problem I had an error show up during the first season but it seems to have gone away? I didnt add any taipani patches but did use names editor for the UEFA competitions maybe its that?

Cam, I made some changes in the game and it is now possible starting in 1998-99 without any error in any league in this DB. And I put the competitions historial with only dates prior to 1998.

<http://www.sendspace.com/file/dh0m82>

So how does this work exactly? what version/patch of cm01/02 do I need installed? what steps should I follow once I have downloaded the rar.exe? (the one in the message just above, with a start in summer 1998).

I downloaded this file (rar.exe file) and when I tried to run it (as administrator) my antivirus kicked-in and warned me of a trojan horse. Has any one tested that file? did I miss something on the download page?

I tried to install it on another laptop and it worked fine, but for some reason not on my usual one. Then I started a new User Account on my usual laptop and it worked there, but not on my current user account. I'll mess about with it later and get it working.

Thanks for the help, because this CM was top class, I'm so looking forward to playing it. Although I still love CM0102, I really enjoyed the game engine of CM3 as well. I can't really believe that I could have been playing it for the last few years with the patch. I've asked on forums before and people seemed to accept that it just wasn't playable on recent versions of windows, no matter what was done.

The issue with Lizarazu was something that obviously couldn't be transferred just by a data exchange. He was brilliant, but for some reason he would always want to move and you could get him so cheaply

[Attachment 479](#)

[Attachment 480](#)

The issue with Trezzi was the one that really confused me. I didn't know that he could be just a midfielder with not R/L/C assigned. I've started 2 CM3 games and he has been 2 different positions.

What is good about having the original game is the ages are all correct.

[Attachment 481](#)

[Attachment 482](#)

Even

[Attachment 483](#)

It was a strange database the more I look into it. The Saudis had some stunning players

(My screenshots are too bit to upload, but check out Sulaimani (DL) and Gahwaji (AMF/c LC) if yo're interested.

DO you play this game regularly? Whats the deal with training and tactics, the same as CM0102 or different? I remember 5-3-2 with wing backs being a really good tactic on this game, but that wasn't wib-wobbled so I'm not really sure.

Where there any cheat tactics?

thanks again for all the help.

This is edited in. For some reason I can't post anymore screen shots. But in the original game Brian Laudrup is at Chelsea and in the version for 0102 he is at Kobenhavn. Just wondering on your take on that.

Was Wayne Rooney on the original CM3? He would of been 13 at the time?

No, too young. His first appearance was in cm 0102.

Thanks Cam,

Is Diego Maradona on the initial release of CM3 either at Boca Juniors or on a free? Also Did Peter Shilton feature on the it as well?

Cheers,

Sam

Maradona was a free after leaving boca with pa 200 and great stats. Shilton retired by then.

Thanks Cam,

Great knowledge.

Do you have the original data set you could send to me from the initial CM3 release? I have the sold out 3.04 version but want to play the data set that came on the initial CD release so I want to overwrite the data from the 3.04 release with that initial data.

I would be really grateful if you could as I am guessing you have extracted it before for conversion in your CM3 project?

Cheers,

Sam

I don't think so, I would have to uninstall CM3 again, leave it with me and will do it in next few days once I locate the disk.

If it's possible to play with/transfer cm3 data to cm 01/02 could you teach me how to do it the other way round?
cm 01/02 to cm3 engine.

The one difference I really remember between the original cd version of the game and the later sold out version was that Gianluca Vialli was a player for Chelsea, not just a manager. And then I think Chris Sutton would still be at Blackburn

I also think Brian Laudrup was at Chelsea during that season but can't be sure.

Originally Posted by **PeterWarne**

Hi,
thanks a million for this.

But is this really from the original database, that came with the first CD?

I ask because I remember (and I am very conscious to the fact it came out a long time ago 😊) some aspects to the game that aren't on this database.

I'll run through a couple of them and see what people think.

1. Peter Prospar. I never actually got around to signing him because I always played in the English leagues and could never get a work permit. But he was a legend on the game from somewhere in the Caribbean. When I started this database in the England he wasn't on the game.
2. Lizarazu. In the original game you used to be able to buy Lizarazu for a bargain £2.5m or thereabouts. He was a must buy for any team who could afford. In this version I doubt I could buy him for less than £10m.
3. Robbie Keane. In the game I remember Robbie Keane was one of the best youngsters on the game. He was another must buy, even at a whopping £12m from Wolves.
4. Silvio Maric. I remembered Maric still playing for Zagreb and not having moved to Newcastle United yet. Another great buy for the record.
5. Players positions. There are a few instances where the players positions are different. For example:

Michael Twiss (Man U) is a FLC in this version, rather than an AM/F LC as I remember him
Carlos Trezzi (Inter) is an MR, rather than MC.
Robbie Keane (Wolves) is an FC, rather than AM/F C

I could understand some of these changing when the data is put into a different system (like Twiss of Keane), but I couldn't see it happening with Trezzi.

Thanks again for putting this database on CM 01/02. It just seemed off to me, and I'll be interested what others think of the differences I pointed out. I wonder if the original game data could be found anywhere and if anything could be done with it. I loved CM3 and when I found out it wouldn't run on my new computer (I'm guessing it was Windows 2000 or XP) I seriously considered keeping my old one as a stand alone computer just for CM3.

Sorry chaps but you are mistaken. CM3 was released in April 99, Vialli was player manager at Chelsea, Laudrup was at Copenhagen. No idea where Sutton was but guessing still at Blackburn.

ok so I was right about vialli being player manager in the original cd, but wrong about laudrup, although I think he was playing in scotland before we signed him.

Now that the memories are flooding back, I also think Eddie Newton may have been at Chelsea still, and they hadn't signed Goldbaek or Hogh at that point

and maybe duberry was at chelsea too just before leeds signed him, but I can't be really sure, as I have lost the old, old scratched cd.

Does anyone still have the original CM3 database? The link isn't working anymore and I would like to try it. Just bought the sold out version, and this database is nothing like the beautiful database I used to play back in the day! 😞

Thanks!

Hi, I posted that picture of Wayne Rooney

As you can see, that post is over 5 years old so I've tried to remember a little about how it came about.

I'll be honest I can't really explain how the picture of 14 yo Wayne Rooney came about, but I'll give it a try.

When I saw your DM about it I fired up a laptop and installed the game from the original CD. Using the 3.04 patch, and then transferred in the old data from the CD.

No Wayne Rooney. I'm confused. I wouldn't have added him in the game. Posting him in that thread was very much an after thought. I was far more concerned about Lizarazu (who I could always buy for about £2.5m at the very start of the game), and Peter Prosper (who I never actually got around to sign because I couldn't get a WP).

So where did he come from? I'm 100% sure I didn't add him myself, for a starters I couldn't be bothered.

I look through my external HD with all my files that I don't want to lose. Of course there is an CM3 folder. It's got the 3.04 patch, some tactics, and a Data file. I move transfer this Data folder into the game, and suddenly Rooney turns up!

I have no idea where this Data file came from, here? some random site off the net? Somewhere else? It was 5 years ago, I just can't remember

For reference in this Data file Laudrup is at Chelsea, Vialli is player manager, Sutton is at Blackburn. There is also a 15 yr old Cristiano Ronaldo at Sporting apparently?

I will happily upload a copy of it if you are interested.

So I've no idea where that version came from, because I sure as hell didn't make it. But there it is

That makes more sense, that is probably a CM3 data folder I did back in the day so you would have Rooney, Ronaldo, Kaka, Klinsmann, Cantona, Omam-Biyik, Zubizarreta, Schillaci...etc in it and Laudrup at Chelsea. I still have it and my tactics and save games.

I wish when they released CM3 they had the data at the start of season as releasing it in April 99 almost 99/00 data.

What a blast, had a go at the 0102 CM3 Project on 200 speed. Arsenal back 5 were awesome, just 7 goals conceded by Seaman, Winterburn, Dixon, Adams, Keown & Bould as back up.

Shouldn't do, did you use the data folder and exe in the download? They have to be used together or it won't work - <https://www.sendspace.com/file/0afc7o>

If not do a fresh install and put them in. Just like the forum update you should do a fresh install.

I re-installed the game put the database and exe in the folder game...and now i'am back again to 98/99 season!

Thanks Cam F

Oh dear God! You made me an happy child! I finally could win italian serie A with Inter with R. Baggio and Ronaldo! Thx a lot! If only we could play also the Cup Winners' Cup...ah memories...
P.S. Is it possible to apply a tapani patch or a speed adjuster?

It's already on a Tapani patch on the exe/db I uploaded, not sure which one, it will show you when you load the game up which one, then you can make changes using the patch.

I would love to have Cup Winners cup also.

This is fantastic. One thing - can't seem to see any player histories below the Prem? Am I doing something wrong?

Hello guys

I have noticed the teams colors, aren't like in CM3 original database.

Can you tell me how i can get it. Maybe changing one by one?

Most should be, if I preferred colours in 0001/0102 I kept as is. You would just use the editor to change.

Think this is it, was 7 years ago eek I did that 🙄 <https://www.sendspace.com/file/qgaak0>

As folk know I prefer 0001 so I have 93/94 season i have been doing for 5 years now which is amazing, my 98/99 I did for 0001 also and my 0001 original with legends db.

Is that a 'finished' DB Cam? I'll add it to the downloads section if so.

It is yes but with year set to 98 thanks to Gio and can play euro 2000 qualifiers also before the tournament. Thanks Derm.

CM 01/02 works fine with original 98/99 database and start year changed to 1998? Or is euro_config crash?

works fine, year 98 was cm3 so the teams are in the right places as they were in the code the makers made already for cm3.

I wouldn't release it btw 7 years ago if it didn't work 😊

Really? I'm talking about CM 01/02 with start date modified to 1998. Not CM3 nor CM 00/01. Doesn't it crash after some seasons?
Thank you.

21-03-19, 08:23 PM

#125

Was talking about 0102 not 0001. Gio fixed it so it wouldn't crash. 0001 doesn't crash either with year set to 98. You have to remember it's already written in the code for Cm3. That, euro configuration crash only affects years after 98 to 2001 start year.

Thank you! It works fine. But player histories are down three years and/or missing in many players. Also all staff date of births are 3 years younger.

DoB problem can be easily solved with CMStaff. But staff histories are weird, since it shows correct into Editor but when you start a new game all histories shown as 3 years down.

Cm3 didn't have as many histories as later versions. If you remember 9798 most players had none but lots had them in Cm3. Not looked at it in many years but sure it was fine last time I looked. Will check later.

Ok you are right but they were fine if the year wasn't changed, sure easily fixed, my 0001 version is fine, not touched this in 7 years. Sure some clever person could fix it.

Is there any tool to increase or decrease just histories years? That would be enough to fix it.

I just need to address the game speed, how do I set it to default on this update without it crashing as I don't prefer the game in terms of its speed going 4 times faster.

Nick+Co 
ProgrammerJoin Date: 18-07-15

For those wanting to use my patcher with this, do not use the exe that comes in this zip file. Just copy over the Data directory onto a fresh install of CM0102 (with the 3.9.68 patch applied). Overwrite all those files, but leave the cm0102.exe as it is. Then run my patcher on it and set the year to 1998. All should be good (you still have the history out by 3 years as mentioned above, but that's a data issue which can be fixed with the History tool if you care about that sort of thing - but it won't affect your game) (paulcney PM'd me about this)

EDIT:

So, if you want the History perfect too, this is how I would do it to use this Data Update:

- 1) Install CM0102 from scratch
- 2) Apply Data Update Patch 3.9.68
- 3) Copy the Data Directory from the "Data Update 1998-99.zip" zip in the Downloads section over the Data directory of your CM0102 install. DO NOT COPY THE CM0102.EXE from the zip though. Leave that as the 3.9.68 patched one.
- 4) Use my Patcher (<https://github.com/nckstwr/CM0102Patcher/releases>) to change the year to 1998 and any other settings you want.
- 5) To then correct the History: Open up the "Data Update 1998-99.zip" again and this time just copy over the files staff_comp_history.dat, club_comp_history.dat and staff_history.dat files to the Data directory.
- 6) Start your new game

Hello, I would like some help. I can not manage the download of the update.

It is written that

"widows ne peut pas ouvrir le dossier. Le dossier compressé zip n'est pas valide."

--- Updated ---

oh pardon je n'avais pas encore vu le message juste au dessus. Je regarde maintenant. 😊

Hi, I had this same error but cannot seem to find a solution, does anyone know if there is an issue with the file? It looks to be the right size but I get an error every time I download and try to unzip it "Windows cannot open the folder" it says the file is invalid?

Was really excited to find this version of CM3 and would love to be able to play it! Any help or tips would be great, I cannot find anything in the forums

Wasnt here for many years)

decided to make it live again

Cam F, i dunno if you are still here, but many top players - hasnt histories. Di Livio e.g

Have anyone got JL tools? ling in download section is broken. I want to use history extract\import

hi guys,

Wonder if someone can please help me and save my game.i downloaded the cm 97/98 database started a game with my fav team celtic and everything was working fine 2 seasons in until i used the cm explorer the 2nd time after changing the money and strips which worked fine.i then went to change ronaldinihos stats as they were mince and also put changed the name of a player in argentinian league to a 12 year old messi and changed stats aswell.i then reloaded the game up and it came up and realised the player i edited for messi was moving at end of season i then went to continue game and it came up with the error message a few times v3.9.68 transfer_manager the a code like cpp3661 and crashed.I tried going on holiday which seemed to work and then saved it but when i reloaded save it came up the error msg again and crashed .i really want to save the game and dont want to lose a good save.PLEASE HELP

You're GREAT guys The histories are perfect right now and it's a fabulous database to work adding the history that's missing... A couple of years of work should do the trick

One last thing, the game is really quick when running the matches and when I try to slow it down it's still too quick and I don't understand why. Is it possible to slow it down to the other speed's of all the CM's, please??? It just runs in very fast or fast, not in average, slow and very slow...

Brilliant this....excellent work 🙌
Just finished first season and no problems
Any chance of a thread going for any super\beast players people come across, as in previous databases....best I've found so far is Marco Delvecchio at Roma...scores a ton
Look forward to any new suggestions

Might have a wee crack at this later on tonight,
do you just extract it and run or do you need to put the data from it into champ?

This -
<https://www.sendspace.com/file/vgyzw7>

Then replace data folder with this - <https://www.sendspace.com/file/kzxtsm>

You would just do a fresh install with 3.68 then plonk them in. you can then rename the 0102 folder 98-99 to separate your 0102s and works fine named 98-99 or CM3.

Think the exe is speeded up so if you don't like that use Nick or JL tool to slow down.

And if you want the CM3 picture folder - <https://www.sendspace.com/file/3cpi7x>

If you copy and paste them on your search bar and then press enter, they should work. Did that today and they worked.

Any chance of a thread going for any super\beast players people come across, as in previous databases....best I've found so far is Marco Delvecchio at Roma...scores a ton
Look forward to any new suggestions

Daniel Kemp Motherwell always turns into a cracking striker, then Willie Howie, Robert Dunn, Alan Archibald, Jamie McKenzie & Liam McKey at Partick become immense. John Ritchie free becomes awesome also.

In fact Partick a great 1st job.

right finally got round to this,

trying to install it and it says uninstall shield is running, close it and start installation again...

how would one go about this?

cheers

- - - Updated - - -

also,

does it have any harder tactic packs installed or manager abroad easier to get etc, or the creativity patch?

cheers

Fantastic, I enjoy this update very much. Does anyone have a link to the original backgrounds from 98/99 or 99/00? Or maybe a picturepack with stadiums from that era?

I always dreamed of playing CM3 (9899) on 0102 & thanks to JL I have taken the players from CM3 & inserted them into 0102.

It picks the exact data ability, mental & player stats that was in CM3.

I've used the player config & euro files from CM3 also.

Here is my DB -

<https://www.sendspace.com/file/kzxtsm>

John Locke is the person who made this possible so GREAT thanks go to John.

**Note* If you use a Tap patch to put year back to 98, you can't use Scotland or any other nation that had league reconstruction from 98-2001, so I guess Brazil & Argentina would be counted out also also people have said France a no no.*

I don't use a tap to change the year so I it doesn't affect my game.

Hey Cam, I've just downloaded this and taken a look. It's bloody fantastic. The nostalgia is reeeeeaaaaaallllllll. Quick question - I'm a Southend fan so have of course started with them down in Division 3. Some of the players at that level (at other clubs too) are missing their playing histories. Is this supposed to be the case or have I done something wrong? Just wanted to check I wasn't missing something before I start trying to add some myself!

WTAF, post 183, 6 posts above this 😞

The links work fine today, as they did on Monday when I checked, I won't reply next time if folk can't check properly.

Hi guys. Anyone has a Competition data change tool to download??? I checked that some competition stories like La Liga aren't complete in this 98/99 masterpiece and missing some years in the winners list and I want to fix it... Can anyone help me and show me how to do it, please???
