### Italian League Structure

What i can do with the march update 2013 , to have 20 teams in Seria A Italy.  
Can anyone help me ?

11-03-13, 03:42 PM

316'sRegen  
Unattached

there is no tapanified version yet. What you are asking involves changing the league structure. Go to the patches discussion board & read "how to tapanify a data set" (or words to that effect 😊)

you need to tapanify your database. or ask zozoa very nicely though I doubt he got the time.

Can't you just Tapanify one league? Or does that need to be done through Olly or the likes?

that actually works as I was testing it like that back then doing one league at a time. can't obv load the other leagues though as they will be incorrect or prone to crash.

you need to tapanify the database. instructions on how it is done are here: <http://www.champpan0102.co.uk/showth...-quot-database>  
 or you can just play with the tapanified database from september. will be a tiny tad out of date but saves you lots of work. download here: <http://www.champpan0102.co.uk/downlo...do=file&id=139>

Quite by coincidence this is something I have on my list of things to experiment with. I'll have a look now and report back. Although I should say that John Locke has included 3 up/3 down between Serie A and Serie B on his patch.

Seems there is an issue with clubs into Italian Cup. Unfortunately this happens when trying to alter numbers of teams in certain divisions. I am still experimenting though.

Setting the Final Positions in the Editor should help that. The 2 excess teams will need to have final position that refers to last seasons Serie A

Golly, you've probably got them already but I have 0x64151b & 0x641522 as the offsets for memory required and number of teams respectively.

I did notice that Tapani has altered 2 offsets for the Italian Cup on his 3.12 patch (where Serie A has 20 teams and Serie B has 22). ie Both league expanded by 2 teams. These are...

```
0063FBFE |. 8078 5F 0F |CMP BYTE PTR DS:[EAX+5F],0F
0063FE2D |. 80F9 0F |CMP CL,0F
```

Both 0F (15) values are changed to 0B (11). A value change of 4- the same amount as the increase in teams is Serie A and B combined. It might be just a coincidence?

The original structure is...

### Group Stage

8 groups of 4

32 teams - 2 from Serie A (3rd and 4th in Serie B previous season), all 20 from Serie B and 5 clubs each from C1A and C1B (4 clubs relegated from Serie B and 6 highest placed clubs not promoted from C1A and C1B ie 3rd to 5th)

Group winners progress

### Round 1

8 knock-out games

16 teams - 8 from Serie A + 8 Group winners

### Round 2

8 knock-out games

16 teams - 8 Serie A + Round 1 winners

### Quarter-Final

4 knock-out games

8 teams - Round 2 winners

etc, etc...

I noticed on original game (3.9.68) and database that one club from Serie C1A or C1B are drawn into 2 groups- guessing the cup would crash if they progressed from both groups. I believe this is because Fiorentina finished the previous season in 17th in Serie A and were demoted to Serie C2B. Therefore there is one club missing from the qualifiers (Serie A 17th) and the lowest ranked club gets drawn twice as a consequence. Tried it 3 times and happened everytime.

Had a quick play- put Fiorentina into Serie B from C2B, Ternana from Serie B to C1A and Alzano from Serie C1A to C2B and ran the game...

And Lanciano (the team in twice everytime) was only in one group and Fiorentina were in too. Proves, that having the previous season's league positions sorted is important for Italian Cup!

Yeah played with them already and the corresponding offsets for Serie B (expanding to 22 teams).

Didn't want to start a new thread for this.

But on the topic of making Italy more like real life, I was wondering if it was possible to remove Serie C2C from the game and still have relegation between C1, C2 and below.

italy still has c2 in real life, starting 2014-15 (probably) it will be merged into c1

I know that.

But instead of the traditional 3 Groups (Girone) it is now only 2. I wasn't talking about wiping out all of C2. Just Girone C.

I was wondering if it was possible to make C2 into just two groups, like it is in real life. I'm sure the Serie C Cup would cause major issues though.

Italy really is a mess these days. I had no idea they were planing to merge the Lega Pro leagues.

italy is always a mess, and not just for football...

sorry, i didn't see you meant to remove group c2c only but i'm quite sure that won't work with the on/off tool, because if you remove it who will be promoted to serie c1 the following year? only 4 teams from c2a & c2b but c1 needs 6 teams from c2 so the game will surely crash.

you could do it as a patch via olly or the likes, removing c2c and allowing 3 promotions from c2a & c2b and 9 relegations to serie d (in real life the worst 3 of each group + the 2 semifinal relegation playoff losers + the final playoff loser).  
but i guess that's really really hard to do for us, don't know, you can try to ask one of our patchers maybe :joyous:

Well considering that the format will change again in 2 years, its pretty much a waste of time now.

What are we going to do when Serie C is only one level with 3 divisions?

the update team can't do so much actually as we don't/can't update formats, etc.

for what i know, there will be 3 groups with 20 teams each and maybe serie b will have again 20 teams (but that's not sure yet), while serie a should keep 20 team, so there will be  $20+20(\text{or } 22)+60 = 100$  (or 102) pro teams.

in our game we have  $18+20+36+54 = 128$  teams, so 26/28 extra teams.

i think we'll use the current system, i.e. put the best teams in the right divisions and extra teams will be "relegated" to the lower tier or missing teams "promoted" from it.

but maybe someone will create a patch by then :watermelon:

Maybe it would be possible to change Serie B so that clubs are relegated to Serie C2/? and change Serie C2/? so that clubs are promoted to Serie B. You would probably have to have 6 Serie B clubs relegated or remove the Promotion spot from Serie C2/? and just have 4 teams play-offs for 1 promotion spot and then 3 relegated from Serie B.

You could also try changing Serie C2/? so that clubs are relegated to what is now Serie C1/? and so that clubs are promoted from Serie C1/? to Serie C2/?

And then you would have to change where teams relegated from Series C1/? go to or maybe just remove relegation from this level as getting teams into that level will be difficult.

You might want to edit the Italian Cup and remove references to Serie C1/? and replace them with references to Serie C2/? also as the Italian Cup is a pain in the arse.

Basically it's a lot of work. And it might not work anyway, but it must be worth a go.

The future Italian structure will actually match the current structure for Portugal in the game.

I wonder if a patch could be made swapping Italy for Portugal once 2014 rolls around?

i think that's a good idea but future serie c will have only 4 promotions: 3 winners of each group plus the only playoff winner (where there will play 3 second ranked, 3 third ranked and the best 2 fourth ranked), while current c2 in game has 6 promotions (the winners of each group plus the playoff winner from each group), and serie b has 4 relegations now. but the relegation system to serie d will be the same as it is now in game from serie c2 to serie d.

i think you mean swapping c1 with c2, but then you will have a useless c1 that's not realistic, so i'd prefer your previous idea.

i think italian cup would be easy to fix as you just have to change last positions, pretending teams played in serie c1 last year, even if c1 is not being played anymore.

Originally Posted by **Bern**

yeah, but then portugal will be messed up 😊

### Team in wrong league!

When you start CM after march 2014 update.  
Hellas Verona still in Serie B. That's wrong.  
They are in Serie A.

2.19 doesn't change league structure. Serie A has 20 teams in real life. In CM0102 there were 18. I believe it's the same stuff as in France.

### Italian League Structure

Hi guys. 😊

First of all I would like to thank you all for your hard work you put in for years in keeping this great game alive. 🙌

I have a question, Being Italian I love playing the Italian League. I know that the Tapani Patch 3.12 changes the structure to the correct one, but this patch is not compatible with the new October 2014 update. Is there anyway this can be changed? 🙌

Thank You Guys. 🙌

i have done a patch for october 2014 update with the 3.12 patch. correcting the italian structure,

but the file is too big to upload to a site, as i transfer my whole champ man folder to a zip file. thats the only way i seem to be able to get it to work on other pcs

Your a funny guy ta, can tapanify a database but cant pack a zip file 🙌

Just copy your Data folder and cm0102.exe to a new folder and then make a zip of that folder with something like 7zip or IZarc. Should end up 30mb or so in total. I think maybe include the patcher too so people can change start date and resolution.

<https://www.sendspace.com/file/9sawwm>

here you go guys,

the league files to some leagues might not be correct as i have roughly done this for myself as i like to play with the relegations in holland etc.

so apologies if its not good enough for some. enjoy.

anyway it's easier to have serie a with 18 teams and serie b with 20 in real life than serie a with 20 and serie b with 22 in the game 🤔

I've been working on a patch for the Italian league over the past couple of weeks. It updates the structure of Serie A and Serie B to match today's numbers, while the Italian Cup has also been altered to accommodate the extra teams. The full list of changes are below.

**Serie A:**  
Number of teams increased from 18 to 20.  
Fixtures block completely rewritten.  
Relegation places reduced from 4 to 3.

**Serie B:**  
Number of teams increased from 20 to 22.  
Fixtures block completely rewritten.  
Promotion places reduced from 4 to 3.

**Italian Cup:**  
Changed the entrants from 18 Serie A teams to 20, 20 Serie B teams to 22, and 10 Serie C1 teams to 6.  
Fixture dates adjusted.  
All knockout ties are now one legged, apart from the semi-finals.  
Final is played at the Stadio Olimpico.

Here's a .68 exe with just the patch on it: <http://www.mediafire.com/download/81...zq7/cm0102.exe>. I'm not 100% sure but I don't think it will be compatible with Tapani's patches.

Or save the following as a .patch and use with Flex:

Code:

```
0x23ee51 0x0 0x3

You must add two clubs to Serie A and two clubs to Serie B yourself. I recommend the Tri Wasano Editor, located here: <http://www.champman0102.co.uk/downlo...?do=file&id=20>. Or you can use my club.dat here: <http://www.mediafire.com/download/0mrpirm0nllhp8/club.dat>. (I can't remember if this is the club.dat from the screenshots or some other one that I just threw random clubs in to fill Serie A + B with.)

A small bit about the Italian Cup. First, here's how the .68 exe selected the entrants:

Code:

```
Group Stage [32 - 8*4]:
2 Serie A      3rd+4th placed Serie B teams from previous season
20 Serie B    15th-18th placed Serie A teams from previous season, 5th-16th placed Serie B teams, 1st+2nd Serie C1/A+
5 Serie C1/A  2 relegated Serie B teams, 3rd-5th placed Serie C1/A teams
5 Serie C1/B  2 relegated Serie B teams, 3rd-5th placed Serie C1/B teams

First Round [16]:
8 Group Stage winners
8 Serie A teams (9th-14th placed Serie A teams from previous season, 1st+2nd placed Serie B teams from previous season)

Second Round [16]:
8 First Round winners
8 Serie A teams (1st-8th placed Serie A teams from previous season, 1st+2nd placed Serie B teams from previous season)

Quarter Final [8]:
8 Second Round winners etc
```

Here's what I changed it to:

Code:

```
Group Stage [32 - 8*4]:
4 Serie A      1st-4th placed Serie B teams from previous season
22 Serie B    17th-20th placed Serie A teams from previous season, 5th-18th placed Serie B teams, 1st+2nd Serie C1/A+
3 Serie C1/A  2 relegated Serie B teams, 3rd placed Serie C1/A team
3 Serie C1/B  2 relegated Serie B teams, 3rd placed Serie C1/B team

First Round [16]:
8 Group Stage winners
8 Serie A teams (9th-16th placed Serie A teams from previous season)

Second Round [16]:
8 First Round winners
8 Serie A teams (1st-8th placed Serie A teams from previous season)
```

The game might find it difficult to select the above entrants in the first season. This is due to a club's last position being filled in incorrectly, or a club having its correct last position but not being where the game expects it to be. For example, Parma won't be in Serie B next season so the game won't find it when it searches for the 17th-20th placed Serie A teams to enter into the Group Stage. It will instead just pick a Serie C1 team to replace them. As I said this is only an issue in the first season.

I've tested this for about 100 seasons over several saves and have encountered no errors so far. The biggest 'issue' is that all fixtures in a division will take place on the same day and time, with the exception of Milan or Inter who normally play a day earlier due to sharing a stadium with each other. The Serie C Divisions will probably have to remain as they are until we find out how to disable playoffs, with a slight chance that Serie C2 could then be transformed into the Lega Pro.

Thanks to Golly for his work on what certain offsets do in the fixture blocks (and cup blocks), and to Tapani for a small fix I took out of his 3.12 patch to solve a couple of non-fatal error messages. Any feedback is welcome, big difference from it holidaying fine compared to it actually playing fine for a human user. I'm still finding minor errors too, even writing this, such as Fixture 41 in the Serie B screenshot being on a Wednesday instead of a Sunday (now fixed).

saturn  
Could you load the patch flex?

Copy and paste into a notebook but did not work.

Thank you

<http://www.mediafire.com/download/ng...tructure.patch>

Not compatible with 2.21.1, and don't forget to add two clubs to both Serie A and Serie B.

Possibly. I know Tapani rewrote the Italian Cup draw code so it would be dependent on that being compatible with the new numbers.

Or, I could revert Tapani's changes and see if the new code I had written here for the Italian Cup solves the problem regarding teams being entered twice into the cup (the reason Tapani rewrote the code).

saturn, be aware that the new italian patch tapani wrote is not perfect, there are some errors about the entrants.

sometimes teams are picked the right way, sometimes not, i'm not sure but i thing the wrong selection happens every other year

Yes, I've noticed that too. I've seen the Serie A winners enter next year's group stages for example. I don't understand Tapani's new code but there is reference to both a club's last division and last position in there. However it doesn't seem to select teams like the original code did.

I think the double team entry error is an unintended consequence of some other change Tapani made with regards to cups, as I've never been able to recreate the error on a .68 exe (tried with various databases too). Ideally I would like to keep the original cup code, maybe with a slight edit to ensure the double team entry doesn't occur.

There's also the chance that the cup code I edited for a 20/22 team structure could have flukily fixed it too.

I had a go at reversing Tapani's 2.21.1 changes to the Italian Cup team selection in order to get the 20/22 structure working. Luckily the code I had edited for the new structure seems to work with 2.21.1, so everything seems to work. You have to add two clubs to Serie A and two clubs to Serie B yourself.

0x24678c 0x9c 0x12
0x24678d 0x4 0x5
0x246796 0x14 0x16
```

So, in order:

1. Install game
2. Patch with .68
3. Patch with Tapani 2.21.1
4. Use Italian Restructure Reversal.patch with JLPatch
5. Use Italian Restructure.patch with JLPatch
6. Add two clubs to both Serie A and Serie B (I use [Tri Wasano's Editor](#)).

This is not compatible with the Fixture Rescheduling patch.

This is why I separated the whole patch in different smaller ones for each league. I'll work on a patch for your code later.

Thanks. Here's the calendar I had made for it: <http://www110.zippyshare.com/v/kPbvpoce/file.html>

The European/International dates were for .68 so are now outdated. I didn't touch any of the Serie C1/C2/C Cup/C Super Cup fixtures either.

I'm testing a fixture reschedule patch for this saturn. It would be applicable right after your patch.

used reversal and patch under 2.21  
i had a comp\_stats.cpp 1664 error during initialising game data...any ideas on what is related?  
i-v added clubs to serie a and b...sorted last positions in all leagues...  
still game didn't crash...

italian cup stops after first round...

you should watch for last season's position and set previous league accordingly in database.

### Numero di squadre

È possibile aggiungere più squadre in un campionato ad esempio in serie A oggi ne sono 20

E' possibile solo usando apposite patch.  
Per cortesia se riesci scrivi in Inglese, grazie.

Is it possible adding more teams e.g. in Italian serie A?

Ony using a patch.  
Please, if you can try writing English, thanks.

### Change number squad

Today I changed the number of the squad could play in Italian Serie A from 18 to 20 with Ollydbg, but I can't add teams in Italian Serie A with the original editor. How could I?

### Problems with Serie A

Hello i installed the files 3968, tapani and March 2019 in this precise order. All regular except in Italy: Parma and Frosinone are not in Serie A but in Serie B, consequently all Italian series are wrong. How can I solve this problem? Are there any files to edit? Thank you

Hi

Order should be....

Game  
3.9.68  
Data Update

Tapani/Saturn patch

Would suggest an uninstall and then re-install and see if still same issue

Thanks

Use saturn v7 patch instead of tapani, it contains updated italian series. Just uninstall and do these 5 steps from scratch:

Originally Posted by **saturn**

So, to summarise the **instructions**:

1. Install the game and apply the official 3.9.68 patch.
2. Download the new Data folder and extract it. Delete the Data folder currently in your Championship Manager folder and paste the new Data folder in there.
3. Download the March 2019 update and extract the city.dat file only. Copy and paste it into your new Data folder.
4. Select, or if necessary request, an exe in post #2. Download the exe, extract it and paste it into your Championship Manager folder, overwriting the file already there.
5. Play.

Hi Tafu87.

As an integration to what MadScientist perfectly explained, that is due to the league structure in the game being very different to what's in the real world.

As you may know, last season it was A/B/C 20/19/57 in real world and A/B/C1/C2 18/20/36/54 in the game.

Therefore during the updating operations, we need to carefully reallocate all clubs to the leagues. Doing that we follow all a set of rational criteria and rules (previous season tables, official FIGC repechage lists...), which involve no human opinions at all. Actually, rearranging clubs is one of the activities I enjoy the most when updating.

A Saturn patch is able to change the league structure for Serie A and B therefore fixing the issue for those two tiers, while it can't fix Serie C1 and C2. It also brings a lot of extra improvements, therefore its installation is recommended for most users. A Tapani patch installation won't fix the issue.

In the March2019 update, Saturn patch only fixes the issue for the Serie A, leaving Serie B at its previous 22 clubs format.

Just come across this post and it got me thinking. Could you change the Italian Cup to include all Italian League sides (so Serie C2 A, B and C also). That is a total of 132 teams, divided into 18 groups of 4 for the opening group stage. You could have the top of each group qualifying for round of 32 along with best 14 runners up and then it becomes a straight knock out competition from this point onwards. I know that the Serie C cup takes the best 6 runners up from 16 groups of 5 alongside winners and 10 teams who get a bye into round of 32.

I'm only just getting back to the game and using ollydbg after too many years away, so struggling to find all the offsets that need changing to attempt this. Any help with this would be much appreciated.

reading all the old post, i find that a compatible nation with Italy is Portugal, anyone tried to swap them?

again thanks a lot Andrea71!!

well... after a week, i read a lot of thread about league structure.. offsets, swapping league... and:

if we swap Italy and Portugal we have already the three group in third division ( lega pro ) but they don't have playoff and playout... also we have to add 2 teams to first and second portugal divisions...

the only way that is near to reality is to swap italian serie c1 and c2, so we have 3 groups and playoff playout like in the reality... but.. this way is really really difficult ( impossible for me.. )

so.. no way to improve italian league...

I think, there is no need to. Better to accept the thing, that the game is working in that state and have fun with it 😊  
If somebody will develop new methods to create things like that an easier way, there will be more "this season" accurate patches. Saturn's have a nice jobs here, and he reach the farest of modding to be accurate.

*maybe this is entire Italian Serie B promotion relegation structure, well... where is the relegation league destination? i don't find it*

HI All,

Any news about Italian Serie B playoff and playout? before summer Nick said he would work on it, but I haven't read any of his posts since

Bye all!!

Marco

\*checks [9CF\*\*\*] thread\* <https://champan0102.co.uk/showthread.php?t=4795>

9CF570 is Serie A

9CF578 is Serie C1 A

Serie C1 B isn't there, if you want to look for that code go to [9CF57C] and press ctrl+r in Olly - that will give you all references.

Dear John Locke, i'm not able to do what i want to do, my purpose is to change italian structure into the new one, Serie A, Serie B with playoff and playout, Lega Pro A,B,C with playoff and playout unfortunately i'm not good enough to do this ( and maybe also to explain this with my poor english ).

So i've to wait if a good boy will do this or put me on the right way 😊

At least i've to say a big THANK YOU to all of you ( you, Nick, Tapani, Saturn ) that have always tried to explain how to do everything a lot of times to us..

again thank you John

Marco,

Not sure it will be possible to get exactly what you want - particularly the playoff and playout in Serie B and Lega Pro A, B, C (is this what serie C is now known as?)

What I have been able to do is swap Italy and Portugal - so now at least you have Serie A, Serie B and then 3 divisions beneath Serie B (ie Lega Pro / Serie C). I'm still changing around the award names, but once done happy to share the exe (if someone can remind me how best to upload it - and which files - am guessing the data folder and the exe itself). All this has done is patch Italy onto the Portuguese league structure which has also meant that Serie A and Serie B are now only 18 teams rather than 20, albeit the Liga Pro now has 20 rather than the old 18 teams in each group - I've not had any luck changing the top two divisions to 20 in Portugal.

well, i've to say a big thank you Footballer 😊, i tried to do the game crashes a lot of time.

AH Lega pro is Serie C 😊

the last but not the least: maybe after the swap we can try to change the league structure to have 20 teams instead of 18? No good i'ven't read you last message till now...  
i'll read again all the forum pages about changing structure..

thanks again footballer

Or it's difficult?

Thanks again footballer.  
Marco

Ps i think you can upload it on megaupload or also on google drive..

I think there might be a way of increasing from 18 to 20 as the original database had 18 in Serie A and in Ligue 1 if I'm right, and they are both now 20. Have tried a couple of ways to change it but no luck as yet.

Once I have the awards tidied up I will get a version uploaded for you - getting a tad side tracked with Europa League Qualifying (Inter-Toto Cup) at the moment.

Marco,

Use this link to download - <https://www.sendspace.com/file/vobh2f>

Please note, I've still not finished tidying up the award names - so some Italian awards are in Portugal and some Portuguese awards are in Italy.

This patch is built on the March 2020 update with both Saturn and Nick patches applied. I'd suggest updating your game with the official patch, Saturn and Nick patches, then extract the two files from the Celtic Cup patch and put these into your main folder replacing the files already there - hopefully all will work.

List of changes;

Italy swapped with Portugal

- Italy now Serie A (18 teams), Serie B (18 teams), Serie C1/A, C1/B, C1/C (20 teams each)
- Portugal now Primeira Liga (20 teams), Liga Pro (20 teams)
- There are 5 divisions below Primera Liga, however these have been renamed as I'm in process of trying to disconnect these and connect to English leagues to increase league pyramid. (Portuguese teams in here currently and all works fine, feel free to rename the leagues)

Welsh League replaces Scotland League Two

- 18 teams in Cymru Premier (still not resolved relegation in this league)
- Scotland League 1 (teams relegate to Scottish Non-League) expanded to 18 teams while Scottish Championship expanded to 12 teams
- Welsh Premier Cup and Welsh Cup now playable

Ukrainian Cup replaces Welsh League Cup

- 18 team cup with group stage (saw this as an opportunity to expand some playable clubs with some structured matches)

Celtic Cup replaces Scottish League Cup

- With the Scottish Challenge Cup having included teams from outside Scotland in recent years thought it good to expand on this
- Rewritten the code for the cup ("stole" Russian cup code for this), to expand cup to 50 teams rather than 42.
- All Scottish Championship, Cymru Premier, Northern Ireland Premier and Ireland Premier take part. Fixture dates changed to avoid clashes with any other competitions in these 4 countries.

### English League Trophy

- Have included 8x U23 teams in this competition rather than teams from the English Conference (similar to what happens irl)

### Cyprus League replaces Greece Division 2

- Greece Premier League and Cyprus Premier both 16 team leagues
- Currently Greek Cup includes Cyprus teams (still working on this)
- Still trying to fully sort out relegation in these leagues with their national non-league system, proving tricky.

### Europa League Qualifying

- Increased number of teams from 60 to 66 (these extra teams primarily come from Italy, Spain and England, hence if you manage in one of these countries you have an increased chance of playing in Europe)

Enjoy!

Please let me know if you manage to download and install patch files okay and anything you think might need changing.

Awesome!!!!

i can't say anything else....

thanks a lot Footballer

i'll try everything tomorrow

Thank you again!!  
Marco

i'll let you know how it goes

Hi Footballer,

i've downloaded the patch and installed it.

So, as you said, some names aren't completely swapped with portugal league, everything it's ok except Serie A and Serie B 18 instead of 20 teams.

Anyway this is a great step forward and i say thank you another time.

Do you think there's an hope to fix Serie A and B?

Another question is:

In this way we've lost playoff and ployout isn't it ?

Thanks again  
Marco

Hi Marco,

Yes, with this way the Serie A and B are now 18 teams, I've tried changing it to 20 but unsuccessful so far. The playoffs and ployouts are also gone - that would require someone to completely recode the league structure, that's not happening anytime soon. Just noticed that the fixture dates on the Celtic Cup aren't correct, so I'll try and sort that before putting up and update of this patch.

Glad it downloaded for you and is playable.
