Offsets for Tapani Patches (to merge)

So since there are a few of us doing patches now, I thought I'd start a thread where we could list all the offsets by country for the things that we need to change when making patches (number of teams, prize and TV money, number of subs, etc...).

Post whatever you know and I'll keep the first post as up-to-date as I can

ARGENTINA

004045AA - Argentine Premier Opening Stage Number of Fixtures 00404D9A - Argentine Premier Closing Stage Number of Fixtures 008322A2 - Argentine Premier League (Change JE to JMP to disable league) 0040554A - Argentine Premier Number of Teams 0040564A - Argentine Premier Prize Money 008322F7 - Argentine 2nd Division (Change JE to JMP to disable league) 00407530 - Argentine 2nd Division Number of Fixtures - Group Stage 00406F36 - Argentine 2nd Division Number of Fixtures - League 00407CE2 - Argentine 2nd Division Number of Subs 00407CE2 - Argentine 2nd Division Number of Teams

AUSTRALIA

004111DD - Australia Number of league fixtures 00411D24 - Australia Number of rounds (hard-coded as DX) 00411D70 - Australia Number of subs in Opening Stage 00411B82 - Australia Number of teams in the league 00411659 - Australia Playoff fixtures

BELGIUM

0041E9AC - Belgium First Division Prize or TV Money 0041E9BA - Belgium First Division Prize or TV Money 0041FE6E - Belgium Second Division Prize or TV Money 0041FE7A - Belgium Second Division Prize or TV Money

BRAZIL

CROATIA

005148AC - Croatian First Division Prize or TV Money 005148BA - Croatian First Division Prize or TV Money 00515DAC - Croatian Second North Prize or TV Money 00515DBA - Croatian Second North Prize or TV Money 00516ECA - Croatian Second South Prize or TV Money 00516EDA - Croatian Second South Prize or TV Money

DENMARK

005539CC - Danish Premier Division Prize or TV Money

Northern Irish Cup offset's:

0078AA2E 0078AAD9 0078ABB9 0078AC5F WINNER 0078AC69 RUNNER UP

Patinoz

ARGENTINA

008322A2 - Argentinian Premier 008322F7 - Argentinian Second 004045AA - Argentine Premier Opening Stage Number of Fixtures 0040455A2 - Argentine Premier Closing Stage Number of Fixtures 00405525 - Argentine Premier Number of Teams 00407CE2 - Argentine Second Division Number of Teams 00405708 - Argentinian Premier Prize Money 00405708 - Argentinian Premier subs named 00407E53 - Argentine Second subs named 00407530 - Argentine 2nd Division Number of Fixtures - Group Stage 00406736 - Argentine 2nd Division Number of Fixtures - League 0040A23 - Argentina Foreigner Rule

Patinoz

German Bundesliga

Number of Teams - 005DB24A Fixtures - 005D9CAA

Croatia Premier Division

Teams - 0051411D Fixtures - 005147C2

(Only problem is that I have not been able to get the game to load after changing the croatian offsets.)

IN Australia you have marked that the number of rounds is hard-coded as DX. Does this mean it cannot be changed?

Patinoz

AUSTRALIA

004111DD - Australia Number of league fixtures 00411D24 - Australia Number of rounds (hard-coded as DX) 00411D70 - Australia Number of subs in Opening Stage 00411B82 - Australia Number of teams in the league 00411659 - Australia Playoff fixtures 00411D70 - Australian NSL subs named

Patinoz

no, if you look at other lines in other leagues that are hard coded, it just means that if you replace the DX value with a number, it will probably also overwrite the following line or 2 with NOPs... so you ned to copy down what the line or 2 following is going to be and change them back if NOPs do over write them

Patinoz

27-01-12, 08:53 PM

Or set DX to the right value (but make sure it is not used elsewhere). There can also be some tricks how to avoid squeeze in more code into the same space (no need for the NOPs).

Have I decreased the teams of the Korean League from 10 to 8 removing from her two teams in excess, but when I make to depart the game me from error of the national cup and the cup of league, because?

Patinoz

27-01-12, 09:02 PM

You need to keep 10 teams in the league,2 teams will be hidden.

27-01-12, 09:01 PM

27-01-12, 09:01 PM

27-01-12, 09:01 PM

Zozoa then as I can make for Ireland break the championship of the North Ireland? I have decreased the teams from 10 to 8 and diminuto the games from 36 to 21, but the championship has gone since August to December. How can I make to end the championship in January?

Patinoz	27-01-12, 09:02 PM
You have to edit the fixtures dates.	
Patinoz	27-01-12, 09:03 PM
Go to the Northern Irish fixtures area and change the dates you want.	
Patinoz	27-01-12, 09:03 PM
Hi Zozoa, i'm green to this what i have to do with french national offsets ??	
Patinoz	27-01-12, 09:03 PM
I gave you the offset - 5C07B1. Change the value from 5 to whatever you want.	
Patinoz	27-01-12, 09:04 PM
It has to be like this ? Because before i start editing there wasn't be anything, and i copy that lin- http://img695.imageshack.us/img695/4636/beztytuuzqf.jpg	e from tutorial about adding new leagues.
Patinoz	27-01-12, 09:05 PM
From the pic you posted I suggest you to do this: 1.Go to offset 5C0782 2.Change it to JMP 5C07B1 3.Change offset 5C07B5 to JMP 5C0785	
Patinoz	27-01-12, 09:06 PM

Arg4 is the month (0 is January) Arg6 is day of the week (Monday is 0) Arg7 is the time of day (0=AM, 1=PM, 2=EVE).

Arg6 overrides Arg3, i.e. it picks the nearest day specified (e.g. Saturday) to the date specified (e.g. 20th); so if you use Saturday and 20th but the 20th is a Thursday then the game will use the 22nd. I think I have previously seen a date that was fixed irrespective of the day of the week it was but can't remember where or how it worked.

0085C3A6 - offset for the venue of English Cup Finals. I changed code from 9CF2E4 (England) to 9D0240 (Manchester United) and the following all took place at Old Trafford during first season (2001-02)...

Spoiler! Show

Offsets for Promotion/Relegation between English Third Division & Conference.

Code:

English Third Division Relegation: 00578111 - MOV BYTE PTR DS:[ESI+BE],BL (Changing ending from "...+BE],BL" to "...0BE],AL" creates 3 automatic relegation spots

English Conference Promotion: 0056EE23 - MOV BYTE PTR DS:[ESI+C1],CL (changing ending from "...+C1],CL" to "...0C1],AL" creates 3 automatic promotion spots

SI Games Official Patch v3.9.68 and June 2010 Data Update (ODB Team). the offsets for portuguese league please (do you need one offset per nation to change player restriction or for each league?)

On the first page what patch and update is the offsets for?

Thanks

Thank you

got it working. just a few question though when changing them do i tick the fill with NOD/NOP (cant remember which one it is)?

And i remember something being mentioned about european cup? about it beeing a different matter, maybe its ludicrous but what if we applied the same rules that national squads have to teams that compete in europe? is this possible? :~ Even if was to have a radicle effect such as ownly club grown players could play etc.

27-01-12, 09:12 PM Patinoz

i think it is possible to add restrictions to european competitions also...never tried till now, but idea is cool...i remember the time when only 3 fgn players were allowed...english clubs were really english, italian clubs were truly italian...and now...11 fgn players in the squad...how can someone support that team ... ?!

nly club grown players, i think that can't be done, but reducing number of fgn players yes...

Patinoz

Completely agree, support Benfica but dont even like watching them play anymore, 3 portuguese players in squad of 16. says it all. Remember the time were it was exiting to see a foreign player come into the team.

Oh an do i fill in with Nops? lol just i never know wether to tick the option or not :~

hmmm that would be interesting reducing number of foreign players would definately make sense. Now if i can apply this to all competitions it would be good to see who exactly dominates the game in 20/30 years time. how do you find the correct offsets yourself?

well, finding offsets is not very tough...after you find few all others are similar...and yes fill with NOP's should be checked...

Patinoz

If someone from some reason wish to disable Dutch Cup and Dutch Super Cup:

offset 00834D7D (command JE change to JMP) - Dutch Cup offset 00834DD0 (command JE change to JMP) - Dutch Super Cup

No, 01-02, I guess the developers must have just updated the code they already had from 00-01 and not bothered renaming the files.

a yes....you are right...when i was trying to edit nation names in 00-01 season i had to change the cm0001.exe in to cm0102.exe...but if you start that renamed file game seeks CD to be present...but when you get back original name cm0001.exe game does not require CD to be present...crazy but that it is...

Can someone give me some advice or help with this? I've been looking through the .exe to find as many offsets for substitutes as I can as part of my Flex tool.

5EAE94: MOV DL,3 5EAEA1: MOV BYTE PTR DS:[ESI+0C2],DL 5EAED3: MOV BYTE PTR DS:[ESI+0C7],DL 5EAF18: MOV BYTE PTR DS:[ESI+4A],DL

The first line sets the register DL to 3, the last is the number of allowed substitutes in the Greek Premier League. The other two uses of DL are for the number of points for win and, I think, the number of non-eu players.

So is it possible to have these three values changed independently? Could the two middle lines be re-written as: MOV BYTE PTR DS:[ESI+C2], 3

MOV BYTE PTR DS:[ESI+C7], 3

The fourth line doesn't have enough space, so that could be left as it is, so DL would only be used once.

I'm not an expert in Olly, can someone advice me if this would be possible? And if so, how exactly do I do it?

http://champman0102.co.uk/forum/show...lacement-Guide

12.Change number of subs in leagues:

1.Go again to the number of rounds block

2.Search the line: "MOV BYTE PTR DS: [ESI+49], value" - this line determines how many players you can register as subs 3.Change it as you like

Attention: If the line doesn't have numeric value but use a variant like in the rounds line, than you will have to do the same trick again and move all the following lines one step down. But make sure you don't overwrite the next block.

this is the one line from the replacement guide...i think that is same situation with your post...this situations are very hard for editing, requires lot of patience, care and on the end often changes simply don't work...

Patinoz

Thanks.

I have just written a short tool to scan the .exe file for all the substitute offsets, here is the definitive list of values that can be edited via Olly (excluding hard-coded values).

Code:

//Subs	na	named

925cd1 - Conference North / Welsh Premier

Those marked with a * indicate they appear twice but I don't know why. Possibly because the competition has two stages which can be edited independently?

Patinoz

John, about .cpp offsets, can you explain it more closer what are they represent exactly...some of the offsets Olly does not recognize, at least for me...

Patinoz

Sure.

If you open Olly, Go to the box the in the bottom left quarter of the screen, Press Ctrl+G Enter the offset and press Enter

0078A176 - Day of Northern Ireland Charity Shield 00789E5B - Number of Subs in Northern Ireland Charity Shield 0078BBD2 - Month of Northern Ireland Second Division Play-Off 0078BBD4 - Day of Northern Ireland Second Division Play-Off

0078A932 - Month of Northern Ireland Cup Draw 0078A934 - Day of Northern Ireland Cup Draw

0078AA2E - Northern Ireland Cup 0078AAD9 - Northern Ireland Cup 0078AB9 - Northern Ireland Cup 0078AB9 - Northern Ireland Cup 0078AC5F - Northern Ireland Cup WINNER 0078AC69 - Northern Ireland Cup RUNNER UP

0078A934 - Date of Northern Ireland Cup (JANUARY - 5 TURN) 0078A9C3 - Date of Northern Ireland Cup (FEBRUARY - 6 TURN) 0078AA5C - Date of Northern Ireland Cup (MARCH - QUARTERS) 0078AB03 - Date of Northern Ireland Cup (APRIL - SEMI-FINAL) 0078ABE4 - Date of Northern Ireland Cup (MAY - FINAL)

007937B2 - Opening Month of Transfer Window in Northern Ireland 007937B6 - Opening Day of Transfer Window in Northern Ireland 007937CD - Closing Month of Transfer Window in Northern Ireland 007937C9 - Clsoing Day of Transfer Window in Northern Ireland

The first thing in the bottom left should begin E:\dev\CM3\ etc. Click on the 'E' Press Ctrl+R

A new box should appear which lists all the times this .cpp file referenced through the code (in Olly these are labeled - ASCII "E:\dev\CM3\etc\whatever.cpp") Double click one of the lines and Olly will take you to the code relating to that .cpp file.

Patinoz

0x41b93d - John, i'v found this offset in one of the old Tapani's threads...this is for changing starting date but Olly does not recognize this offset?

there is a great amount of info in this thread, specially ideas about changing CL and Uefa cup structure...

http://www.thedugout.net/community/s...t=14860&page=3

Patinoz

plays with Olly

0x41b93d is the literal offset (where it actually is in the .exe file) + 0x400000 to get the Olly offset gives 0x81b93d

Which is: PUSH 7D1 (7D1 = 2001)

BTW - start is stored in lots of places, in some places it is even stored relatively, e.g. 0x7e6819 is start year minus 3 (no idea why).

Let me know if you want me to post all the offsets for that (courtesy of Tapani's patch where I stole them from).

Patinoz

i think that minus 3 is because of the first release of CM 3 which was in season 98-99...maybe some old stuff left behind SI programmers...

I've just been looking in the .exe file at the section that, I believe, checks that certain clubs exist. I was wondering if anyone knew if it was possible to disable all the checks - this would allow allow the clubs to be renamed without generating an error when the game loads.

Examples: 0x6146B6: PUSH OFFSET 009E1F08 - "MLS All Stars East" 0x616EA9: PUSH OFFSET 009E060C - "stuttgarter kickers ii"

I'm not an expert at actually editing the code but could these checks be disabled with an appropriately placed JMP command to skip this section of code?

offset 0083660E (JE SHORT 00836634 change to JMP SHORT 00836634)

John, this is the offset for disable/enable Polish league cup, and i have some more similar offsets for disabling Irish Cups for example...can you scan .exe file and provide a list with all competition offsets just as u did for subs?

Slight problem, what I'm searching for are the values in the second column in Olly (0x74 0x24 in this case). That combination appears in the exe 5013 times!

Will all the lines be followed by: MOV EDX, DWORD PTR DS:[9CF860] ? If so I can include this to see if that reduces the number of matches.

In answer to my own question, YES! Changing the JNE to JE disables the World Cup! Not had any errors after 1 season - although the World Cup still appears on the menu in the game and if you select it the game crashes.

Anyone know how to remove a competition from the menu? Would I have to delete the competition in the editor?

Patinoz

27-01-12, 09:20 PM

John, when i disable competition i only change command JE PUSH to JMP PUSH, after that when starting game, that disabled competition does not appear in the menu.

i'v tried to disable WC long ago when i was creating league with only national teams participating in it...i remember i'v change around 50 lines...no,i get it,my idea was to disable all nation competitions,WC,Euro Championship,Copa America...that why i changed so many lines.In the end that worked but with many error messages,but game didn't crashed...

International competitions must be different from domestic.

Here's a screenshot to show no World Cup in 2002 (Japan as co-host would have played if it had). Clicking on the highlighted menu crashes the game.

http://img16.imageshack.us/img16/9839/57282780.jpg

I'll have to holiday on a bit to see if anything breaks. The game still says the qualifying draw will be made in March 2004 - so it might break then or when the teams qualify for the non-existent competition.

Patinoz

Looks like I spoke too soon, the game crashed 4 weeks later.

Patinoz

the problem is this line for FA cup not existin the original v68 file it was add by tapani patch and i tried to add it but nothing changed in the game thats the problem (and i know what i requested before)

Patinoz

yeah... icy is right.... some of those offsets are for tapanified patches, not the regular, untouched EXE file.... I have no idea how to change subs in Engerland

Patinoz

icy wants offset for england FA cup subs inside the untapanified official 3.9.68 .exe file...

you should go to the this offset:

9c42cc E:\dev\CM3\cm3 00-01\cm3\code\comp\cups\eng_fa_cup.cpp

13.Change number of subs in cup:
1.Go to the 1st reference line in the cup references list
2.Scroll up a bit until you see the block start (should start with: "Push -1")
2.Look down for the same lines as the league subs lines
3.Change it as you like
4.Save the changes
5.Close olly

and somewhere inside that block should be a line like this:

MOV BYTE PTR DS:[ESI+49],value

Patinoz

27-01-12, 09:23 PM

00570C6B MOV BYTE PTR DS:[ESI+49],AL (this is the offset for changing how many subs can be assigned for the FA cup)

00570C6E MOV BYTE PTR DS:[ESI+4A],AL (this is the offset for changing how many subs you can use during match)

now, they don't have numeric value and changing offset will affect other lines and game would crash...i don't know how to change this...this is the question for Tapani or Zozoa.

00835023 - Irish Premier 00835078 - Irish First 008350cb - Irish Challenge Cup 0083511e - Irish League Cup 00835171 - Irish Super Cup 008351c4 - Irish Presidents Cup 00835217 - Irish Munster Cup 00835216 - Irish Leinster Cup

all JE commands just replace with JMP commands for the competitions you like. That is all.

Patinoz

I'm looking to change the size of the Irish First Division from 12 to maybe 16 or 18. Have gotten fed up of playing the same clubs so many times, would rather play each team twice only. I know Djole managed to do this with the scottish premier, second and third divisions. And as the correct league sizes are now in place I guessed someone must have found a way to change the size of the leagues. I'm just having difficulty finding the offsets in Olly.

Patinoz

27-01-12, 09:25 PM

27-01-12, 09:26 PM

for Ireland i only managed to reduce number of rounds from 3 to 2,22 fixtures...offsets for number of teams for ireland premier are not in HEXADECIMAL value, instead they are something like ECX or EPB...and that is tricky part...

Originally Posted by Patinoz

what is the offset to change the italian Serie B, Round, team and Fixtures? thank's

00646792 MOV WORD PTR DS:[ESI+3E],16 (number of clubs) 16 is 22 in decimal

0064678B PUSH 512 (number of clubs *59) 512 is 1298 in decimal 1298/22=59, if you change number of clubs, let's say on 24 you will have to change PUSH command like this:24*59=1416 and to convert 1416 to hexadecimal, that is 588 so command should be PUSH 588

00645B2D MOV WORD PTR DS:[FAX].2A (number of fixtures)

006468B2 MOV WORD PTR DS:[ESI+3C],CX (number of rounds) CX is a variant that contain some value(in this case it contains the value 2) We can't edit this line and put 3 instead of CX because it will overwrite the next line and we aren't allowed to do it. We can't either change the value CX gets above("MOV ECX,2") because it may affect other things like number of subs or number of points for

winning a game Therefore we will have move all the following lines 1 step down.

4.Mark all this block in grey using Shift+key down

5.Right-click somewhere on the grey block->copy->to file 6.Now change the "MOV WORD PTR DS:[ESI+3C],CX" to "MOV WORD PTR DS:[ESI+3C],3"

7.Copy the the following lines as they are in the file you have created

Note:when copying the lines it may give the message:"unknown identifier", in this case you just need to add 0 before the variant name. For example, if the line you want to copy is: "MOV WORD PTR DS:[ESI+AB],AX", write it as "MOV WORD PTR DS:[ESI+0AB],AX"

I'm looking to make a new application to simplify the process of editing player restrictions in various leagues. I'm looking for as many offsets as I can get, I've done some scanning and found the following but if anyone that has any more I'd really appreciate it.

+5 579c63 (England Match Rules) 5c1a53 x 5c1a5a x 5e02f8 Unknown (3), Germany 5e02ff Unknown (18) Germany Sed048 Unknown (5), Greece Sed04f Unknown (4), Greece 6397f1 Unknown (0), Irish Presidents Cup? 6d79ed Unknown (0), ? 6d7adc Unknown (0), ? 6d7ae6 Unknown (0), ? 794753 Unknown (3), Norway 8595a5 Unknown (4), Spain 8595b9 Unknown (2), Spain 8595c9 Unknown (4), Spain 8595d1 Unknown (3), Spain 90a731 Unknown (0), MLS All Stars

+2 40aa23 Unknown (4), Argentina 412dc3 Unknown (6), Australia 43f2c8 Unknown (2), Brazil 6670a3 Unknown (3), Japan 7cd973 Unknown (18), Poland 7ec978 Unknown (3), Russia 902203 Unknown (0), Turkey 90222d Unknown (6), Turkey 90ba88 Unknown (18), USA

If anyone can confirm what any of the are I'd also appreciate it. The number in brackets is the number of players allowed. +5 is for non-eu restriction, +2 wasn't in the tutorial but, as a guess, I'd say it is non-region or non-continent restriction (I've only played in Australia from that list).

5055D01 /		de Name de la V

I have discovered a new way of understanding the code during decoding the section.

MOV EAX,DWORD PTR DS:[ECX+53] would previously have been a bit of a mystery but I now know that it is accessing the value 83 (53 in hex) bytes into a club - which is the field 'nation id'. I'll post some more examples of this that should help improve our understanding of the code.

Editing the nation 'basque' clubs are restricted to:

008CEBB5: MOV EAX,DWORD PTR DS:[9CF424] - original value, basque restriction 008CEBB5: MOV EAX,DWORD PTR DS:[9CF488] - restricts them to just Spanish players.

Data directory name offset: 0x9c3824.

Not particularly important but it would allow one to run multiple databases without needing to swap data directories. With the later versions of the Tapani patch there is no requirement for the exe to be called cm0102.exe. So you could have an exe called odb.exe that reads data from a directory call odbdata, an exe called sim.exe that reads data from a directory called simdata etc. You could also have a different directory for Tapanified data, 3.9.60 data etc etc.

There is limited space available - only 8 bytes (enough for 7 characters and the null termination).

A huge collection of text offsets - http://www.sendspace.com/file/347me9

The file includes a line that is pre-formatted to work with the Flex Editor along with the original value.

There is a problem with the way Flex Editor, and my software generally, handles the endline character (ASCII value 10), as a result I have replaced it with a '\$' sign. If you want to edit text with '\$' signs then the only think I can suggest is to replace it with a ' ' - this would result in some news stories being squashed into one paragraph rather than being split. The endline is also used by the game on buttons where the text is over two lines - at present there is no way of keeping editing these values with the Flex Editor.

Values wrapped with '{}' appear to be those that can be clicked in the game, e.g. club names in news items, you could remove them if you really wanted to.

Some values will contain comments that can safely be removed to give more space, e.g. 'Club chairman <%s - Chairman Name eg Peter Johnson>

is glad that you are not getting over confident about the club's chances of beating the drop this season.' - here the text ' - Chairman Name eg Peter Johnson' can be removed without impacting on the visible message.

I have been working on a tutorial for the Flex Editor, it can be found here: http://champman0102.co.uk/forum/show...ditor+Tutorial

Please note - the text file was auto-generated, some of the values will be critical to the game working properly, others will be linked to the names of things in the data files. Please back-up your .exe.

Patinoz

0x60d780: change from MOV EAX,DWORD PTR SS:[ESP+4]

to: JMP 0060D800 (make sure Fill rest with NOPs is ticked, this will insert two lines of NOP).

This disables the error message displayed when a hard-coded club name has been changed; i.e. you can rename Barcelona, Manchester United etc and not get an annoying error message when the game loads.

The official editor still won't let you make the changes so you'll have to use something like Tri Wasono's editor.

I have just noticed that editing Barcelona's name has broken the link with Barcelona B, i.e. you can't promote / relegate player between the two. So you might want to bear that in mind before renaming a club.

Someone has probably noticed this pattern before but if not the following offsets represent a date. In this case it is the date of the Charity Shield.

0056D70D | . 6A 04 PUSH 4 ; |Arg9 = 4 0056D70F | . 51 PUSH ECX ; |Arg8 0056D710 | . 6A 01 PUSH 1 ; |Arg7 = 1 0056D712 | . 6A 06 PUSH 6 ; |Arg6 = 6 0056D714 | . 53 PUSH EBX ; |Arg5 0056D715 | . 6A 07 PUSH 7 ; |Arg4 = 7 0056D717 | . 6A 0D PUSH 0D ; |Arg3 = 0D 0056D719 | . 53 PUSH EBX ; |Arg2 0056D71A | . 56 PUSH ESI ; |Arg1

Arg3 is the day of the month (0 is the 1st). Arg4 is the month (0 is January) Arg6 is day of the week (Monday is 0) Arg7 is the time of day (0=AM, 1=PM, 2=EVE).

Arg6 overrides Arg3, i.e. it picks the nearest day specified (e.g. Saturday) to the date specified (e.g. 20th); so if you use Saturday and 20th but the 20th is a Thursday then the game will use the 22nd. I think I have previously seen a date that was fixed irrespective of the day of the week it was but can't remember where or how it worked.

Patinoz

Note to self:

Just copied across all posts with valuable infos in them or problems (only the ones which got solved though)

left out the "thank you" and pasquale / probe stuff

this obviously needs serious sorting, perhaps somebody with a slight understanding of these things can help there? i only see random numbers and letters there :lol:

EUROPE

CLUB COMPETITIONS

European Super Cup Venue

Code:

0085C351: MOV EAX, DWORD PTR DS:[9D0264]

Stadium at which the European Super Cup is played. It is set using a club and then uses that club's stadium (9D0264 refers to AS Monaco, changing this to 9D0120 (Athletic Bilbao) alters where the game is played from Stade Louis II to San Mamés)

NATION COMPETITIONS

Euro Championship Host Biddings

Code:

Fed up of seeing Scotland/Wales and Denmark hosting the European Championships? Well here are the offsets for nations bidding for the European Championships starting with 2008. Each European Championship has 3 bidders with 1 selected (at random?). I have included an example of the edits I made to my .exe to make it more realistic and only have each county bidding once over the 8 bidding cycles.

BID FOR 2008

005F9CE7 - MOV EDX,DWORD PTR DS:[9CF45C] > [9CF228] - SCOTLAND (JOINT) > AUSTRIA (JOINT) 005F9CF5 - MOV ECX,DWORD PTR DS:[9CF510] > [9CF4AC] - WALES (JOINT) > SWITZERLAND (JOINT) 005F9D03 - MOV EAX,DWORD PTR DS:[9CF4A8] > [9CF344] - SWEDEN > HUNGARY 005F9D18 - MOV EAX,DWORD PTR DS:[9CF4AC] > [9CF31C] - SWITZERLAND > GREECE

BID FOR 2012

005F9D35 - MOV ECX,DWORD PTR DS:[9CF300] > [9CF4F0] - FRANCE > UKRAINE 005F9D4B - MOV ECX,DWORD PTR DS:[9CF408] > [9CF430] - NORWAY > POLAND

```
005F9D61 - MOV ECX, DWORD PTR DS:[9CF2C0] > [9CF4A8] - DENMARK > SWEDEN
BID FOR 2016
005F9D7F - MOV EDX,DWORD PTR DS:[9CF2DC] > [9CF300] - IRELAND > FRANCE
005F9D95 - MOV EDX,DWORD PTR DS:[9CF4AC] > [9CF360] - SWITZERLAND > ITALY
005F9DAB - MOV EDX,DWORD PTR DS:[9CF51C] > [9CF238] - YUGOSLAVIA > BULGARIA
BID FOR 2020
005F9DD3 - MOV EAX,DWORD PTR DS:[9CF4AC] > [9CF45C] - SWITZERLAND > SCOTLAND
005F9DE8 - MOV EAX,DWORD PTR DS:[9CF244] > [9CF2C0] - BELGIUM > DENMARK
005F9DFD - MOV EAX,DWORD PTR DS:[9CF338] > [9CF408] - HOLLAND > NORWAY
BID FOR 2024
005F9E1A - MOV ECX,DWORD PTR DS:[9CF360] > [9CF2E4] - ITALY > ENGLAND
005F9E30 - MOV ECX,DWORD PTR DS:[9CF314] > [9C338F] - GERMANY > HOLLAND
005F9E46 - MOV ECX,DWORD PTR DS:[9CF2E4] > [9CF244] - ENGLAND > BELGIUM
BID FOR 2028
005F9E64 - MOV EDX,DWORD PTR DS:[9CF31C] > [9CF2AC] - GREECE > CROATIA
005F9E7A - MOV EDX,DWORD PTR DS:[9CF488] > [9CF51C] - SPAIN > YUGOSLAVIA
005F9E90 - MOV EDX,DWORD PTR DS:[9CF300] > [9CF444] - FRANCE > ROMANIA
BID FOR 2032
005F9C47 - MOV ECX,DWORD PTR DS:[9CF338] > [9CF2B8] - HOLLAND (JOINT) > CZECH REP (JOINT)
005F9C55 - MOV EAX,DWORD PTR DS:[9CF244] > [9CF470] - BELGIUM (JOINT) > SLOVAKIA (JOINT)
005F9C62 - MOV EDX,DWORD PTR DS:[9CF360] > [9CF448] - ITALY > RUSSIA
005F9C78 - MOV EDX,DWORD PTR DS:[9CF408] > [9CF314] - NORWAY > GERMANY
BTD FOR 2036
005F9C97 - MOV EAX,DWORD PTR DS:[9CF344] > [9CF2DC] - HUNGARY (JOINT) > IRELAND (JOINT)
005F9CA4 - MOV EDX,DWORD PTR DS:[9CF228] > [9CF3E4] - AUSTRIA (JOINT) > N.IRELAND (JOINT)
005F9CE2 - MOV ECX, DWORD PTR DS:[9CF434] - PORTUGAL*
005F9CC8 - MOV ECX, DWORD PTR DS:[9CF488] > [9CF4DC] - SPAIN > TURKEY
 (*HOSTS FOR 2004- ALTERING WILL ALSO CHANGE 2004 HOSTS!)
NB. After all nations have bidded the game goes back to the start of the list and Brazil, Argentina & South Africa
bid for 2042, Sweden/Norway, Spain & Switzerland bid in 2046 etc...
```

MORE

Here are all the offsets for the dates of the "European Champions Cup" (UEFA Champions League). Hope they are useful.

Code:

```
Date offsets
ARG 7 = TIME OF DAY (AM/PM/EVE)
ARG 6 = DAY OF WEEK (MONDAY etc...)
ARG 4 = MONTH OF YEAR (JANUARY etc...)
ARG 3 = DATE OF MONTH (1st etc...)
1st Qualifying Round
Draw
00583CEF - Day
00583CF2 - Month
00583CF4 - Date
1st Leg

Rivaldo

hi

Where is the England Premier Maximum subs named?

Craig Forrest

it isn't.... I think if you use a Tapani patch you can find it.... but if you use the original game with no patches, it is impossible to change... as far as I know anyway...

Goofy

Quick question for the clever folk :lol:

Ive used Olly to change the amount of named subs in the SPL and cups to 7 instead of 5 and its working fine when i start a new game in Scotland, question is - is there any way to get it to work on a save game as my current save still shows only 5 named subs? Cheers.

Fods

Didnt John Locke make a tool for this? not sure about save games though....

Craig Forrest

I don't think there is... when you use Olly, it changes the DB.... but each save file is based on the DB that was used to create it..... I don't think you can change league/cup rules in a save....

Goofy

Ok, cheers guys, thought as much :)

djole2mcloud

tapani wrote about this...olly changes .exe and therefore it affect on save...as i remember, for my save game always had affect at once...no need to start new game...

Zorb

Does anyone know the offset that Tapani used to disable Unprotected contracts ? They are the bane of my life.

Thanks in anticipation

nanging Prize Moneys ?	
Hello All	
I had to Register again	
I am Liverpool Fan here :)	
I would like to know how Do I open the club_comp.dat Files to change the Prize Moneys?	
FA CUP £1.8M	
LEAGUE CUP £100,000?	
CHAMP LEAGUE £42M?	
ods	20-03-12, 04:01 AI

or you could try one of John Lockes tools which is in the downloads section

Pasquale

Hi guys I have two questions:

1) you can limit the number of foreign players in the league of northern ireland? I'm trying for a long time looking for some solution could not find anything ... can you give me a hand?

2) you can decide what kind of transfers to make a nation? example: if I make the championship of San Marino (exchange with northern ireland) you can make sure that the League of San Marino buy only Italian players?

I hope you understand ... thanks

Go into the downloads section, download John Locke's tool called "Flex"

When you run it, you will be able to select a bunch of options from the drop down menu.... one of those options allows you to change TV and Prize money.... set it to what you want, save and voila....

djole2mcloud

sorry pasquale...i'v looked through Olly, even tried to change few offsets but nothing...simply, offset for NIR rules aren't there where they suppose to be...

Pasquale

No matter djole, thank you anyway :)

vult

Hi, do anyone knows how to turn off the unprotected contracts without using tapani patch? Maybe changing some offsets? Thanks.

Pasquale

Hey guys you can cancel the repeat of the match in the Northern Ireland cups? :confused:

djole2mcloud

If someone want to increase number of clubs in Dannish premier division, this is how to do it:

offset 005538E2 - put the value 10(10 is 16 in hexadecimal)

offset 00553808 - put the value 3B0(3B0 is 944 in hexadecimal and this number is number of teams 16 * 59. If u like to increase number of teams to 18 than u must multiply 18*59)

offset 0055293A - put the value IE(1E is 30 in hexadecimal, and this is number of fixtures, 16 clubs, two rounds) offset 0055293a - leave the value 861(861 is 2145 in hexadecimal and that is 33 fixtures * 65.now we have 30 fixtures but higher number can

stay,however if u increase number of clubs to 18,then will be 34 fixtures and u must do next math 34*65,convert to hexadecimal and input in this offset)

now add 4 more clubs via Tri Wasano editor to Dannish premier division.

next is crucial...to change number of rounds,but not to mess offset for awarding points for a win: start changing offsets one by one until the very end...curently playing third season,no errors...

WORLD

CLUB COMPETITIONS

0058BE1B - Fifa Confederations Cup subs named 007A02AE - Olympic Games subs named 00929C1C - World Club Championships subs named 0092B51E - World Club Cup subs named

First year the FIFA Club World Cup takes place

Code:

009291B2 - Change it from CMP AX,7D3 to CMP AX,7D1 and the Competition takes place in 2001.

NB 7D3 is hex for 2003 and obviously 7D1 is hex for 2001.

Clubs that take part in FIFA club world cup

Code:

the first one is: 0092A9F2: CALL 0092AE60

There are then another 11 similar calls.

Arg5 is the competition - which is only used once (UEFA Cup), the rest seem to be picked on other criteria. The game uses -1 to signify that the club to pick is not based on a competition winner. Arg1 is the continent. 9CFA08=Africa, 9CFA0C=Asia, 9CFA10=Europe, 9CFA14=North America, 9CFA18=Oceania, 9CFA1C=South America.

Not sure it would work but you could create a new continent in the editor and move Northern Ireland to that continent. Then make sure EAX (used for Argl) is always 6 (the id of any new continent, the existing ones being 0 to 5) - use MOV EAX, 6 at 0x92A9E3 and the other locations where EAX is set. The game should then pick a club (suspect it will be using club rep to ensure it pick the 'best' clubs) from this new continent.

Just made the changes below - the competition has now picked 12 European clubs to take part (2 is the id for Europe).

Teams picked are: Arsenal, Bayern, Real Madrid, Romam Dortmund, Lazio, Liverpool, Valencia, Barcelona, Juventus, Man Utd & Villarreal.

0092A9E3: MOV EAX,2 0092AA09: MOV EAX,2 0092AA2C: MOV EAX,2 0092AA4F: MOV EAX,2 0092AA72: MOV EAX,2 0092AA8B: MOV EDX,-1 //tells game not to use UEFA Cup winners 0092AA90: NOP 0092AA97: MOV ECX,2 0092AA9C: NOP 0092AABE: MOV ECX,2 0092AAC3: NOP 0092AAE2: MOV ECX,2 0092AAE7: NOP 0092AB06: MOV ECX,2 0092AB0B: NOP 0092AB2A: MOV ECX,2 0092AB2F: NOP 0092AB4E: MOV ECX,2 0092AB53: NOP

I didn't edit: 0092AB78: PUSH -1

I think this might have the effect of telling the game to pick a big club from any continent - as all the best clubs are in Europe the game picked one of them.

If you change all the continent references to a continent with no great clubs, e.g. Oceania (4), then move N. Ireland to Oceania (maybe boost club and league reps too) this might get the clubs you want invited. Moving a nation might crash the game though.

First FIFA Club World Championship hosts

Code:

005FA36C - MOV EAX, DWORD PTR DS: [9CF488] > [9CF36C] - SPAIN > JAPAN

0x585078 to 0x58517D, seems to relate picking clubs to play in the UEFA Champions League. The equivalent for the UEFA cup seems to be: 0x902c3f > 0x902c9d and/or: 0x902cda > 0x902d63

I think the following 2 lines are accessing the nation a club is from and checking it is not from 'no nation'. 00902CF2 |. 8B41 53 |MOV EAX,DWORD PTR DS:[ECX+53] 00902CF5 |. 85C0 |TEST EAX,EAX

This line is, I think, checking the reputtion of the nation the club is from. 00902D17 |. 8B96 A7000000 $| {\rm MOV}$ EDX,DWORD PTR DS:[ESI+0A7]

FIFA Club World Championship Fixtures

Code:

Those who use a Tapani patch will know that the great man moved the WCC fixtures around and screwed it up somewhat (esp Group C). NB. I use Tapani 2.19 WCC TAKES PLACE IN 2001 009291B2 - CMP AX,7D3 > 7D1

RESULT

Fixtures are spread out much better. Like this...

SAT - GROUP A x2 SUN - GROUP B x2 MON - GROUP C x2 TUE - GROUP A x2 WED - GROUP A x2 WED - GROUP A x2 FRI - GROUP A x2 (Fixtures kick off at same time) SAT - GROUP A x2 (Fixtures kick off at same time) SUN - GROUP C x2 (Fixtures kick off at same time) MON TUE WED - SEMI-FINALS x2 THU FRI SAT - 3rd/4th Play-off SUN - FINAL

Additionally, if you want the WCC Group stage to be moved to pre-season (End of July) BUT want the Semi-Finals and Final to remain in December (for realism). Change the following...

SORTING OUT GROUP STAGE MATCH DAYS

This will help with fixture congestion caused by playing 5 games in WCC in December.

World Cup fix in order to start in 2013, so here are the changes need to be done Code:

Change offset 005F9ACC to MOV EAX,DWORD PTR DS:[9CF4AC] - replaces Sweden with Switzerland as WC Host Change offset 009IB8E2 to MOV EDX,DWORD PTR DS:[9CF3A0] - replaces Norway with LIECHTENSTEIN as WC Host Change offset 009IB8E2 to MOV ECX,DWORD PTR DS:[9CF300] - replaces Spain with France in the WC Euro Quals. Change the following offsets to DS:[9CF300] - replaces Spain with France in the WC Euro Quals, sorts the results against another teams in the group 0091D25 0091D33 0091D34B 0091D479 0091D400 Sort Qualifying nations: 0092F304 .^E9 3751C2FF JMP NEW.00554440 0092F308 90 NOP 0092F308 90 NOP 0092F308 90 NOP 0092F30C 90 NOP

FIFA World Cup Host Biddings

Code:

Fed up of seeing Switzerland and Sweden/Norway hosting the World Cup? Well here are the offsets for nations bidding for the World Cup starting with 2010. Each World Cup has 3 bidders with 1 selected (at random?). I have included an example of the edits I made to my .exe to make it more realistic and only have each county bidding once over the 8 bidding cycles.

BID FOR 2010

005F9A91 - MOV EDX,DWORD PTR DS:[9CF260] > [9CF2D8] - BRAZIL > EGYPT 005F9AA1 - MOV EDX,DWORD PTR DS:[9CF218] > [9CF3D8] - ARGENTINA > MOROCCO 005F9AB1 - MOV EDX,DWORD PTR DS:[9CF480] - STH AFRICA

BID FOR 2014

005F9ACC - MOV EAX,DWORD PTR DS:[9CF4A8] > [9CF4F4] - SWEDEN (JOINT) > URUGUAY (JOINT) 005F9AD9 - MOV EDX,DWORD PTR DS:[9CF408] > [9CF218] - NORWAY (JOINT) > ARGENTINA (JOINT) 005F9AE7 - MOV ECX,DWORD PTR DS:[9CF488] > [9CF29C] - SPAIN > COLOMBIA 005F9AFD - MOV ECX,DWORD PTR DS:[9CF4AC] > [9CF260] - SWITZERLAND > BRAZIL

BID FOR 2018

005F9B25 - MOV EDX,DWORD PTR DS:[9CF3D0] > [9CF448] - MEXICO > RUSSIA 005F9B3B - MOV EDX,DWORD PTR DS:[9CF4F4] > [9CF2E4] - URUGUAY > ENGLAND 005F9B51 - MOV EDX,DWORD PTR DS:[9CF280] > [9CF338] - CANADA > HOLLAND

BID FOR 2022

005F9B6F - MOV EAX,DWORD PTR DS:[9CF360] > [9CF43C] - ITALY > QATAR 005F9B84 - MOV EAX,DWORD PTR DS:[9CF314] > [9CF224] - GERMANY > AUSTRALIA 005F9B99 - MOV EAX,DWORD PTR DS:[9CF2E4] > [9CF4DC] - ENGLAND > TURKEY

BID FOR 2026

005F9BB6 - MOV ECX,DWORD PTR DS:[9CF260] > [9CF4F8] - BRAZIL > U.S.A. 005F9BCC - MOV ECX,DWORD PTR DS:[9CF218] > [9CF3D0] - ARGENTINA > MEXICO 005F9BE2 - MOV ECX,DWORD PTR DS:[9CF4F8] > [9CF280] - U.S.A. > CANADA

BID FOR 2030

005F99E9 - MOV ECX,DWORD PTR DS:[9CF300] > [9CF31C] - FRANCE > GREECE 005F99FB - MOV ECX,DWORD PTR DS:[9CF488] - SPAIN 005F9A0B - MOV ECX,DWORD PTR DS:[9CF434] - PORTUGAL

BID FOR 2034

005F9A21 - MOV EDX,DWORD PTR DS:[9CF484] - S KOREA* 005F9A2C - MOV ECX,DWORD PTR DS:[9CF36C] - JAPAN* 005F9A37 - MOV EAX,DWORD PTR DS:[9CF264] > [9CF298] - ENGLAND > CHINA 005F9A46 - MOV EAX,DWORD PTR DS:[9CF360] > [9CF34C] - ITALY > INDIA (*HOSTS FOR 2002- ALTERING WILL ALSO CHANGE 2002 HOSTS!)

BID FOR 2038

005F9A5B - MOV ECX,DWORD PTR DS:[9CF314] - GERMANY* 005F9A6B - MOV ECX,DWORD PTR DS:[9CF2E4] > [9CF360] - ENGLAND > ITALY 005F9A7B - MOV ECX,DWORD PTR DS:[9CF218] > [9CF300] - ARGENTINA > FRANCE (*HOSTS FOR 2006- ALTERING WILL ALSO CHANGE 2006 HOSTS!)

NB. After all nations have bidded the game goes back to the start of the list and Brazil, Argentina & South Africa bid for 2042, Sweden/Norway, Spain & Switzerland bid in 2046 etc...

Olympic Games Hosts

Code:

ACTUAL HOSTS

005FA076 - MOV EAX,DWORD PTR DS:[9CF314] > [9CF298] GERMANY > CHINA (2008) 005FA093 - MOV ECX,DWORD PTR DS:[9CF360] > [9CF264] ITALY > ENGLAND (2012) 005FA0B1 - MOV EDX,DWORD PTR DS:[9CF36C] > [9CF260] JAPAN > BRAZIL (2016) 005FA0CF - MOV EAX,DWORD PTR DS:[9CF3D0] > [9CF36C] MEXICO > JAPAN (2020) POSSIBLE FUTURE HOSTS 005FA0EC - MOV ECX,DWORD PTR DS:[9CF280] > [9CF4DC] CANADA > TURKEY (2024) 005FA10A - MOV EDX,DWORD PTR DS:[9CF288] > [9CF3D8] SPAIN > MOROCCO (2028) 005FA030 - MOV ECX,DWORD PTR DS:[9CF248] > [9CF280] AUSTRALIA > CANADA (2032) * especially for Craig Forrest (this offset seems to be the 2000 hosts. Probably left over from a previous version)

Fods

20-09-12, 03:50 AM

Northern Ireland is only annoying to you Pasquale

Pasquale

21-09-12, 01:10 PM

Annoying because no one before had managed to solve this little problem I wanted to share the discovery with you, but if you are interested in pretend that I did not write anything

JohnLocke

21-09-12, 09:14 PM

22-09-12, 09:38 AM

22-09-12, 09:41 AM

30-09-12, 12:02 PM

Thanks for this, any idea if it would be possible to do the same for other competitions? It would be cool if you could find the corresponding offsets for other competitions to add/remove extra time etc.

Pasquale

I do not know but I think that trying to do some testing will be some result is obtained but which one do you intend to change the competition?

Cam F

I changed swiss league with Northern Ireland, did the full shebang but then still got UK youngsters coming through. Any1 know the offsets to unlink the UK Nations? might be pissing up stream with this one though :lol:

technoir

I have question regarding this instruction:

- 006468B2 MOV WORD PTR DS:[ESI+3C],CX (number of rounds) CX is a variant that contain some value(in this case it contains the value 2)
- We can't edit this line and put 3 instead of CX because it will overwrite the next line and we aren't allowed to do it.
- We can't either change the value CX gets above("MOV ECX,2") because it may affect other things like number of subs or number of points for winning a game
- Therefore we will have move all the following lines 1 step down.
- 4.Mark all this block in grey using Shift+key down
- 5.Right-click somewhere on the grey block->copy->to file 6.Now change the "MOV WORD PTR DS:[ESI+3C],CX" to "MOV WORD PTR DS:[ESI+3C],3"
- 7.Copy the the following lines as they are in the file you have created

I cant change CX into 2 so it means that i have to do like this? [ESI+03C],2

I want to change Portuguese first and second league like it is now (first-16 and second-22). So is it possible to do this? I am asking cause maybe someone tried and failed or succeeded

Pasquale

I'd also like to remove link with UK .. credoi that the only thing to do is block the transfer market in UK :dance:

Bomberinho

Prize for(offset):

Fifa world cup (Clubs)? European super cup? Intercontinentel cup? League cup (England)? Charity Shield(ENG)?

albdono

Hy, and for Italy

- Italian Serie A Numbers of Teams
- Italian Serie B Numbers of Teams?

albdono

Hello everybody.

I've changed the number of teams in Italian Serie A and Italian Serie B without big problems with Olly. How can I change the start month of the season? Increasing the number of teams, the first day arrives in June, quite a bit too early.

What is the offset to change this? Thank you very much!

albdono

Spectral

08-01-13, 09:15 AM

Almost everyone gave player restriction offsets, what about transfers ?

Anyone has some to share please ? :) would like to use for portugal ie.. or how to turn off work permit in premier league ?

30-09-12, 02:57 PM

02-10-12, 09:20 PM

23-10-12, 09:49 AM

05-11-12, 04:40 PM

faz44

Serious question, has anybody tried modding Wales and, as such, know any of the offsets?

Golly

28-01-13, 06:10 PM

Date offsets ARG 7 = TIME OF DAY (AM/PM/EVE) ARG 6 = DAY OF WEEK (MONDAY etc...) ARG 4 = MONTH OF YEAR (JANUARY etc...) ARG 3 = DATE OF MONTH (1st etc...) See Post #79 in this threas for more details on editing dates correctly. Here are all the offsets for the dates of the "English Auto Cup" (English Vans Trophy). Hope they are useful. Final (Draw) 0056AEAD - Day 0056AEB6 - Month 0056AEB7 - Date Final (Match) 0056AEC7 - Time (AM/PM/EVE) 0056AEC9 - Day 0056AECD - Month 0056AECF - Date Section Round 1 (Draw) 0056AFAA - Day 0056AFAD - Month 0056AFAF - Date Section Round 1 (Match) 0056AFBE - Time (AM/PM/EVE) 0056AFC0 - Day 0056AFC3 - Month 0056AFC5 - Date Section Round 2 (Draw) 0056B01F - Day 0056B022 - Month 0056B024 - Date Section Round 2 (Match) 0056B034 - Time (AM/PM/EVE) 0056B036 - Day 0056B03A - Month 0056BO3B - Date Section Quarter-Final (Draw) 0056B0B2 - Day 0056B0B6 - Month 0056B0B7 - Date Section Quarter-Final (Match) 0056B0C7 - Time (AM/PM/EVE) 0056B0C9 - Day 0056B0CD - Month 0056B0CF - Date Section Semi-Final (Draw) 0056B154 - Day 0056B158 - Month 0056B15A - Date Section Semi-Final (Match) 0056B16A - Time (AM/PM/EVE) 0056B16C - Day 0056B170 - Month 0056B172 - Date Section Final (Draw) 0056B1F7 - Day 0056B1FB - Month 0056B1FD - Date Section Final (Match- 1st Leg) 0056B20D - Time (AM/PM/EVE)* 0056B20F - Day* 0056B213 - Month 0056B215 - Date* *Section Final 2nd Leg takes place 7 days after 1st Leg, but not sure where this is coded!

Date offsets ARG 7 = TIME OF DAY (AM/PM/EVE) ARG 6 = DAY OF WEEK (MONDAY etc...) ARG 4 = MONTH OF YEAR (JANUARY etc...) ARG 3 = DATE OF MONTH (1st etc...) Here are all the offsets for the dates of the "European Champions Cup" (UEFA Champions League). Hope they are useful.

MISCELLA NEOUS

Disabling the error displayed when a hard-coded club name is changed

Code:

This disables the error message displayed when a hard-coded club name has been changed; i.e. you can rename Barcelona, Manchester United etc and not get an annoying error message when the game loads.

The official editor still won't let you make the changes so you'll have to use something like Tri Wasono's editor.

I have just noticed that editing Barcelona's name has broken the link with Barcelona B, i.e. you can't promote / relegate player between the two. So you might want to bear that in mind before renaming a club.

0x60d780: change from MOV EAX,DWORD PTR SS:[ESP+4] to: JMP 0060D800 (make sure Fill rest with NOPs is ticked, this will insert two lines of NOP).

Disabling the splash screen (untested)

Code:

0x5ccd3c - change JE 005cd0b3 to JMP 005cd0b3 NOP.

Names of continents

Code:

should anyone wish to rename them (.dat files would also need changing):

Africa - 0x5d9458 Asia - 0x5d9450 Europe - 0x5d9448 North America - 0x5d9438 Oceania - 0x5d9430 South America - 0x5d9420

Offsets are literal, add 0x400000 for Olly offsets.

Data directory name offset

Code:

0x9c3824

Not particularly important but it would allow one to run multiple databases without needing to swap data directories.

With the later versions of the Tapani patch there is no requirement for the exe to be called cm0102.exe. So you could have an exe called odb.exe that reads data from a directory call odbdata, an exe called sim.exe that reads data from a directory called simdata etc.

You could also have a different directory for Tapanified data, 3.9.60 data etc etc.

There is limited space available - only 8 bytes (enough for 7 characters and the null termination).

League selection screen

Code:

3 lines above each of the lower division names is a JNE instruction; change these to JMP and the lower division selection is removed from the list.

The following lines refer to specific nations (i.e. those that have selectable lower leagues).

00669FE1	1.	8B15	E4F29C00	MOV	EDX, DWORD	PTR	DS:[9CF2E4]	=	England
0066A012	>	3B0D	14F39C00	CMP	ECX, DWORD	PTR	DS:[9CF314]	=	Germany
0066A03C	>	3B0D	60F39C00	CMP	ECX, DWORD	PTR	DS:[9CF360]	=	Italy
0066A062	>	3B0D	34F49C00	CMP	ECX, DWORD	PTR	DS:[9CF434]	=	Portugal
0066A06A	1.	3B0D	88F49C00	CMP	ECX, DWORD	PTR	DS:[9CF488]	=	Spain

Star players also for user's team

Code:

"%s*" @ 0x98e8dc. %s is always replaced at run time by text.

0045B82C: JNE SHORT 0045B89F

Replace this line with NOP NOP.

Taking control of any club in game

Code:

00482A74: JE 00482D04

Fill with NOP and you can Take Control of a club even if it is in a 'non-playable' league.

Golly

RESTRICTIONS

Letting Real Sociedad buy any spaniard players

Code:

change 008CECAC: MOV ECX,DWORD PTR DS:[9D0128]

to 008CECAC: MOV ECX,-1 008CECB1: NOP

Stop from buying a nation's players

Code:

008CE9D0: MOV EDX,DWORD PTR DS:[9CF458] 008CE9D6: CMP ECX,EDX 008CE9D8: JNE SHORT 008CEA14

9CF458 is Saudi Arabia, this is the code that stops you from buying Saudi players. Changing 9CF458 will allow this rule to be applied to another nation instead.

Alternatively, deleting JNE SHORT 008CEA14 (filling with NOP) will apply this restriction to everybody unless they already play abroad.

It won't edit the messages the game shows though, they'll still refer to Saudi Arabia.

Stopping trial offers

Code:

change 00872538 - JE 00872620

to 00872538 - JMP 00872620 0087253D - NOP

Stopping transfers and loan bids

Code: change 0087278D JE 00872918 to 0087278D JMP 00872918 00872792 NOP

I believe this just impacts on the user interface, so the AI should still be able to buy players.

Stop releasing players on free

Code:

change 00872077: JNE 00872165

to JMP 00872165

Basque-only restriction

0053D8F7	\. C3	REIN

I have discovered a new way of understanding the code during decoding the section.

MOV EAX,DWORD PTR DS:[ECX+53] would previously have been a bit of a mystery but I now know that it is accessing the value 83 (53 in hex) bytes into a club - which is the field 'nation id'. I'll post some more examples of this that should help improve our understanding of the code.

Stop applying for jobs

Code:

00482CA9: JNE SHORT 00482D04

Change this to JMP and you won't be able to apply for jobs - you'd have to wait to be offered a job.

Stop referring to players having 'British' passports

Code:

CPU Disas	m			
Address	He	x dump	Command	Con

<%s - player name eg Batistuta> would not require a work permit because he holds {an}<%s - nationality name eg Italian>{} passport."

Not tested this but I think if the bold lines are changed to CMP EAX,-1 the game will stop referring to players having 'British' passports, i.e. the game could be made to report that a player holds a Scottish passport - which might come in handy in a few years time.

9CF2E4 = England 9CF510 = Wales 9CF45C = Scotland 9CF3E4 = Northern Ireland

Imposing the basque-only restriction on every club

Code:

0053D7F0: MOV ECX,DWORD PTR SS:[ESP+4] 0053D7F4: TEST ECX,ECX

Change to: 0053D7F0: MOV EAX,1 0053D7F5: RETN

This will impose the basque-only restriction on every club, net result is that only a handful of transfers will happen.

The following changes the nationality that everyone is restricted to and changes it from Basque to -1; as nobody has -1 for a nationality (nationalities start at 0 for Afghanistan) no club will be able to sign anybody, not even free transfers. Clubs will only get the players that come through their youth team.

008CEBB5	A1 24F49C00	MOV EAX, DWORD PTR DS:[9CF424]
Change to: 008CEBB5	B8 FFFFFFFF	MOV EAX,-1

Making this change will probably get really boring as I suspect lots of clubs will have squads full of grey players as their players leave and don't get replaced.

I want to change the Russian premier division restrictions, so you can't play with more than 3 foreing players. But the problem is i only found the offset for the 2nd division. I can't find the offset for premier. Can anyone help me?.

Thanks!

007EC978 : MOV BYTE PTR DS:[EDX+2], 3

This is what I've got for Russia, not sure which division(s). If you've got another offset please post it.

Those marked with a * indicate they appear twice but I don't know why. Possibly because the competition has two stages which can be edited independently?

JohnLocke

Some CM00/01 offsets for those interested:

Here are all the .cpp offsets - these help identify what each bit of code relates to.

See this post for how to use: http://www.champman0102.co.uk/showth...&p=133#post133 Although now you would click the 'X', rather than the 'E'. Code:

CM 00/01 OFFSETS

Here are all the .cpp offsets - these help identify what each bit of code relates to.

See this post for how to use: http://www.champman0102.co.uk/showth...&p=133#post133 Although now you would click the 'X', rather than the 'E'. Code:

coue:

Two 00/01 offsets (Olly):

0x62f8d0 - this code relates to prize money, highlight this line, press ctrl+r and you'll get every call to this method. A couple of lines above the call you'll see a 'PUSH' instructions that specifies the amount of cash. An example call can be found at 0x405653 - scrolling up reveals this relates to the Argentinian Premier league.

0x62f970 - same thing but this relates to TV money.

If you know the offsets I might be able to do something. All the Flex Editor can do is automate what would otherwise be done manually with Olly.

For those interested in date offsets, I seem to have cracked the scheduling of 2nd legs. I have only tried it out on the League Cup Semi-Final, but it works perfectly.

Approximately a dozen lines down from the offsets controlling the dates of a match are a couple of offsets. I have highlighted them on the following screen grabs from Olly. These offsets are for the English League Cup Semi-Final. As well as changing the timing of the second leg (from 21 days after to 14 days after) I changed the date of the 1st Leg.

http://img571.imageshack.us/img571/586/2ndleg.jpg

The first line of the 2 highlighted seems to control the match timing (0 = AM, 1 = PM, 2 = EVE) and the second line is how many days between the 1st and 2nd Leg. As you can see I changed to value from 15 (21) to OE (14) and that is reflected in the round dates in the game.

JohnLocke

10-02-13, 07:16 PM

Nice work

If you press Ctrl+B, then type into the 'HEX' box the values from the start of the line (C6 86 2A 02 00 00) you should be able to find the same instruction for other competitions.

10-02-13, 10:19 PM

Having just browsed through the FA Cup date offsets on Olly, it would appear replay dates are worked out the same way. Loads of 0A (10 days) in the equivalent offsets after the dates of each Round.

This quote has got me thinking - it would be nice to revert this change, I used to like managing in Wales.

I've found the right offsets and changed them back to their original values: 009DA3E0 welsh premier division. 00AD56B8 E:\dev\CM3\cm3 00-01\cm3\code\comp\leagues\wel_first.cpp

Doesn't seem to have made any difference though. Wales still isn't an option at the start and the Northern Premier loads as normal.

Anyone have any ideas?

Golly

11-02-13, 12:34 AM

I had a little experiment earlier with expanding the Conference and Northern Premier to 24 teams each.

Did both by simply finding the offset for Number of Teams in either division and increasing it to 18 (Hex for 24). 2 lines above these offsets is another where the offset is $59 \times No$ of teams. So for Conference I had to change it from 512 (22x59 in hex) to 588 (24x59 in hex). Did nothing with the fixture list- ie left them at 42 rounds scheduled and same dates. Added 2 teams to Conference and 1 to Northern Premier using Explorer and...

Had no problems whatsoever. Both leagues run fine with 24 teams in. On the "Schedule" page of either competition there are only 42 games schedule for Conference and 34 for Northern Premier, but the game inserts the other rounds of fixtures into vacant midweek slots and all games are played.

The FA Cup still pulled 22 Conference teams and 23 Northern Premier teams into the Qualifying Round (so 2 random? Conference sides and 1 random? Northern Premier side misses out). And the FA Trophy also pulls in 22 Conference teams (2 miss out) and 10 other teams (some Northern Premier, some not) into Round 2.

Guessing reducing the Conference below 22 and the Northern Premier below 23 might screw up the FA Cup, although I haven't tried it. Ditto with the FA Trophy if there are less than 22 teams in the Conference.

Golly

Anybody fancy writing an idiots guide to editing a PUSH EBX command on Olly without screwing everything up. Keep encountering PUSH EBX on offsets I am wanting to play around with and haven't found a way around the issue. Really need step by step instructions that a complete novice could follow. Many thanks to anyone who can help.

This is what I've got for Russia, not sure which division(s). If you've got another offset please post it.

Thats the only one. It's only applies to 2nd division, if you want to make for the premier division too. Go to that adress, look up 1 lines and change the JNZ SHORT 007EC97C to JNZ SHORT 007EC978. With this, you have the restriccion for the 2nd, 1st and russian cup.

JohnLocke

12-02-13, 07:27 PM

I'm no expert at Olly but I can try - not sure if this will help.

First, EBX is a 'register' - it holds a value (although finding the value it holds can be a bit tricky). PUSH is an instruction to put the value in EBX (or whatever follows the PUSH) on the 'stack'. The stack is the computer's memory, another part of the application will presumably get the value back later (using a POP instruction).

I have no idea how to edit this though. If you see the second column in Olly you can see the bytes that make up the instruction - PUSH EBX is just '53' (hex). 0x54 would be PUSH ESP but there is no space to change it to 'PUSH <value>'.

If you need more space you can have a go doing what Tapani did with his patches - find a spare piece of the executable and write code there. Then you just need a couple of JMP instructions - one to say 'go to the new code' and one to say 'go back and carry on executing from there' - but this is quite advanced (I've never done this except where I've been copying part of a Tapani patch). I'll have a play about and report back, but think this confirms what I suspected. ie That it's beyond me. I did manage to edit one PUSH EBX as an experiment with a little (and I mean little) success.

I chose to edit the day of the English Championship Play-off Final as it was a basic PUSH command- PUSH EBX (EBX = 0 = Monday). Moved the match to a Saturday and got through 2 entire season working fine, but game kept crashing in June 2003 when the 3rd season was initialising. No idea why and to be honest I was surprised it worked up to that point.

14-02-13, 12:19 AM

Re: the 2nd paragraph of my last post...

Went through the same steps as I did before just to make sure I hadn't made a silly error. Same thing happened. Game crashes when it attempts to begin the 2003-04 season. Used Tapani to try and start the game in 2003 and it crashed. Changed start year to 2004, 2005, 2006 and every year up to 2010 and all work fine. It just doesn't want to work for 2003-04 season.

I guessed 2009-10 wouldn't work either as the PO Final would be schuduled on the same date, but it loaded no problems. So that got me thinking that as well as the Final falling on the same day maybe the combination of this and it being a leap year had caused the error. So I used Tapani to start the game in 2031 (as the 2031-32 is the next leap year with the exact same calendar day/dates as 2003-04). And... It crashed.

So, basically my edit works except the leap year seasons when February 29th falls on a Sunday!!!

981fb8 X: cm3 code match_eng.cpp

That line by itself doesn't really do anything, however it can be used to find the game code that relates to the match engine (at least I assume what 'match_eng' refers to) - which begins at 0x660430.

The equivalent offset for 01/02 is: a15884 E:\dev\CM3\cm3 00-01\cm3\code\match_eng.cpp, with the code starting at 0x6b7f20.

Golly

I was looking at the English Conference Fixture offsets and I found something very interesting. After the regular season fixtures are 3 extra dates set out in the same way as Play-off games are for the English First/Second/Third. It got me thinking, is it possible that there is a Promotion Play-off for the English Conference pre-written into the game that could maybe be activated by an offset change or few.

For those interested and/or clever enough to maybe work it out the first offsets for each of the 3 fixtures are:-

0056EAED 0056EB67 0056FBFF

0056EAED 0056EB67 0056EBFF

Looks like that code is only accessed at 0x56EA67 (JNE SHORT 0056EAD3) - you could try changing the JNE to JMP.

If you're not familiar, JNE is Jump Not Equal (based on the line above "CMP ESI, EBX"), JMP is just jump. CMP is compare - so of the values in ESI and EBX are the same the code continues to 0x56EAD0 and returns, if they not equal the 'play off' section is executed.

Here's an interesting one, or at least interesting to me.

0x60d780 - this is a function that seems to be called when you rename certain clubs so the game can't find them (the 5809 error).

If you replace the instruction at this address with: RETN, NOP NOP, NOP (c3 90 90 90) the game just continues without showing the error - so you can rename any club you like.

Edit: do not rely on this post, it's more complicated that this post makes it look.

I'm looking to make a new application to simplify the process of editing player restrictions in various leagues. I'm looking for as many offsets as I can get, I've done some scanning and found the following but if anyone that has any more I'd really appreciate it.

+5
579c63 (England Match Rules)
579c63 (England Match Rules)
5c1a53 x
5c1a5a x
5e02f8 Unknown (3), Germany
5e02ff Unknown (18) Germany
5ed048 Unknown (5), Greece
5ed04f Unknown (0), Irish Presidents Cup?
6d7ade Unknown (0), ?
6d7ade Unknown (0), ?
6d7ade Unknown (0), ?
6d7ae6 Unknown (0), ?
6d7ae6 Unknown (0), Pain
8595b9 Unknown (2), Spain
8595c9 Unknown (3), Spain
8595d1 Unknown (0), MLS All Stars

+2 40a23 Unknown (4), Argentina 412dc3 Unknown (6), Australia 43f2c8 Unknown (2), Brazil 6670a3 Unknown (3), Japan 7cd973 Unknown (18), Poland 7ec978 Unknown (18), Russia 902203 Unknown (0), Turkey 90222d Unknown (6), Turkey 90ba88 Unknown (18), USA

If anyone can confirm what any of the are I'd also appreciate it. The number in brackets is the number of players allowed. +5 is for non-eu restriction, +2 wasn't in the tutorial but, as a guess, I'd say it is non-region or non-continent restriction (I've only played in Australia from that list).

I'll see if I can find some more at the weekend.

Golly

The equivalent offset in the English Football League divisions are also JNE SHORT... so don't think it's that.

JohnLocke

Maybe the values being compared are different though.

You could try setting a breakpoint and looking out for values of ESI and EBX.

To do this, go to: 0x56EA65, right-click, Breakpoint > Toggle (the address should highlight red), then run the application by clicking the little blue triangle (just next to the right of the 'x' in the top left). When the game gets to this instruction it will freeze. The Registers section in Olly will then show you what value is stored in each register.

Guessing reducing the Conference below 22 and the Northern Premier below 23 might screw up the FA Cup, although I haven't tried it. Ditto with the FA Trophy if there are less than 22 teams in the Conference.

Finally got around to checking out what effect reducing Northern Premier to 22 teams has on the FA Cup. And... The FA Cup Qualifying Round draw fails to take place and therefore the competition doesn't start.

Therefore I think it is fair to say that you can increase amount of clubs in English divisions, but reducing them messes up the FA Cup.

Might have a play around with Scotland to see how league sizes effect Scottish Cup(s).

JohnLocke 17-02-13, 09:12 AM

FREE

Fods

So that's all the 5809 error is?

JohnLocke

Yes, unless there are other causes I'm not familiar with.

Also, I've just realised that in some cases there was a good reason for checking club names - this is how the game creates a link between one club and their B team. So, for example, renaming Barcelona will still cause an error and leave them with no connection to Barcelona B.

Edit: it appears this error is a generic 'something is missing' error - so there are a lot more causes, including when a colour can't be found.

Fods

I just got the same error 5809 when using the Names Editor changing the Scottish comp names?

JohnLocke

I've just checked the code and the above fix should also work on all 3 Scottish cups - it should let you rename them in the data without needing to use the Names Editor.

JohnLocke

Coloured Attributes (work in progress)

0x87abf1: Change to CALL 09660e8 NOP NOP and all the attributes are black instead of yellow.

Somewhere in there Tapani has instructed the game to use different colours.

Edit:

0x9660e9: MOV EDX, DWORD PTR SS:[ARG.3] 0x9660ed: MOV CX, WORD PTR DS:[0AEBDEC]

EDX stores the attribute value (1-20) CX stores the colour each attribute should be displayed.

I can't get Tapani's modification to work - it must rely on something I don't yet know - however I have figured out it uses the attribute value itself as part of the calculation. For example, the result is something akin to setting the green element of the colour to 255 - (attribute value * 12).

JohnLocke

COLOURED ATTRIBUTES (work in progress)

Edit:

0x9660e9: MOV EDX, DWORD PTR SS:[ARG.3] 0x9660ed: MOV CX, WORD PTR DS:[0AEBDEC]

EDX stores the attribute value (1-20) CX stores the colour each attribute should be displayed.

I can't get Tapani's modification to work - it must rely on something I don't yet know - however I have figured out it uses the attribute value itself as part of the calculation. For example, the result is something akin to setting the green element of the colour to 255 - (attribute value * 12).

JohnLocke

Still working on it...

http://i46.tinypic.com/34i5x5g.gif

Golly

009291B2 - Offset for the first year the FIFA Club World Cup takes place.

Change it from CMP AX,7D3 to CMP AX,7D1 and the Competition takes place in 2001.

NB 7D3 is hex for 2003 and obviously 7D1 is hex for 2001.

I know the offset of Intro Header colour. But it seems that heres no one colour -> one element. Theres colour -> different elements. So when i

changing red header background to black - Red cards and you have news also becoming black. Any ideas how to attach it to another colour?

JohnLocke

Post the offset and I'll have a look.

MarcoVanBast

1e45d9 - it not olly offset, i using HxD, olly seems + 4. It offset of red byte i think.

JohnLocke

Ah, that colour seems to be stored at 0AE31A8, which is accessed 80 times.

If you know how to use Olly (or something similar), you could find an empty 4 byte block and put another colour in it - then find any the references to the original colour and replace them with references to the new location.

JohnLocke 11-03-13, 07:28 PM

FREE

MarcoVanBast

I know Olly a little.

then find any the references to the original colour and replace them with references to the new location.

Any idea how to do that? I maen i can change all the 80 references and change one by one to see which is header background, but how to do it? Ctrl+R in ascii editor?

JohnLocke

If you go to address 0AE31A8 in Olly you'll see: ADD BYTE PTR DS:[EAX],AL (lots of them).

Press ctrl+r (make sure you're on the right line), a new window will appear with all references - double-click each in turn and you can get a rough idea what they relate to as there will be some text shown, e.g.

Address = 0081BB1A Command = MOV DX,WORD PTR DS:[0AE3184]

Which is referred to at:

0081BB13 66:8B0D 8431AE00 MOV CX,WORD PTR DS:[0AE3184] 0081BB1A 66:8B15 A831AE00 MOV DX,WORD PTR DS:[0AE31A8]

To start with small steps, swap the two values (0AE3184 & 0AE31A8) and save to file - then start run the edited file.

If you get the colours to swap then come back and I'll see if I can find some more colour locations.

11-03-13, 08:06 PM

great will try. BIg thanks JL!

PS: However didnt understand really much :) need to try with olly opened.

MarcoVanBast

JohnLocke colour chhanged :)

MarcoVanBast

How u find that exactly that reference to start game background header? by random clicking and finding smth looks like start game strings?

As i understand now i need to change reference to bytes-colour (i wanna green like cm9900) so i need to change reference to **positions boxes** colour right?

MarcoVanBast

I mean i dont nned new block of bytes i wanna use those which already there.

JohnLocke

First try to find all the colours, go to the offset you post and look for lines that look like:

MOV WORD PTR DS:[0AE31A2],CX.

Now try editing the title colours again to include this new value (0AE31A2), then make a note of which colour is stored at this location. When you know where each colour is stored you can start editing the colours by changing the location the game is looking for a colour.

What are you wanting to change the colour of? Just the title?

MarcoVanBast

What are you wanting to change the colour of? Just the title?

Background of title. And maybe background of title when u are on **settings** screen and add manager - but its not important as start game title screen.

JohnLocke

OK, so go through the list of colours as described above, then edit the values here: 0081BB13 66:8B0D 8431AE00 MOV CX,WORD PTR DS:[0AE3184] 0081BB1A 66:8B15 A831AE00 MOV DX,WORD PTR DS:[0AE31A8]

Change the value in the square brackets.

MarcoVanBast

Ok will try. U are best as always JL :)

MarcoVanBast

After some code searching finally done what i want :) Noy sure i find ALL the colors coz i dont find pure black for example, find 24 colours.

Bomberinho

offset for spanish cup?

JohnLocke

0053D819: MOV ECX, DWORD PTR DS:[9D0120]

Amend this to: MOV ECX, -1

This will disable the Basque-only restriction at Athletic Bilbao.

JohnLocke

12-03-13, 08:37 PM

12-03-13, 08:37 PM

I'm looking to make a new application to simplify the process of editing player restrictions in various leagues. I'm looking for as many offsets as I can get, I've done some scanning and found the following but if anyone that has any more I'd really appreciate it.

+5579c63 (England Match Rules) 5c1a53 x 5c1a5a x 5e02f8 Unknown (3), Germany 5e02ff Unknown (18) Germany 5ed048 Unknown (5), Greece 5ed04f Unknown (4), Greece 6397f1 Unknown (0), Irish Presidents Cup? 6d79ed Unknown (0), ? 6d7adc Unknown (0), ? 6d7ae6 Unknown (0), ? 794753 Unknown (3), Norway 8595a5 Unknown (4), Spain 8595b9 Unknown (2), Spain 8595c9 Unknown (4), Spain 8595d1 Unknown (3), Spain 90a731 Unknown (0), MLS All Stars

+2 40aa23 Unknown (4), Argentina 412dc3 Unknown (6), Australia 43f2c8 Unknown (2), Brazil 6670a3 Unknown (3), Japan 7cd973 Unknown (18), Poland 7ec978 Unknown (3), Russia 902203 Unknown (0), Turkey 90222d Unknown (6), Turkey 90ba88 Unknown (18), USA

If anyone can confirm what any of the are I'd also appreciate it. The number in brackets is the number of players allowed. +5 is for non-eu restriction, +2 wasn't in the tutorial but, as a guess, I'd say it is non-region or non-continent restriction (I've only played in Australia from that list).

I'll see if I can find some more at the weekend.

John

Dermotron

Does that reference Bilboa and the Nation specifically?

Just wondering would be possible to a Nation specific restriction to any club

JohnLocke

The way the code is written it only allows Spanish clubs to have the Basque restriction. I can probably remove the check on the club being Spanish (although this would make the game loop through all clubs, which might be visibly slower) but the club would need to be one that the editor won't let vou rename.

Edit: scratch that about making it slower, it would be fractionally slower but not enough to notice.

Dermotron

Cool. Sounds like it could make for an interesting twist in a game. There are plenty of clubs that can't be renamed. (None in Italy or France though)

djole2mcloud

fantastic!

Editing the nation 'basque' clubs are restricted to: 008CEBB5: MOV EAX,DWORD PTR DS:[9CF424] - original value, basque restriction 008CEBB5: MOV EAX, DWORD PTR DS: [9CF488] - restricts them to just Spanish players. 12-03-13, 09:45 PM

008CE9D0: MOV EDX,DWORD PTR DS:[9CF458] 008CE9D6: CMP ECX,EDX 008CE9D8: JNE SHORT 008CEA14

9CF458 is Saudi Arabia, this is the code that stops you from buying Saudi players. Changing 9CF458 will allow this rule to be applied to another nation instead.

Alternatively, deleting JNE SHORT 008CEA14 (filling with NOP) will apply this restriction to everybody unless they already play abroad.

It won't edit the messages the game shows though, they'll still refer to Saudi Arabia.

JohnLocke

free

Alan

On a related theme, can you find where Real Sociedad are restricted to Basque Spaniards and Foreign players (i.e. they can't sign Spanish players unless they have Basque 2nd Nat.) This self-imposed rule no longer exists so it would be great for Real Sociedad to be able to act without any transfer restrictions.

Fods

John, do you plan on adding all of these finds to one exe file to make the game as accurate as you can to current date, obviously without all the league structures etc but all these small things you are finding all in one exe would be amazing... or do you plan on having a patcher like app where people would select each change them self?

MarcoVanBast

Always wanted the 3 stars in team showed also when i controlling team - is it possible?

JLPatch should have some extra features at some point over the weekend.

On a related theme, can you find where Real Sociedad are restricted to Basque Spaniards and Foreign players (i.e. they can't sign Spanish players unless they have Basque 2nd Nat.) This self-imposed rule no longer exists so it would be great for Real Sociedad to be able to act without any transfer restrictions.

Done.

008CECAC: MOV ECX, DWORD PTR DS: [9D0128]

Change to: 008CECAC: MOV ECX,-1 008CECB1: NOP

I'll add this to the JLPatch shortly.

JohnLocke

14-03-13, 09:28 PM

Alan

Brilliant, thanks for that.

JohnLocke

Before: 00872538 - JE 00872620 After: 00872538 - JMP 00872620 0087253D - NOP

Result - you can no longer offer trials.

Same thing for disabling transfer and loan bids

0087278D JE 00872918 to 0087278D JMP 00872918 00872792 NOP

I believe this just impacts on the user interface, so the AI should still be able to buy players.

And another...

00872077: JNE 00872165

Change to JMP 00872165 and you won't be able to release players on free transfers.

John can you confirm something for me? Else I will go nuts or break something up :D.

Did SI apply some sort of CRC mechanism in cm0102.exe file? Would make sense why my stuff breaks it... If not, then there must be some sort of other algorithm preventing the file from exceeding MB limit. At least that what it looked like to me... Though I may be completely wrong here :lol:.

Btw amazing job getting all those offsets. Assembly is out of my head for long time now :lol:. Hated it (despite it being the lowest programming level, so you should know basics of it if you're trying to be serious programmer :lol:).

Great job and :ok: up.

JohnLocke

15-03-13, 08:23 PM

Not to my knowledge, what are you trying to do?

I know the game crashes if renamed but only because of Cpuinf32.dll (in the Data directory), delete that and it's happy.

I know what you mean, I did some Assembly at uni and never really understood what I was doing - but now I can see what is happening from what must look like gibberish to most people.

info0

15-03-13, 08:26 PM

Yeah, Uni made me hate it with passion to be fair... -.-

Trying to inject some code into exe file. But here is when you hit wall. I must be missing something Tapani did in 3.12 patchers. Well, I never give up though, so scratching my head, lots of coffee and good night ahead of me :D.

15-03-13, 07:51 PM

What exactly do you mean do you mean bu inject code? I know Tapani re-wrote large chunks of code and added code into the gaps - is that what you're doing?

info0

Yep, trying to do. That guy was a wizard, remember ;).

Though I don't need to rewrite "that" much. Still missing the guy a lot :(. He could be helpful again. :/.

Actually, might say, trying to rewrite his harder AI stuff. Without source code. Yeah!

Jumped from high platform here :lol: and the landing might be hard, but who does not try gets nothing ;).

JohnLocke

So true, it's amazing to think he could see errors in the original C++ code and fix them just using Olly.

Let me know if I can help at all.

info0

Oh definitely you may and I will probably end up hitting on your door :).

JohnLocke

008EC856: JE SHORT 008EC8A8 008EC962: JE SHORT 008EC9B4 008ECAEE: JE SHORT 008EC8H0 008ECC1F: JE SHORT 008EC5F 008F3ED9: JE SHORT 008F3F2B 008F3FC7: JE SHORT 008F4029

Change all these JE to JMP and you can reject any bid even if it should trigger a release clause.

MarcoVanBast

JL any chance to disable ALL transfers? it will be great feature as "disable first transfer window" in FM, after december in game just re-edit .exe and playing with transfers.

JohnLocke

Quote:

Originally Posted by MarcoVanBast 👀

After some code searching finally done what i want :) Noy sure i find ALL the colors coz i dont find pure black for example, find 24 colours.

One possible solution to this is to find a 4-byte block of NOP instructions - of which there are many, e.g. 0x573375. Then replace the 4 NOP (0x90) with 0x0 (Right click > Edit > Binary edit). Then use this location where you were using the locations where the other colours are stored.

That should quite easy - I think I can just edit the basque restriction code to always block the transfer irrespective of which club tries to sign the player.

djole2mcloud

can u take a try to find offsets that breaks the link beetween NIR,ROI and Welsh leagues with England...to avoid promoting young players from this countries through English clubs...?Same for Belgium and Holland... thanks

JohnLocke

Not really sure what that would look like in the code but I'll keep it in mind.

Pasquale

00606254	> 393D 44F59C00	CMP DWORD PTR DS:	[9CF544],EDI =	"MONTSERRAT"

The important bit it the '[9CF544],EDI = "MONTSERRAT" section. Every reference in Olly to 9CF544 relates to Montserrat.

Interesting, if you go to this location there's nothing there - this is because the game sets the value at this location at run time based on the name of the country - which is why the game can't handle countries being renamed.

JohnLocke

00606215	> 393D 38F59C00	CMP DWORD PTR DS:[9CF538],EDI	= "TURKS AND CAICOS ISLANDS"
0060622A	> 393D 3CF59C00	CMP DWORD PTR DS:[9CF53C],EDI	= "US VIRGIN ISLANDS"
0060623F	> 393D 40F59C00	CMP DWORD PTR DS:[9CF540],EDI	= "ANGUILLA"
00606254	> 393D 44F59C00	CMP DWORD PTR DS:[9CF544],EDI	= "MONTSERRAT"

The important bit it the '[9CF544],EDI = "MONTSERRAT" section. Every reference in Olly to 9CF544 relates to Montserrat.

Interesting, if you go to this location there's nothing there - this is because the game sets the value at this location at run time based on the name of the country - which is why the game can't handle countries being renamed.

JohnLocke

I have discovered a new way of understanding the code during decoding the section.

MOV EAX, DWORD PTR DS:[ECX+53] would previously have been a bit of a mystery but I now know that it is accessing the value 83 (53 in hex) bytes into a club - which is the field 'nation id'. I'll post some more examples of this that should help improve our understanding of the code.

Interesting, if you go to this location there's nothing there - this is because the game set the name of the country - which is why the game can't handle countries being renamed.	

the game can't, but can you through olly? i mean, if you change the name of a nation there, then will the game crash or not?

JohnLocke

Indeed nations can be renamed with Olly - as long as the name in Olly matches the data the game won't crash.

JohnLocke

00482CA9: JNE SHORT 00482D04

Change this to JMP and you won't be able to apply for jobs - you'd have to wait to be offered a job.

Replace this line with NOP NOP.

Works brilliant :)

JohnLocke

0053D7F0: MOV ECX,DWORD PTR SS:[ESP+4] 0053D7F4: TEST ECX,ECX

Change to: 0053D7F0: MOV EAX,1 0053D7F5: RETN

This will impose the basque-only restriction on every club, net result is that only a handful of transfers will happen.

The following changes the nationality that everyone is restricted to and changes it from Basque to -1; as nobody has -1 for a nationality (nationalities start at 0 for Afghanistan) no club will be able to sign anybody, not even free transfers. Clubs will only get the players that come through their youth team.

008CEBB5 A1 24F49C00 MOV EAX,DWORD PTR DS:[9CF424]

Change to: 008CEBB5 B8 FFFFFFF MOV EAX,-1

Making this change will probably get really boring as I suspect lots of clubs will have squads full of grey players as their players leave and don't get replaced.

I've actually been looking at this one on and off. As you are probably aware I found the offset for the year the World Club Champ starts a few weeks ago- allowing you to start in 2001. I'll report back if I make a breakthrough.

Hmm i already have WCC start year i even posted it here :) what interseting if u set 2000 and start game in 1999, it will be played in 1999.. seems "2 years" rule here acting.

17-03-13, 09:08 PM

From my experience the game doesn't seem to like it being played in an even number year. I set it to 2002 and the first tournament was played in 2003.

Maybe i playing with it rather long time ago. I just remember i can set 1999, 2001., 2002 etc but not 2000.

JohnLocke

0085C351: MOV EAX, DWORD PTR DS:[9D0264]

This piece of code sets the stadium at which the European Super Cup is played. It is set using a club and then uses that club's stadium.

9D0264 refers to AS Monaco, changing this to 9D0120 (Athletic Bilbao) alters where the game is played from Stade Louis II to San Mamés.

JohnLocke	17-03-13, 10:08 PM

Golly

Where do you find the codes for each club?

JohnLocke

Olly, bottom left, ctrl+b, ASCII (untick 'ignore case'), then type a club name in uppercase replacing spaces with '_', e.g. MANCHESTER_UNITED.

MANCHESTER_UNITED is found at 0x9d2040 (lots of other clubs are nearby too). Click on the 'M', ctrl+r, then click on the only reference that is listed on the window that comes to the foreground. This will take you to:

0060A973 | > \393D 40029D00 CMP DWORD PTR DS:[**9D0240**],EDI 0060A979 |. 75 0D JNE SHORT 0060A988 0060A978 |. 68 40209D00 PUSH OFFSET 009D2040 ; ASCII "MANCHESTER_UNITED"

To do that would require a random number generator of some sort and I don't know how to do that, would be nice though.

milo

You don't have to go too far back to find a post I made because I didn't understand how to use Olly and needed some help. Practise is the best way. I have probably uninstalled and reinstalled the game 100 times in the last couple of months while I tinkered with various things and experimented. I have made more mistakes than I care to remember, but keep plugging away and you start having successes and more importantly you work out the limitations to what can be achieved.

This is something i have been wondering about too.

what i noticed is that when I load all leagues, there are a few players who suddenly change names. they keep atts, caps etc. but their name is different and they are not under any contract officially (albeit they are at the right club). yet you cannot sign them for some reason

JohnLocke

If you pick a club in a playable country you can still get into cup competitions.

This is available on the 2.19 patch - think it possibly requires eval.bat running 1st though

Alan

You needed to choose the benchmark option in the patch. You could then choose to manage lower league clubs from the nations you had selected. Also, with this option the interface had been changed so that in theory all clubs (including non-league clubs) were listed at the point of club selection, but due to certain constraints only a certain number were actually visible.

This hack above doesn't change the interface so if you want to manage a club not on the normal list then you have to find them via player history or some other means. There is an interesting benefit to this change though, in that it will allow you to manage B teams, although the same constraints seem to apply as when managing a B team via editing through CM Explorer, in that the A team manager has full control over player promotion and relegation and player purchases.

Dermotron

Increasing squad size is an interesting one given clubs with B teams can still only have 50 players split between each club. If you could have up to 100, even 80, it would be nice to have. Instead on having the likes of Parma with 50 players in one squad, 30 in a bogus Parma (R) and 14 on permanent deals at the wrong clubs.

Be good fun developing strong B teams full of youth players

MarcoVanBast

Golly

18-04-13, 12:20 PM

I had a request via a PM for a bit of help with a competition. I won't say who it was, but the competition was the Northern Irish Charity Shield.

The question was, is it possible to change which competitions provide the entrants for the NI Charity Shield. ie Can you change it from Premier Division winners v Cup winners to something else.

Well, I had a quick scan through and within the NI Charity Shield offsets I found 3 references to other competitions.

These offsets are: 0078A26E - MOV EAX,DWORD PTR DS:[9CF8C0] 0078A2D5 - MOV EAX,DWORD PTR DS:[9CF8B0] 0078A345 - MOV EAX,DWORD PTR DS:[9CF8C0] 18-04-13, 11:49 AM

26-04-13, 07:27 PM

12-04-13, 09:21 AM

The first and last reference the NI Cup and the middle on references the NI Premier Division.

So, my suggestion would be to try and change these references to the other competitions you want the winners of to qualify for the NI Charity Shield.

The competition references for Northern Ireland are as follows:-9CF8B0 - PREMIER DIVISION 9CF8B4 - FIRST DIVISION 9CF8B8 - LOWER DIVISION 9CF8BC - CHARITY SHIELD 9CF8C0 - CUP 9CF8C4 - GOLD CUP 9CF8C8 - LEAGUE CUP

Hope this might be helpful to anyone with an obsession with Northern Irish football.

26-04-13, 07:35 PM

26-04-13, 07:41 PM

26-04-13, 07:42 PM

I am not really interested in Northern Ireland. But I tried doing the same with the English Charity Shield. I changed it from winners of Premier League v winners of FA Cup to winners of Conference v winners of FA Trophy. And....

English Charity Shield fixture... Boston United v Yeovil Town (Conference champions v FA Trophy winners)

So, Pasquale the above post should sort out your problem.

Pasquale

How can I change to norther ireland?

Pasquale

Sorry Golly, finally I succeeded thanks to your help ... but the problem is that having the teams in the premier division decreased from 10 to 8 and that of the second division from 10 to 12, reactivating the league cup game is wrong. ..

Golly

There's probably an offset in the NI League Cup saying there has to be 10 teams from the Premier Division. If you only have 8 that will be your problem. You need to try and locate the offset and change it from 10 (0A) to 8 (8). And there may well be a similar one for First Divison to change from 10 (0A) to 12 (0C).

You just want the Final to take place in the new year or more rounds?

I know which offset controls which year any fixture takes place (ie in season 2001-02 either 2001 or 2002), but I haven't mastered it with the couple of experiments I had.

Pasquale

The cup begins in 2012 and ends in 2012 ... I would like to begin in 2012 and end in 2013

Golly

Date offsets ARG 7 = TIME OF DAY (AM/PM/EVE) ARG 6 = DAY OF WEEK (MONDAY etc...) ARG 5 = YEAR ARG 4 = MONTH OF YEAR (JANUARY etc...) ARG 3 = DATE OF MONTH (1st etc...)

Arg 5 controls the year the match/draw takes place. For season 2001-02 the value 0 = 2001 and 1 = 2002 etc...

The problem with editing matches so they take place after the new year is that all dates for the first year seem to be hardcoded using the value EBX. So to change that to 1 is a pain in the arse.

The other way around (ie moving a game to before the new year from after it) is fairly straight forward. As the value for Arg5 = 1 and you can just change that to = 0.

How good with olly are you Pasquale?

I understand that, but there is a group stage, a quarter-final, a semi-final and a Final.

Which rounds do you want to be played in 2013? Just the Final or some earlier rounds too?

Pasquale

Golly I tried to change the date of the final of the League Cup, but I can not find the offset to advance to the next year ... you can tell me you?

Pasquale

Or change the cup of northern ireland .. instead of starting from 32 teams make 16 .. then 8 to 4 to 2 at least this is possible?

Golly

Do you ever actually read a post properly? I know English isn't your first language, but I have told you if you bother to read my posts in full. If you only want to change the Final you need to change offset 0078CE18 from PUSH EBX to a value which equals 1. Remember if you change it to PUSH 1 the next line will be overwritten and you will have to fanny about rewriting line after line after line.

I can't delete rounds of a competition, but what I can do is reduce the Northern Irish Cup to 16 teams (from 32) and change the first round from 32 teams to 16 and from 16 matches to 0. That way when the first round draw takes place every team will receive a bye and no matches will actually take place.

Pasquale

...

Have you ever heard of coincidence? While you where typing the post I will write another ... but I tried to change quell'offset but the game crashes

Pasquale

I said you can't overwrite a PUSH EBX with a PUSH 1 without the next line being deleted!!!!!!!!!!!!!

That's why your game crashed. You need to either find a way of using a PUSH EAX/EBX/ECX/EDX etc... where the EAX/EBX/ECX/EDX etc... = 1 or change it to PUSH 1 and then rewrite every line that follows until you reach a big group of NOPs and the offsets are all back in place.

Both, like yourself, are a pain in the arse.

Golly

I wish we could make the USA 2 divisions instead of 3.... increasing the number of teams wouldn't be that hard.....

Fods			03-05-13, 01:51 PM
U can			

Pasquale

I would like to exchange USA with San Marino but the MLS has 12 teams...

djole2mcloud

u have lot of minor American leagues that must be also replaced with teams from san marino...and i don't know is there a 200 clubs from san marino

Quote:

me to now only interested in increasing the teams in the MLS ...

Kowalinho

Is there any offset for number of groups in Greece Cup? To have less than 4 groups? Or probably changing from groups/knockout to only knockout phase. (I'm swapping Greece with luxembourg and have problems with cup).

Hi guys,

Am trying to find the offsets to change relegations from the two German regional divisions but can only find one of them.

These offsets are the only ones I found that seem to fit the bill:

005DDA43 - MOV BYTE PTR DS:[ESI+C1],5 005DDA4C - MOV BYTE PTR DS:[ESI+C1],4

Changing 005DDA4C to end with a 0 means North has no relegations (instead of original 4) but changing the other one has no obvious change on anything, and South still has 4 relegations.

Does anyone know if there's a particular code/pattern I should be looking for when a league level is split into different divisions?

Thanks

Look at the code only 1 of the above lines is ever executed never both. Some value (a year presumably) is compared to 2000 (7d0 hex) at 0x5dd9fa - so I assume the German league was restructured in 2000 meaning 4 are relegated except in 2000 when 5 were.

Southern code might be separate but I can't find it either.

Nice find though.

Not tested this...

007A0BB9 | MOV EAX, DWORD PTR DS: [9CF260] - I think this is the line that causes Brazil to play in the Olympics.

If someone wants to test it, try changing the value to 9CF264 and holiday to the Olympics - if I'm right then Brunei should take part instead.

The offset for subs allowed to use in Russian First is 007EA87F. BUT the value for this offset is DL (which = 3) and changing the value of DL (007EA818) will also change points for a win and another offset. So, unless you are very clever I wouldn't bother trying.

ACTUALLY ...

I have managed to come up with a work around for this problem.

Change 007EA875 from NOP > MOV DL,4

I have had a quick look and this works- you can use 4 subs in the Russian First Division. You will have to check yourself that nothing else has been screwed up by this though.

Couldn't find these in other pages on this thread so putting them up for anyone who's interested, sorry if already common knowledge :):

Offsets for Promotion/Relegation between English Third Division & Conference.

English Third Division Relegation: 00578111 – MOV BYTE PTR DS:[ESI+BE],BL (Changing ending from "...+BE],BL" to "...0BE],AL" creates 3 automatic relegation spots

English Conference Promotion: 0056EE23 - MOV BYTE PTR DS:[ESI+C1],CL (changing ending from "...+C1],CL" to "...0C1],AL" creates 3 automatic promotion spots

Scottish Promotion/Relegation Offsets

Premier Division Relegation: 007F29CF - MOV BYTE PTR DS:[ESI+C1],BL (...+0C1],DL)* 007F29A1 - MOV BYTE PTR DS:[ESI+C1],AL (...+0C1],DL)*

First Division Promotion: 007EEE90 - MOV BYTE PTR DS:[ESI+BE],BL (...+0BE],DL) Relegation: 007EEEB0 - MOV BYTE PTR DS:[ESI+C1],CL (...+0C1],DL)

Second Division Promotion: 007F3FBD - MOV BYTE PTR DS:[ESI+BE],AL (...+0BE],DL) Relegation: 007F3FDD - MOV BYTE PTR DS:[ESI+C1],AL (...+0C1],DL)

Third Division Promotion: 007F4F33 - MOV BYTE PTR DS:[ESI+BE],AL (...+0BE],CL)

For what it's worth, the figures in brackets are the changes I made to make all promotions 3up-3down between all the divisions So it's PD>3<FD>3<SD>3<TD rather than the original PD>1<FD>2<SD>2<TD

*both of these changes seem to be necessary so the SPL split after game 33 still happens (when it's three relegation spots a lot of those last games are suddenly cup finals!)

Am 12 seasons in and no error messages.

ChrisWex

Code

18-05-13, 08:16 PM

18-05-13, 08:16 PM

I think I've figured out a way of renaming competitions that neatly gets around the issue of name lengths being restricted. Can someone test this?

1) Save the following text as a file called 'Greek Cup.patch'.

0xal 0xb8
0x78 0x8e
0xf8 0x0
0x9c 0x0
0x0 0xc3
0x0 0x90
0x0 0x90
0x0 0x90
0xal 0xb8
0x78 0x8e
0xf8 0x0
0x9c 0x0
0x8b 0xba
0x15 0x8e
0x78 0x0
0xf8 0x0
0x9c 0x0
0x0 0x90

2) Download Flex 2 and run Patch Install, select your exe (back it up first), then click 'apply' and select the above file.

3) Edit the name of the Greek Cup in an editor - you don't need to use the Names Editor and you can give it a longer name.

4) Start a new game.

If I'm right the game should run as normal and display the new name instead of 'Greek Cup'. If this works I'll post details on how this works and how to do it for other competitions.

JohnLocke

I think I've figured out a way of renaming competitions that neatly gets around the issue of name lengths being restricted. Can someone test this?

1) Save the following text as a file called 'Greek Cup.patch'.

Code:

0x1ec536	0xal 0xb8
0x1ec537	0x78 0x8e
0x1ec538	0xf8 0x0
0x1ec539	0x9c 0x0
0x20d780	0x0 0xc3
0x20d781	0x0 0x90
0x20d782	0x0 0x90
0x20d783	0x0 0x90
0x268263	0xal 0xb8
0x268264	0x78 0x8e
0x268265	0xf8 0x0
0x268266	0x9c 0x0
0x434a2f	0x8b 0xba
0x434a30	0x15 0x8e
0x434a31	0x78 0x0
0x434a32	0xf8 0x0
0x434a33	0x9c 0x0
0x434a34	0x0 0x90

2) Download Flex 2 and run Patch Install, select your exe (back it up first), then click 'apply' and select the above file.

3) Edit the name of the Greek Cup in an editor - you don't need to use the Names Editor and you can give it a longer name.

4) Start a new game.

If I'm right the game should run as normal and display the new name instead of 'Greek Cup'. If this works I'll post details on how this works and how to do it for other competitions.

Kowalinho

Sorry, i can't. No change in editor and names editor crashes after choosing "clubs comps names"

JohnLocke

Ah, just realised that the Patch Installer doesn't actually work - the changes are not saved.

JohnLocke

18-05-13, 09:53 PM

18-05-13, 09:32 PM

These changes just tell the game to use the id number of the greek cup (8E, 142 decimal) rather than using the value stored at 9CF878.

Finally, to suppress the error message caused by renaming a competition change the following 0060D780: MOV EAX,DWORD PTR SS:[ESP+4] to RETN NOP NOP NOP

JohnLocke

18-05-13, 10:00 PM

18-05-13, 10:41 PM

18-05-13, 10:53 PM

18-05-13, 11:16 PM

23-05-13, 09:40 AM

23-05-13, 02:54 PM

Try this: 005EC536: MOV EAX,DWORD PTR DS:[9CF878] to MOV EAX,8E 00668263: MOV EAX,DWORD PTR DS:[9CF878] to MOV EAX,8E 00834A2F: MOV EDX,DWORD PTR DS:[9CF878] to MOV EDX,8E NOP

These changes just tell the game to use the id number of the greek cup (8E, 142 decimal) rather than using the value stored at 9CF878.

Finally, to suppress the error message caused by renaming a competition change the following 0060D780: MOV EAX,DWORD PTR SS:[ESP+4] to RETN NOP NOP NOP

JohnLocke

Or download this: http://www.sendspace.com/file/lcymc3

Then edit the name of the Greek Cup in the data and start a new game.

ChrisWex

JL, what kind of file should it be saved as? just had a quick go and the cmd window went crazy! (tried it as a notepad file)

ignore me, hadn't checked most recent posts.

ChrisWex

Yep, it worked for me.

Downloaded the exe you linked to then used Tri Wasono's editor to change "Greek Cup" to "Greek Challenge Cup" for short & long names and game started with no problem

holidayed for 4 seasons and no errors

Nice work JL

Pasquale

You can change the participants in the fifa club world championship?

ChrisWex

26-05-13, 11:06 AM

Cardiff City, Swansea City and Wrexham play in the English leagues and as a result the data has to have them as English clubs, the game however displays that they are Welsh - this is how it does it.

00460D77 MOV ECX,DWORD PTR DS:[9D0430] //9D0430 is Swansea City, set using a name lookup elsewhere. 00460D7D CMP EAX,ECX 00460D7F JE 00460E0A 00460D85 CMP EAX,DWORD PTR DS:[9D0434] //9DO434 is Cardiff City 00460D8B JE SHORT 00460E0A 00460D8D CMP EAX,DWORD PTR DS:[9D043C] //Wrexham

00460E0F PUSH OFFSET 009904F4 ; ASCII "Wales<%s - COMMENT - Country Name>"

All the above (and nearby code) does is display the text 'Wales' (the '<' onwards is ignored, it's there to tell the developers what the text is for only) if the club being looked at is one of the 3 mentioned.

One thing that might be of use to people is the following:

Move Rangers and Celtic into England - which would necessitate them being English in the data, then...

00460D77 MOV ECX,DWORD PTR DS:[**9D0118**] //Glasgow Celtic 00460D7D CMP EAX,ECX 00460D7F JE 00460E0A 00460D85 CMP EAX,DWORD PTR DS:[**9D011C**] //Glasgow Rangers 00460D8B JE SHORT 00460E0A 00460D8D CMP EAX,-1 NOP NOP NOP //EAX will never be -1, this just removes the Wrexham check as we only need to do this for 2 clubs now.

005F0DAA PUSH OFFSET 009CE6A4 ; ASCII "Scotland<%s - COMMENT - hall of fame menu>" //just re-using an existing piece of text already present in the exe.

JohnLocke

26-05-13, 11:06 AM

Cardiff City, Swansea City and Wrexham play in the English leagues and as a result the data has to have them as English clubs, the game however displays that they are Welsh - this is how it does it.

00460D77 MOV ECX,DWORD PTR DS:[9D0430] //9D0430 is Swansea City, set using a name lookup elsewhere. 00460D7D CMP EAX,ECX 00460D7F JE 00460E0A 00460D85 CMP EAX,DWORD PTR DS:[9D0434] //9D0434 is Cardiff City 00460D88 JE SHORT 00460E0A 00460D8D CMP EAX,DWORD PTR DS:[9D043C] //Wrexham

00460E0F PUSH OFFSET 009904F4 ; ASCII "Wales<%s - COMMENT - Country Name>"

All the above (and nearby code) does is display the text 'Wales' (the '<' onwards is ignored, it's there to tell the developers what the text is for only) if the club being looked at is one of the 3 mentioned.

One thing that might be of use to people is the following:

Move Rangers and Celtic into England - which would necessitate them being English in the data, then...

00460D77 MOV ECX,DWORD PTR DS:[**9D0118**] //Glasgow Celtic 00460D7D CMP EAX,ECX 00460D7F JE 00460E0A 00460D85 CMP EAX,DWORD PTR DS:[**9D011C**] //Glasgow Rangers 00460D8B JE SHORT 00460E0A 00460D8D CMP EAX,-1 NOP NOP NOP //EAX will never be -1, this just removes the Wrexham check as we only need to do this for 2 clubs now.

005F0DAA PUSH OFFSET **009CE6A4**; ASCII "Scotland<%s - COMMENT - hall of fame menu>" //just re-using an existing piece of text already present in the exe.

djole2mcloud

can this be used for bigger number of clubs...example for various super leagues patches where all clubs should retain their nationality...?

JohnLocke

Could do but as with so many things a lack of available space in the exe restricts what can be done. There is only space for 3 clubs and all would need to be in the same country, I suppose you could use JMP or CALL instructions to leap into space somewhere else but not sure you could find enough space to do a whole league of teams.

Pasquale

Pasquale

John you can change the participants in the league for fifa club? for example, instead of inserting the African team to enter the winner of a championship?

JohnLocke

Possibly - what competition does a club have to win in order to be invited?

Pasquale

I would like to enter: 1) northern ireland premier league winning 2) Three Flowers 3) FC Vaduz 4) HB Torshavn 5) FC Valletta 6) KR Reykjavik 7) FC Pyunik 8) F91 Dudelange 9) Flora Tallin 10) Zalgiris Kaunas 11) Skonto Riga 12) APOEL Nicosia

is possible inserie these teams?

Pasquale

Or in addition to winning the premier league northern ireland other rolling but always and only national ones mentioned

JohnLocke

Just done a bit of tinkering and have managed to get the champions of Norway into the competition.

Original: 0092AA8B: MOV EDX,DWORD PTR DS:[9CF6F0] //UEFA Cup

Modified:

0092AA8B: MOV EDX, DWORD PTR DS:[9CF6BC] //Norwegian Premier Division

26-05-13, 05:48 PM

26-05-13, 05:48 PM

26-05-13, 06:30 PM

26-05-13, 07:18 PM

26-05-13, 07:48 PM

26-05-13, 07:50 PM

26-05-13, 07:51 PM

Some participants seem to have been picked at least partly at random as some of the clubs haven't won anything recently, e.g. Asante Kotoko and Monterrey.

JohnLocke	26-05-13, 07:56 PM
Not sure I could get specific team into it, especially if the team isn't 'hard coded' into the game.	
Pasquale	26-05-13, 07:56 PM
How do you write in hexadecimal norther ireland premier league, San Marino, Liechtenstein, Luxembourg, Malta, Cyprus, Lithuania, Faroe Island, Iceland? and what are the offsets to change?	, Armenia, Estonia, Latvia,
I would be grateful for this help John	
Pasquale	26-05-13, 08:19 PM
Help John:hail::hail::hail::hail:	
JohnLocke	26-05-13, 08:31 PM
9CF8B4 is the Northern Irish Premier League, the rest are a little tricky as they don't see to be hard-coded.	
It might be possible to use the id number of the competition (which is the value stored at the offset) but if the league isn' sure the game will be able to find the team that won that league.	't playable then I'm not
Pasquale	26-05-13, 08:34 PM
But the offsets of the other teams where I find them? this and tell me how to write in hexadecimal those nations pleas	se John
JohnLocke	26-05-13, 08:42 PM
To find offsets for clubs see: http://www.champman0102.co.uk/showth8020#post88020	
Most clubs aren't hard-coded though, so it won't work for the majority of clubs.	
Not sure I understand what you're wanting to do with this though.	
Pasquale	26-05-13, 08:50 PM
So let me explain so you know what I would do: I created the league of Andorra (in place of the Northern Ireland) and I those nations (ie Malta, Cyprus etc.) play a competition parallel to the Champions League know? I tried to do as you not find any of the teams that I told you	

JohnLocke

Hard-coding a club was done for a reason, e.g. linking B teams to their parent club as well as some others reasons I don't understand yet but the majority of clubs can just be renamed without fear that the game will complain about them being missing.

You could possibly replace some of the hard-coded clubs, for example Crystal Palace is hard-coded for no good reason I can find (I think this was because they were in Europe in 2001). To do this, find "CRYSTAL_PALACE" and overwrite it with another club name. This isn't enough yet though as at present I don't know how the game picks the club - somewhere it must find the winners of a competition and use that value (club id) but I don't know where this is yet. If you just swapped the UEFA Cup offset for a club offset the game would almost crash as it would be a number for which there was no competition.

Pasquale

instead you can do a similar thing with the Oceania champions cup?

JohnLocke

I found the 12 calls that pick which clubs take part, the first one is: 0092A9F2: CALL 0092AE60

There are then another 11 similar calls.

Arg5 is the competition - which is only used once (UEFA Cup), the rest seem to be picked on other criteria. The game uses -1 to signify that the club to pick is not based on a competition winner. Arg1 is the continent. 9CFA08=Africa, 9CFA0C=Asia, 9CFA10=Europe, 9CFA14=North America, 9CFA18=Oceania, 9CFA1C=South America.

26-05-13, 09:41 PM

26-05-13, 09:09 PM

26-05-13, 09:48 PM

Not sure it would work but you could create a new continent in the editor and move Northern Ireland to that continent. Then make sure EAX (used for Arg1) is always 6 (the id of any new continent, the existing ones being 0 to 5) - use MOV EAX, 6 at 0x92A9E3 and the other locations where EAX is set. The game should then pick a club (suspect it will be using club rep to ensure it pick the 'best' clubs) from this new continent.

Pasquale

John Ok now I try to do this test that you say ... I created a continent named" MICRO STATI" how do I turn it into hexadecimal?

JohnLocke	26-05-13, 11:17 PM
You shouldn't need to. Where the code refers to 9CFA08 (Africa) the value at this address will alwa	ys be 0 (the id number of the continent).
This: 0092AA09: MOV EAX,DWORD PTR DS:[9CFA08]	

Could be written: MOV EAX, 0

The result should be exactly the same.

Try changing the 0 to 6 (the id of the new continent) and as long as there is at least 1 nation (and some clubs) on this continent one club should get picked for the tournament (I think).

You could try changing the continents around first to see if that works, e.g. set all to Europe (9CFA10 - or just 2).

Pasquale

How do I give an ID to the new continent? I have created the continent" MICRO STATI" how do I enter the new ID in OllyDB of the continent?

JohnLocke

The editor will have done it automatically, it will assign 1 more than the previous maximum.

As the number of continents is fixed they will always be 0 for Africa, 1 for Asia, 2 for Europe etc. South America is 5, so your new continent will be id 6.

Pasquale

Sorry John so my ID would be 4 or 7? goes in alphabetical order the game?

JohnLocke

Yours would be 6 - the existing continents are numbered 0 to 5 (alphabetically).

JohnLocke

Just ran a quick test - I created a new continent and moved Northern Ireland to it; the game crashed a few months in.

JohnLocke

Just made the changes below - the competition has now picked 12 European clubs to take part (2 is the id for Europe).

Teams picked are: Arsenal, Bayern, Real Madrid, Romam Dortmund, Lazio, Liverpool, Valencia, Barcelona, Juventus, Man Utd & Villarreal.

0092A9E3: MOV EAX,2 0092AA09: MOV EAX,2 0092AA2C: MOV EAX,2 0092AA4F: MOV EAX,2 0092AA72: MOV EAX,2 0092AA72: MOV EAX,2 0092AA8B: MOV EDX,-1 //tells game not to use UEFA Cup winners 0092AA90: NOP 0092AA97: MOV ECX,2 0092AA8E: MOV ECX,2 0092AAE2: MOV ECX,2 0092AAE2: MOV ECX,2 0092AAE7: NOP 27-05-13, 07:43 AM

tinent?

26-05-13, 11:21 PM

26-05-13, 10:46 PM

26-05-13, 11:31 PM

26-05-13, 11:35 PM

27-05-13, 06:52 AM

27-05-13, 07:26 AM

0092AB06: MOV ECX,2 0092AB0B: NOP

0092AB2A: MOV ECX,2 0092AB2F: NOP

0092AB4E: MOV ECX,2 0092AB53: NOP

I didn't edit: 0092AB78: PUSH -1

I think this might have the effect of telling the game to pick a big club from any continent - as all the best clubs are in Europe the game picked one of them.

Paquale, if you change all the continent references to a continent with no great clubs, e.g. Oceania (4), then move N. Ireland to Oceania (maybe boost club and league reps too) this might get the clubs you want invited. Moving a nation might crash the game though.

Pasquale

John I tried to make these changes, by changing the first 6 offset okay, but after does not go .. after changing any other offset the game does not go as expected.

Pasquale

What is the offset to disable the Oceania Champions Cup?

CHAMPMAN

0102.CO.UK

JohnLocke

I have 830E66 as the offset for 'OFC Nations Cup' - is that the same thing?

If you've got Flex 2 on your computer there should be a folder called 'config', from there go to the 'onoff' folder for a file with all the offset for turning competitions on / off.

Pasquale

No OFC Nations Cup, but Oceania Champions Cup .. when to start the game with Australia winning the part in the Oceania Champions Cup .. I would like to disable this cup but how? I checked with Legion but this cup was not included ...

JohnLocke

Ah, if it's not in the Big On/Off Switch tool then I don't know how to turn it off. I've had a quick look in the exe and there doesn't appear to be an offset that stores the competition id - so it can't be turned off in the same way as other competitions.

Pasquale

John was able to exchange small nations with those of Africa but I only have two problems:

1) The city of matches can you change?

2) The cup is held every two years .. you can do it every year?

JohnLocke

Not seen anything to edit either of those. I've never seen the game record cities, so I suspect the game will be using clubs or nations and then selecting stadiums from there.

Pasquale

John I exchanged small nations with Africa, but when I start the game after changing the offset appears as a team Betis why?

JohnLocke

Were they UEFA Cup winners? If so, edit 0092AA8B to MOV EDX,-1. If not I don't know why.

JohnLocke

Try this: 0083204E: JE SHORT 00832096

Change JE to JMP - I think this will disable the Oceania Club Championship. Untested.

Pasquale

it is the offset however the team that participates in the Club World ... Spanish is always a time when Real Betis Athletic Bilbao or nop is the winner of the Uefa Cup

giovanisantana29

I think this is not possible, but it never hurts to ask:

Is there any way to put in the Match Rules of the Copa Libertadores the rule "Away goals used if scores are level after 90 minutes."?

JohnLocke	27-05-13, 05:58 PM
Not that I know of.	

Pasquale

No John I tried to change the offset with MOV EDX, -1 but the game crashes

JohnLocke

Not sure what's causing that, I've tried it with both Europe and North America; it worked both times - the only clubs selected where from the continent I specified.

Details in post 360 is all I was doing.

Pasquale

John but instead enter the name of the continent can not Enter your extension name of the nation?

JohnLocke	27-05-13, 09:23 PM

0092AFDB: MOV EDX,DWORD PTR DS:[EAX+53] //moves the clubs nation id into EDX

0092AFE2: MOV EDX,DWORD PTR DS:[EDX+71] //moves the nations continent id into EDX

0092AFF4: CMP WORD PTR DS:[EAX+80],BX //compares club rep to BX (set to 5000 @ 0x92AFB1

If you can tamper with this section (not just these 3 lines) it might be possible to make the code skips clubs not in a specified nation.

JohnLocke

0092AFDB: MOV EDX,DWORD PTR DS:[EAX+53] //moves the clubs nation id into EDX

0092AFE2: MOV EDX,DWORD PTR DS:[EDX+71] //moves the nations continent id into EDX

0092AFF4: CMP WORD PTR DS:[EAX+80],BX //compares club rep to BX (set to 5000 @ 0x92AFB1

If you can tamper with this section (not just these 3 lines) it might be possible to make the code skips clubs not in a specified nation.

Not that I know of.

JohnLocke

31-05-13, 06:03 AM

Pasquale, check this out:

0092AFE2 MOV DL,BYTE PTR DS:[EDX+75] 0092AFE5 TEST DL,DL 0092AFE7 JE SHORT 0052B016 0092AFE9 CMP DL,4 0092AFEC NOP 0092AFED NOP 0092AFE1 NOP 0092AFF1 NOP 0092AFF1 NOP 0092AFF1 NOP

EDX+75 (originally +71) is accessing the club's 'region' (rather than what country they are in). The following 2 lines just check if the region isn't set - the clever bit is CMP DL, 4 - which is comparing each club's region to Brazil.

List of all codes below. As you can see not every nation has a region of their own. You could try moving Northern Ireland into a region of their own by moving England, Scotland and Wales out of the 'Britain' region in the editor - not sure what impact this will have on other aspects of the game.

Code:

// nation region #define REGION_AFRICA 1
#define REGION_ASIA 2 #define REGION_BALKAN 3 #define REGION BRAZIL 4 #define REGION_BRITAIN 5 #define REGION_CARIBBEAN 6
#define REGION_CENTRAL AMERICA 7 #define REGION EASTERN EUROPE 8 #define REGION_FRANCE 9 #define REGION_GERMANY 10 #define REGION_HOLLAND 11 #define REGION_ITALY 12 #define REGION_JAPAN 13 #define REGION MIDDLE EAST 14 #define REGION_NORTH_AFRICA 15 #define REGION_NORTH_AMERICA 16 #define REGION_NORTHERN_EUROPE 17 #define REGION_CCEANIA I8 #define REGION_CCEANIA I8 #define REGION_RUSSIA 19 #define REGION_SCANDINAVIA 20 #define REGION_SOUTH_AFRICA 21 #define REGION_SOUTH_AMERICA 22 #define REGION SOUTHERN EUROPE 23 #define REGION_SPAIN 24 #define FIRST_REGION 1 #define LAST_REGION 24 // nation actual region // nation actual region
#define ACTUAL_REGION_AFRICA 1
#define ACTUAL_REGION_ASIA 2
#define ACTUAL_REGION_CARIBBEAN 3
#define ACTUAL_REGION_CENTRAL_AMERICA 4
#define ACTUAL_REGION_CENTRAL_EUROPE 5 #define ACTUAL_REGION_CENTRAL_EUROPE 5
#define ACTUAL_REGION_EASTERN EUROPE 6
#define ACTUAL_REGION_MIDDLE_EAST 7
#define ACTUAL_REGION_NORTH_AFRICA 8
#define ACTUAL_REGION_OCEANIA 10
#define ACTUAL_REGION_SCANDINAVIA 11
#define ACTUAL_REGION_SOUTH_AMERICA 12
#define ACTUAL_REGION_SOUTHERN_EUROPE 13
#define ACTUAL_REGION_OUTHERN_EUROPE 13
#define ACTUAL_REGION_UK_AND_IRELAND 14
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define FIRST_ACTUAL_REGION_1
#define ACTUAL_REGION_1
#define AC #define LAST_ACTUAL_REGION 14

If you want to use the 'actual region' change 0052AFE2 to EDX+76.

It's not perfect - the game still invited Dortmund (UEFA Cup winners), Man Utd (Champions League) and Atletico Madrid (not sure why) but the other 9 teams were from Brazil.

Edit - clubs invited from Brazil were: Atlético Mineiro, Corinthians, Cruzeiro, Botafogo, Coritiba, Vasco, Gremio, Internacional and Palmeiras.

JohnLocke

31-05-13, 06:03 AM

Pasquale, check this out:

0092AFE2 MOV DL,BYTE PTR DS:[EDX+75] 0092AFE5 TEST DL,DL 0092AFE7 JE SHORT 0052B016 0092AFE9 CMP DL,4 0092AFEC NOP 0092AFED NOP 0092AFEE NOP 0092AFEF NOP 0092AFF0 NOP 0092AFF1 NOP 0092AFF2 JNE SHORT 0052B00F

EDX+75 (originally +71) is accessing the club's 'region' (rather than what country they are in). The following 2 lines just check if the region isn't set - the clever bit is CMP DL, 4 - which is comparing each club's region to Brazil.

Pasquale

I tried to move the small nations instead of Oceania ... off the Champions League and tried to change offset 0092AFE2 MOV DL, BYTE PTR DS: [EDX +75] (although I did not understand with what I have to change it) and then 0092AFE9 CMP DL, 4 (with 18 number of Oceania) ... but the game crashes

Pasquale

John thanks for the help

JohnLocke

This pick 9 teams form a specified nation, Norway in this case.

0092AFE2 8B12 MOV EDX,DWORD PTR DS:[EDX] 0092AFE4 81FA 8B00000 CMP EDX,8B //8B is Norway, use 81 for Northern Ireland 0092AFEA 75 23 JNE SHORT 0092B00F 0092AFED 90 NOP 0092AFE5 90 NOP 0092AFE5 90 NOP 0092AFE5 90 NOP 0092AFF1 90 NOP 0092AFF1 90 NOP 0092AFF1 90 NOP 0092AFF3 90 NOP

3 non-Norwegian clubs were still invited (including the CL winner and UEFA Cup winner).

Golly

02-06-13, 07:41 AM

There's a reference to the UEFA Cup (9CF6F0) at 0092AA8B with a reference to Europe just below it. You could always try changing thede to another competition and country and see what happens?

At a guess the third non-Norwegian clubs involved was from the host country?

I had a little experiment with who the host club are. If I start a game without playing the host country (Spain) league when it appears the club selected is random (Zaragoza). If I run that league then the current champions (Valenica) are selected. I used the editor to change the current champions to another team (Osasuna) and ran the game 4 times with Spanish League included and... Osasuna are in the WCC all 4 times. Then I started again but without the Spanish league running (again 4 times) and... Valencia, Alaves, Real Madrid and Deportivo were placed in the WCC.

So, if you pick the league of the host nation the current champions go into the WCC, if you don't it's random.

Golly

This line is accessing the value that indicates whether a league is selected or not. 0092B23D: MOV CL,BYTE PTR DS:[EAX+11C]

JohnLocke

This line is accessing the value that indicates whether a league is selected or not. 0092B23D: MOV CL, BYTE PTR DS:[EAX+11C]

Golly

On a completely unrelated topic, I have been experimenting with adding a new competition (well an old one actually) to England- the English Conference Cup. I have done it on a Tapanified exe (2.19) using a Welsh Cup competition. When I started I rated my chance of success about 10%, I have now upgraded that to 90%. Just need to crack on and polish out the wrinkles.

Golly

Update: I'm at that frustrating point. I probably had the job 80% done, but made a mistake without having a back-up. Now, I am trying to work out/remember how I had got to the point I had got too. Arggggghhhhh!

Zé

I am wondering if somebody can help.

I would like to restrict the number of foreign players at a club. The Portuguese league to be exact, I have used flex and I can force the game to only allow a certain number of foreign players to be selected for domestic games. However I cannot force the game to restrict the purchase of foreign players, like the Brazilian league does.

Can anyone point me in the right direction?

Craig Forrest

hmmm... there is obviously an offset that controls things like that.... same way that Saudi players can't be transferred outside the KSA and that some Basque teams can only sign Basque players.... maybe John Locke will have an idea?

Dermotron

Saudi and Basque already covered in this thread - http://www.champman0102.co.uk/showth...6705#post86705 & http://www.champman0102.co.uk/showth...7865#post87865

And that's why you're a Director and I'm a lowly Manager.... :ok:

I thought it had been covered before :D

Dermotron

Don't think that's what he's after though :D

Think it's like in Turkey when you have more than 5 FGN and when you try buy the 6th guy the deals falls through.

JohnLocke

Ive just checked the offsets that Flex uses and I think that it actually edits different leagues in Portugal rather than the number of players allowed at a club.

Many thanks JohnLocke.

A further question, I note the following on the first post.

Quote:

AUSTRALIA

004111DD - Australia Number of league fixtures 00411D24 - Australia Number of rounds (hard-coded as DX) 00411D70 - Australia Number of subs in Opening Stage **00411B82 - Australia Number of teams in the league** 00411659 - Australia Playoff fixtures

Am I correct in saying you can reduce the number of teams in a league but not increase them? Am I also right in saying we cannot edit the number of teams that are relegated/promoted?

The reason I ask is because the Oceanic structure is ideal for what i'm looking to do. Except for the fact they do not have relegations.

Fods

Zé

There are no relegations/promotions in Australia, Ze

paysbasque

Does anyone know how to change the teams participating in the Welsh Premier Cup? In the game some participants are the best Welsh Premier League teams (and I want it to stay that way), but also 4 Welsh clubs playing in England: Wrexham, Swansea, Cardiff and Merthyr Tydfil. I assume that those 4 clubs are hardcoded in exe file.

JohnLocke

Welsh Premier Cup invites (untested):

00928A3D MOV EAX, DWORD PTR DS:[9D0434] (Cardiff City)

00928A62 MOV EAX, DWORD PTR DS:[9D0430] (Swansea City)

00928AA6 MOV EAX, DWORD PTR DS: [9D0438] (Merthyr Tydfil)

00928A85 MOV EAX, DWORD PTR DS:[9D043C] (Wrexham)

JohnLocke

Originally Posted by **Fodster** There are no relegations/promotions in Australia, Ze

Thanks Fodster, as I thought (Well as google told me).

Maybe I am thinking far too simplistically, but I was hoping there was an offset which would enable relegation/promotion. Therefore I could attach teams to the lower division and then the game would promote based on reputation.

It would certainly make the league more interesting if one team dropped every year... It's bad enough there is no cup!

Quote:

Thanks JohnLocke! I'll see if it works.

slivie

what is the offset for changing a 800x600 game into a 1280x800 game without applying the tapani patch? I downloaded a tapanified 3.12 league patch that is 800x600

JohnLocke

Can you just re-apply the 3.12 patch to the exe and select the wide screen option?

slivie

i tried that it crashes the game, i'm just going to use tapani 2.19 instead

Does anyone know how to change a competition nation? I changed the Northern Irish Charity Shield, so that it is played between winners of Welsh Premier Division and Welsh Cup and that works, but the competition is only active when Northern Ireland was selected. I tried using the Tri Wasono Editor to switch the nation to Wales, but changes made there do not influence if the competition is loaded, so I suppose something has to be changed in the exe file.

zozoa

John, will you be able to locate the command which determines how many year required for a foreigner to get nationality in a league? I have tried few times to locate it but never managed to.

Pasquale

You can increase the friendly matches of the national?

Fods

You can, ESP for Northern Ireland

Pasquale

John, you can move the final of the League northern ireland league cup from December to January or February of the following year? Can you tell me how to do?

Kowalinho

Ok i did a 2nd attempt on lux league ;) So far good but i have a problems:

1)Greek Cup (which is now lux cup) have 11 groups with 4 teams so is there any possibility to change any offset to reduce number of groups or something else because game gets rest of teams from "greek lower league".

2a) Greek lower league -> is there any possibility to cut it from luxembourg so greek teams dont get involved into luxembourg competitions?

2b) Or you know any other possiblity to get lux teams in lux 2nd div a greek teams keep away?

3) I tried to change with olly number of relegations from 2nd division to 0 so no greek teams will be promoted but game crashes at last round

Pasquale

20-07-13, 09:10 PM

Hello I have two questions:

1) you can change the number of teams participating in the playoffs to Australia? 2) you can change the start date of the championship of South Korea?

Fods

You can

Pasquale

21-07-13, 12:40 PM

21-07-13, 01:08 AM

I can but how?

25-07-13, 07:26 AM

25-07-13, 12:29 PM

25-07-13, 02:18 PM

The answer is 42.

Now you just need to find the question.

Fods

4+2 = post 6 in this thread.....

or 4 x 2 = Pasquale is a twat.com

paysbasque

Hey!

I spotted something interesting when browsing through the exe file in Olly.

At offset 525394 starts a block of code that references by name two players from the original database: Collin Samuel and Devon Mitchell (both talented Trinidadian youngsters).

I have no idea what this code does and this is the first time I see any player referenced in the file.

Alan

26-07-13, 05:02 PM

26-07-13, 05:02 PM

Samuel has Mitchell as a favourite staff. Both players have a future transfer to Falkirk on 1/10/01. Also, if you browse through the exe you will see that Falkirk are one of the teams used as an example in many of the text strings.

Alan

That's true, but both the transfers and the favourite staff info is specified in the database, so why put in the exe file?

Alan

26-07-13, 05:50 PM

I have no idea but feel this just adds to the fact that there is something curiously relevant about these two players. Suppose it could be a hangover from something that was going on in an earlier CM3 game.

2.16 doesnt	
MarcoVanBast	13-08-13, 07:06 PM
any1 gave offset of transfer deadline date? startinng game in 1999 and whole months no transfer deadline in any cou	untries.
Golly	01-09-13, 09:58 PM
Been away a while doing grown up things, but finally got around to having a play with CM0102 offsets.	
I have managed to change the English League Cup First Round back to 2 Legs like it was upto 2000-01 season. Still r though and fix an issue with the date of the 2nd Leg.	need to thorough test it all out
I have also managed to turn English FA Cup Semi-Final replays back on. Unfortunately I am still trying to work out ho penalty shoot-out off as this overrides the replay as the method of sorting out a SF drawn match.	w to turn FA Cup Semi-Final
I am pretty confident that once I have worked everything out I will know how to edit any competition. ie One off mate Extra-time. Penalties or replay(s).	ch or 2 Legs. Extra-time or no
I should just add that all that will be totally impossible for all Northern Ireland competitions due to a bug in the CM01	02.exe
kurtkolik	06-09-13, 01:09 PM
Does anyone know how to change the player restrictions of Turkish league?	
Turkey's second citizenship five years. What should I do to be the first year?	
Dermotron	24-09-13, 11:15 AM
Are there offset's for the number of clubs required for each competition, specifically the Cup competitions.	
I guess it's not the offset's I am particularly interested in, more the so the minimum number of clubs required.

JL,

I'm trying to work off what you were showing Paquale in post 381.... am trying to figure out how I can get the comp to select teams for the CONCACAF CL after I move them to a new league.... for example, if I create a new MLS league by swapping USA with Wales, then the CONCACAF CL will select 2 Welsh teams from what used to be the USA, and then select 3 teams from the new MLS as the three random Caribbean teams that get invited, as the MLS squads will have a higher rep than anyone else....

what I'd like to do is find the offset(s) that tell the program which regions (or nations) to invite teams from.

Make any sense?

Pasquale, check this out:

0092AFE2 MOV DL, BYTE PTR DS:[EDX+75] 0092AFE5 TEST DL, DL 0092AFE7 JE SHORT 0052B016 0092AFE9 CMP DL,4 0092AFEC NOP 0092AFEC NOP 0092AFET NOP 0092AFEF NOP 0092AFF1 NOP 0092AFF1 NOP 0092AFF2 JNE SHORT 0052B00F

EDX+75 (originally +71) is accessing the club's 'region' (rather than what country they are in). The following 2 lines just check if the region isn't set - the clever bit is CMP DL, 4 - which is comparing each club's region to Brazil.

List of all codes below. As you can see not every nation has a region of their own. You could try moving Northern Ireland into a region of their own by moving England, Scotland and Wales out of the 'Britain' region in the editor - not sure what impact this will have on other aspects of the game.

Code:

// nation region #define REGION AFRICA 1 #define REGION ASIA 2 #define REGION BALKAN 3 #define REGION BRAZIL 4 #define REGION BRITAIN 5 #define REGION CARIBBEAN 6 #define REGION CENTRAL AMERICA 7 #define REGION EASTERN EUROPE 8 #define REGION FRANCE 9 #define REGION GERMANY 10 #define REGION HOLLAND 11 #define REGION_ITALY 12 #define REGION_JAPAN 13 #define REGION MIDDLE EAST 14 #define REGION NORTH AFRICA 15 #define REGION NORTH AMERICA 16 #define REGION NORTHERN EUROPE 17 #define REGION OCEANIA 18 #define REGION_RUSSIA 19 #define REGION_SCANDINAVIA 20 #define REGION_SOUTH_AFRICA 21 #define REGION_SOUTH_AMERICA 22 #define REGION_SOUTHERN_EUROPE 23 #define REGION SPAIN 24 #define FIRST REGION 1 #define LAST REGION 24 // nation actual region #define ACTUAL REGION AFRICA 1

#define ACTUAL_REGION_AFRICA 1 #define ACTUAL_REGION_ASIA 2 #define ACTUAL_REGION_CARIBBEAN 3 #define ACTUAL_REGION_CENTRAL_AMERICA 4 #define ACTUAL_REGION_CENTRAL_EUROPE 5 #define ACTUAL_REGION_MIDDLE_EAST 7 #define ACTUAL_REGION_MORTH_AFRICA 8 #define ACTUAL_REGION_NORTH_AMERICA 9 #define ACTUAL_REGION_OCEANIA 10 #define ACTUAL_REGION_SCANDINAVIA 11 #define ACTUAL REGION SOUTH AMERICA 12 #define ACTUAL REGION SOUTHERN_EUROPE 13 #define ACTUAL REGION UK AND IRELAND 14 #define FIRST_ACTUAL_REGION 1 #define LAST ACTUAL REGION 14

If you want to use the 'actual region' change 0052AFE2 to EDX+76.

It's not perfect - the game still invited Dortmund (UEFA Cup winners), Man Utd (Champions League) and Atletico Madrid (not sure why) but the other 9 teams were from Brazil.

Edit - clubs invited from Brazil were: Attético Mineiro, Corinthians, Cruzeiro, Botafogo, Coritiba, Vasco, Gremio, Internacional and Palmeiras.

Make anv sense?

Not really. Can you explain it without the league swapping aspect - do you want Welsh teams to appear in the CONCACAF CL?

Who gets invited now? (which competition winners etc).

JohnLocke

The only code I can find is for the Inter American Cup, is that the same thing?

See 00632566 & 00632692.

JohnLocke

0x585078 to 0x58517D, seems to relate picking clubs to play in the UEFA Champions League.

JohnLocke

0x585078 to 0x58517D, seems to relate picking clubs to play in the UEFA Champions League.

Craig Forrest

CONCACAF CL takes 2 USA teams, 2 Mexican teams, 3 Central American Teams and 1 Carribean team.... as only the USA is playable I believe that the 2 USA spots go to the MLS winner and the US Open Cup winner while the spots for the other teams probably work on reputation (although I'm not certain).

What I'd like to do is find a way to get the computer to choose a different region than USA, Mexico or the Caribbean.... I'd like to be able to select the region that clubs are chosen from... that way if I do a league swap and I can get it to choose teams from the nation I want rather than always choosing Mexico, USA, Central America and the Caribbean.

When I search for the comp in Olly, it is referred to as eurocomp\con_champ.cpp.... don't know if that's helpful or not...

Cheers

JohnLocke

Very helpful, see 0x4c11e7 to 0x4c12b8, which is looping through every club in the game.

MOV EAX,DWORD PTR DS:[EDI+53] is accessing club.nation MOV ECX,DWORD PTR DS:[9CF3D0] is accessing location of mexico id (see 0x60e56F) MOV ECX,DWORD PTR DS:[EDI+57] is accessing club.division CMP ECX,DWORD PTR DS:[9CF4F8] is accessing then location of 'America Major League', MLS I assume. See 0x6063e3 CMP EDX,DWORD PTR DS:[9CF4F8] is accessing location of USA id - see 0x60ed91 CMP BYTE PTR DS:[EAX+75],7 is, I think, nation.region, 7 is REGION_CENTRAL_AMERICA (see above post) CMP BYTE PTR DS:[EAX+75],6 ditto - REGION_CARIBBEAN ADD EDI,245 - 0x245 is 581 decimal, which is the length of a club - this means the next iteration will access the next club.

Let me know if this doesn't make sense or if you want more info.

Craig Forrest

Cheers Mr. Locke :ok:

I'll mess around with this tonight and see what I can do with it :D

Oh.... and out of curiosity, how can you determine what the Nation ID is from the 9CF*** number?

EDIT

Never mind that last bit... figured out what you meant :ok:

Oh this is quite exciting, so looking at that it might then be possible to dissociate nations from the UK as that looks like has 2 bits for region & maybe the 2nd is for regens.

In my game I find Ireland, N Ireland & no offence Top but Wales pointless.

I would love to replace these leagues with other European nations, say Switzerland, Romania & Austria for example but when you replace them presently the regens also include the UK & Ireland kids.

Never seen anything that relates to this. As there is no text message (news item etc) associated with gaining a 2nd nationality it almost impossible to figure out what most code is actually doing.

The code in Olly would contain a reference to [EAX+1E] (although not necessarily EAX, it could be any of the registers. +1E is 30 decimal, which is the location of 2nd nationality in the person data. There'd also be a CMP instructions, and probably a TEST to check it the existing value is -1 (no 2nd nationality).

You might be able to narrow it down if you knew which .cpp file (see post 39) relates to gaining a second nationality.

Great. Works a treat.

On a similar note, is there a way of allowing non-EU loans into English clubs?

Unrelated but something that bugs me a lot as I spend a great deal of my management time in Spain: Would you be able to identify and disable the game not allowing any more than 26 players in the 'A' team. This only seems to apply when promoting players from the 'B' team, and doesn't stop incoming transfers. Once the maximum 26 players is exceeded (by transferring in or trialling in for example) in the 'A' team the game will then allow further promotions from the reserves. Si in short, it seems that if the 'A' team has exactly 26 players then you are unable to promote from the 'B' team.

JohnLocke

Post a screenshot of the message the game displays in each situation and I'll take a look.

Alan

For the non-EU loans it's this: http://imageshack.us/a/img198/1374/zajd.jpg

For the maximum squad: http://imageshack.us/a/img163/9518/1hfi.jpg

This message only seems to appear if you try and promote players on the day of Spanish Cup matches.

JohnLocke

I can find the code that displays the messages but I've not manged to find the code that controls whether a player can be loaned or moved.

008F12CC: PUSH OFFSET 00A9F514; ASCII "{}<%s - Club Name(e.g.Chelsea)>{} are not allowed to loan non-EU players."

008887B0: PUSH OFFSET 00A8B2CC; |ASCII "There is no space in the {}<%s - Club Name(e.g.Barcelona)>{} squad for this player." 0088A16D: PUSH OFFSET 00A8B2CC; |ASCII "There is no space in the {}<%s - Club Name(e.g.Barcelona)>{} squad for this player."

Code checking if a nation is in Europe should access [register+7F], there would probably be a [register+1A] (nationality of a person) line nearby too but I can't find anything.

JohnLocke

0x98b3fc - change from '\$' to '£' (0xA3 - displays as a 'ú' in Olly), then when you load the game select the 2nd '£' on the currency list (where the '\$' used to be) - hey presto, you've got all monetory values inflated by about 50%. Quick test shows Del Piero on £190,000pw as opposed to £120,000.

Muppetry on my part I know but how is this done? No problems with normal offset values but when the begin in 0x I don't have a clue! :redface:

JohnLocke	23-10-13, 11:44 AM
JOHNLOCKC	

'0x' just means its a hexadecimal number. Seeing as all offsets are hexadecimal you can just ignore it.

scemoka

Hello Mates!

Is there anybody here, who knows the OFFSET of Olympiastadion in Helsinki ? National stadium of Finland. This stadium is very interesting for me. During game (both 3.9.60-3.9.68) Olympiastadion hosts FC Haka's, Hjk's, Mypa's home Champions League matches. Where is the magic? Which code/rule or offset provide this? I'm very curious. ;)

Any suggestions, any ideas ?

Bomberinho

Prize for(offset):

Fifa world cup (Clubs)? European super cup? Intercontinentel cup? League cup (England)? Charity Shield(ENG)? Spanish cup?

in earlier post JL mention this about continents:

9CFA08=Africa, 9CFA0C=Asia, 9CFA10=Europe, 9CFA14=North America, 9CFA18=Oceania, 9CFA1C=South America.

does anyone knows what is the command for "no continent"?

djole2mcloud

inspired by Pasquale's posts, i tried to edit Asian Club Championship in order to create new World club Champions Cup, competition with best teams from all over the world...

but, that didn't work because ACC has continent set to ASIA at offset : 0040BD56 MOV EDI, DWORD PTR DS:[9CFA0C]"Asia". But i edited continent value to Europe 9CFA10, and change whole lot of other offset to force game to pick clubs from European nations. This is what i manage to do so far. Next goal is to try to find value that stores competition as "international" like world club championship so i can insert nations from other continents.

Thank you :ok:

djole2mcloud

08-12-13, 07:47 PM

The competition is already there,only that now picks European teams...so we can call it a new European competition...it can be used to create a custom, let's say "South East European Champions Cup", and only teams from South East European countries will participate...i think even winner of the UEFA CL and Europa League can be "called" to participate...didn't test that, but there is offset for J-League winner, so if we change it with UEFA CL reference i think that is possible ...

Still, one issue is standing, if u like to play this competition with European teams u still must pick Japan or S. Korea as selected leagues because competition still appears under ASIAN competition screen... this is the point where we need a wizard like JL ... :-)

Golly

On the subject of changing competitions to other things...

It always struck me that the structure of the German League Cup is as close as you get to the current FIFA Club World Cup Structure. Whether it would be possible to edit the German League Cup to become the Club World Cup and get the correct teams/competition winners into it is another matter. Would automatically take place every year too is it was achieved.

I did manage to add the Conference Cup to the English Leagues by using (and changing) the offsets for one of the Welsh Cup competitions. Didn't get it quite right (and how I wanted it), but the competition ran and I was close. But then I messed it up without properly backing up my work and I lost it all. Not had the time or inspiration to have another crack as of yet.

all nation competitions have stored (leagues and cups) reference to a certain nation...(9CF***), and now u gave me idea... also when i have looked argentinian 1st div through olly i saw lot of references to argentinian 2nd div...that must be offset to point where relegated teams should go...also, i saw references for the copa libertadores, that must be for a winner of the argentina 1...also in asian champions league there is a reference for the World club cup,that must be for a winner again... Continental championships have stored continent reference,again(9CF***),and if u change it to another continent, u must assign nations to

compete in from same continent...i tried to force game to pick teams with league references instead of nation references but that wont work...i also wanted to try to go around offset that specify competition nation or continent to be "international" like WCC, but till now had no luck...maybe u golly have an idea about that

note:golly,from your post, now i think i understand how tapani added conference north using welsh league...he simply change nation reference of the welsh league, and changed references from english conference where relegated teams should go, and from welsh league reference where winner or first 3 clubs should go.still, i dont understand how he adds relegetions to some leagues.am i right?

It always struck me that the structure of the German League Cup is as close as you get to the current FIFA Club World Cup Structure. Whether it would be possible to edit the German League Cup to become the Club World Cup and get the correct teams/competition winners into it is another matter. Would automatically take place every year too is it was achieved.

I did manage to add the Conference Cup to the English Leagues by using (and changing) the offsets for one of the Welsh Cup competitions. Didn't get it quite right (and how I wanted it), but the competition ran and I was close. But then I messed it up without properly backing up my work and I lost it all. Not had the time or inspiration to have another crack as of yet.

Reading this thread, I had the idea of transforming the Inter-American Cup (an extinct competition) in South American Recopa (a super cup between the champions of the Copa Libertadores and Copa Sudamericana). I managed to do it perfectly: http://imageshack.us/a/img43/953/dndd.png

But when the same team wins the Copa Libertadores and Copa Sudamericana, this happens: http://imageshack.us/a/img268/5127/qngz.png

Has some way to fix this, or is it impossible?

djole2mcloud

09-12-13, 04:24 PM

yes...that is because it is specified that winners of both competitions take a part...if u take a look, above this offsets u should se some EDX, ECX or EAX command followed by some numeric values (+75 for example).I read somewhere where JL pointed that some values are determine that "winner" of the competition takes part,but some other value determine "random" club from that competition... now,i don't understand how this EAX,EDX,ECX and numeric value commands works...will try to figure out

ok,i used irish league cup to change it to be serbian league cup...offset changes were flawless...the only matter now is how to move serbian league cup from northern irish competition screen to serbian competition screen...maybe golly can help with this?

Cam F

So potentially if some clever person masters it, changing cup/league competitions could be a new tutorial like swapping nations for new patches :D

Looking forward to adding the highland league to Scottish leagues for sure :)

Correct. Going to be a 5th tier with mix of highland & top junior teams in a pyramid system but not sure how far off it is.

When I changed that Welsh Cup Competition to the English Conference Cup I spent a good amount of time examining exactly what offsets Tapani changed to alter the Welsh Premier into the Northern Premier League and trying to replicate that for the Conference Cup.

Like Tapani I changed it to a competition that is in the game (from a previous version), although no longer active.

djole2mcloud

do u have saved that changes somewhere maybe?

i would like to take a look of it. that your new english conference cup, is it appearing under english competitions or welsh competitions?

Golly

I lost everything by not backing up and then making a f*** up, but I'll have a little play and report back.

djole2mcloud

ok thanks a lot m8...

currently i manage to link up different comps...now i have issue about promotions / relegations...to sort those offsets, to point how many relegations/promotions go to right leagues and to switch off relegations...and specially offset that moves competition from one nation screen to the other...

adding cup comp to australia

was looking about this request past few days...the thing is that Australia has reference in .exe only for NSL(national soccer league), and beside that i can use only teams from A lower or A premier division(australian teams)...the rest of Australian leagues visible in Editor are not stored in .exe, so if u use tri wasano editor to place all other teams to A lower or A premier division, it has no effect on game.Now i need some Cup competition that

select teams only from top division or cup competition that select teams from top division and only one division more(in case of Australia that will be A lower division)I started to check NIR and IRE cup comps to see if something will fit. Your suggestion is also welcome.

Beside that i was busting my had with Cam F idea of adding Highland league to Scotland like Conference north to England..I can say i was 50% successful. Still trying...

djole2mcloud

15-12-13, 11:04 PM

Finally got it all sorted. Changed Irish League cup to Australian FFA Cup. Game picks all 13 teams from NSL, rest of teams are from Australian lower leagues.

Winner of NSL goes to Asian Champions League, and the winner of Australian FFA Cup goes to Asian Cup Winners Cup. The only thing that still i can't figure out is how to transfer FFA Cup from Irish competition screen to Australian competition screen, that why, when u start Australian league u must select Ireland also in order to play FFA Cup. Here some screenshots:

p.s.Fods, u wanted cup or two for Australia, i give u three :-)

was little experimenting so i did the following:

English Charity shield is now playing between EPL and SPL winners

http://imageshack.us/a/img837/3606/9z5w.jpg

Scottish cup is now "British" cup.I'v changed the participants of the cup and now clubs from Irish Premier Division, Scottish Premier, Scottish D1, English Premier and English Championship entering the draw:

http://imageshack.us/a/img46/4633/0db1.jpg

http://imageshack.us/a/img19/3134/y6dp.jpg

no errors at all, everything goes smoothly...

Craig Forrest

It's fun what we can do with the offsets now :D

Good work djole :ok:

djole2mcloud

indeed...the next i will do is to scottish and english league cup. scottish league cup will play scottish D2 and D3 teams and english D2 and D3 clubs,maybe Conf clubs also english league cup will play scottich PRM and D1 clubs,and sam goes for english clubs.Also,i plan to assign welsh and NIR prem clubs to some minor english or scottish cup(fa trophy or scottish challenge cup)

p.s. happy b'day Mr.Forrest :-)

Brazilian league now permit 5 foreigners per game, how can i change it from three (that it is already set in my game) to Thanks :baby:	five?
stakhanovite	31-12-13, 02:54 AM
I've been looking at some of the posts on editing continental cup competitions, and tried a bit myself despite being an am Russia and Uzbekistan through the editor to start with. Uzbekistan clubs now take part in CL and EL, and the national teal qualifiers for UEFA. That was alright. Russia played in the Asian national qualifiers, however the teams never showed up competitions. I modified the Asian club competition offsets so that the Russian league ID stuff replaced Uzbekistan, and r in the western section of the competitions. Success. The only thing is that it just picks random teams at first for the comp seemingly, and even after a couple of seasons it's still prone to picking lower-league teams. Is there any way to make it winners?	m competes in national in the Asian club now Russian teams do play petitions, for all countries
On a side note, is it possible to change the start and finish dates of the Russian league and cup competitions?	
djole2mcloud	31-12-13, 01:11 PM
there is no way to pick winners for the competitions that does not exist in dbuzbekistan league isn't playable therefore can change it with japan or south korea, and then will work cause those leagues are playable.for all other countries i thin reputation.

Zé

This thread is a great read.

Just a thought, once the forum geniuses figure out how to add a competition to a nation can I suggest a step by step tutorial? This may encourage those with less editing knowledge to contribute.

I for one get lost with what to edit :suspicious:

stakhanovite

Is there a full list somewhere of offsets for Russian TV & prize money across the two divisions? (and even the cup) I think there was something on an earlier page but it didn't look like the usual offsets I've used.

Edit: I worked it out for RPL, but not R1D.

Kowalinho

Can anyone tell me offsets for changing number of rounds for scottish leagues? Prm to third. I cant fidn it :(

djole2mcloud

007F4F20 /\$ 56 PUSH ESI
007F4F21 . 8BF1 MOV ESI,ECX
007F4F23 . B0 02 MOV AL,2
007F4F25 . B1 03 MOV CL,3
007F4F27 . 8886 C4000000 MOV BYTE PTR DS:[ESI+C4],AL

007F4F84 . 8D8E A9000000 LEA ECX,DWORD PTR DS:[ESI+A9]

Thanks but now i encountered another problems :P
1) Premier league have 39 fixtures (33 normal and champions & relegation group) - Is there any offset to change it to normal format? 2) When i change number of round and fixtures for 2, 3 and 4 league to 2 round & 18 matches - league end in december any possibility to set end date to next year or something?

djole2mcloud

i think someone found a way to switch off groups, Golly as i remember wrote about it...but i think it is not only one offset about other question, it is possible but u need to reorder the schedule for the first 18 matches...to complicated as far as i can tell...

ng closer to the real life system. ns on and off has been achieved (Big On/Off Switch)

Pasquale

I need to stop the playoffs / out Northern Ireland because I have to create the championship of Armenia that has not playout

I imagine these were inherited from a previous edition when the SPL changed from 10 teams (36 games) to 12 teams (33 games and split into 6/6 and a further 5 games = 38 games).

Therefore someone clever might be able to work out how to change the SPL back to 10 teams and a straight 4 rounds of fixtures = 36 matches per team. I haven't really looked at it and as the SPL is still as it is in the game I have no plans to look at it at the current time.

If you set the year to 98 or 99 in 0102 the SPL reverts to 10 team league, then at end of 99/00 it tries to change to 12 but crashes but sure some clever dude could fix it.

Premier league have 39 fixtures (33 normal and champions & relegation group) - Is there any offset to change it to normal format? When i change number of round and fixtures for 2, 3 and 4 league to 2 round & 18 matches - league end in december any possibility to set end date to next year or something?

djole2mcloud

i think someone found a way to switch off groups, Golly as i remember wrote about it...but i think it is not only one offset about other question, it is possible but u need to reorder the schedule for the first 18 matches...to complicated as far as i can tell...

URGENT APPEAL

I keep getting begging letters (well messages) from a poster who I won't name with a problem. I haven't been able to work out a solution but I am actually quite keen for it to be resolved.

Somebody (no names) wants to switch off the Play-offs in the Northern Ireland Premier. And whilst I have no interest in the NI Premier if we/somebody can crack the problem it will also work for other (more interesting and relevent) leagues with Play-offs too. For instance there are a set of Play-off fixture offsets in the English Conference. If we can switch off NI Play-offs we should be able to switch on English Conference Play-offs and get something closer to the real life system.

Switching competitions on and off has been achieved (Big On/Off Switch), so I am guessing this can be done.

06-01-14, 07:51 PM

06-01-14, 08:56 PM

06-01-14, 09:59 AM

06-01-14, 09:59 AM

06-01-14, 10:04 AM

06-01-14, 11:59 AM

05-01-14, 04:57 PM

I am sure there is an offset in there for the year the change takes place (2000 = 7D0 in hex).

There is a good chance there will be something in Div 1 too. Because the year the change happened no one was relegated and 2 came up from D1. And coming to think about it only 1 team was relegated from D1 and D2 and three teams were promoted from D2 and D3 and 2 teams entered D3 from "Non-League".

I have tried doing that (98 or 99) and it still starts with 12 teams and the 6/6 split. I might try it on an un-Tapanified DB.

I can see why the game crashes. 1 down from SPL and only 2 up leaves the SPL one team short the following season.

Oh no Golly, it's weirder than that.

3 up from div 1, 2 up from every other league & with 99/00 it defaults to Peterhead and Gala Farydean being promoted to div 3 from non league.

SI must have been hedging their bets on who got promoted but they got it 50% right as Peterhead did but the other spot irl was Elgin.

You can't see it but the bottom 2 SPL teams are in limbo (11th & 12th)

Just having a play.

Ouote:

1 up from D1 automatically. Bottom team in SPL and 2nd and 3rd in D1 go into play-off group with top 2 going into SPL and 3rd place going into D1. So does leave 12 teams.

Golly

06-01-14, 09:48 PM

djole2mcloud

i don't know if i follow right, but is there an offset for making changes in SPL after 1999? if it is that offset for the year 2000, can u put year 3000 so game wont do any changes to SPL?

Golly

Quote:

Originally Posted by **djole2mcloud** 🔊

More than likely. The problem is that the relegation/promotion system is set up for the reorganisation and all the Scottish Cups are set-up for 12-10-10-10. A lot of work considering the league structure is still correct.

Golly

Change the following 2 offsets...

007F2833 - JNE SHORT 007F283D > JMP SHORT 007F283D 007F283B - JMP SHORT 007F2843 > JNE SHORT 007F2843

This means that instead of the SPL having 10 teams only in 1999/2000 it now has 10 teams every year except 1999/2000.

Still need to short out the relegation and promotion issues and Scottish Cup problems with number of teams entering etc...

Golly

06-01-14, 11:53 PM

06-01-14, 11:58 PM

Does it actually work?

He's harmless. And like I said, it's a question I wouldn't mind having an answer for.

Pasquale

Found a way to block the playout of northern ireland?

Golly

Quote:

Originally Posted by **Pasquale** Found a way to block the playout of northern ireland?

If you use the On/Off Switch and turn off both the Northern Irish Premier and Northern Irish Division 1 that stops the play-offs from being played.

Golly

Djole this is directed at you.

I see you have had some success at moving competitions from one country to another. I think you moved an Irish Cup to Serbia. And I see the Cup shows up in the colours of Serbia. ie the game knows it is now a Serbian competition. How did you do this?

I have changed the Welsh League Cup into an English Northern Premier League Cup, but the competition header is still in Red with White letters (Welsh). How do you get the game to think it is an English competition?

Craig Forrest

I think that you use Tri-Wasano to change the nationality of the comp.... I did it with a patch I'm working on and the various divisions all have the correct nationality colour instead of the country they were originally from

Golly

Isn't Tri Wasano a saved game editor only? :s

Golly 08-01-14, 03:58 PM

Found it.

Golly

Yeah, that worked.

Another question...

If I change say the Welsh Cup into an English competition will the winners still go into the UEFA Cup representing Wales?

08-01-14, 04:00 PM

i did that with Irish cup but for Australia, as Fodster asked. Yes, i chaged it as Mr. Forest said, via Tri Wasano editor. But, some competitions have offset inside .exe that also pointing on competition nationality. This is the case wit Irish league cup:

irish league cup:

00637E98 |. A1 DCF29C00 |MOV EAX,DWORD PTR DS:[9CF2DC] - "REPUBLIC_OF_IRELAND" 00637EB2 |. 3B05 14F89C00 |CMP EAX,DWORD PTR DS:[9CF814] - irish group a 00637EC0 |> 3B05 18F89C00 |CMP EAX,DWORD PTR DS:[9CF816] - irish group b 00637ECE |> 3B05 1CF89C00 |CMP EAX,DWORD PTR DS:[9CF816] - irish group c 00637ECC |> 3B05 20F89C00 |CMP EAX,DWORD PTR DS:[9CF820] - irish group d 00637EEA |> 3B05 24F89C00 |CMP EAX,DWORD PTR DS:[9CF824] - irish group d 00637EA |> 3805 24F89C00 |CMP EAX,DWORD PTR DS:[9CF824] - irish group e 00637FA5 |. 880D 54F89C00 |MOV ECX,DWORD PTR DS:[9CF854] - irish leinster senior league 00637FB5 |> 3805 48F89C00 |CMP EAX,DWORD PTR DS:[9CF848] - irish connacht league 00637FC3 |> 3805 50F89C00 |CMP EAX,DWORD PTR DS:[9CF850] - irish munster senior league 00637FD1 |> 3805 4CF89C00 |CMP EAX,DWORD PTR DS:[9CF84C] - irish ulster senior league 00638099 |. A1 DCF29C00 ||MOV EAX,DWORD PTR DS:[9CF24C] - "REPUBLIC_OF_IRELAND"

now, if u open official editor u'll se that irish groups A,B,C,D,E are empty, but opening with Tri Wasabo, there are clubs in it. Now if u open one of those clubs u'll notice that under OTHER LEAGUE tab is set Irish group A.Also, Irish groups has no nation.so it can be used for other competitions

On the other hand in Scottish competitions u can merge clubs from any league u like.

As i told u via PM,i am only one step away from adding league to the competition.Just as Tapani did it with Conference North. Cam F gave me idea with Highland League of Scotland.I used Danish 3rd division for that,And everything works for the first season,but relegations from Scottish 3rd division don't go to the Highland leage,they end up in Scotland non league,while promotions form Highland league are promoted correctly to Scottish 3rd.I am working on this past 2 months,and tried over 200 solutions...but still no success... On the other hand Danish league works perfectly even after i "disconnected" one division from competition.So i guess there is still one or more offsets to point correctly relegations.

Do you have to run Denmark to get the Highlands League to work?

Oh and this season a new league started in Scotland...

The Lowlands League which is the same level as the Highlands League and will be 1 of 2 feeder leagues into the Scottish Football League.

This is probably obvious and you have probably already tried it but have you tried changing the following 2 offsets in the Scottish 3rd Division...

007F4F8D - MOV EDX,DWORD PTR DS:[ESI] > MOV EDX,DWORD PTR DS:[9CF5B4] * causes next line to be written over so be careful

007F4F95 - MOV DWORD PTR DS:[ESI+20],-1 > MOV DWORD PTR DS:[ESI+20],6 * -1 is "A Lower Division" if I remember correctly. 6 is the number for Danish 2nd Division

I honestly don't know how to.

Pasquale

Ok thanks all the same :pout::pout::pout:

Zé

The Oceania Champions Cup seems to play every other year.

Is it possible to change it to play every year?

djole2mcloud

yeah,i'v tried something like that,many,and many combinations,but,worth to try again,and i will try it...and yes i have read about lowland league also... i know about overwriting next lines,so i manually add again until RETN command...

If you are having no problem with teams being relegated out of Scottish Div 3/Lge 2 into Non-League, you could always try inserting the Danish division inbetween Scottish Div2/Lge1 and Div3/Lg2 and rename the leagues accordingly. You would obviously have to do some editing with cups to get clubs to enter at the correct time.

djole2mcloud

09-01-14, 12:14 PM

already try this solution so many times...between d3 and d2,but problem is the same...teams from d2 end up relegated to non league and teams from league between also end up in non league instead in d3...while promotions are fine...in the 2nd season there are no matches in that league between...

If you set the year to 98 or 99 in 0102 the SPL reverts to 10 team league, then at end of 99/00 it tries to change to 12 but crashes but sure some clever dude could fix it.

I think I know your problem with Scotland crashing at the end of the 1999/2000. I remember you said Peterhead and Gala Farydean were promoted into the SD3 at the end of the season as the 2 extra clubs. Well, I have found 2 offsets with the SPL that point to 2 clubs...

007F2AAE - which references [9D029C] = Elgin City007F2ADE - which references [9D02A0] = Peterhead

I think the game probably crashed because it is attempting to insert 2 clubs into the Scottish League which are already there.

Try removing Elgin City and Peterhead from the Scottish Leagues. Use CMEXPLORER to leave the SPL, SD1, SD2 and SD3 with 10 teams each and leave Elgin & Peterhead out of the 40 teams and put them in "A Lower Division".

See if that works and report back :D

Vin_Z

Dear MR PatinoZ. It's possible to change Italian leagues numbers of teams? Example Serie A 2002 had 18 teams... today 20. If it's possible where have I add the new code? It's it on club_comp.dat? Thanx

Golly

I am sure there is a thread all about changing Serie A to 20 teams somewhere.

Golly

I think you can change Italy to Serie A (20), Serie B (22) and alter the Italian Cup without using Tapani 3.12 patch. I will have a play and report back.

Craig Forrest

WTF, then as expected I proved I am a fanny as I keep getting an error loading Scotland saying sco_fa_cup.ccp 77 Can you upload you data folder?

Edit: still getting the error message but loaded up fine now testing :D Wow, you forget how slow 0102 is on holiday ffs.

Any chance some mega smart kind person could change this 0001 exe - http://www.sendspace.com/file/xvpvzn

Into two different exes, one set to year 98 & one to 99 so I can try some 0001 experiments? With 0001 starting on an even number there shouldn't be any problems with international competitions I'm reckoning.

Ooooh Scottish Cup problem. During 1999-2000 it probably still wants 12 SPL clubs in the draw. I will have a look at this when I get a chance.

djole2mcloud

this r the references for the Scottish cup.U can change the order of the offsets.swap a lower division offset with premier league offset.a lower div has more then 12 clubs.only in this case prem clubs will enter the draw in the first round.

this r the references for the Scottish cup.U can change the order of the offsets.swap a lower division offset with premier league offset.a lower div has more then 12 clubs.only in this case prem clubs will enter the draw in the first round.

09-01-14, 09:58 PM

Golly

Had a quick search through the Scottish Cup offsets and there doesn't appear to be 2 sets of offsets like there are in the Scottish Leagues for when the structure is 10-10-10-10 & 12-10-10-10. The only way around this I would think is to leave 12 teams in the SPL in the database. This will mean that the 2 last clubs alphabetically won't play in the league when it's 10 teams but will enter the Scottish Cups. And when it goes to 12 teams and there are 14 teams in the DB they won't play in the league or Cups (if Cups are selected alphabetically which I believe they are).

For these reasons for the extra 2 SPL clubs I would place Wishaw & Yoker Athletic in the SPL as these are the last 2 clubs alphabetically in Scotland.

Golly

10-01-14, 09:01 AM

Djole has got me thinking with his Danish 3rd Tier becoming the Scottish Feeder League. Can I steal some of the Italian Serie C leagues to form an English Non-League Pyramid?

Yesterday I had a play and got the English Premier League clubs relegating to the Scottish First Division and vice-versa. Could be fun.

I mean, if I disabled the Welsh Premier/Northern Premier could I insert Serie C1 and C2 below it to form the current English Structure?

Premier League Championship League One League Two Conference National Conference North / Conference South Northern Premier / Southern Premier / Isthmian Premier

Might have a play around with it.

Golly

10-01-14, 09:10 AM

Having had a good look at different leagues I actually think it might be easier to place German Regional Leagues below it. And theoretically I could place Portuguese Divsion 2B below that. So I am going to go down that route and try it. I am going to try and get the German Regional inserted first.

Vin_Z

File name where to look, pls

djole2mcloud

oh golly,i did that same thing last night...i quit danish league and played with england and it was success...why? maybe because of britain?i might give a try welsh premier to become scottish feeder also. let us know your findings...and i will post mine... :)

After looking through the Bundesliga offsets and seeing the huge amount of reference to German Regional leagues I think I will save myself the effort and give up before I have started.

djole2mcloud

golly do u have an offset for the Welsh premier league?the start of the block? i can't find it anywhere...

I generally use Tapani 2.19 and the Welsh Premier/Northern Premier offsets run from 00924E30 to 00925E83.

Golly

11-01-14, 07:00 AM

I have managed to reinstate FA Cup Semi-Final (and Final) replays. Managed to work out what offsets control when Extra-Time is played and when Penalty Shoot-outs take place.

I will write a full guide to changing Cup stuff when I have finished all my experimenting, but I think it is possible to change between 2-legs and 1 off matches, have as many replays as you like etc...

If I have time tomorrow I will write up everything I have worked out.

Golly	14-01-14, 12:24 AN
What I have worked out 100% Changing how many replays. Changing from 2 legs to 1 off match and vice-versa. When the replay/2nd leg takes place.	
What I have changed but I need to experiment with Extra-Time. If it's played in original game or replay or both or neither. Penalties Shoot-outs taking place or not. (You can plan a replay, but if you leave a penalty shoot-out in place it will ta happen).	ake place and the replay won't
I should just add that these changes are possible for all competitions except for the Northern Irish ones.	
Pasquale	14-01-14, 12:29 Af
Golly, you can move a cup from one country to another?	
djole2mcloud	14-01-14, 12:43 AN
yes	
Quote:

Pasquale	14-01-14, 01:06 AM
you can move the CFA Franch with North Ireland?	
Golly	14-01-14, 08:58 AM
I can think of a problem with changing French competitions. The French League reorganises after the 1st Season so entering at various rounds and the amount of games played in early rounds changes. I am sure it could still be done, difficult.	the distribution of teams but it would just be more
Pasquale	14-01-14, 11:35 AM
You can change the teams which come to class to participate in the cup of northern ireland? for example in the cup of premier division, first division 10, 12 lower division if I wish that the division will participate lower 16 is possible?	game involving 32 clubs, 10
Golly	14-01-14, 11:55 AN
I don't think so. The NI Cup starts with 32 teams and the offset seem to tell the game to take ALL the teams from the from D1 (10) and then X amount Lower Division teams to make it up to 32 teams.	e Prem (10), ALL the teams
Pasquale	14-01-14, 12:05 PN
What is the offeset that decides how many teams of Lower Division participating in Northern Ireland Cup?	
Golly	14-01-14, 12:09 PN
Ouote:	
Quote: Originally Posted by Pasquale	

Like I said, it doesn't work like that.

The offsets tell the game to take 32 teams from Premier, D1 and Lower Division. SO IT TAKES ALL THE PREMIER TEAMS (10), ALL THE DIVISION 1 TEAM (10) & THEN USES LOWER DIVISION TEAMS TO MAKE UP THE NUMBER TO 32 (SO 12).

Sorry if that isn't the answer you are looking for.

(Actually I'm not really sorry at all)

Golly

Here as promised is a run down of Cup Round offsets. The more ?s the more uncertain I am either to what it does or how to edit it. Hope it is helpful...

Golly	14-01-14, 12:38 PM

The example shown shows the basic template for cup round offsets. Some are a lot more complicated and messier than the one shown, but even so you should be able to work out which are the ones as shown above to edit certain features as you please.

Pasquale

Go

So I ask you the last thing Golly: You can move the League Cup Northern Ireland January of the following year?

olly	14-01-14, 04:31 PM

Quote:

Originally Posted by Pasquale

Which Round(s) you want to move?

Pasquale

I would like to move the final from December to May of the following year

Golly

Give me an exact date. Do you want it the Wednesday after the NI season finishes? The Wednesday before?

Pasquale

The date I want is May 7. I also explain how did you change?

Golly

Actually forget that, it's a tricky one to change but I can get the Final played on the closest Wednesday to May 2nd (ie April 29th - May 5th). Change the following offsets and in this EXACT order...

1) 0078CE18 - PUSH EBX > FILL WITH NOPS 2) 0078CE19 - PUSH 0A > FILL WITH NOPS 3) 0078CE18 - PUSH 1C > FILL WITH NOPS 4) 0078CE18 - NOP > PUSH 1 5) 0078CE1A - NOP > PUSH 4 6) 0078CE1C - NOP > PUSH EDI

And just to prove it works and to stop you coming back and saying it doesn't work....

https://imagizer.imageshack.us/v2/77...90/43/q5x6.png

Golly

14-01-14, 12:36 PM

14-01-14, 12:36 PM

14-01-14, 01:08 PM

14-01-14, 04:53 PM

14-01-14, 07:10 PM

14-01-14, 08:02 PM

14-01-14, 08:09 PM

The first has changed from PUSH EBX (= 0) > PUSH 1. For competitions that spread over more than one year 0 = in the first calendar year (so 2001) and 1 = in the second calendar year (so 2002) The second has changed from PUSH 0A (= 10) > PUSH 4. This is the offset for month. 0 = January, 1 = February, 4 = May, 0A (10) =

November and 0B(11) = December. The final has changed from PUSH 1C (= 28) > PUSH EDI. This is the offset for day of the month. 1 = 1st etc... I can see from the other offsets in this fixture that EDI = 2 and using EDI has allowed me to changed the 3 offsets without overwriting the next line.

14-01-14, 09:19 PM

14-01-14, 09:04 PM

Best I can do is..

Group 1/5 - Wed 9th August Group 2/5 - Wed 16th August Group 3/5 - Wed 20th September Group 4/5 - Wed 25th October Group 5/5 - Wed 29th November Quarter-Final - Wed 10th January Semi-Final 1st Leg - Wed 31st January Semi-Final 2nd Leg - Wed 7th February

I have tweaked your dates slightly for several reasons. 1) So they fit into a uniform calendar. 2) To avoid Irish League matches. 3) To avoid International dates. 4) So I can successfully edit them on Olly.

INSTRUCTION Follow these EXACTLY!

Change Group match 1/5

0078CB6D - PUSH 1D > PUSH 9

Change Group match 2/5

0078CB93 - PUSH 8 > PUSH 7 0078CB95 - PUSH 0C > PUSH 10

Change Group match 3/5

0078CBBF - PUSH 1A > PUSH 14

Change Group match 4/5

0078CBE9 - PUSH 0A > PUSH 19

Change Group match 5/5

0078CC11 - PUSH 9 > PUSH 0A 0078CC13 - PUSH 18 > PUSH 1D

Change Quarter-Final draw date

0078CCEE - PUSH 9 > PUSH 0A 0078CCF0 - PUSH 19 > PUSH 1E (will take place on Thursday 30th November)

Change Quarter-Final match date (FOLLOW EXACTLY!)

0078CD03 - PUSH EBX > FILL WITH NOPs 0078CD04 - PUSH 9 > FILL WITH NOPs

0078CD03 - NOP > PUSH 1 0078CD05 - NOP > PUSH EBX 0078CD06 - PUSH 1F > PUSH 0A

Change Semi-Final draw date (FOLLOW EXACTLY!)

0078CD63 - PUSH EBX > FILL WITH NOPs 0078CD64 - PUSH 0A > FILL WITH NOPs

0078CD63 - NOP > PUSH 1 0078CD65 - NOP > PUSH EBX 0078CD66 - PUSH 1 > PUSH 0B (will take place on Thursday 11th January)

Change Semi-Final match date (FOLLOW EXACTLY!)

0078CD7A - PUSH EBX > FILL WITH NOPs 0078CD7B - PUSH 0A > FILL WITH NOPs

0078CD7A - NOP > PUSH 1 0078CD7C - NOP > PUSH EBX 0078CD7D - PUSH 0E > PUSH 1F

Change Final draw date (FOLLOW EXACTLY!)

0078CDFB - PUSH 3 > FILL WITH NOPs 0078CDFD - PUSH EBX > FILL WITH NOPs

0078CDFB - NOP > PUSH EBX 0078CDFC - NOP > PUSH 1 0078CDFE - PUSH 0A > PUSH 1 0078CE00 - PUSH 16 > PUSH 0C (will take place on Monday 12th February)

Change Final match date

As I posted in Post #604

And if you do all that exactly as I have written out you can go from this to this...

https://imagizer.imageshack.us/v2/76...0/809/wr64.png

And that is why I am amazing!!!

The Irish Super Cup probably looks up the Irish Cup winners. As you have disabled it the game is throwing a fit. Go into the Irish Super Cup offsets and find the reference to the Irish Cup and change it to another competition that is still running.

B. Do either of you know how JL reference those offset's for his Java apps.

I've had a look at them and where as you will list an offset one way, the ones in his apps seem to "+1" e.g. 0078D8B6 becomes 0x78D8B7

14-01-14, 10:23 PM

A rough guide would be great, I'm sure there's a scale or table somewhere to reference Hexidecimal numbers to get the next in a sequence.

Not sure these are right as I have just lifted them from a txt file done by JohnLocke, but anyway...

042A461 "Brazilian First Division TV Money (£)" 042CA51 "Brazilian Second Division TV Money (£)"

And if you follow that pattern for Brazilian Third Division TV Money...

I'm not sure what the Club Championship is.

1st round 26 clubs(10 from 3rd,10 from 2nd,6 from 1st div)

Sorry for later reply, just saw this post scanning through for something else.

There are probably reference to CL & UC in Scottish League Cup because European teams get a bye through to the 3rd(?) Round whereas other SPL clubs have to play in the previous round. Same happens in English League Cup.

Fods

Everyone knows I dislike him and think he should of been banned years ago. Don't need to troll back to prove it golly. Concentrate on your offsets buddy

Mark

For all of his persistent questions, has Pasquale ever actually shared any of the things he keeps working on?

I have in my head that the Northern Ireland league is now something resembling the PS3 FIFA league which falls apart after the first few games :lol:

Fods

ha ha

He is a troll, i really do beleive that. I dont think for one second he does anything with the offsets he is given.

Golly

World Club Championship Fixtures

Those who use a Tapani patch will know that the great man moved the WCC fixtures around and screwed it up somewhat (esp Group C). NB. I use Tapani 2.19 $\,$

WCC TAKES PLACE IN 2001

009291B2 - CMP AX,7D3 > 7D1

CHANGE THE DATE OF THE INITIAL DRAW

00929C39 - PUSH 7 > 6 00929C3B - PUSH 5 > 1 (Draw takes place on Sat 1st Jul instead of Sat 5th Aug)

SORTING OUT GROUP STAGE MATCH DAYS

0092942C - PUSH 5 > 6 00929431 - PUSH 6 > 3 0092945B - PUSH 9 > 6 00929487 - PUSH 0C > 9

SORTING OUT GROUP A FIXTURES

009295CD - PUSH 6 > 5 009295DE - PUSH 2 > 1 009295F2 - PUSH 2 > 1 00929602 - PUSH 1 > 2 00929604 - PUSH 5 > 4 00929615 - PUSH 5 > 4

SORTING OUT GROUP B FIXTURES DO IN THIS EXACT ORDER!!!

00929551 - PUSH 2 > FILL WITH NOPs 00929553 - PUSH EBX > FILL WITH NOPs

00929551 - NOP > PUSH EBX 00929552 - NOP > PUSH 6 00929563 - PUSH 3 > 2 00929577 - PUSH 3 > 2 00929589 - PUSH 6 > 5 00929598 - PUSH 6 > 5 00929598 - PUSH 6 > 5

SORTING OUT GROUP C FIXTURES DO IN THIS EXACT ORDER!!!

009294CA - PUSH 1 > 0 009294DA - PUSH 1 > 0 009294EB - PUSH 4 > 3 009294FF - PUSH 4 > 3

0092950F - PUSH 1 > FILL WITH NOPs 00929511 - PUSH EBX > FILL WITH NOPs

0092950F - NOP > PUSH EBX 00929510 - NOP > PUSH 6

0092951F - PUSH 2 > FILL WITH NOPs 00929521 - PUSH EBX > FILL WITH NOPs

0092951F - PUSH EBX 00929520 - PUSH 6

CHANGING SEMI-FINAL DRAW DATE

009296E0 - PUSH 1 > 0 009296E5 - PUSH 0E > 0B (Draw takes place on Mon 11th Dec)

CHANGING SEMI-FINAL MATCH DATE

009296F5 - PUSH 1 > 2 009296FC - PUSH 10 > 0D

CHANGING FINAL DRAW DATE

00929756 - PUSH EAX (=4) > EBP (=2) 0092975A - PUSH 11 > 0D

CHANGING FINAL MATCH DATE

00929771 - PUSH 14 > 10

CHANGING 3rd/4th PLAY-OFF DRAW DATE

009297EC - PUSH 4 > 2 009297F1 - PUSH 11 > 0D

CHANGING 3rd/4th PLAY-OFF MATCH DATE

00929808 - PUSH 13 > 10

RESULT

Fixtures are spread out much better. Like this...

SAT - GROUP A x2 SUN - GROUP B x2 MON - GROUP A x2 WED - GROUP A x2 WED - GROUP A x2 WED - GROUP A x2 FRI - GROUP A x2 (Fixtures kick off at same time) SAT - GROUP A x2 (Fixtures kick off at same time) SUN - GROUP C x2 (Fixtures kick off at same time) MON TUE WED - SEMI-FINALS x2 THU FRI SAT - 3rd/4th Play-off SUN - FINAL

Additionally, if you want the WCC Group stage to be moved to pre-season (End of July) BUT want the Semi-Finals and Final to remain in December (for realism). Change the following...

0092942F - PUSH 0B > 6 00929431 - PUSH 3 > 17 00929459 - PUSH 0B > 6 0092945B - PUSH 6 > 1A 00929485 - PUSH 0B > 6 00929487 - PUSH 9 > 1D

This will help with fixture congestion caused by playing 5 games in WCC in December.

This leaves the schedule like this...

https://imagizer.imageshack.us/v2/78...0/802/og8z.png

It begins with T, but he's not a troll.

Golly

Had a little play with the UEFA Champions League and changed the Semi-Finals to a 1 off game and moved it to the same venue as the Finals. Also changed the date of the Final (to a Saturday) so that the UCL now finishes...

TUE 21 MAY - Semi-Final 1 @ Hampden Park (2001/02) WED 22 MAY - Semi-Final 2 @ Hampden Park SAT 25 MAY - Final @ Hampden Park

Just need to get ET & Penalties to be played in the 1 off Semi's and it will be sorted.

Craig Forrest

FIFA WORLD CUP HOST BIDDING

Fed up of seeing Switzerland and Sweden/Norway hosting the World Cup? Well here are the offsets for nations bidding for the World Cup starting with 2010. Each World Cup has 3 bidders with 1 selected (at random?). I have included an example of the edits I made to my .exe to make it more realistic and only have each county bidding once over the 8 bidding cycles.

BID FOR 2010

005F9A91 - MOV EDX,DWORD PTR DS:[9CF260] > [9CF2D8] - BRAZIL > EGYPT 005F9AA1 - MOV EDX,DWORD PTR DS:[9CF218] > [9CF3D8] - ARGENTINA > MOROCCO 005F9AB1 - MOV EDX,DWORD PTR DS:[9CF480] - STH AFRICA

BID FOR 2014

005F9ACC - MOV EAX,DWORD PTR DS:[9CF4A8] > [9CF4F4] - SWEDEN (JOINT) > URUGUAY (JOINT) 005F9AD9 - MOV EDX,DWORD PTR DS:[9CF408] > [9CF218] - NORWAY (JOINT) > ARGENTINA (JOINT) 005F9AE7 - MOV ECX,DWORD PTR DS:[9CF488] > [9CF29C] - SPAIN > COLOMBIA 005F9AFD - MOV ECX,DWORD PTR DS:[9CF4AC] > [9CF260] - SWITZERLAND > BRAZIL

BID FOR 2018

005F9B25 - MOV EDX,DWORD PTR DS:[9CF3D0] > [9CF448] - MEXICO > RUSSIA 005F9B3B - MOV EDX,DWORD PTR DS:[9CF4F4] > [9CF2E4] - URUGUAY > ENGLAND 005F9B51 - MOV EDX,DWORD PTR DS:[9CF280] > [9CF338] - CANADA > HOLLAND

BID FOR 2022

005F9B6F - MOV EAX,DWORD PTR DS:[9CF360] > [9CF43C] - ITALY > QATAR 005F9B84 - MOV EAX,DWORD PTR DS:[9CF314] > [9CF224] - GERMANY > AUSTRALIA 005F9B99 - MOV EAX,DWORD PTR DS:[9CF2E4] > [9CF4DC] - ENGLAND > TURKEY

BID FOR 2026

005F9BB6 - MOV ECX,DWORD PTR DS:[9CF260] > [9CF4F8] - BRAZIL > U.S.A. 005F9BCC - MOV ECX,DWORD PTR DS:[9CF218] > [9CF3D0] - ARGENTINA > MEXICO 005F9BE2 - MOV ECX,DWORD PTR DS:[9CF4F8] > [9CF280] - U.S.A. > CANADA

BID FOR 2030

005F99E9 - MOV ECX,DWORD PTR DS:[9CF300] > [9CF31C] - FRANCE > GREECE 005F99FB - MOV ECX,DWORD PTR DS:[9CF488] - SPAIN 005F9A0B - MOV ECX,DWORD PTR DS:[9CF434] - PORTUGAL

Has anybody ever found the remaining colour offsets?

The main one I am looking for is the text colour. At the moment we are stuck to skinning the game with dark colours due to the text being white.

Dermotron

It's a bit of stretch but could I possible make a request from one of you patching/olly geniuses.

Would it be possible to get a list of the minimum amount of teams required by for each playable cup competition. If it is a lot of work this could be cut to a specific few either. I have a feeling there a number of Lower Division leagues that can be cleared from the *data* without effecting the game or required modification to the .exe but I reckon the only issue will be the number of entrants in the early stages of some cups.

For instance the Russian Lower Division, Swedish Lower Division & Finnish Lower Division, all have huge Non leagues structures that don't direct connect to the bottom playable tier in the way that the French CFA or Spanish Lower Division are. These seem like pointless comps that I am pretty sure can be reduced to 0 entrants. The only issue would be the cups.

Should help to lighten the DB when playing on Max settings ;)

djole2mcloud

i can take a look of few when i catch time...but be aware that some lower leagues are connected to cup competitions... croatia:

ASCII "the CROATIAN_CUP"

00607364 > 393D 98F89C00 CMP DWORD PTR DS:[9CF898],EDI

CH REP (JOINT) VAKIA (JOINT)	
ELAND (JOINT) RELAND (JOINT)	
Argentina & South Africa bid for 2042, Sweden	/Norway,
	16-01-14, 12:04 PM

16-01-14, 12:04 PM

22-01-14, 08:46 PM

30-01-14, 06:16 PM

u see, that cup picks clubs from croatia 3rd central div...so that league must not be cleared.,..i presume that also goes for many other divisions...

Dermotron

30-01-14, 06:20 PM

Excellent djole, thanks. I think only lower than that would be what I'd be interested in. So for instance in Croatia, only Croatian Lower Division (even though with only 29 teams it's such a big issue)

Sweden is the big one though, with ~470 teams doing fuck all only taking up space!

djole2mcloud

30-01-14, 06:42 PM

yes, i agree... it is lot easier to do patching also, without those unplayable lower leagues... they just sit there... i'll try to find time over weekend...

so, if i understood clearly, u need minimum number of teams for all playable cups?

Quote:

0 01 14 00 42 00

I think minimum number of teams should be enough. Or maybe check which leagues a Cup picks teams from?

For instance if Swedish Cup doesn't take any teams from Swedish Lower Division there should be no issue removing teams?

djole2mcloud

swedish cup:

0088DAA1 |. 3B0D C8F79C00 | CMP ECX, DWORD PTR DS:[9CF7C8] - swedish second div

0088DAD8 |. 3B0D A8F49C00 |CMP ECX,DWORD PTR DS:[9CF4A8] - sweden

0088DAE9 |. 3B0D ACF69C00 |CMP ECX,DWORD PTR DS:[9CF6AC] - swedish lower div

0088DB2E |. 3B0D F0F59C00 | CMP ECX, DWORD PTR DS:[9CF5F0] - swedish first div

0088DB8B |. 8B1D ECF59C00 | MOV EBX, DWORD PTR DS:[9CF5EC] - swedish premier div

0088D5AF |. 66:C746 3E 1E0>MOV WORD PTR DS:[ESI+3E],1E is 30 clubs for the cup needed

Dermotron

Blah. Take it that means cant clear out swedish lower division :(

EDIT: Removed it and testing atm

djole2mcloud

i am little surprised with this lower number of clubs needed for the cup?!but i didn't found any other offset...on the other hand, i have never played swedish league so i don't know what id the cup system...maybe there is a way round but that requires .exe editing...

Dermotron

djole2mcloud

as i see there are 8 groups with total of 232 clubs in the swedish cup first round... and whole lot of them are from non league...

Dermotron

Still, that's potentially 204 less clubs loading. Interesting.

MarcoVanBast

I have text offsets, but need to take my old PC from parent's house to check it :)

giovanisantana29

Is there a way to change the date that starts the game in a certain league? For example, when I start the game in Brazil, the game always starts on day 21/12, no way to change that date?

Golly

Change the following 4 offsets:-

006647BA - MOV WORD PTR DS:[EAX],2C > 2A (Amount of Fixtures- 44 > 42)

0066503B - PUSH 2C4 > 512 00665042 - MOV WORD PTR DS:[EDI+3E],0C > 16 (Amount of teams in League- 12 > 22)

00665149 - MOV WORD PTR DS:[ESI+3C],4 > 2 (Amount of Fixtures Round- 4 > 2)

Use CMEXPLORER to add 10 Lower Division Japanese clubs to J-League 2. Then use the Editor to rearrange the lower division clubs as you please ensuring all Japanese unplayable Leagues still have the correct amount of teams in.

Do all this and you should have a league of 22 with each team playing the other twice and 42 fixtures in total.

One problem I can forsee is that the Japanese Cup is only contested between 28 teams- 16 from JL1 and 12 from JL2. So 10 teams will miss out on the Japanese Cup. When I ran a game with the changes listed above R1 contained 19 JL2 teams and 5 JL1 teams. The 4 teams entering in R2 were 1 from JL1 and 3 from JL2. So all 22 JL2 teams entered the Cup and only 6 JL1 teams (10 missed out).

The Emperor's Cup is larger. It starts with 64 teams entering R1 (12 JL2 and 52 others). After 2 rounds with these teams the 16 teams to make it through are joined by the 16 JL1 teams to make 32 teams and it's a straight knock-out from there. I ran all the offset edits and CMEXPLORER alterations I listed and when I run the game the First Round of the Emperor's Cup still contrains 12 JL2 and 52 others. I've had a good look through the Emperors Cup offsets and I can't find one that would pick 12 JL2 clubs and 52 others. So I am stumped on that one.

ok thanks, i will try it.i have 4 question may be you can help me:

- how many maximum clubs can be added to japan league 2?
 how about enlarge participated club in emperor cup from 64 to 128 clubs? if i want to change emperor cup structure in new model, for example: emperor cup followed 128 club for first stage, 2nd stage 64 clubs, 3th 32 club, 4th 16 clubs, 5th 8 club, 6th semifinal, 7th final.. can you explain me how to create it step by step?
- 3. how about relegated club in japan league 2? if i decided 2 bottom japan league 2 relegated and 2 club from lower divion have promoted, what should i do? which offset will be changed?

4. how to chage regulation in japan league likes english premiere league, if we play draw not yet extra time anymore i'm sorry for many question and poor english.

MarcoVanBast

12-02-14, 07:21 PM

Still what to load FULL database, i mean ALL layers who are in editor to show in game. Need it fro cm3 98-99? however i sure same code answering for it. Maybe it possible to shut down command which is counting "minimum" or "normal" data to load and load all.

Pasquale

18-02-14, 05:28 PM

Hi guys, I saw that giovannisantana has published the patch Austria with a limit of foreign players .. how do you restrict foreigners in northern

Craig Forrest

Why would you want to know for N. Ireland? That seems very unlike you Pasquale..... who is this really?

Pasquale

:lol: mh?? I'm interested in the Northern Ireland because of all the championships CM 2001 is the most modifiable .. for example, I can create leagues such as Armenia, Andorra or San Marino, which are national with a few clubs you know?

Fods

It seems by the amount of questions you ask its a fucking nightmare to modify :pound:

giovanisantana29

Quote:

Go to offset 00793864 and put "MOV BYTE PTR DS:[EDX+5],3". And put in the line below "RETN 8"

Pasquale

I changed what you said but no change

giovanisantana29

You must have done something wrong, then..

Pasquale

I only changed what you said, nothing more ... but that patch do you use?

giovanisantana29	21-02-14, 12:23 AM

The patch makes no difference about it ... worked with and without it.

Pasquale

Very strange I did what you said but I have no result ... the strange thing is that I tried with your patch of Austria to take the value that you said but nothing changes always remain foreigners 3. ...

giovanisantana29

Ohh sorry Pasquale, I made a mistake ..

Change this block: http://s27.postimg.org/w1fkyvrkz/image.png to this: http://s27.postimg.org/muxablmcj/image.png

And both Republic of Ireland and Northern Ireland will be with limit foreign

Pasquale

I did not understand what I have to change ... can you explain step by step?

21-02-14, 12:53 AM

21-02-14, 01:09 AM

Dude, just put exactly what is in the picture...

Pasquale

The game crashes just click on a club the game freezes ... are you sure that it is only those steps?

giovanisantana29

Now surely you did something wrong...

Pasquale

Impossible, I followed the instructions in the photo you sent recently ... only those instructions and nothing more

giovanisantana29

In this .exe I did just what is in the picture that I posted and as you can see, it's working perfectly, and with foreigner limit in the two Irelands. http://www.sendspace.com/file/t6055i

Here's my modified exe that I changed Northern Ireland with Armenia I have taken all the steps but it goes

http://www.sendspace.com/file/d7blgw

giovanisantana29

I SAID YOU HAD DID SOMETHING WRONG!

How you did: http://s28.postimg.org/jlkz7v4ot/image.png

How it should have been done: http://s28.postimg.org/i7tcck5fh/image.png

Pasquale

GIOVANI SANTANA YOU ARE THE BEST :clap::cl

Cam F

This is fecking hilarious :rofl:

There should be a separate Northern Ireland offset thread so others who find the main offset thread interesting don't have to read every second post about N Ireland :lol:

Pasquale

The offsets are found useful not only to me but also to other users who want to create new leagues so shut up :roll:

MarcoVanBast

Guys what is cpp and what can we do with it?

Hugo9

cpp is a file extension used by the C++ programming language - I assume that is the language the game was written in.

I'm currently trying to teach myself to write software in C++ myself.

Golly

Oooooh

I have worked out how TV matches are scheduled in league competitions.

And I have successfully changed the English Premier League TV schedule from 2x Sunday Afternoon games + 1x Monday Evening game to 1x Saturday lunchtime (AM) + 1x Saturday evening + 1x Sunday afternoon.

23-02-14, 07:16 PM

Hugo9

23-02-14, 10:09 PM

24-02-14, 04:44 AM

I have been looking through all the files in JohnLocke's 'flex' and I think I have found out how the JL patch works.

The zip file (flex 2013-06-16) contains the following directory: \workspace\JLPatch\config\jlpatch\default\

This seems to be a collection of files with a .patch extension, each corresponds to an option in the jl patch.

If you rename one of these files and then run JL Patch the option is renamed too - so jl patch must just be reading all files in this directory.

These .patch files are just text files, for example - 'Italy - 18 loans.patch' contains just the following: 0x2618a4 0x4 0x12. If I've understood this correctly, these are just the offset, original value and new value.

so do you mean that anyone can add/remove/edit an option of JL tool just using the correct line in .patch extension?

24-02-14, 11:18 AM

Quote:

Originally Posted by milo 🔊

Yes. To remove an option just go into \workspace\JLPatch\config\jlpatch\default\ and delete the file (or more it somewhere), that option will then be missing the next time you run the jl patch.

Adding options would be more difficult, however JL created a tool called Patch Creator (in Flex), which has this description: "Generates a 'patch' based on the difference between two files - useful for finding what the Tapani patch actually changes."

When you run it you select two CM exe files, it then auto-generates a .patch file with the differences between the two files.

So to create your own .patch just keep a 'before' exe, make the desired changes with Olly, then use the two exes in Patch Creator. Then place the generated .patch file in the folder mentioned above - JL Patch then auto loads it.

Yes. To remove an option just go into \workspace\JLPatch\config\jlpatch\default\ and delete the file (or more it somewhere), that option will then be missing the next time you run the jl patch.

Adding options would be more difficult, however JL created a tool called Patch Creator (in Flex), which has this description: "Generates a 'patch' based on the difference between two files - useful for finding what the Tapani patch actually changes."

When you run it you select two CM exe files, it then auto-generates a .patch file with the differences between the two files.

So to create your own .patch just keep a 'before' exe, make the desired changes with Olly, then use the two exes in Patch Creator. Then place the generated .patch file in the folder mentioned above - JL Patch then auto loads it.

cool, thanks :ok:

vult

Hey, does anyone know if there is an offset for Polish league TV money? The only one I found refers to prize money.

Pasquale

You can enter relegation in the Korean League?

Craig Forrest

what about removing relegation from a league? I want to do a USA patch... they have 3 league levels (MLS, NASL, USPRO) but with no promotion/relegation.... I'd love to figure out a way to turn that off so that you could manage in any of the 3 tiers but still keep all the leagues in the same country

Pasquale

Also remove the play-off/out of Northern Ireland would not be bad

djole2mcloud

what league u have in mind?

djole2mcloud	01-03-14, 01:29 AM

well, not a problem for a league which last tier has no relegation to non league...i did it many times...scotland for example...france has 3 tiers, denmark, but they have relegations/promotions to non league, and i didn't figured how to cancel promotions from non league...

Depending on what is being edited, this is probably because the 'instruction' bit is not being changed.

For example, the prize money for the premier league offset is:

00574B1C | > \68 90D00300 PUSH 3D090

But in JL's config files the offset stored is: 0x174B1D

[Ignoring the 0x400000 difference] the 1 byte difference is to reflect that the important value (the money) starts after the PUSH instruction.

This should set EBX to 3D090 (250000) for use on these 3 lines.

I haven't got the patience to test this, or figure out why there would be a need for 3 values for TV money.

For Cup competitions there are 3 prize money values for each round. These are for winners prize money, losers prize money and participation money.

There TV money might be because you get a fixed amount at the start of the season, a small amount when your game is on TV and place based prize money at the end of the season?

I do not know if anyone will be able to help me, but .. I am trying to turn the Brazilian First Division in a "round-robin" tournament. Ie, without semi-final and final phases , just for points as it is currently. I made a lot of changes (several do not even remember all) and theoretically was perfect:

http://s25.postimg.org/448wwzkvj/image.png

Spoiler! Show

Hugo9

06-03-14, 08:53 AM

06-03-14, 09:10 AM

This is the line that is picking 4 teams (DL is set to 4 @ 42A5AD): 0042A5DB - MOV BYTE PTR DS:[ESI+0BE],DL

I don't know how the rest of it works though.

If you expand the details section of the error it might give an offset at which the game crashed - this might help to narrow down where it broke.

Hugo9

NOT TESTED

I think I've found a way to make more space available in the exe.

This might be easier to explain if you have Olly open at the section below:

00595BD0 . 68 E8709800	PUSH OFFSET 009870E8	; ASCII "v%s %s.%s %d"
00595BD5 . 68 D024AE00	PUSH OFFSET 00AE24D0	
00595BDF . 55	PUSH EBP	
00595BE0 . 68 D024AE00	PUSH OFFSET 00AE24D0	
00595BE5 . 68 E0709800	PUSH OFFSET 009870E0 CALL 005E8290 ADD ESP,24	; ASCII "Error"
00595BEA . E8 A1260500	CALL 005E8290	
00595BEF . 83C4 24	ADD ESP,24	
	MOV DWORD PTR DS:[0B67A34],EBP	
	XOR EAX, EAX	
00595BFA . 5E	POP ESI	
00595BFB . 5D	POP EBP	
00595BFC . 5B	POP EBX	
	ADD ESP,200	
00595C03 . C3	RETN	
00595C04 > A1 5C23AE00	MOV EAX, DWORD PTR DS: [0AE235C]	

I think everything from 00595B9C to 00595C03 just relates to displaying an error message. If the RETN statment is moved to 00595B9C the rest can be filled with NOP, giving us 66 bytes of space to write new code. It looks like all the .cpp text lines just relate to error messages - so this technique can be used all over the place.

I'll test this at some point.

Hugo9

NOT TESTED

I think I've found a way to make more space available in the exe.

This might be easier to explain if you have Olly open at the section below:

Code:

CPU Disas	sm

Originally Posted by Hugo9

This is the line that is picking 4 teams (DL is set to 4 @ 42A5AD): 0042A5DB - MOV BYTE PTR DS:[ESI+OBE],DL

I don't know how the rest of it works though.

If you expand the details section of the error it might give an offset at which the game crashed - this might help to narrow down where it broke.

 ${\rm I}$ lost the exe that was making the changes... ${\rm I}$ did some wrong changes and it no longer works.

So I started it from the beginning:

1 changed: 0042A5DB - MOV BYTE PTR DS:[ESI+BE],DL to MOV BYTE PTR DS:[ESI+BE],1 so that only one team qualify and therefore, be champion. 0042A2D4 MOV WORD PTR DS:[EAX],2 to MOV WORD PTR DS:[EAX],0 for the semi-final and final do not happen.

Everything worked perfectly, but at the end of the championship, this error occurs: http://s25.postimg.org/r1id0mru7/image.png

Hugo9

No idea what causes it but that message relates to: 0x51CB3D - PUSH 0A64 (which is hex for 2660)

See also: 0x51C84B - JG 0051CB16, which is the line that causes the jump to the code that shows the error.

Hugo9

00683182 | . 807E 64 03 CMP BYTE PTR DS:[ESI+64],3 00683186 |. 75 04 JNE SHORT 0068318C 00683188 |. C646 64 02 MOV BYTE PTR DS:[ESI+64],2

I think the above sets a clubs pro status to semi-pro if they are amateur and the club gets promoted into a playable league.

Hugo9

00683182 |. 807E 64 03 CMP BYTE PTR DS:[ESI+64],3 00683186 |. 75 04 JNE SHORT 0068318C 00683188 . C646 64 02 MOV BYTE PTR DS:[ESI+64],2

I think the above sets a clubs pro status to semi-pro if they are amateur and the club gets promoted into a playable league.

07-03-14, 10:20 PM

Anyone know how to change value rate?

As i understand standard value is english pound and all others have their exchange values. I find part of code, can change the name/symbol of any value but cant understand wheres rate of each value

07-03-14, 06:56 PM

06-03-14, 06:21 PM

07-03-14, 10:20 PM

08-03-14, 07:23 AM

There's also a value limit too (26,000,000 I think) can the limit be removed

MarcoVanBast

Okie i find what strings in code answers for VALUE RATE.

MOV DWORD PTR DS:[8334F0],7AE147AE MOV DWORD PTR DS:[8334F4],3FF7AE14 MOV DWORD PTR DS:[8335DC],40080000

NOW NEED TO EXPLORE WHICH EXACTLY SET rate

PS: Its cm3 (98-99) code but i sure cm01-02 same

i think it more compicated coz it affected by many things like CA PA Reputation and etc..

MarcoVanBast

SO that code strings change all

MOV DWORD PTR DS:[8334F4],3FF7AE14 - "3FF7AE14" makes pound value get Pound x 1,4545454545454545 value (Euro value ingame) MOV DWORD PTR DS:[8334F4],400B70A3 - "400B70A3" makes pound value get Pound x 3,4090909090 value (Real ingame)

Need to know hex numbers to manipulate it :) anyone know it

PS: understand how to set it approximately :)

MarcoVanBast

Hugo9

None of those lines exist in the cm0102 executable

If it helps, the text string 'Value' can be found at 0x98ea0c.

MarcoVanBast

Little advice from me

If u want find smth, try find binary name not so staright :)

I mean if u need value u need search binary string "Euro" or better "Peso". Not "value", its not so simple :)

djole2mcloud

09-03-14, 03:13 PM

hugo,

can u figure it out how to add relegation/promotion to Scottish 3rd div?

Hugo9

Tried.

007F4F65 66:C786 BF000000 0000 MOV WORD PTR DS:[ESI+0BF],0 007F4F6E C686 C0000000 01 MOV BYTE PTR DS:[ESI+0C0],1 007F4F75 90 NOP 007F4F76 90 NOP

Failed, crashes during season update - caused by line 48ce46.

Craig Forrest

those are the playoff offsets aren't they? shouldn't it be [ESI+0BE] and [ESI+0C1] that you change?

of course I'm probably totally wrong.....

Hugo9

The original values are weird - it uses AL for all four values (BE, BF, C0 & C1). AL is set to 2 (see 07f4f23).

MOV WORD PTR DS:[ESI+0BF],0 is a bit clever, this sets BF AND C0 to 0 - it does this by writing two bytes, rather than one (WORD = 2 bytes). The C0 line above should have been C1 - but the game still crashes.

It might be because, unlike Denmark, there is no code to promote teams from non-league.

Hugo9

Not fully tested this but if this works - WOW!

00540B00 JE SHORT 00540B1B, change to: JMP SHORT 00540B1B

Result - you can have B teams in any country instead of just Germany, Spain and Portugal.

Hugo9

Craig Forrest

any idea what line of code I should be looking for if I want to change player restrictions within a certain country? It used to have it in the League Replacement guide tutorial but it has been changed to a video showing how to use the Flex tool.... but that tool doesn't have all the leagues... and I can't remember what I'm looking for....

Craig Forrest

does that change your reserve squad into a B team?

Hugo9

Alas not - but if you move, for example, Bayern Munich into the Premier league and Bayern Munich A into the Championship the link is preserved - if you do that without the above modification the two clubs would not be linked.

A

Craig Forrest

09-03-14, 08:05 PM

Will it preserve the link if the clubs are renamed? example: Club America and Club America B

09-03-14, 05:18 PM

The flex tool seems to be using the file ./config/flexeditor/Restrictions.txt - that might help track down what the code should look like.

Example: England 0x179c65

Craig Forrest

I saw that but even though JL said that just add 400000 to that number to get the offset in Olly, it gives me offsets that have nothing to do with restrictions....

Hugo9

Quote:

Originally Posted by Craig Forrest

No - the clubs are linked by names stored in the exe. See http://www.champman0102.co.uk/showthread.php?t=380 for details on how to add B teams.

Craig Forrest

I've read that but I can't ever get it to work :D

Hugo9

Quote:

09-03-14, 08:24 PM

09-03-14, 08:22 PM

EDIT: I've realised that the data below is only half right, I'll post new data shortly.

Try this (read this thread first - http://www.champman0102.co.uk/showthread.php?t=4763): Code:

0x140b00 0x74 0xeb 0x5d1e0c 0x46 0x53 0x5d1e0d 0x43 0x48 0x5d1e0e 0x5f 0x45 0x5d1e0f 0x42 0x46 0x5d1e10 0x41 0x46 0x5d1e11 0x59 0x49 0x5d1e13 0x52 0x4c 0x5d1e14 0x4e 0x44 0x5d1e16 0x4d 0x55 0x5d1e17 0x55 0x4e 0x5d1e18 0x4e 0x49 0x5d1e19 0x43 0x54 0x5d1e1a 0x48 0x45 0x5d1e1b 0x45 0x44 0x5dle1c 0x4e 0x0 0x5e1470 0x46 0x53 0x5e1471 0x43 0x68 0x5e1472 0x20 0x65 0x5e1473 0x42 0x66 0x5e1474 0x61 0x66 0x5e1475 0x79 0x69 0x5e1477 0x72 0x6c 0x5e1478 0x6e 0x64 0x5e147a 0x4d 0x55 0x5e147b 0xfc 0x6e 0x5e147c 0x6e 0x69 0x5e147d 0x63 0x74 0x5e147e 0x68 0x65 0x5e147f 0x65 0x64 0x5e1480 0x6e 0x0

First change enables b teams in all nations, the rest just changes the link from Bayern Munich to Sheffield United - game loads as normal but Bayern no longer have a b team; instead Sheffield United are linked to Bayern Munich A. Bayern Munich have a reserve team instead though.

In my data both Munich teams are playing in England already - have not tested with a link to a club in another nation. Will do that now - how amazing would that be?

Hugo9

09-03-14, 08:51 PM

EDIT: I've realised that the data below is only half right, I'll post new data shortly.

Try this (read this thread first - http://www.champman0102.co.uk/showthread.php?t=4763):

Code:

0x140b00 0x74 0xeb 0x5d1e0c 0x46 0x53 0x5d1e0d 0x43 0x48 0x5d1e0e 0x5f 0x45 0x5d1e0f 0x42 0x46 0x5d1e10 0x41 0x46 0x5d1e11 0x59 0x49 0x5d1e13 0x52 0x4c 0x5d1e14 0x4e 0x44 0x5d1e16 0x4d 0x55 0x5d1e17 0x55 0x4e 0x5d1e18 0x4e 0x49 0x5d1e19 0x43 0x54 0x5d1e1a 0x48 0x45 0x5d1e1b 0x45 0x44 0x5d1e1c 0x4e 0x0 0x5e1470 0x46 0x53 0x5e1471 0x43 0x68 0x5e1472 0x20 0x65 0x5e1473 0x42 0x66 0x5e1474 0x61 0x66 0x5e1474 0x61 0x66 0x5e1475 0x79 0x69 0x5e1477 0x72 0x6c 0x5e1478 0x6e 0x64 0x5e147a 0x4d 0x55 0x5e147b 0xfc 0x6e 0x5e147c 0x6e 0x69 0x5e147d 0x63 0x74 0x5e147e 0x68 0x65 0x5e147f 0x65 0x64 0x5e1480 0x6e 0x0

First change enables b teams in all nations, the rest just changes the link from Bayern Munich to Sheffield United - game loads as normal but Bayern no longer have a b team; instead Sheffield United are linked to Bayern Munich A. Bayern Munich have a reserve team instead though.

In my data both Munich teams are playing in England already - have not tested with a link to a club in another nation. Will do that now - how amazing would that be?

http://s27.postimg.org/wcmubzkxf/hugo.gif

Edit: With Bayern back in Germany they no longer have a reserve team - just like other clubs with no b team.

That's what I thought it was but it's not to be found in any of the Danish leagues.....

There doesn't seem to be a denmark_rules.cpp either. Odd that the code works differently for Denmark.

I assume that's why it isn't in Flex.

djole2mcloud

09-03-14, 11:13 PM

there are no player restriction for Denmark, maybe that why denmark rules, cpp does not exist but maybe game can be forced to use some other country rules for Denmark

Craig Forrest

09-03-14, 11:21 PM

Well it says max 3 non-EU players in the match squad so I was hoping to change that but I can't find anything that relates to it..... maybe my brain just isn't working right I've looked at too much code in the last few days

djole2mcloud

09-03-14, 11:49 PM

this is the Belgium rules offsets:

00424F80 . 8B5424 08 MOV EDX, DWORD PTR SS:[ESP+8] 00424F84 . 57 PUSH EDI 00424F85 . B9 0A000000 MOV ECX,0A 00424F8A . 83C8 FF OR EAX, FFFFFFF 00424F8D . 8BFA MOV EDI, EDX 00424F8F . weird?

Craig Forrest

Something Tapani did in the patch..... that's not in my exe..... if it was, then 0055447F would be the offset that I need to change...

Craig Forrest

ugh... I've been going over the EXE for too damn long... at least a couple of hours now trying to figure out where the game is told that Denmark is allowed 3 non-EU players in the match squad... which is crazy hard because there is no section for Denmark rules.... but it isn't anywhere.... it should be as simple as finding MOV BYTE PTR DS:[EDX+5],3 but that isn't anywhere either apart from some other countries (like England and France).... now my thought is that like djole posted earlier, there is something in the code that points to another league to steal the rules from..... but I can't find that either..... it's possible that I just overlooked some JMP command or some CALL command so I'll look again in the morning.... I think I may dream of code tonight....

Hugo9

Maybe the game has some sort of default setting? Then the developers just added code for countries where the rules were different.

djole2mcloud

a ham, you say in untapanified version there is player restrictions in Denmark, but in tapanified i have no restrictions at all...then maybe in tapanified version denmark uses belgium rules...cause there is no restrictions in belgium...tapani must linked that somehow...the same way i sent u Zozoa solution to use spanish 2nd div fixture structure for danish 1st division... i manage to start Korean league in 2013 using that trick.. another question, is there player restrictions in belgium in untapanified version?

Ouote:

Craig Forrest

no... no player restrictions in Belgium

Sent from my SGH-S730M using Tapatalk

djole2mcloud

hmm...then Denmark must be using Belgium player restriction rules in Tapanified version of the game...then in theory, changing Belgium rules will affect Denmark rules...i speak for Tapanified version...will try and let u know...

Craig Forrest

problem is the code in the tapanified version is in the fixtures in Denmark so i can't just copy and paste

These offsets contains the code which team will receive the Kings Dock stadium, originally from Everton (9D0248 = Everton). I moved to 9D0110 (Arsenal's code) and the stadium was for Arsenal.

0059BCD7 PUSH OFFSET 009C87BC ; |Arg2 = ASCII "Kings Dock"

The text 'Kings Dock' can be found at 009C87BC, you could edit this to Emirates ('The Emirates' is 1 character too long), then create a stadium in the editor called Emirates - the game should then use that instead of Kings Dock.

Would it be worth creating a thread for this? Then we can add more 9CF values for other things - clubs, countries etc. Then there would be one place to search (ctrl+f) when you find a value in Olly.

The text 'Kings Dock' can be found at 009C87BC, you could edit this to Emirates ('The Emirates' is 1 character too long), then create a stadium in the editor called Emirates - the game should then use that instead of Kings Dock.

Yes, I had already done it before you speak.

A thing that should be added, is that the stadium must have a negative capability (must be placed -60000 and not just 60000, for example) if not the stadium move simply does not occur.

0059BCD7 PUSH OFFSET 009C87BC ; |Arg2 = ASCII "Kings Dock"

The text 'Kings Dock' can be found at 009C87BC, you could edit this to Emirates ('The Emirates' is 1 character too long), then create a stadium in the editor called Emirates - the game should then use that instead of Kings Dock.

Yes, I had already done it before you speak.

A thing that should be added, is that the stadium must have a negative capability (must be placed -60000 and not just 60000, for example) if not the stadium move simply does not occur.

Probably best to lock the other up mate and use it for reference. New offsets can be added to the other for reference from here as they are found/compiled. Keep the other thread nice and tidy

thanks very much hugo9 i will try it.

how about this problem, i created Indonesian Super League (asia region), i decided swap Poland League with indonesian super league. Indonesian clubs now take part in CL and EL, and the national team competes in national qualifiers for UEFA. That was alright. Poland played in the Asian national qualifiers. i like Japan league and south korea league, so i didn't replace with them.any solution how to fix it?

Changing Day/Time of TV Matches

I mentioned a while back that I had worked out how the game schedules TV matches. Below is a fixture offset for Match 3 in the English Premier League season...

http://i1218.photobucket.com/albums/...EPLTVdates.png

The offsets for Match 3 (Arg2 = 2) has 5 sections. The top section is the timing of the round of fixtures...

0057378D - PUSH 0 (Arg9) = fixture venue. 0 is for the home team hosting the game. If you switched it to 4 an entire round of fixtures would be played at the National Stadium of that competitions country. ie Wembley for EPL. 0057378F - PUSH EDX (Arg8) ??? 00573790 - PUSH 1 (Arg7) = time of day. 0= AM (Morning), 1= PM (Afternoon) and 2= EVE (Night) 00573792 - PUSH 5 (Arg6) = day of week. 0= Monday, 1= Tuesday, 2= Wednesday, 3= Thursday, 4= Friday, 5= Saturday and 6= Sunday 00573794 - PUSH 0 (Arg5) = year of season. So for 2001-02 season... 0= 2001 and 1= 2002 00573798 - PUSH 7 (Arg4) = month of year. 7= August 00573798 - PUSH 7 (Arg2) = day of month. 1A= 26th 00573798 - PUSH 2 (Arg2) = fixture round. For EPL 0= match 1, 1= match 2... 0F= match 16, 10= match 17... 24= match 37, 25= match 38 0057379C - PUSH ESI (Arg1) ???

So the match above takes place on the nearest Saturday to August 26th (23rd-29th) in the afternoon.

The next 3 sections are the timing of the TV matches. For each match Arg5= the time of day and Arg4= the day of the week. So the 3 TV matches above are played on Sunday PM, Sunday PM and Monday EVE. Below is an example of an edit I have made. Now the TV matches take place on Saturday AM, Saturday EVE and Sunday PM...

http://i1218.photobucket.com/albums/...PLTVdates2.png

The last section is standard for all fixtures offsets, but it appears the Arg3 value is the amount of TV matches played. The value on the example shown is 3. I have gone through the entire EPL offsets to check and the value always equals the amount of games on TV. I would imagine if you change the Arg3 value to 0 for every round of fixtures then there would be no TV games at all. Although I haven't checked that.

change the Arg3 value to 0 for every round of fixtures then there would be no TV games at all. Although I haven't checked that.

20-03-14, 11:13 AM Golly

Should just add the amount of TV games varies. For instance there are no TV games in the first and last round of EPL games.

Can someone move this to the [9CF***] thread? Thanks

[9CFA1C] = South America (0x9d9420) [9CFA18] = Oceania (0x9d9430) [9CFA14] = North America (0x9d9438) [9CFA10] = Europe (0x9d9448)[9CFA0C] = Asia (0x9d9450) [9CFA08] = Africa (0x9d9458)

2nd offset it the address where the name is stored - you could use that to rename the continents, although you would need to edit the data to match.

giovanisantana29

Hugo, a while ago I tried to transform the Inter-American Cup in South American Recopa (super cup between the champions of the Copa Libertadores and Copa Sudamericana). But when the same team win both competitions, this happened:

http://imageshack.us/a/img268/5127/qngz.png

Do you know if there is any way to avoid this?

Hugo9

Post details of how you did that and I'll take a look.

Hugo9

These two blocks of code seem to be the default settings for leagues. The game overwrites some of these but of it doesn't these are the values used. I don't know what they're all for.

These two blocks of code seem to be the default settings for leagues. The game overwrites some of these but of it doesn't these are the values used. I don't know what they're all for.

No idea - maybe use a different competition, e.g. a charity shield, those should already prevent this happening for when a clubs win the league and cup.

In my game I find Ireland, N Ireland & no offence Top but Wales pointless.

I would love to replace these leagues with other European nations, say Switzerland, Romania & Austria for example but when you replace them presently the regens also include the UK & Ireland kids.

Just a thought. Try changing the nationality of the clubs - I know you won't be able to manage them but it could help identify why you get UK regens, i.e. is it linked to the nationality of the club or the nationality of the competition?

Hugo9

00821900: code that displays the list of nations to select a nationality from, could be edited it you want your nation to be on the list.

Can someone move this post http://www.champman0102.co.uk/showth...414#post157414 to the [9CF***] thread? Thanks

ryanitaa

hugo can you created relegation in japan league 2, and club from japan lower league promotion to japan league 2?for example club from japan football league promotion to japan league 2.

Hugo9

Relegation - yes, probably. Promotion from lower leagues - no.

Craig Forrest

You could try the full exe.txt file to see how many "[EDX+5]," references there? Might need to repeat using different register though (EAX, ECX etc). It must be in there somewhere.

Craig Forrest

It's on my comp at home and I'm trying to kill time at work :D

djole2mcloud

can't u compare original exe with tapanified...there is no player restrictions in denmark in tapanified version...maybe u can figure what tapani changed

005516D7 C646 4A 03 MOV BYTE PTR DS:[ESI+4A],3 > 12

Don't ask me why, but change this offset (located right at end of Danish Cup) and ALL Danish competitions allow upto 18 foreigners in a match day squad.

Golly

005516D7 C646 4A 03 MOV BYTE PTR DS:[ESI+4A],3 > 12

Don't ask me why, but change this offset (located right at end of Danish Cup) and ALL Danish competitions allow upto 18 foreigners in a match day squad.

Golly

Does that fix the problem? Doesn't cause any other issues?

Craig Forrest	24-03-14, 08:57 PM
I'll test and see :ok:	
Mucho graçias señor	
Craig Forrest	24-03-14, 08:58 PM
isn't ESI+4A usually subs?	
Craig Forrest	24-03-14, 09:03 PM

that changed nothing for me.....

Craig Forrest

are you using tapani?

djole2mcloud

in tapanified exe offset is the same as Golly wrote, but still there are no player restriction...

Craig Forrest

Tried it also on a non-Tapani exe and it works for me...

http://i1218.photobucket.com/albums/...ishoffsets.png

And the subs are still the same too (3 used out of 4 named).

The best tip I can give anyone when searching for offsets is this...

If you only use logic you won't always find what you are looking for. Sometimes the best thing to do is work out what VALUE you are looking for (3 in this case) and then search through the offsets manually and experiment with any offsets that could fit the bill EVEN IF COMMON SENSE TELLS YOU IT SHOULDN'T BE THAT OFFSET.

Golly

25-03-14, 08:46 AM

NOW I am confused. Forget that offset. Whenever I start a game the Danish competitions are all 18-foreigners in match squad. So, why are some people saying it's always 3 non-EU only???? I have tried with and without Tapani and it's still the same for me!

There are no rules in Denmark. There are no rules in Sweden.

When there are no rules the game defaults to the English rules.

Therefore I am guessing you are stuck with 3 non-EU in the Danish competitions (and Swedish too) because you have edited the English rules to 3 non-EU players. It is worth noting that there is no limit on non-EU players in the English league. Clubs can have as many as they like as long as they qualify for a work permit.

So change the English rules and the Danish (and Swedish) rules change too!

So change the English rules and the Danish (and Swedish) rules change too!

This is why I had 18 foreigners rule in Denmark (and Sweden)- because I had English league set in 18 foreigners.

I know that... it's how I turned off the "can only buy 2 foreign players" rule in Brazil for my world league patch..... searched through every offset until I found the right one :D

I can confirm... just tested it :ok:

Thanks Golly :D

25-03-14, 01:56 PM

I've had a fun morning replacing/swapping the Danish and Ukrainian leagues. First time I've done it and everything seems to be working. Only annoyance was couldn't get clubswap working so did it all manually.

Craig Forrest

I'm going to use Denmark to make the US leagues. MLS, NASL and USL Pro :ok:

Golly

Playing with the Danish (Ukrainian) Cup seeing if I can alter the structure at all.

Craig Forrest

Is there anyway of telling the game to pull a certain number of teams from each league?

for example - all 12 from Danish Prem, 20 from Danish first (after I expand it of course), and then all from Danish 2nd? I know the code specifies how many teams the Cup requires.... and it also specifies what leagues to get teams from.... but I'd love to figure out how many it wants from each league....

Golly

Doesn't seem to specify. I wonder if it just pulls teams in in the right order?

There are 92 teams in the Danish Cup. 48 Lower League 16 Division 2 16 Division 1 12 Premier They enter as follows... R1 - 48 lower + 16 div 2 - 32 matches R2 - 32 winners + 8 div 1 - 20 matches R3 - 20 winners + 8 div 1 - 14 matches R4 - 14 winners + 6 prem - 10 matches

R5 - 10 winners + 6 prem - 8 matches QF - 8 winners - 4 matches

SF - 4 winners - 2 matches FINAL - 2 winners - 1 match

Profa

Is it possible to remove non-EU restriction in Spanish league, original season 2001-02, Tapanified version 2.19? I would greatly appreciate answer.

Craig Forrest

So I know that JL figured out that the [EDX+53] command accesses the club nation ID... and that the [EDX+57] command accesses the division ID.... and that the [EDX+71] or [EDX+75] command accesses the region and actual region ID..... but is there any way of figuring out what command would access the club ID?

How did JL read through a DAT file to findout what field each of those commands is accessing?

Craig Forrest

008595D1 is the offset

MOV BYTE PTR DS:[EDX+5],3

EDX+5 is the code for non-EU and the 3 is how many of them you can have.... I believe that if you change it to [EDX+6],12 then you will have no restrictions at all

Craig Forrest

+53 (83) & +57 (87) relate to info about clubs.

+71 (113) & +75 (117) would seem to relate to nation, as that's where that info is stored.

If you've downloaded flex, check out the folder: \workspace\AlphaCore\src\core\obj\

I know that 004C2643 MOV EAX,DWORD PTR DS:[EDI+53] is accessing the nation ID and then the lines after it like 004C2650 MOV ECX,DWORD PTR DS:[9CF3D0] are specifying what country to get clubs from (in this case Mexico).

Do you know if there is a way to get the club to take the clubs from a region (like Central America) rather than a country? I know that it would have

28-03-14, 07:57 PM

Show 40 post(s) from this thread on one page

to be something like [EDI+75].... and in the CONCACAF CL there is a line 004C125F CMP BYTE PTR DS:[EAX+75],7 which tells the game to get clubs from Central America (region 7)..... but I'm at a loss to know how I could insert a command like this into the Merconorte Cup.... or if it's even possible....

When I was playing around, I did manage to change 004C2643 MOV EAX,DWORD PTR DS:[EDI+53] to [EDI+57] to access the Division and then changed the 9CF*** offsets and had the Merconorte Cup selecting teams from the English Prem, the Italian Serie A and German Bundesliga... but like I said I'm lost when it comes to trying to get it to choose clubs from a region instead of a specific country or league....

Any ideas?

I know that 004C2643 MOV EAX,DWORD PTR DS:[EDI+53] is accessing the nation ID and then the lines after it like 004C2650 MOV ECX,DWORD PTR DS:[9CF3D0] are specifying what country to get clubs from (in this case Mexico).

Do you know if there is a way to get the club to take the clubs from a region (like Central America) rather than a country? I know that it would have to be something like [EDI+75].... and in the CONCACAF CL there is a line 004C125F CMP BYTE PTR DS:[EAX+75],7 which tells the game to get clubs from Central America (region 7)..... but I'm at a loss to know how I could insert a command like this into the Merconorte Cup.... or if it's even possible....

When I was playing around, I did manage to change 004C2643 MOV EAX, DWORD PTR DS:[EDI+53] to [EDI+57] to access the Division and then changed the 9CF*** offsets and had the Merconorte Cup selecting teams from the English Prem, the Italian Serie A and German Bundesliga... but like I said I'm lost when it comes to trying to get it to choose clubs from a region instead of a specific country or league....

28-03-14, 09:09 PM

004C2643 8B47 53 MOV EAX,DWORD PTR DS:[EDI+53] {EAX will contain a 'pointer' to a nation} 004C2646 85C0 |TEST EAX,EAX {check if the pointer = 0 (null)} 004C2648 0F84 D4000000 |JE cm0102.004C2722 {skip some code don't select this club} 004C2648 8800 |MOV_EAX_DWORD PTR DS:[EAX] move the pation id (chered at the pointer address in

004C264E 8B00 | MOV EAX,DWORD PTR DS:[EAX] {move the nation id (stored at the pointer address in EAX) into EAX} 004C2650 8B0D D0F39C00 MOV ECX,DWORD PTR DS:[9CF3D0] {move the nation id of Mexico into ECX}

004C2656 3BC1 |CMP EAX,ECX {check if this club's nation (in EAX) is the same as ECX (Mexico)}

UNIC2050 SECT [CHIP EAX, ECX {CHECK II UNS CIUD'S HAUOTI (III EAX) IS UNE SAME AS ECX (MEXICO)}

Pointers are a difficult thing to explain - they are basically a memory address (like an offset) to where something is stored.

Rather than the game storing a nation id in each club it actually stores the memory address (pointer) to the location in memory where the nation data is stored - or zero (a 'null' pointer) if the club is not in a nation.

So to access a nation's region +75 (117) you want something like:

004C264E CMP BYTE PTR DS:[EAX+75],7 - then fill the next 6 bytes with NOP.

What this does, if I'm right, is compare the byte 0x75 bytes into the nation in which this clubs is based and compares it with 7 (Central America).

If it isn't Central America the existing jump instruction at 004C2658 will do what the code original did if the nation wasn't Mexico, i.e. skip code a.

I've haven't tested any of this.

Thanks Hugo... it's helpful for someone like me who is learning assembly language on the fly like this :D

I play around some more and see what I can do :ok:

Hugo9

[9cc270] - I'm fairly sure this offset is used at run-time to store whether the 'fog of war' is on or off.

The French code is checking the division (ARG.1), I'm trying to do the same thing in the English code but with no luck.

I've managed to make lots of space for new code - so if someone wants to have a go you can make the changes below first to give you space. The code should run with 7 fgn players allowed in England (& Denmark).

Interesting.

00925BDD MOV EAX, DWORD PTR DS:[9CF94C] to: [9CF960] (Welsh Premier to Welsh Lower Division)

Welsh league is populated with teams from Welsh non league, but you can only choose from those in the premier league (based on the data). So I picked TNS who had several cup fixtures scheduled but no league fixtures. The 'Division' button is disabled for all clubs.

Edit:

Very interesting - 00925BDD MOV EAX, DWORD PTR DS:[9CF5BC] (English Premier), English Premier League teams now play in both divisions at the same time!

Hugo9

I'm always eager to see this thread despite i'm being a lay person in this chapter of our beloved game. Everytime i check it, i see lots of new developments and findings in the offsets.

My question is (and i don't know if i'm at the right place to ask it) is there a way to increase the league's expenditure in order to get realism into it? Is far too easy to make money in this game...

Hugo9

You could reduce TV & prize money.

ryanitaa

hugo help me!!! I increase Japanese league 1 club from 16 to 22, using the format in Japan league half of the season champion (match day 15) will meet the winner at the end of season (match day 30} in the final match, but the addition of the club will result change in the system of determining a champion japan league 1, half of the season champion (match day 21) will meet the winner at the end of season (match day 42), how to created it?

i think the problem is you have no taxes in game (or so it seems) so when you offer contracts to your players they get the whole fee, while in real life that doesn't happen.

so if you are abramovich and give oscar 100.000 £ a week you need to pay around 200.000 £ in real life, but in the game you just pay those 100.000 £

I think the problem is actually that the game is from 2001-02 and since then transfer fees and wages have sourced well above inflation.

The only way to do that is find a big enough gap and write some new assembly language, the access the new code will one or more CALL instructions.

Although Switzerland, Liechtenstein & France did replace Norway, Sweden & Spain, the WC Euro Qualifiers were still unfinished so no world cup, i might post a screen of olly to see where i've gone wrong

milo

using a save game editor i noticed that all the clubs have an own stadium, both those with an own stadium set in the editor and those without.

if you untick the own stadium option in the save game editor, then the game will show you that the club is using a rented stadium so you can't expand it, etc. (like it should be for clubs that don't own the stadium).

well, my question is if we can change this making only the clubs with the own stadium option selected really owners of their stadium and all the others on rent

Patinoz

While this adds more realism; you'd have to watch out for the costs involved in renting a stadium too. Might void our WR structure or whatever.

milo

it's maybe the opposite mate, if you are the owner you spend a lot for ground maintenance, while if you aren't you pay a lower amount.

these are taken 3 years in game, same stadium, inter owner & milan rented.

i set both rented but i think inter bought it after a while, that's why £22 m in the previous season but in the current one inter still pay more than milan, almost twice more.

http://s3.postimg.org/606juw1wj/miin.jpg

ajra21

thought milan owned the stadium with inter renting?

Craig Forrest

I think you're right.... Milan was the original inhabitant too....

ajra21

i thought i read somewhere, they were both tenants & then milan became the owners.

milo

Originally Posted by ajra21 🔤

no... milan built the stadium in the 20's, then sold it to the city of milan that let also inter play there from the 50's (because they used to play in a very small stadium).

now milan would like to build a new stadium and inter can whether buy it or build another one, but san siro is still owned by the city of milan :ok:

that sounds right. i always wondered why milan built a stadium and named it after a player for inter.

Make this change: 925BD4 MOV EAX,DWORD PTR DS:[EDI+60]

Then pick 18 clubs in the editor and set their 'reserve division' to the Welsh Premier League. The game will load with all those clubs in this division, as well as in their original division.

stakhanovite

Can anyone advise on how to change foreigner restrictions in Australia? not in terms of match squad, but how many foreigners allowed at the club. I tried through Flex 2 tool but aside from not knowing what all the numbers will do, I could only get it to remove the limit on matchday squads, not on how many foreigners I could sign at the club.

Craig Forrest

how many foreigners are you allowed to sign? let me know and I'll find you the offset

stakhanovite

Quote:

Originally Posted by Craig Forrest 🔊

It seems like you are only allowed six foreigners at the club, if you try to sign any more it says you're over the limit and the deal has collapsed.

Craig Forrest

ok... I'm just heading to bed now but I'll have an answer for you tomorrow :ok:

Sent from my SGH-S730M using Tapatalk

Cheers. : ok:

Craig Forrest

Been looking... hard to find..... might take longer than I thought

Craig Forrest

The offset is 00412D89

.... but it's the value CL rather than a number so it's difficult to change without some creativity :D

Alright my patching friends.....

00412DAE 90

I've turned off the restriction in the Turkish 2nd league that stops you from buying and loaning in non-Turks.... now I can get a non-Turk in on loan with no issues.... however, while the buy player screen does not tell me I'm unable to buy a non-turk, when the deal is supposed to go through it says I'm not allowed anymore foreign players in the team (I have 0 right now)

So any idea what else I have to change?

djole2mcloud

17-04-14, 09:39 PM

what offsets have u changed?

Cam F

If there was one thing you 0102 masters could work out, it would be how to stop British regens going to Uk nations once a patch has been done for that country & is no longer a playable nation yet regens still reappear.

To digress, i changed Wales & both Irelands with Romania, Ukraine & Switzerland yet english, Scottish, welsh & irish regens sstill appear :(annoying. it doesn't happen if i switched with finland or croatia for example.

00412DA4	C2 1400	RETN 14
<i>00412D</i> A7	90	NOP
00412DA8	C646 13 32	MOV BYTE PTR DS:[ESI+13],32
00412DAC	^EB DE	JMP SHORT cm0102.00412D8C
00412DAE	90	NOP

You're basically telling it to jump to the new line of code, and then jump back to where it is supposed to be :ok:

Yer a star, it worked! A couple of quick questions which I suspect can't be done but I'm going to ask anyways.

- 1) I read in another thread some discussion on adding/removing teams from the Australian league. Can it be done or too complicated?
- 2) Can a cup competition be added or activated for Australia without league swapping? Or too complicated?
- 3) Is it possible to change the Australian calendar to start earlier/later in the year?

- 6) Are there any offsets for Prize money in OFC Cup?

⁴⁾ Would it be possible to use the EEC hack to set a zone for all Oceania countries that would work? Or add another EEC-style system? This would be for a scenario where I didn't change the foreigners offsets in Australia. 5) Are there any offsets for TV/Prize money in Australia?

Fods

Golly did a load of what you have asked for above in a pached exe. have a look around :ok:

I'm looking around for that patched .exe by golly and can't find anything at all. I can see his posts on Australia in a couple of threads, but nothing that mentions a download.

Fods	18-04-14, 12:46 AM

Its in this thread, post 498 on

stakhanovite

Cheers, I see it. Not quite what I had in mind but still a great job.

stakhanovite

No idea if I've done this myself and forgotten how, or if it was through advice on this, but now my Australian League game goes through three rounds of fixtures before the second phase, ends round about April, then it waits until the start of July to do the play-off final. Can I change the dates of fixtures to make it a bit more realistic?

Craig Forrest

I changed 008CEC5A to MOV ECX,-1 (that took away the screen that says you can'y buy or loan non-Mexican (Turkish) players so now I can make loan offers and transfer offers)

I changed 00902201 to JE SHORT 0090222D (that showed match restriction of max 5 foreign players in the match squad)

So I can make offers for foreign players.... I can get foreign players in on loan.... but I can't actually purchase any foreign players.... but if I had any I could have max of 5 in the squad..

I'm going to keep playing with offsets until I find it but if anyone else has any ideas I'd be happy :)

24-04-14, 07:45 PM

on a related note, I somehow turned on a match restriction that limited Mexican teams to max 5 players over the age of 21 in the squad.....

Craig Forrest

25-04-14, 03:19 AM

Actually I think that these are the only 2 that need changing

008CEC5A |. B9 FFFFFFF MOV ECX,-1 008CEC5F |. 90 NOP

008D2D38 |. B9 FFFFFFF MOV ECX,-1 008D2D3D |. 90 NOP

this allowed me to buy and loan as many non-Mexicans as I want :ok:

The other ones are for player restrictions during a match I believe

00902219 . C642 16 15 MOV BYTE PTR DS:[EDX+16],15 0090221D . C642 17 00 MOV BYTE PTR DS:[EDX+17],0

These ones make the restriction players over 21 years of age (15 is 21 in hex as you know)

Craig Forrest

When you create a super league all clubs need to be moved to the nation of the division you're using - as a result the game displays that as their nationality. What the above does is force the game to display a club's nationality (General Info screen only) as the country in which their stadium is.

So if you move AC Milan into England the data will say they are an English club but the General Info screen will continue to say they are Italian because that the San Siro is in Milan, which is in Italy.

Downside:

Clubs at no stadium show their nation as Unknown.

I've replaced the code that made the game report those Welsh clubs playing in England (Swansea, Cardiff etc) as being Welsh - so they'll now appear as English.

i'v tried this...on a general screen under the nationality it stays "!" but when i click on it it really shows the nationality where the stadium is...fine for me :-)

bravo

Hello guys,

I want ask you something about your work on patches...

I like to update CM and I am curious about prize money, so how can I change that? I don't like that in a league you receive the same money if you win the league or not etc...

I would like to know how change costs club, like stadium: If I am the owner, I spend a lot to mantain BUT I also have to receive money (merchandising,shops etc.)

Last thing (at the moment :)) To make real this game, you have to add costs about salary. In CM we pay only the wage but not tax. We all know how is difficult for a club pay players when you don't play Champion's League or Europa League...

Thanks

Craig Forrest

You can change prize money by either using Olly to manually change the amounts, or by using the Flex 2 tool which makes it a bit easier

Don't think there is anything you can do about the rest

Sorry, what is Olly? I can't use Flex2 because when I run it, program doesn't go on (appears some errors java then ask me to click a button to continue and program ends)

Wanna change how players' value is counting. In cm 01-02 AMC/MC and FC/SC is counting higher than GKs and DFs, which is not realistic. I mean best Goalie may cost 20m\$ while not the best SC 30m\$. For example Zambrottaa Defender/Winger (Left) - cost 15m while Zambrotta Midfielder/Atacking Midfielder (Left) cost 30 m\$/ Same reputation, same attributes, same CA/PA? just changing position changes player value twice which isnt good.

Played cm 3 (98/99) i saw that here values even more differs according to positions. It means it not really hardcoded (if it changes in every version) and can be changed. I hope :)

I think is realistic, because if you think about it, a great goalkeeper will never cost like a CR7, Messi, Cavani etc. We all know that midfielder and forward cost more than def and GK ...

Anyway, I think that to improve game, we have to decide which parameter define value player.

To me they are:

Club where play (Higher club reputation, higher player value)
 Age (more young more costs at the opposite from 30 years old until 40 years old, price has to go down)
 CA e PA (as step 1)

4 - % in his role (if you're looking for a SC, and 2 players have same CA the one who has good skills in finishing, heading, technique, speed etc. has to cost more than the other)

5 - Reputation

MarcoVanBast

LLLorenzo did u read my message?:) i wrote BEST goalkeeper and NOT best forward :)

Even in 2001 (IRL) Buffon and Thuram cost more than Di Vaio or Saviola.

MarcoVanBast

Find offsets which are answer for FONT size of each font.

I mean in cm 01/02 large.t2k is about 28 windows size. Now it can be changed.

Also find offset how to remove shadows from header font.

LLLorenzo

Yes, but in real life we know that in transfermarket, midfielder and forward cost more than def and GK...Thuram and Buffon? another planet :D

Courtois, Mangala will cost shitloads irl. That's just 2 players.

Plus don't trust transfermarkt. Their prices are weird. ;)

MarcoVanBast

LLLorenzo what about Ogbona and Tevez for same prize ? :)

Lets not flood, first we need to find offsets ...

zozoa

Craig, try offset 009021A9 |. B0 08 MOV AL,8

If I remember correctly, it is the limit of foreign in Turkey.

Give it a try.

zozoa

Don't think that's it... it changed nothing.....

LLLorenzo

is it possible to let get down the reputation of a player who don't play for 1 year? because it's impossible that some free players who don't play for a long time, ask million of euro to play!!

Fods

yeh you can use a save game editor for that

LLLorenzo

I know that :) I asked to try to fix this unreal thing :D

Fods	04-05-14, 04:38 AM

So let me get this straight, you want someone to figure out how to decrease a players reputation if they dont play for a year?

haitani222

Hello. Someone know how to change the host of the Intercontinental Cup (Match between South American Libertadores winner and the UCL winner)? These tournament is always played at the Saitama's Stadium 2002, in Japan. I would like to change it to another country (eg. Australia or US). I tried to find the correct offset to change it but I couldn't. So, I'm asking you guys!! Thanks. Ah, and sorry for my poor English skills!!!

http://s22.postimg.org/intj0pne9/intercontinental.jpg

005FA150 - MOV EDX, DWORD PTR DS:[9CF36C]

*9CF36C is the code for Japan. Change it to the code of which ever country you want to be the host.

ie if you change it to 9CF300 the game will take place in France at the Stade de France.

If you don't want the game to take place at the National Stadium but the highest capacity stadium that isn't the national stadium then change the following offset...

0092B83D - PUSH 4 > PUSH 40

If you do this also then the game will not take place at Stade de France but at Stade Vélodrome (Marseille) instead. Or which ever stadium is largest in France if you have edited capacities

Abolishing English FA Cup Replays

I have managed to successfully get rid of FA Cup replays. Instead of a draw resulting in a replay and a replay then going to extra-time and penalties if required I have managed to get the original tie to go to extra-time and penalties if needed. I have done this purely to help with fixture congestion when having good runs in multiple cup competitions.

Here are the offsets you need to change

Quarter-Final

0056F8E6 - MOV WORD PTR DS:[ESI+27D],BX > BP 0056F90D - MOV WORD PTR DS:[ESI+27F],BP > BX 0056F921 - MOV BYTE PTR DS:[ESI+290],1 > 0

Round 5

0056F820 - MOV WORD PTR DS:[ESI+215],BX > BP 0056F852 - MOV WORD PTR DS:[ESI+217],BP > BX 0056F875 - MOV BYTE PTR DS:[ESI+228],1 > 0

Round 4

0056F756 - MOV WORD PTR DS:[ESI+1AD],BX > BP 0056F79C - MOV WORD PTR DS:[ESI+1AF],BP > BX 0056F7B0 - MOV BYTE PTR DS:[ESI+1C0],1 > 0

Round 3

0056F632 - MOV WORD PTR DS:[ESI+145],BX > BP 0056F639 - MOV WORD PTR DS:[ESI+147],BP > BX 0056F6E7 - MOV BYTE PTR DS:[ESI+158],1 > 0

Round 2

0056F537 - MOV WORD PTR DS:[ESI+0DD],BX > BP 0056F53E - MOV WORD PTR DS:[ESI+0DF],BP > BX 0056F5C7 - MOV BYTE PTR DS:[ESI+0F0],1 > 0

Round 1

0056F492 - MOV WORD PTR DS:[ESI+75],BX > BP 0056F4B5 - MOV WORD PTR DS:[ESI+77],BP > BX 0056F4C5 - MOV BYTE PTR DS:[ESI+88],1 > 0

Qualifying Round

NB. Haven't managed to get this to work yet. I have managed to abolish replays, but when a match is drawn the away team goes through and the home team is eliminated!!!

I've just figured out how to can cancel a friendly.

Highlighted changes will display the 'Cancel' & 'Arrange' buttons forn international sides - only the Cancel works though. You can click Arrange too but theres no 'invite' option when you get to select a team (only national teams are available - you can't select a domestic side).

I have had a search and note that Hugo says the arrange button does not work but on the off chance I have missed it elsewhere have we figured out how to arrange an international friendly?

Zé

Just a thought. Jobs abroad depend on reputation etc. Could we tell the exe to take the home/current as the world rep etc for non players?

MarcoVanBast

MarcoVanBast

Little confused.

Wanna change number of teams of swedish lowe division in cm3 (98/99) however theres no swe_low string or any like that in exe, only swe_prm, swe_cup, and swe_fir.

However editor see swedish second divisions and its 402 teams, where located that info?

Hugo9

Might not be in the exe. Can't you just add / remove teams via the editor?

MarcoVanBast

I wanna add russian league to cm3 (98/99), 402 teams too much for me :)

Hugo9

What happens if you just delete some of them - does the game crash? If so, I can only think it is related to a cup needing that many clubs.

djole2mcloud

cup is the issue...every league has a minimum number of teams required for the cup...u can remove or add teams to unplayable leagues using tri wasano editor or using John Locke legion tool...

No no. But editor has issue minimum 402 teams. Delete one and cant save.

What more interesting, that "402" value NOT in .exe, NOT in club.dat, in cm3 game theres no swedish lower division at all, even no second division. Cant understand where it stored, from where editor takes that info?...

- - - Updated - -

I can understand cup, but cup "number of teams" in .exe exist, while editor reading only .dat files...

Hugo9

01-06-14, 07:04 AM

I suspect that the editor is taking the number 402 from the number of teams that are in the division. Try a different editor.

u r using official editor that why u can't delete teams from comp. use tri wasano editor and u can,or use legion tool...i use it daily for my patches... this is what is stored in exe:

a8b4a0 E:\dev\CM3\cm3 00-01\cm3\code\comp\cups\swe_cup.cpp a8b53c E:\dev\CM3\cm3 00-01\cm3\code\comp\leagues\swe_first.cpp a8b578 E:\dev\CM3\cm3 00-01\cm3\code\comp\leagues\swe_prm.cpp a8b550 E:\dev\CM3\cm3 00-01\cm3\code\comp\leagues\swe_second.cpp 006065F0 | > 393D F4F59C00 CMP DWORD PTR DS:[9CF5F4],EDI 006065F6 | . 75 0D JNZ SHORT cm0102.00606605 006065F8 | . 68 84849D00 PUSH cm0102.009D8484 ; ASCII "SWEDISH_SECOND_DIVISION_SOUTH_GOTALAND" 006065FD |. Does anyone from administrators have an option to "export" certain forum thread to a .bxt file or something similar?

Golly

I have managed to get the African Cup of Nations to play in odd numbered years instead of even as it does in real life now (2003, 2005, 2007 etc...)

http://i1218.photobucket.com/albums/...GTFC/ACN03.png

Re posting this: https://www.sendspace.com/file/01aas2

It's the full text output of the CM0102 exe with added details - so when the exe refers to [9CF2C0] this file will tell you this is a reference to Denmark.

CM0102 Functions offsets

Having few PMs with Tapani and in patch requests thread its appeared tha knowing where function starts - may help change lot of things.

CAn Tapani, or anyone else who knows post here such function offsets as Loading DB, Player contract value, Transfer accepted/rejected value and etc.

Big thanks in advance ..

Tapani

There are just way too many of them.

Craig Forrest

we have an offsets thread that we use as a dump for useful offsets for a whole variety of things..... maybe just put offsets in there once they are found.....

MarcoVanBast

Quote:

Well i mean main fuctions which affect major aspects of game.

MarcoVanBast

Need offstes of Database loading function, Player wage value function.

Big thanks in advance.

JohnLocke

52c2b0 load staff.dat from database (only persons) 52c4f0 load players from staff.dat

Not found by me, these are from some notes upload several years ago by Tapani.

If you know what some code might look like in Assembly (i.e. Olly) I might be able to help you find it. For example, I've recently been able to search for all the instances where the code is looping through of every club in the database - which is it how the game finds clubs to enter a competition.

Ty JL :)

Club and comps rather easy coz it has ascii strings.

Transfer function harder to find coz theres no string transfer in whoe code. U only can go around cpps and look.

MarcoVanBast

it's the location of game information within the exe file that you can edit...

Cristian

But edit into what?? Like for instance the last interaction just now, what is MarcoVanBast doing with the information Locke gave him?

JohnLocke

I'll try to explain with a simpler example.

The CM0102.exe file can be edited with an application called the Olly Debugger (http://www.ollydbg.de/), usually referred to as Olly.

Two simple offsets: 0x579e58 0x579f16

These both concern the number of loan players a club can have in England, the first is the total number and the second relates to how many they can have at any one time.

The 0x is to indicate they are hexadecimal numbers (base 16, rather than base 10) you don't need to know what the decimal value is.

When I open Olly and go to these offsets the following lines of assemly code are shown (assembly is the lowest level computer programming language).

00579E58 |. 803C01 05 CMP BYTE PTR DS:[EAX+ECX],5

00579F16 |. 3C 01 CMP AL,1

On the first line, if you change the 5 to another number it will change the number of total loans allowed in England. On the second, the game is using the number the of loan players the club has currently - so if they have 1 or less the loan can go ahead, if they have 2 already the loan would be cancelled. CMP AL, 2 would allow 3 simultaneous loans.

Ok, I think I understand now. And the game is stable enough to make these changes without potential crashes?

Last question--is there a list of offsets and what they do, or are they spread through this thread? Any tutorials on how to install the .exe to make sure I dont fudge it up?

Thanks a lot for the help guys!

MarcoVanBast

Any1 know offset to isable bosman rule?

bine ye

You might be better off just downloading and using the JL Flex editor. It is amazing and allows you to edit many of the game's aspects, much of which you probably already wanted.

Someone will know how to do that, it's probably in this thread somewhere. Changing the size is probably not that difficult but in some cases, English Premier for example, it would have knock-on effect on the FA Cup as that relies on there being 20 teams in the league for the 3rd round draw.

7d1 is 2001 decimal, just change to a year a long way in the future - this is how Tapani's patch does it.

Golly

Offsets for 2 guest nations into Copa America...

005E1FFE - MOV EAX, DWORD PTR DS:[9CF280] - CANADA 005E2009 - MOV ECX, DWORD PTR DS: [9CF3D0] - MEXICO

This also appears to do the same thing...

005E1FED - MOV EDX, DWORD PTR DS:[9CF360] - JAPAN

...but I can not remember seeing Japan enter the Copa America ever, only Canada & Mexico.

Dermotron

Get Guyana and Surinam in there, some cannon fodder!

Craig Forrest

as if Canada isn't already cannon fodder :tsk:

I put U.S.A. in replacing Canada. so the 2 big North American nations have a regional international tournament to play in.

I didn't note them down, but there is also separate offset references to Honduras, Costa Rica and Mexico for the 2001 tournament in the Copa America offsets. As you can probably recall the tournament was cancelled due to security concerns and then un-cancelled at the last moment. Canada's squad had already disbanded and gone on holiday and Argentina refused to enter. Honduras and Costa Rica stepped in at the last moment as guests along side Mexico.

31-07-14, 11:19 PM

and I think Honduras and Costa Rica have been in it more than just then..... I seem to remember them playing before in the Copa America...

Golly

Real life ...

2001 - Costa Rica, Honduras & Mexico 2004 - Costa Rica & Mexico 2007 - Mexico & U.S.A. 2011 - Costa Rica & Mexico 2015 - Jamaica & Mexico

But like I said, the game seems to pick those 2 offsets every time (Canada & Mexico) after the 2001 tournament is played.

TY JL!

Can u tell me ho to find it in cm3? I look at cm0102 offset y gave, ints not in transfer or any other value section, it just part of code in middle of nowhere :)

And strange why it has 2001 value not 1996.

MarcoVanBast

JL are u sure its bosman rule offset, not unprotected contract rule?

JohnLocke

Oops. You're right, that is for unprotected contracts. I don't know how to disable bosman transfers.

giovanisantana29

Reactivating the CONCACAF competitions, that are disabled when you using CMPatcher 2.19:

CAn Tapani, or anyone else who knows post here such function offsets as Loading DB, Player contract value, Transfer accepted/rejected value and etc.

Big thanks in advance..

If it helps, the following is a list of all 6379 offsets that immediately follow a NOP instructions, most of these will be functions.

Having few PMs with Tapani and in patch requests thread its appeared tha knowing where function starts - may help change lot of things.

CAn Tapani, or anyone else who knows post here such function offsets as Loading DB, Player contract value, Transfer accepted/rejected value and etc.

Big thanks in advance..

If it helps, the following is a list of all 6379 offsets that immediately follow a NOP instructions, most of these will be functions.

The following is an example of how to edit the long name of any club competition - you won't need to use the Names Editor and you can use all 50 characters if you desire.

This example below uses the German First Division, more commonly known as the Bundesliga.

Original: 0060F007 JNE SHORT 0060F014 0060F009 MOV DWORD PTR DS:[9CF54C],EDI 0060F00F JMP 0060FD31

Change to: 0060F007 NOP 0060F008 NOP 0060F009 MOV DWORD PTR DS:[9CF54C],10 0060F013 NOP

Change to (version 2): 0060EFF7 MOV DWORD PTR DS:[9CF54C],10 0060F001 to 0060F013 (inclusive): NOP

Both versions work.

This works by hard-coding the competition id (0x10) into the exe, so the game uses 0x10 without looking it up using the long name. As a result you can edit the data to give it any name you like. You can find other competition ids by opening club_comp.dat in XVI32, I'll post a list at some point.

Giving up on inviting nations to friendlies. Documenting my findings, in case someone else would interested in continuing.

My findings so far:

The comparison at offset 0045f64d disables national teams from inviting. NOP out the conditional jump there, and you unlock the select nation to invite screen.

Problem: nobody can be invited. National clubs do not have a "invite" button. This is prevented from appearing by comparisons at offsets 482b02 and 482b17. These comparisons check the return values from function calls. I do not understand what those function calls do, or should return. Disabling the

checks leads to crash.

Another few hours wasted.

Modified:

Result: You can now rename England in the data (nation.dat) and the game won't complain (untested).

EDIT: Don't rely on this, it seems it doesn't work.

JohnLocke

00874661 /0F84 F1030000 JE 00874A58

Change to:

00874661 /E9 F2030000 JMP 00874A58 00874666 |90 NOP

Result: the 'Compare players' option will be removed from the Action menu.

This, combined with the above post and this: http://www.champman0102.co.uk/showth...262#post177262 - mean you could play the game but never see any attributes. Unfortunately these also remove most of scouting option - you should still get reports about 4 and 5 star finds - but you'd have to scout individual players.

I'll see if I can let the scouts report by country but keep all attributes hidden, not sure I can do that though.

Brilliant :ok:

Did you every find out why the game crashes when clicking on contract after applying the star patch?

Zé

Please can someone apply the below to this exe? https://www.sendspace.com/file/tuwhid

Change offset 004CBA67 from JNZ to JGE

I can't seem to find offset 004CBA67?

http://en.zimagez.com/miniature/scre...8-11212721.png

Just taking another look at that. I think the last problem was caused by me picking the wrong place in the exe to write new code - as the location I used wasn't actually 'empty'.

I can't see why but what I think should work is crashing the exe now, I'll keep trying.

Fill with NOP - you can now take control of any club (nations, non playable leagues etc). This is probably in this thread already somwhere...

If you reduce this value the code that displays attributes on the player screen won't display all attributes.

I don't think I got it to work. On the olly it says: "AND EBP,0FF" for me. My English is not the best but how should it say instead, I get "MOV EBP" but didn't get that 18 decimal stuff. Thanks in advice.

JohnLocke

The amended line should just be: MOV EBP, 12 12 hexadecimal is 18 decimal, so you're setting the value of EBP to 18.

And1

It worked! Thanks a lot, John.

You would assume less transfers between AI clubs. Some games I play I notice that the same players move to the same clubs within the first season. Probably stops this.

MarcoVanBast

00870AF4 6A 01 PUSH 1

change to push 2 and when u click on player, head bar will be in club AWAY colours. Push 3 - 3d shirt colour

Hmmmm, I think I know how we could insert the current transfer windows into the game.

From my limit understading the original offsets say..

Open transfer window on Tuesday 2nd June. Close transfer window on Friday 26th March.

What if somebody clever expanded the rule to say...

Open transfer window on -1 1st June. Close transfer window on -1 1st September. Open transfer window on -1 1st January. Close transfer window on -1 1st February.

That would put the current transfer windows into the England rules section. If you then went through every league rules and removed the transfer window offsets the game always defaults to the English rules when there are no rules for another country.

Could that work?

Golly

Here's the Spanish transfer window rules ...

http://i1218.photobucket.com/albums/...sferwindow.png

...which seem to say ...

Open transfer window on Thursday 17th June. Close transfer window on Friday 20th August. Open transfer window on DL(?) 15th December. Close transfer window on DL(?) 22nd January.

I am totally convinced we could insert the real life transfer window into the game fairly easily now !!!!

MarcoVanBast			

#anyone know offset of how attribute setting according to .dat files

For exmaple in cm3 f.exe and cm3 e.exe same player from same data may have 20 20 Driibbling Finishing, and 14 15. Seems code of reading attributes is different.

JohnLocke

0045C061 90 NOP 0045C062 90 NOP

Result: you can now see the contract status of every player (Squad screen > View > Contract: Squad Status will now be visible). This should help you decide whether it's even worth making a bid - and how much they club are likely to want. Not sure why but you can only order-by this column for your own club.

I would think it more likely that this is due to some form of randomisation.

MarcoVanBast

No no, its 100% not random.

Coz not only dri, fin, also determintaion, pace, acceleration are higher.

E.g starting game 3.0.4 and adding filter dri, fin 19 20, u recieve 3 players. In 3.0.3 you recieve 67!! players. And that is every every game. It cant be random i guess.

JohnLocke

Wierd - I posted the above posts separately... anyway - no idea why then but it can't be reading the data that is doing that (IMO), the game must have been changed slightly between versions.

Had a look at these and they are in the order of the Qualification group draw for the 2002 World Cup. So I am guessing this is something inherited from CM0001 (maybe Cam F can confirm this?) to ensure the real life 2002 European Qualifying groups take place.

Whether this would be any use to anyone is questionable. Unless you find a way of changing which qualification tournament it's for?

Actully further along the offsets is the actually fixture list for each group with results included. Probably used in 3.60 when you started the game half way through the group stage?

Here's an example of one (NB away teams are first for some reason)...

here it is:

Few people asked me about the World Cup fix in order to start in 2013, so here are the changes need to be done:

Change offset 005F9ACC to MOV EAX, DWORD PTR DS:[9CF4AC] - replaces Sweden with Switzerland as WC Host Change offset 005F9AD9 to MOV EDX, DWORD PTR DS:[9CF3A0] - replaces Norway with LIECHTENSTEIN as WC Host Change offset 0091B8E2 to MOV ECX, DWORD PTR DS:[9CF300] - replaces Spain with France in the WC Euro Quals

Change the following offsets to DS:[9CF300] - replaces Spain with France in the WC Euro Quals, sorts the results against another teams in the group 0091D2B5

0091D285 0091D323 0091D363 0091D3AF 0091D479 0091D479 0091D4C4 0091D4C4 0092F304 .^E9 3751C2FF JMP NEW.00554440 0092F304 90 NOP 0092F30A 90 NOP 0092F30B 90 NOP

<%s - player name eg Batistuta> would not require a work permit because he holds {an}<%s - nationality name eg Italian>{} passport."

Not tested this but I think if the bold lines are changed to CMP EAX, -1 the game will stop referring to players having 'British' passports, i.e. the game could be made to report that a player holds a Scottish passport - which might come in handy in a few years time.

9CF2E4 = England 9CF510 = Wales 9CF45C = Scotland 9CF3E4 = Northern Ireland

Would adding CMP EAX,-1 before the Wales, Scotland and Northern Ireland offset turn them in to foreigners within England then?

EDIT: Re-read your post and it's to do with scout reports it seems..

JohnLocke

No - all the above is doing is displaying a person's passport as 'British' rather than 'Scottish', 'Welsh' etc - only appears on scout reports.

Stil cant undesrtand how to set coordinates of object :(almost a week past sincei try to find it.

E.g button action - i find offset

006D2203 68 11020000 PUSH 311 - changing to push 211 - (785px to 529px) moving that button to left to X coordinate 529px

But when i change same attribut under game.mbr, nothibg happens..

And what if i want to add abolute new element to game, e.g 111.mbr loading in right side of screen. Without menu, without buttons, just mbr background.

near player_search.cpp...

007B0B6C: CMP BYTE PTR DS:[EDX+76],AL - +76 is nation.actual_region

This might be the game checking in a player is 'local', filling the following line with NOP might widen the search.

edit: or not... it turns out there are a lot of refereces of player_search.cpp: Code:

near player_search.cpp...

007B0B6C: CMP BYTE PTR DS:[EDX+76],AL - +76 is nation.actual_region

This might be the game checking in a player is 'local', filling the following line with NOP might widen the search.

edit: or not... it turns out there are a lot of refereces of player_search.cpp:

akbazia

John you can move the Merconorte Cup in Europe?

JohnLocke

Can you explain what you mean? You can use an editor (but not the official editor) to change a competition's nation.

djole2mcloud

It can be used as european competition, just like i did with asian...but to move it to be shown under european competition menu that is the hard part...

007ABEA0 MOV EAX,DWORD PTR DS:[EAX+88] 007ABEA6 CMP EAX,15E 007ABEAB JGE 007AC3DD

I think these 3 lines are accessing nation.staffCount, comparing it to 350 (0x15e), then jumping if the nation has at least 350 staff. I think this might relate to the age of regens, so changing the JGE to JMP *might* result in younger regens rather than the 26 years olds you get from lesser nations.

JohnLocke

Has that been figured out? I mean I can, for example, use an editor to switch say the Dutch Cup to Turkey and have it only select Turkish teams for the competition.... but I still have to load up both Holland and Turkey if I want the cup to show up....

giovanisantana29

In recent days I discovered something amazing.

First, go to the line that corresponds to disabling of a competition. Ex: 00833027 which disables the Brazilian Champions Cup.

You will see that some where down the line JE SHORT ... have a CALL ... http://s10.postimg.org/kx1zcyjrt/image.png

This CALL is always the offset of the competition that will be loaded in this "slot". If you click on it and hit enter, take you to the first line of the first reference line of the competition (usually the first line is PUSH -1). http://s10.postimg.org/i1kascqe1/image.png

Thus, you can make competitions occur in different leagues of the original.

So I make the following modification: 00833046 CALL 004259A0 > CALL 0066D820

0066D820 is the first line of the first reference line of the Korean Super Cup.

And this happens: The Korean Super Cup is loaded in place of the Brazilian Cup Champions! http://s10.postimg.org/thvb44ty1/image.png

I change the participants of this super cup and transform it into Brazilian Supercup, competition that we have from 2015. http://s10.postimg.org/fzoeruhsp/image.png

With this will be possible to make exchanges of competition's structures.

I hope it was understandable. :P

Question:

How do we know which offset disables the competition.. and how do we know what offset to point the call command to?

Dermotron

Very nice. I think someone found this earlier in the thread or in a different thread, I can't find it though. As far as I can remember you can use any comp in the database (even in the inactive ones) and do as you have done.

giovanisantana29

Offsets disables the competition:

Spoiler! Show

And the CALL offset, do this to discover it:

1 Go to some competition from its address (E:\dev\CM3\cm3 00-01\cm3\code\comp\cups\bra_champ_cup.cpp).

2 Go to the 1st reference line. 3 Scroll up a bit to find the first line (which is usually PUSH -1). This line will be the offset.

Yes, first value is the offset. Just change the second line (007498EA) from JGE 0074998D to JMP 0074998D.

This makes me want to bring up another issue:

When us patchers come across information that might "harm" the game, should it still be made public?

At least I have kept my mouth shut about several things, there are things to be discovered that would many aspects of the game no fun. Once you know everything, it is no longer fun. The magic disappears. It is just mechanics. Once this knowledge is commonplace, there is no more community.

With great power comes great responsibility. Just because we can know things, one has to think if we really should tell the world.

This is a change I probably would not have published, at least without a reason. It is not a big deal. But generally I believe cheats ruin games, more than make them more fun.

I agree to this. I would for the reasons mentioned not use this "feature" on a regular basis. I consider this a "cheat" and that's not really my thing. Don't mind scouting at all. Makes the game more challenging and realistic.

Wish There was a really good video tutorial on how to do all this with CM0102......

Never used the ollydb program at all and it all seems complicated to me but i know i would grasp it, if there was a comprehensive guide/video tutorial on how to edit the exe for this game....

I'd love to get cracking! :pray:

I can see your point of view but the thought of not releasing this didn't even occur to me.

While I agree that this is certainly cheating, and that cheating can ruin the fun, I think it's up to each person to decide whether they want to use any modification in this thread.

Also, whether something is 'cheating', or fun for that matter, is ultimately a subjective judgement that each of us has to make. Some people prefer non wib/wob tactics because super-tactics ruin the fun (for them), others choose to use CMScount or GPF/2/3 to help them find good players ultimately it's a matter of personal preference.

I don't think there are any video tutorials. The best place to start, IMO, is to do is back-up your exe and just muck about with Olly.

Although a thread on Assembly & Olly might be a good thing, just as a starting point for people in your position.

All you need to know is CTRL+G to find offsets, and then you double click to make a change to the code.

eddieC

That all sound great man.... any suggestions for newbs like me, is really welcome.... perhaps a thread like John suggested would be a great idea.....

Anyone faces doing a/some simple video tutorials to show how things are done.... i think that would be brilliant.... I pick up things alot better visual rather than read text... because i'm like "Box what??? There's four boxes!!! :("

very frustrating!!

But any more suggestions for people in my position would be fantastic

JohnLocke

JohnLocke

Fill with NOP - you can now offer trials to employed players. They stay in the squad of the parent club but following the trial they they're unemployed - so when you click their name they're not attached to a club and can be signed for free.

I think you missed the point. :)

Cheats as such is not the kind of information I had in mind with my post. Even if I strongly dislike cheats for games, and would not publish any.

Say that you would discover that the only attribute ever used for goalkeepers is handling and the rest are completely irrelevant (**this is not true**, but just an example).

Is this something we should post here? I think not.

Because what makes the game great is the illusion of a football simulation it creates. Sometimes the game has some very clever things, that makes an appearance

of something advanced and magical going on -- while in fact is just a clever trick. Every time I have seen those (which has been a few times), I've kept my mouth shut.

For the sake of the game.

MarcoVanBast

14-09-14, 02:43 PM

In my opinion we shoud post every offset we find. Because

1) It offset thread, nobody add all that info to game automatically. 80% of which posted here not included in any patch.

2) Most important thing: one offset posted here always lead to another finding in exe by absolutely another user. Os its some kind of team work :)

About Tapani's example of "handling" (even its not true) i already looking only on it buying GKs :) So even if smth like it will shown up its willnot ruin the game i think.

Tapani

That was just an example. There are other things, that if I would have known, I might not have gotten into the game at all.

armenikum

Guys how do you decrease the number of teams in the Northenr Ireland League Cup?

Guys how do you decrease the number of teams in the Northenr Ireland League Cup?

Man theres tons of tutorials. Despite to ask every Irish competition, learn how to do it by yourself at once/ Even monkey would learn it rather than for years ask to edit irsih leagues/cups. No offense.

MarcoVanBast

Always wanna know how function begin and ends? with push -1 and RETN?

2xtreme

2 questions:

Any offset I can change make a human manager take control of a portuguese B squad and a second human manager take control of the main squad without issues? I already applied the offset to allow human managers to manage B teams but if a human manager is in the main team he gets sacked.

In the same topic any offset to allow b squads to be promoted to the portuguese first league?

BugHunter

Hi!

Is there any offset to change the number of subs in Portuguese Cup matches (from 5 to 7)? Thanks!

JohnLocke

No, the code isn't there - it must just be using the default values. You could try the following though (untested).

007CD956 MOV WORD PTR DS:[ESI+40],AX 007CD95A MOV BYTE PTR DS:[ESI+49],7 007CD95E JMP SHORT 007CD9D1

007CD9CD JMP SHORT 007CD956 007CD9CF NOP 007CD9D0 NOP

00542865 JMP SHORT 0054288C

The first three will enable reserve teams in these countries, the last one will do it in all three with a single instruction. The reserves will only be accessible for team without a B team. Initially I though the only advantage would be a less cluttered squad screen but I eventually saw a fixture between my reserves (Eschborn) and a 2nd string (i.e. not the first team, nor their B team) team of Union Berlin.

Interested in the "Find every Player" offest in the player and staff search

I've applied the JMP change to "007AFC4B JGE 007AFCEE" - Which, yes, has worked so to speak but It doesn't straight away, every player it says it's found "1 Player Found" and "63063 filtered out" but there are NO players listed...... So IIve had to use Filters to narrow the search so it can find players I can see Is this normal?

.....or should I try an adjustment to "007AFC47 CMP AX,0FA0" Instead?

Also if I do change the reputation, which is currently 4000, as you say, if i want it to find players with a reputation of "10" - onwards, Do I still need to enter in four digits (i.e "0010") or can I simply replace "4000" with "10"?

Hope thats understandable

Craig Forrest

you would need to enter the hexadecimal value of the normal number you wanted - 0FA0 is 4000, 0A would be 10 (0A is also 0010 as that is still 10)

eddieC

so which do I change the "0FA0" or the "4000"?

eddieC

so which do I change the "0FA0" or the "4000"?

Change the JGE to JMP and the Player & Staff Search feature will find EVERY player! Alternatively, adjust OFAO as desired - this is being compared to the player's world reputation, at present someone with 4000 (0xFAO) or higher is 'famous' and will always be found. Scouts, you're all fired!

Either change the JGE to JMP and it should find every player

OR

change the 0FA0 value (which equals 4000) to another number (but it will have to be in hexadecimal)

Craig Forrest

:nod:

eddieC

Can I change club and competition names using Olly?

Craig Forrest

Using Olly to change the names is probably a huge pain in the ass..... I've never even look at it.....

Use the Names Editor found in the download section... just make sure to run it as an admin :ok:

eddieC

yeah i know that but i want to change uefa cup to europa league and the best i can do is "Europa" ... any suggestions?

Craig Forrest

I think JL had posted an offset somewhere about allowing names to go past their limit but I can't remember where as it was of no use to me.....

eddieC

wow if you or someone else could show me that ... i would be so happy ...

And also THANKS TO EVERYONE who contributed to this thread.... i've been so happy that I can do so many things with my game... :)

Found it

http://www.champman0102.co.uk/showth...hlight=maximum

eddieC

nah, dont understand it! :(

eddieC

Don't know if i use olly or hex editor... could someone do a tutorial for changing comp names apart from Names Editor... similar to THIS Tutorial with screen shots????... these codes are making me dizzy...

http://www.champman0102.co.uk/showthread.php?t=5641

it would be really great... I really want to do this... please someone help

Craig Forrest

Olly is a hex editor :ok:

eddieC

i'm really struggling with this....

If someone could find the time to do a tutorial on how to do the more difficult things using Olly, besides tv prize money and subs... it would really help my fragile little mind.....

A shiny gold coin for the first person to do this!!!

Craig Forrest

Well I'm at work so it won't be me :P

Olly is best figured out by practicing first with simple things, and then moving on to more complicated issues.... the few of us that do patches and stuff have spent a lot of time getting very frustrated by things not working until we've figured things out..... while someone might be kind enough to do up a tutorial, it would be pointless to do one for every thing that could be changed.....

at it's most basic it's a pretty simple process. You find the offset that relates to the thing you want to change in game and you alter the offset to make the game do something different than it originally did....

eddieC

Thats Fair enough, i'll just have to ask for the specific thing i wanna change...

NEED OFFSETS FOR THE FOLLOWING:

1 - How can I Change the names of competitions to anything I want? Specifically UEFA Cup to Europa League European Cup to UEFA Champions League

All English Divisions to current FULL NAME in Real life (WITHOUT using 3.12 Patch)

2 - If I dont wish to use UEFA Cup, How do I disable the competition without the game crashing? I would imagine i'd have to disable Inter toto and Super Cup also??

16-10-14, 04:34 PM

Ouote:

Originally Posted by edcrowley100

Use the Names Editor to create something similar. You wont be able to change the allocated space to make UEFA Cup to Europa League and European Cup to UEFA Champions League whether you hex edit or use the names editor. Same goes for the leagues, you can only use the space allocated to each long name within the .exe. You'd need the source code for anything else which of course no-one here has or has access to (or will ever have access to).

eddieC

But I'm Sure the 3.12 Patch Managed to rename to Europa League???

JohnLocke

I'll write some instructions at some point. What you need to do is find some space to enter the text 'Europa League', then change all links to 'UEFA Cup' to point to the location of 'Europa Lague', then edit the data to match and you're good to go. I think there's a .patch file somewhere that does this for you - I'm too lazy to check but it's probably in Flex 2.

Cam F

You can change it to europa lge, that's what i did and you can fit in uefa champions league no bother.

eddieC

yeah, i forgot, i already did change champions league

how can i swith uefa cup off without game crashing, anyone know?

djole2mcloud

not sure if possible...

if u switch off uefa cup, u must switch off intertoto cup and super cup...and even world club championship... winner of intertoto cup goes to uefa cup, super cup is played by uefa cup winner, and also uefa cup winner takes place at world club championship... maybe changing world club championship offset would help, combined with switching off offset for other euro comps

00831482 champions league 008314E6 uefa cup 00831549 intertoto cup 008315AC euro super cup 00831189 world club championship:

if you could do some comprehensive instruction with screen shots.... that would be really helpful to people like myself, who get a little confused when using ollydb

i'd appreciate any efforts you would make to help in all this... The moment you or anyone can make an easy to follow tutorial with screenshots, then you dont have to keep answering the same old questions, you can just give them the link instead...

I really want to get into making my own league patches but the tutorial for this, on the forum is not easy to understand and the screenshots are not displayed anymore, which makes it hard to follow, no disrespect to whoever took the time to do it...

Shackmaster

Is there any way "Managing Director" can be renamed "Director" using Olly? Haven't been able to find any reference to it elsewhere in the thread. Cheers.

JohnLocke

Offsets: 009B6A7C "Mng/Director<%s - COMMENT - short name>" 009B6A54 "mng/director<%s - COMMENT - short name>" 009B6A40 "Managing Director" 009B6A2C "managing director"

For other jobs, see code @ 0053AD00

Hi! Has anyone identified part of the code which relates to time required for the foreign players in certain country to gain passport of this country? If so, can this be shared for all the countries which can be managable, I am especially interested in Poland?

Originally Posted by JohnLocke 🔊

The following is an example of how to edit the long name of any club competition - you won't need to use the Names Editor and you can use all 50 characters if you desire.

This example below uses the German First Division, more commonly known as the Bundesliga.

Original: 0060F007 JNE SHORT 0060F014 0060F009 MOV DWORD PTR DS:[9CF54C],EDI 0060F00F JMP 0060FD31

Change to: 0060F007 NOP 0060F008 NOP 0060F009 MOV DWORD PTR DS:[9CF54C],10 0060F013 NOP

Change to (version 2): 0060EFF7 MOV DWORD PTR DS:[9CF54C],10 0060F001 to 0060F013 (inclusive): NOP

Both versions work.

This works by hard-coding the competition id (0x10) into the exe, so the game uses 0x10 without looking it up using the long name. As a result you can edit the data to give it any name you like. You can find other competition ids by opening club_comp.dat in **XVI32**, I'll post a list at some point.

Whats, "XVI32"?

How EXACTLY do i Change the name, without using a names editor as JL said?

is there a list of ALL Comps yet?

Also, i know its a bit of an ask but, if i posted my exe, would someone be really kind enough to apply some changes for me if they get the time, would probably take maybe just over an hour or so?

I saw in the forum once, someone posted a screenshot of a players atts IN THE GAME, of his INTRINSIC VALUES shot instead of "1-20".... anyone know the offsets for THAT?

Thanks

eddieC

is there a list of ALL Comps yet?

Also, i know its a bit of an ask but, if i posted my exe, would someone be really kind enough to apply some changes for me if they get the time, would probably take maybe just over an hour or so?

I saw in the forum once, someone posted a screenshot of a players atts IN THE GAME, of his INTRINSIC VALUES shot instead of "1-20".... anyone know the offsets for THAT?

Thanks

LLLorenzo

I don't know if somebody already talked about that but I think that to make more realistic (and difficult) CM, players has to take and has to ask more money...

I see that in CM, maximum salary is about 8,5mln euro and at the moment, there are players like rooney,ronaldo,messi etc. etc. that take more than 15mln euro..

I say that because it's easy to take a positive balance, because if you're in CL (never mind about your club arrive in competition) and you have a big stadium, you don't have problem with money...and even because I managed Como from C2 to A and won Italian Cup,Super Italian Cup (2 times) and Serie A but nobody ask for more money!?! (maximum salary was about 1mln euro!) Too easy...for me...

milo

i agree, wages (and not all the rest) should be doubled to reproduce taxes payed by clubs in real life

eddieC

Anyone know the offset for changing \$ and Euro's into into £?

Zé

Just enter 'NOP' that, combined with the 'Fill rest with NOPs' should do it.

You should then see two NOP lines in red.

JohnLocke

:frustv:

I've never written any Python code but I think the problem is that you will need to specify that the variable 'new' (which should be a reserved key word damn it!) is a byte and not an int. Google suggests a 'b' prefix - but that makes no sense to me, what's wrong with something sensible like: 'byte newValue = 0x7d'? LOL

You might be able to use the bytearray (example: http://stackoverflow.com/questions/1...-a-binary-file) but if you just want to write one byte that might not be the best thing.

Good idea by the way.

Zé

Thank you JL :ok: Was just working on the conversion to bytes but not quite there yet.

readtest.pv

Code:

```
offset = 0xcba67
new = b'}\x00\x00\x00'
#0xcba67 0x75 0x7d
#0x7d = b'}\x00\x00\x00'
#0x75 = b'\x00\x00\x00'
with open('test3.exe', 'r+b') as victim:
victim.seek(offset)
victim.write(new)
```

Will need to look into my conversion to bytes. Don't think it is correct.

Code:

struct.pack("@I', 0x7d)

How does your patch file work? Code:

0xcba67 0x75 0x7d

Is it offset oldvalue newvalue ?

'new' Should have known better

Yes, that's exactly how it works.

Zé

19-11-14, 07:13 PM

Can I establish the offset value in OllyDbg?

For example to manage all nations I have

Code:

0x144854 b'\x96' b'\x00'

How can I get to 0x144854 in Olly?

I have tried to look at the JL collection but I can't find two bits of code I am interested in understanding.

1. The creation of a patch file

Zé

Every time I think I've got it!

Disable release on free patch:

Code:

offset1 = 0x472077 offset2 = 0x472078 offset3 = 0x472079 offset4 = 0x47208a offset5 = 0x47208a offset6 = 0x47208b
<pre>newvalue1 = b'\xe9' newvalue2 = b'\xe9' newvalue3 = b'\x00' newvalue4 = b'\x00' newvalue5 = b'\x00' newvalue6 = b'\x90'</pre>
#//3.9.68 #0x472077 0xf 0xe9 #0x472078 0x85 0xe9 #0x472079 0xe8 0x0 #0x47208a 0x0 0x0 #0x47208b 0x0 0x0 #0x47208b 0x0 0x0 #0x47208c 0x0 0x90
<pre>with open('test.exe', 'r+b') as victim: victim.seek(offset1) victim.write(newvalue1) victim.seek(offset2) victim.write(newvalue2) victim.seek(offset3) victim.seek(offset4) victim.write(newvalue4) victim.seek(offset5) victim.seek(offset5) victim.seek(offset6) victim.write(newvalue6)</pre>

Does not work. Crashes CM. I will figure this one out !!!

That codes looks right to me. You should only need the first seek line though, after that the file pointer (if Python works like other languages) should automatically be incremented following the write call.

Try opening the modified file in Olly and go to 0x872078 to see what happened.

Correct - the write function moves the file pointer by one, so calling seek isn't needed as the file pointer is (in this example) already where you want it to be.

Now I can see where you the mistake in your code has come from - you've copied it from my .patch file - which doesn't work because I'm an idiot. :doh:

Makes the changes I mentioned above and it should work.

Not sure where but I think this is mentioned in a thread somewhere. Someone (possibly with Craig Forrest) was creating a league patch but needed to disable relagation. No idea which thread it's in though.

djole2mcloud

no problem m8,i'v figured it out...the reference wasn't in danish 2nd block, but in danish premier division block...i'v changed them and works...

thanks

Zé

Thank vou JL.

Also figured out that I was taking 0x7 and using b'\x70' when I should have been using b'\x07' !!!

I now also understand the line spaces in your patch file. In my Python world that would indicate I need to seek the next offset and I imagine that is how you have set yours.

Now I understand the offset and byte changes I will work on improve the way my patches are applied. Has to be a better way then newvalue1, newvalue2, newvalue3...

Zé

John, if i may ask for a little help here ...

i have a problem starting a game, crashes at initializing leagues point only when i select English Conference along with other leagues. England works fine without picking Conference. The strange is that i didn't change anything in English leagues at all. I'v started game through Olly and game freezes at this offset:

00601FF1 |. 0FB68E C100000>MOVZX ECX,BYTE PTR DS:[ESI+C1]

the game is patched with 2.19.2 version, so i wonder can ${\rm u}$ identify what is this problem related to. thanks

England works fine without picking Conference. The strange is that i didn't change anything in English leagues at all. I'v started game through Olly and game freezes at this offset:

00601FF1 |. 0FB68E C100000>MOVZX ECX,BYTE PTR DS:[ESI+C1]

the game is patched with 2.19.2 version, so i wonder can ${\rm u}$ identify what is this problem related to. thanks

JohnLocke

That code seems to have been written by Tapani as it isn't in the original. If you can upload the exe I'll take a look but I can't promise anything.

Dermotron

Is there an offset to disable the 'Maximun 200 deletions in any one operation' that exists within cm0102.exe?

Zé

Dermotron

Close, it is for cm0102ed.exe. But alas it indeed untested and doesn't do anything.

Dermotron

Olly was in 'Paused' mode, works a charm :)

cm0102ed.exe that allows up to 10k deletions at a time - https://www.sendspace.com/file/zqb8s0

00601FF1 |. 0FB68E C10000 MOVZX ECX,BYTE PTR DS:[ESI+0C1] 00601FF8 |. E3 5C JECXZ SHORT 00602056 00601FFA |. 0FB75E 3E MOVZX EBX,WORD PTR DS:[ESI+3E]

The last line is accessing league.numerOfTeams (I think), I don't know what is stored at +C1 though. I'm fairly confident that the problem is caused by ESI being null (0), as opposed to being the location of data about a particular league.

No idea how to fix it.

Zé

I have been searching for these for a while! Will be having a play next week :ok:

i have a patch before patching this league, could it be helpful to upload that .exe so maybe to compare it?

Those errors mean that the two divisions referred to couldn't be found in the data - I assume that would be because you have renamed them? If you edit the exe to match the data that should remove the errors.

djole2mcloud

30-11-14, 08:55 PM

yes,u r right.

i'v renamed them,but i don't know how to change the names in .exe. i'll try to undo changes i'v made...

Can anyone find this in Olly? I can find 'Profile' at 00874A6C but cannot see 'Push 30' ...

Zé

07-12-14, 07:54 PM

A few offsets I am looking for, I have searched but not found anything.

1. Remove foreign player restrictions (Clay, do you know this one?)

2. Change relegation and promotion numbers from the Portuguese tiers.

JohnLocke

0x3d43f3 byte "Portugal - Restriction Type (Club)" 0x3d43f4 byte "Portugal - Number of Foreign Players at Club" 0x3d43ec byte "Portugal - Restriction Type (Match)" 0x3d43ed byte "Portugal - Number of Foreign Players in Match Squad"

Offsets are literal, add 0x400000 if using Olly.

JohnLocke

As a test I have tried to get six teams promoted and relegated throughout the divisions.

For the Premier league relegation I change 007CF938 to MOV CL, 6.

For second league promotion and relegation I change 007D16A8 to MOV CL, 6.

But struggling to get two teams from each of the second division b leagues to be promoted...

Is there a way I can change 007D16FF |. 888E C1000000 MOV BYTE PTR DS:[ESI+0C1], CL to a number, ie 4, but it will not let me do this as the size conflicts.

Zé

JohnLocke

There is:

6 up and 6 down would be: 007D16EB C786 BE000000 06000006 MOV DWORD PTR DS:[ESI+0BE],6000006 007D16F5 to 007D1704 - NOP

This is a bit complex.

The original code sets the 4 values (up, play-offs, relegation play-offs, down) separately. What the above is doing is setting them as if they are one value. Instead of using BYTE (1 byte) it uses DWORD (4 bytes), which overflows the first value and fills in the next 3 as well.

One thing to note is that DWORD are stored in the opposite order to the way they are displayed - so if you put: MOV DWORD PTR DS: [ESI+0BE],3000006, the 2nd column would show as: "C786 BE000000 06000003", i.e. it would be 6 up and 3 down and NOT 3 up and 6 down.

Zé	10-12-14, 07:51 PM

Nice. Thank you.

Hoping I am being stupid but is there a way of searching for part of a command in Olly? My idea was to search for 9CF610 which should eventually lead me to the section relevant to the Portuguese second division B.

Zé

I can't seem to change the signing of foreign players to be unrestricted in Portugal.

There's a text file of the full exe around here somewhere - probably a few pages up in this thread. That might help, e.g. search for "+0BE".

If you're still looking for this, the offsets relating to signing non-EU players in Portuguese squads are:

Code:

PRM: 007D41AE MOV BYTE PTR SS:[ESP+12],6 D2: 007D41BE MOV BYTE PTR SS:[ESP+12],5 D2B: 007D41C5 MOV BYTE PTR SS:[ESP+12],4

Change the values to 32 for no restrictions.

There are similar 6/5/4 offsets for the Portuguese leagues a bit further down from these, I'm not sure what they're used for.

i asked some years ago, maybe now any1 know want to make STAR player highlighed only star, not player_name_staricon lurking in offsets near %s* find colours of whole string 0045BA50 cant find how to "break" it

Golly

15-01-15, 08:56 PM

Had a PM from out Northern Ireland obsessed friend about how the edit the K-League so it's 8 teams (from 10), 4 rounds of fixtures (from 3) and 28 fixtures (from 27) and here is what I told him...

Korean League offsets

Team 10 to 8...

0066BBAB - PUSH 24E > 1D8 0066BBB2 - MOV WORD PTR DS:[ESI+3E],0A > 8

Fixture Rounds 3 to 4..

0066BCF0 - PUSH EAX > NOP 0066BCF1 - MOV WORD PTR DS:[ESI+3C],CX > NOP

0066BCF0 - NOP > CALL 0066BEF7

0066BEF7 - NOP > PUSH EAX 0066BEF8 - NOP > MOV WORD PTR DS:[ESI+3C],4 0066BEFE - NOP > RETN

Fixtures 27 to 28...

0066B16A - MOV WORD PTR DS:[EAX],1B > 1C DON'T DO THIS BIT!!!!! (Or undo if you have already tried it).

All untested by the way!!!

15-01-15, 09:50 PM Pasquale

unfortunately it does not work, the game crashes

JohnLocke

Maybe the Korean cup code assumes the league will have 10 clubs - and can't handle the situation where that isn't true?

Pasquale	15-01-15, 10:

I decreased the number of clubs for the League Cup (I disabled the korea cup) from 10 to 8

Golly

Decreasing the amount of clubs in a cup competition is a lot more complicated than for a league competition. I would respectfully suggest that the problem which causes the crash is in the Cup competition.

Golly

And having looked at the Korean League Cup I think that's the problem. It starts with a group stage with 2 groups of 5. Decreasing the amount of teams would be very complicated.

Golly

Actually, don't do the bit I have turned red on my initital post.

technoir

I am thinking of recreating Polish league structure so I have question. Is it possible to find offset responsible for division league into championship and relegation group (like it is in scotish premier league) and make only one round? For example 16 teams in one league and then dividing them into two groups and playing one round so 37 matches

24-01-15, 04:03 AM

It would be great to know more about the cups and how/where teams are drawn from so as to help alter the number of clubs in a league. Tapani effortlessly helped with the Danish Cup here, but unfortunately a lot of other cups don't seem to use the same structure.

I've known for a while that work permits in the UK & ROI are given to any player with Potential Ability of 191 and above (probably to mimic the exceptional talent clause that exists IRL). I searched for 191 (BF in Hex) in JohnLocke's text version of cm0102.exe but found nothing so I left it. A couple of days ago I tried again, searching instead for 190 (BE).

008C7C11 |. 66:817E 07 BE00 CMP WORD PTR DS:[ESI+7],0BE

Changing 0BE to a different value will mean that any player with a PA above that value should get a work permit. Changing the value to 1 will mean that any player should get a work permit.

To change the value, right click on the middle column -> Binary -> Edit. Change the last four values from BE 00 to 01 00 so that any player will get a work permit, to AA 00 so that any player with PA above 170 (AA in Hex) will get a work permit and so on.

There is still a chance that players will not get a work permit. For example when testing I set up a friendly with Boca Juniors in v3.9.68 and had all their players scouted. Walter Gaitán (and a couple of others) won't get a work permit, despite him having a higher PA than others in the squad who would get one. I don't know why this happens. (Personally I don't mind this happening as otherwise you could tell definitively from scout reports those who had a PA of >170 or whatever you've changed 190 to.)

Lastly, this doesn't seem to have any affect on hiring backroom staff, nor will it reduce the time needed for a work permit to be granted (around 23/24 days).

Dermotron

Very nice. The game matched to real life players would probably allow anyone over PA150 to get a work permit in England. Could be an interesting change to the game as the years pass and regens start appearing. Also good to spot some negative PA guys that have high PA as they differ great from save game to save game.

Is it the same rule for Uk and Ireland in the game? Work permit restrictions are a lot more lax here (Ireland). Clubs are just broke so thats why there has never been a big influx of foreign players here. Even Malta is a far wealthier league, lol

I think the single offset effects all of the work permit countries, but I haven't tested all the leagues fully. I scouted Boca with an English, Scottish and Welsh club and all the scouts were in agreement about whether a player should get a work permit or not. (I said in the previous post that players don't always get permits for some unknown reason: to put a figure on it, I'd say roughly 90% of the time one will be awarded.)

I played a couple of medium-term games in England and Ireland with no problems, but then had one in Wales where almost all work permits were rejected - way less than the 90% I mentioned earlier. In the English and Irish games I was signing young players on free transfers, while in the Welsh game it was journeymen players not wanted by other clubs, so maybe there's something in that. In all games the PA required was set to 1 though.

One positive thing to mention is that the AI take advantage of the new rule too. There wasn't the deluge of non-EU players arriving like I thought there might be, but a few uncapped foreigners getting very high average ratings (7.8+) in their leagues were nonetheless signed up by the AI.

JohnLocke

I *think* the PA 190 code only affects players aged 23 and under - based on these lines: 008C7C05 | MOV CL,BYTE PTR SS:[EBP+18] 008C7C08 | CMP CL,18 008C7C0B | JGE SHORT 008C7C1D

The first is person.age, which is then be compared to 24 and if their age (CL) is greater than or equal to 24 (0x18) then 008C7C11 is skipped.

JohnLocke

MarcoVanBast

JohnLocke

I playing CM3, and transfer system here little broken, coz even when i offer 60m\$ for Makkaay from Tenerife, or Montella from Smapdoria, bids are rejected with "player too valuable for club" answer, which is rather unrealistic. Can i somehow downgrade that? U can suggest 0102 offsets, i will transfre it to cm3.

MarcoVanBast	26-01-15, 02:43 PM
--------------	--------------------

And i also want to set olympics in cm3 to get u23 not main nation laying

MarcoVanBast

And i have also question baout backgrounds.

Cant find in exe any mentions of [stadiums] or [clubs] how game know which area in pics.cfg answers for current backs?

JohnLocke

No idea how to make clubs accept less money or how to change the Olympics. For backgrounds, try searching for "pics.cfg"

MarcoVanBast

i know wheres offsets of pics, cfg but i cant understand how it realted to [staff] [clubs] [nations] and etc. Theres that code but it just strings, very strnge it hasnt any ascii references Opush ctrl -R nothing happened, it isnt in code)

http://s17.postimg.org/kx52i71of/002.jpg

MarcoVanBast

what that means

CMP BYTE PTR DS:[ESI+15],0F

comparing some value (15) but what means esi+15

MarcoVanBast

and what that string means?

MOVSX EDX, BYTE PTR DS: [ESI+77]

MarcoVanBast

I FINALLY FIND HOW TO CHANGE player's value depend on that's postion !!! Now can finally make TOP GKs costs same as MC of SC

JohnLocke

ESI+15 is (probably) accessing either nonPlayer.freeRoles or player.striker, which is being compared to 0xf (15). I've seen code like that for determing if the game regards the players capable of playing in a given position.

ESI will, in this situation, hold the memory address at the start of the the data on a player, ESI+15 is accessing the 0x15th (i.e. 21st) byte into the data to access one of the above values - probably player.striker given the comparison to 0x0F.

Changing Bold values changes value of players depend on it position.

One value is secret for me, coz it changes nothing. FC, AMC, MC/DMC, GK, DF - in cm3 it goes in that order, one value isnt refer to any position i dunno what it is

Several years ago someone uploaded a file that the developers released, it shows the format of all the data files. I think it was released to help people write data editors. I have posted the contents on a new site I started recently here: https://hugo9cf.wordpress.com/resources/c-header-file/

A more accessible way of checking is to look at the [9CF***] Thread or the expanded version here: https://hugo9cf.wordpress.com/resources/the-9cf-page/

Thnaks but i sill cant understand.. theres no player.goalkeeper on site u postor any reference to how to read MOVSX ECX,BYTE PTR DS :[XX+YY] commands.

sorry for my stupidness :(

EDIT: Find it in other url :) thanks again!

ESI+15 is (probably) accessing either nonPlayer.freeRoles or player.striker, which is being compared to 0xf (15). I've seen code like that for determing if the game regards the players capable of playing in a given position.

ESI will, in this situation, hold the memory address at the start of the the data on a player, ESI+15 is accessing the 0x15th (i.e. 21st) byte into the data to access one of the above values - probably player.striker given the comparison to 0x0F.

As i undserstod, 15 - is value of player position rating in data. If it more than 15 it acess striker value, if it less 15 it jumps to next position by **JL SHORT XXXXXXXX**. Thats why SC, AMC, MC and DF comparing to 15, and GKs to 20, coz theres no player has 15 (or any less than 20) in his goalkeeper position rating :)

First, click the bottom-left corner of Olly (in the Address, Hex dump, ASCII section), then press Ctrl+b, type the name of the club you're looking for, e.g. Manchester United, then click into the hex box (3rd box down) and at the end of the field enter 00. If that finds the text you're looking for, click the first letter ('M' in this case), then press Ctrl+r, you should then get a new window with one line - in 01/02 that line is: 00615275 PUSH OFFSET 009E1834 ASCII "Manchester United". Double-click this line and you're taken to 00615275 which looks like this: 00615275 | > \68 34189E00 PUSH OFFSET 009E1834 ; /Arg2 = ASCII "Manchester United" 0061527A |. 56 PUSH ESI ; |Arg1 0061527B |. E8 D0C93300 CALL 00951C50 ; \cm0102.00951C50 00615280 |. 83C4 08 ADD ESP,8 00615283 |. 85C0 TEST EAX,EAX 00615285 |. 75 08 JNE SHORT 0061528F 00615287 |. 893D 40029D00 MOV DWORD PTR DS:**[9D0240]**,EDI ;

The bold value is the '9cf' value - 9cf isn't special, it just happens that most hard-coded clubs etc are found there, this one being at a 9d0 address is not a problem.

Edit:

You can also do this in reverse, so if you find a 9cf value in the code you can find out what it is as follows: top-left of Olly, Ctrl+g, enter the 9cf value, e.g. 9cf3a0, and press return - then press Ctrl+r and you'll get a list of lines where this value is referred to. There are usually two lines in the format MOV DWORD PTR DS:[9CF3A0], EDI (although it might be a different register, i.e not always EDI), check both you should find the text the game uses to set the 9cf value a few lines further up - in this case you'll find:

0060E401 | > \68 209A9D00 PUSH OFFSET 009D9A20 ; /Arg2 = ASCII "Liechtenstein"

0060E413 |. 893D A0F39C00 MOV DWORD PTR DS:[9CF3A0],EDI;

004D0E0F MOVSX EDX,BYTE PTR DS:[ESI+43]	; player.creativity
004D0E19 MOVSX EAX,BYTE PTR DS:[ESI+36]	; player.pace
004D0E2E MOVSX ECX,BYTE PTR DS:[ESI+2F]	; player.leadership

The value of goalkeepers is not increased by: flair, finishing, creativity, pace or leadership - I think.

Hmm i looking down to code, but cant see same for other positions (DFs, MCs, etc) shouldnt it goes one by one?

I don't know what 4164FB18 (1,097,136,920 decimal) is but I'd guess the code is some sort of calculation using diffent values depending on what position someone plays in, e.g. to make strikers more expensive than defenders. You could try editing the values to see what difference it makes.

For the purposes of what we're doing there is probably no difference - they're both what is technically known as a 'register', it stores a value that is

30-01-15, 11:17 AM

30-01-15, 11:17 AM

30-01-15, 11:15 AM

. 101 usually the location at which the game stores the data about a thing (club, player, nation etc), then by using the +value it is accessing a location with that thing to get/set the value at that location.

The graphic on this page http://www.cs.virginia.edu/~evans/cs216/guides/x86.html may be helpful - as not all registers are the same size, and some are really part of a bigger register.

For the purposes of what we're doing there is probably no difference - they're both what is technically known as a 'register', it stores a value that is usually the location at which the game stores the data about a thing (club, player, nation etc), then by using the +value it is accessing a location with that thing to get/set the value at that location.

The graphic on this page http://www.cs.virginia.edu/~evans/cs216/guides/x86.html may be helpful - as not all registers are the same size, and some are really part of a bigger register.

Well they changing value of player position ofcourse, thats how i find them lol :) changed and saw that value changed. I cant understand HOW its changed, if ESP+3C - is player.stamina.

BTW **4164FB18** - same value (not exactly same i mean format) using to set VALUE's value lol. I mean i changed DOLLAR value in cm3 to make it more, and it has same format value to that.

I mean that

MOV DWORD PTR DS:[8334F4],40017011 - in cm3 (9899) its offset of DOLLAR value.

However its not "strikers more expensive than defenders", it strikers, midfilders, gks more expensive than X. Coz changing each position value never affect another position value.

That should be (almost) exactly the same for all versions of CM3. I think the way the game stores preferences (liked & disliked clubs and people) is different between version but the rest is the same.

Originally Posted by Golly 🔤

0085C3A6 - offset for the venue of English Cup Finals. I changed code from 9CF2E4 (England) to 9D0240 (Manchester United) and the following all took place at Old Trafford during first season (2001-02)...

Charity Shield League Cup Final Vans Trohpy Final FA Cup Final Division One Play-Off Final Division Two Play-Off Final Division Three Play-Off Final

Golly, I've just tested this because I had doubts that it would work given that clubs and nations are different things, it seemed odd that the developers would have written code that could accept a club in this context. Anyway, the above doesn't actually work properly. I tried using a different club and the Charity Shield was still played at Old trafford, so I think the code must default to the largest stadium in the country if the stadium specified doesn't exist.

0085C3A4 | . 8B08 MOV ECX,DWORD PTR DS:[EAX] 0085C3A6 | . A1 E4F29C00 MOV EAX,DWORD PTR DS:[9CF2E4] ; England 0085C3AB | . 3BC8 CMP ECX,EAX 0085C3AD | . 0F85 F4010000 JNE 0085C5A7

As the value at 0085C3A6 has changed, then 0085C3AD will now equate to the opposite of what it did prior to the change, in which case the code jumps to 0085C5A7 when it didn't before.

The wider code looks like it is telling the game to use the biggest stadium in Wales, if the competition is in England, until 2003 (as Wembley was being rebuilt).

Want to make cm0001 and cm0102 palyer's value to be in cm3.. Cnat understand how it counted..

In cm3 (9899) and cm9900, most valued player is Del Piero around 23m \$, in cm0001 and cm0102 same data and year tirned to 1998 Del Piero costs 42m \$. Also very different on position, in cm3 Zidane costs 13m \$ in cm0102 40m\$....

First I thought that value (dollar) changed itself, so i raise it, but its wasnt right, coz ALL players now cost more, same as club's budgets and etc. Second i find offsets i posted above and try to edit it according to position. But now averge players like Lars Ricken costs 24m\$, while in cm0102 he is 12m\$ like it should be.

Seems cm0102 and cm001 used some additional calculation and i cant understand which exactly :(

FIMUL isn't just access the value, it's also multiplying it by something - http://docs.oracle.com/cd/E19455-01/...151/index.html

Cant undesrstand how uefa coeficents work

I count all points (including bonus) and get 6, but country i counte it for get 9.75!

Seems it rather random :(

MarcoVanBast

Absolute random calculation.

I take Russia, it has coeffs in editor

4 2.8 5.4 3.66 11

26.86 in total (same number in game in begin of season)

in game season all 4 clubs get 4 wins (in total not each one) and 1 draw in total - it 9 points, even with maximum bonus, rating for season should be maximum 3 points.. and new rating should be

2.8 5.4 3.66 11 3

about 25

but in new season i see rating 33.86!

MarcoVanBast

Oh i get it..

Its glitch by game.

By playing first season it takes value by last season in editor NOT the real coeffs. I mean if russia has 9 in last season in editor, in 02/03 it count also 9 even if ALL clubs eliminated in qualifiers

MarcoVanBast

Lol but even after qst season it counts by ome random calculation.. ok i give up

008C7C37 |. 85C0 TEST EAX,EAX 008C7C39 |. 74 14 JE SHORT 008C7C4F 008C7C3B |. 66:81B8 8E000 CMP WORD PTR DS:[EAX+8E],0BB8 ; nation.reputation | 3000 008C7C44 |. 7E 09 JLE SHORT 008C7C4F 008C7C46 |. 80F9 20 CMP CL_20 ; CL is person.age 008C7C49 |.^ 0F8C BEFDFFF JL 008C7A0D

Players aged under 32 who have more than 20 caps from a nation whose reputation is 3000 or more will get a work permit.

Those restrictions seems a bit "loose" just from my experience playing: I wonder if that code applies only to the beginning of the game? I always wondered how the game judged whether a player was eligible or not for a work permit given that no internationals had been played yet.

Fill the first two lines above with NOP and amend the third to: 008C7AE5 | MOV ESI,OFFSET 009E1834; ASCII "Manchester United"

Result is that Man Utd will always get a work permit while all other clubs have to meet the usual criteria.

Another good find! Strange piece of code - I take it that that means Falkirk always get work permits for players on .68? I wonder if that's connected in any way to the unusual mention in the exe of the players Devon Mitchell and Colin Samuel, as they were linked to a move to Falkirk in real life at the time.

The well-known £40,000pw week to always get a work permit seems to be wrong, the magic figure is actually £34,999 - I think, based on these lines:

008C7BF8 | CMP DWORD PTR DS:[EAX+0C],88B7; contract.weeklyWage | 34999 008C7BFF | JG 008C7A0D

Very nice, I tried searching for 40,000 too but didn't find anything useful - I gave up as I thought the figure could've been anything in the exe when you consider currencies. Could this be changed to a transfer fee value rather than a contract value? I think work permits will be given to any transfer fees worth £10m+ from next season.

The first is person.age, which is then be compared to 24 and if their age (CL) is greater than or equal to 24 (0x18) then 008C7C11 is skipped.

Nice, that would help explain why the journeymen foreigners I tried to sign in my Welsh game couldn't get permits, while others did (I usually was signing the young pregens when testing).

That's exactly what it relates to, I just removed the code that checked the current year and player's first name (and changed the club).

Possibly but I don't know how to access the fee.

Thanks for testing, how long did you holiday for?

I was hoping that these lines were checking how long a player had been at a club, then giving them a second nationality if it were 5 years or more.

Probably not even worth it now that I think of it, as any £10m+ fee would usually warrant a £35k contract too.

I tested for three seasons for both sets of offset changes you made. Players still seemed to be gaining second nationalities as quickly as expected.

The CMP ECX,5 offset mightn't be for second nationalities as the number of years differs for each league, as shown here, although perhaps it could be some sort of default value for the UK&ROI given the value of 5.

That's roughly what it's for: I changed it to CMP ECX,1 and created a game with England and Spain selected. All non-EU players at English clubs had a second nationality of English, while nothing changed for non-EU players at Spanish clubs. It also affected players at other UK/Irish clubs, eg Scottish second nationalities for players at Scottish clubs etc.

Furthermore, it only affects players already at clubs when the game loads. Players you sign will still take five years to gain English as a second nationality.

Anyone know how World footballer and fifa world player awards counts? :) rather strange winners, what to do normal balon d'or from it

Lewis MacLeod

Any offsets for reducing English Division Three relegation from 3 to 2, and reducing Conference promotion from 3 to 2?

I am using Tapani Patch obviously

JohnLocke

15-02-15, 05:19 PM

15-02-15, 04:55 PM

I *think* that the two changes below will do what you want. Tapani has modified this section of the code, so the following might only work with his 2.20 patch.

0056EE1D | MOV DWORD PTR DS:[ESI+0BE],3000002 0057811F | MOV BYTE PTR DS:[ESI+0C1],2

@Tapani, I noticed the following in your patch: 005780FE | MOV DWORD PTR DS:[ESI+0BE],1000403

... 0057811F | MOV BYTE PTR DS:[ESI+0C1],3

If the first line was **3000403**, then couldn't the second line be removed completely?

Tapani

JohnLocke,

it is very possible. I think the early patchers allowed users to select the number of relegations/promotions between CON/D3. (We played a lot of multiplayer back then, and wanted to have more spots to fight for). Could be that the redundancy is a remnant from that.

JohnLocke

Anyone care to test this?

Fill the line below with NOP, then holiday a game for a few months / years - keep an eye on the positiining value of players.

008B30F2 | MOV BYTE PTR DS:[ESI+39],AL;

The line seems to relate to training, so filling it with NOP *might* mean the value never changes.

Very nice, exactly what you thought happens: no changes in positioning. Two years training and no greens or reds:

http://thumbnails110.imagebam.com/39...d390858303.jpg

One thing to notice is that the value does change for some players (Keane goes from 15 to 16), likely through playing/not playing, but as it's not due to training no colour is assigned to it.

Numbers wise, the amount of players having Positioning of 15+ fell by about one third (on a minimum .68 English league only game). Here are some rough figures from it:

Spoiler! Show

After the initial training boost in the first couple of years, the figures seem to grow at a similar rate. I think the reason that the -Training figures still increase each year is due to certain stats and their intrinsic values surging once a player nears retirement/retires (I can't find the thread that I read that in).

You'd probably have to go through at least one full generation of players (20+ years) to find out what effect this has on gameplay, but you'd assume that less Positioning equals more goals.

Dermotron

That's quite an amazing find. Has determination been affected. Always seem like the CA points were taken from determination and added to positioning

MarcoVanBast

Can anyone say where transfers function begins at? selling player by UI to UI in half of his price is super annoying..

Golly

Isn't that just real life though? A club buys a player for super bucks, but he flops and they then sell him on for a fraction of the price they paid for him.

Damien Duff - Chelsea signed him for £17m & sold him for £5m 3-years later. Juan Veron - Man Utd signed him for £28m & sold him for £15m 2-years later. Scott Parker - Chelsea signed him for £10m & sold him for £6.5m 18-months later. Shaun Wright-Phillips - Chelsea signed him for £21m & sold him for £9m 3-years later.

Tapani

I want to know that too. Looking for the one where the computer has to decide "yes" or "no" to a bid.

My reasons are to make it possible to get players for free when playing really low level. The computer refuses to sell a player for free when he is not playing, worth like 1k, and has 2k per month salary. Avoiding the salary cost should be part of the consideration.

I don't think so, I'm not sure if attributes are chained like that. But I remember Trip (possibly someone else) saying that he thought some were in another thread I can't find (might have been in the Tsigalko / van Nistelrooy thread).

I also don't think Determination drops for regens, it's just that all the top players have a high value for it initially and then get a random value for their regen (seeing as it's a mental attribute). I charted all the attributes and their changes in values in a 400+ year run of the Welsh league, I'll stick the results in the more appropriate thread here as it's a sizeable post.

eddieC

Has anyone discovered offsets for Keeping 'Attributes' at the same value, without the game increasing or decreasing them through age or training?

Just curious?

JohnLocke

This may (or may not) help.

The minimum fee release value of a contract is stored 0x21 bytes into a contract, so the AI will have to access this value when determining whether to accept or reject a bid. I've searched the exe and the following lines may help narrow down the search.

004E4321 004E470A 00782FFD 00866C68 00866C71 00866CEE 00866D02 00866D17 00866D1C 00866D75	. 39 . 39 . 39 . 39 . 39 . 39 . 39	47 21 47 21 5E 21 5F 21 5E 21 5E 21 56 21 57 21 56 21 46 21	CMP DWORD PTR DS:[EDI+21],EAX CMP DWORD PTR DS:[EDI+21],EAX (CMP DWORD PTR DS:[ESI+21],EBX (CMP DWORD PTR DS:[ESI+21],EBX (CMP DWORD PTR DS:[ESI+21],EBX (CMP DWORD PTR DS:[ESI+21],EBX (CMP DWORD PTR DS:[ESI+21],EDX (CMP DWORD PTR DS:[ESI+21],EDX (CMP DWORD PTR DS:[ESI+21],EDX (CMP DWORD PTR DS:[ESI+21],EDX (CMP DWORD PTR DS:[ESI+21],EDX

I want to know that too. Looking for the one where the computer has to decide "yes" or "no" to a bid.

My reasons are to make it possible to get players for free when playing really low level. The computer refuses to sell a player for free when he is not playing, worth like 1k, and has 2k per month salary. Avoiding the salary

This may (or may not) help.

The minimum fee release value of a contract is stored 0x21 bytes into a contract, so the AI will have to access this value when determining whether to accept or reject a bid. I've searched the exe and the following lines may help narrow down the search.

Code:		
00866C68 00866C71 00866CEE 00866D02 00866D17 00866D1C	<pre> . 3947 21 . 3947 21 . 395E 21 . 395F 21 . 395E 21 . 395E 21 . 395E 21 . 3956 21 . 3957 21 . 3957 21 . 3956 21 . 3956 21</pre>	CMP DWORD PTR DS:[EDI+21],EAX CMP DWORD PTR DS:[EDI+21],EAX CMP DWORD PTR DS:[ESI+21],EBX [CMP DWORD PTR DS:[EDI+21],EBX [CMP DWORD PTR DS:[ESI+21],EBX [CMP DWORD PTR DS:[ESI+21],EDX [CMP DWORD PTR DS:[EDI+21],EDX [CMP DWORD PTR DS:[EDI+21],EDX [CMP DWORD PTR DS:[ESI+21],EDX [CMP DWORD PTR DS:[ESI+21],EDX

If you're still looking for this, the offsets relating to signing non-EU players in Portuguese squads are:

Code:

PRM:	007D41AE	MOV	BYTE	PTR	SS:[ESP+12],6
D2:	007D41BE	MOV	BYTE	PTR	SS:[ESP+12],5
D2B:	007D41C5	MOV	BYTE	PTR	SS:[ESP+12],4

Change the values to 32 for no restrictions.

There are similar 6/5/4 offsets for the Portuguese leagues a bit further down from these, I'm not sure what they're used for.

Perfect. :ok:

Spoiler! Show

Thank you!!

Usually CM uses the FPU for financial stuff, so the loading of an integer onto the FPU stack stood out as highly suspicious...

and guess what, the code around that has plenty of calls to club finance functions and player evaluations ...

and the CPP module is called transfer_offer.cpp

I'd be damned if we did not find it! @8e5b30 :-)

EDIT: Fail. That function (8e5d60) seems to be a preparatory function for a transfer offer. It gets called before you get a screen where you can adjust an offer.

milo

a naive question for offset guys, was wondering how much of the exe, in percentage, did you disclose?

JohnLocke

Well under 1% I would think.

--

Fill these two lines with NOP and the + and - buttons for wages on the Offer Contract screen will be disabled. 004E1414004E150C

You can still use the list of wages to select a different wage to offer the player - I'm still trying to figure out how to disable that.

JohnLocke

Pasquale

Since it is difficult to disable the play-off / out of Premier and First Division Northern Ireland, you can cancel the direct promotion?

Tapani

I'd guess that I know more than 1%, maybe up to 5%, of the exe by now. (But still, that is nothing!)

The surrounding code could be changed fairly easily to move attributes into another training regime, or even have it in more than one regime.

Does it avoid **De**creases?

JohnLocke

Training has never made stats decrease, so these changes won't stop that. I will try and find all other instances of stats changing (up and down).

milo

Goofy it very simple. Find all references ro "Next" and "Back" "Profile" "Contract" and etc. U will see "Push 30" offset near EACH of them. Change it to "Push 2" to make it semi-transparent (as birdth date string) and "Push 0" to make it 100% transparent. http://www.champman0102.co.uk/images...quote_icon.png Originally Posted by **Tapani** http://www.champman0102.co.uk/images...post-right.png The player display function is at 870700 to 8764e9. Searching that for PUSH 30 (6Ah 30h) and replacing with PUSH 2 (6Ah 02h) is probably a better brute force shot.

I have changed the PUSH 30 into PUSH 2 in order to make the button semi-transparent but this does not work.

Does anyone know how to remove the edges from the buttons? i.e. creating a flat modern look...

Goofy it very simple. Find all references ro "Next" and "Back" "Profile" "Contract" and etc. U will see "Push 30" offset near EACH of them. Change it to "Push 2" to make it semi-transparent (as birdth date string) and "Push 0" to make it 100% transparent. http://www.champman0102.co.uk/images...quote_icon.png Originally Posted by **Tapani** http://www.champman0102.co.uk/images...post-right.png The player display function is at 870700 to 8764e9. Searching that for PUSH 30 (6Ah 30h) and replacing with PUSH 2 (6Ah 02h) is probably a better brute force shot.

I have changed the PUSH 30 into PUSH 2 in order to make the button semi-transparent but this does not work.

Does anyone know how to remove the edges from the buttons? i.e. creating a flat modern look...

Hey sorry not to answer ur PM, i am extremely busy atm, i wish i can help..:(

I'll try to explain with a simpler example.

The CM0102.exe file can be edited with an application called the Olly Debugger (http://www.ollydbg.de/), usually referred to as Olly.

Two simple offsets: 0x579e58 0x579f16

These both concern the number of loan players a club can have in England, the first is the total number and the second relates to how many they can have at any one time.

The 0x is to indicate they are hexadecimal numbers (base 16, rather than base 10) you don't need to know what the decimal value is.

When I open Olly and go to these offsets the following lines of assemly code are shown (assembly is the lowest level computer programming language).

00579E58 |. 803C01 05 CMP BYTE PTR DS:[EAX+ECX],5

00579F16 |. 3C 01 CMP AL,1

On the first line, if you change the 5 to another number it will change the number of total loans allowed in England. On the second, the game is using the number the of loan players the club has currently - so if they have 1 or less the loan can go ahead, if they have 2 already the loan would be cancelled. CMP AL, 2 would allow 3 simultaneous loans.

As someone with virtually no editing experience, how would i go about changing this so that the English leagues allow, say, 6 loans at one time?

I have located the relevant offsets on Olly. Although the top one ends with 9 on mine (not 5)

I'm using Tapani patch 2.19 (version 2) - this allows loans between EPL clubs but there's only a maximum of 2 total loans at one time

Lewis MacLeod

Think i managed it actually

Changed CMP AL, 1 to CMP AL, 5

Now there are 6 loan players allowed in all English clubs at one time

JohnLocke

The 9 is from Tapani's patch.

Glad you got it sorted.

Lewis MacLeod

In terms of the top line (5 in yours, 9 in Tapani's) is that the total number of loans you are allowed in one season? And is 9 the highest you can go?

JohnLocke

Total loans in a season. I assume 9 is closer to current rules, so Tapani will have included that in his patch.

Change the following lines (changes in bold) for infinite loans.

00579E5C | JMP SHORT 00579E9C

Simultaneous loans: 00579F18 | JMP SHORT 00579F58

Although infinite simultaneous loans may as well be 50 (32 hexadecimal) given the squad size limit.

JohnLocke

Change the following lines (changes in bold) for infinite loans.

00579E5C | **JMP** SHORT 00579E9C

Simultaneous loans: 00579F18 | JMP SHORT 00579F58

Although infinite simultaneous loans may as well be 50 (32 hexadecimal) given the squad size limit.

Lewis MacLeod

Rather than change to infinite, what if i just wanted to increase the below from 9 to 12? Just type 12? Or would that be interpreted differently in this hexadecimal shiz i know nothing about?

00579E58 |. 803C01 05 CMP BYTE PTR DS:[EAX+ECX],9

Top tip that.

I use: http://www.rapidtables.com/convert/n...to-decimal.htm

Lewis, 12 decimal is 'c' in hexadecimal (a=10, b=11, c=12, d=13, e=14, f=15, 10=16, 11=17 and so on).

Isn't that just real life though? A club buys a player for super bucks, but he flops and they then sell him on for a fraction of the price they paid for him.

Damien Duff - Chelsea signed him for £17m & sold him for £5m 3-years later. Juan Veron - Man Utd signed him for £28m & sold him for £15m 2-years later. Scott Parker - Chelsea signed him for £10m & sold him for £6.5m 18-months later. Shaun Wright-Phillips - Chelsea signed him for £21m & sold him for £9m 3-years later.

No it isnt ofcourse.

Examples u gave isnt correct, coz there players sold for half value they were bought, not they cos itself.

E.g some player on trensfermarkt now cost 20m Euro, and club selling him fo 2m, is it realistic?

MarcoVanBast

Which is most important, that Inter selling Zamorano to Real in cm for 4,5m and he costs 15m in Real so they can sell in in 6 months in 3 times more expensive even if he doesnt scored 1 goal, lol

Lewis MacLeod

Thanks a lot guys

Final question

Is there a way to change the wording? I assume there must be as i think Tapani has done so for the total loans (if you try to loan a 10th, it says "no more than 9")

However, even though i've changed simultaneous loans from 2 to 5, the wording still says "no more than 2 at one time" if you try to sign a 6th

JohnLocke

Go to the bold locations (ctrl+g) in the bottom left quadrant in Olly, then right-click > Edit.

00579E73 | PUSH OFFSET **009C4534** ; ASCII "{}-{%s - Club(e.g.Newcastle)>{} are not allowed to loan more than five players in a season." 00579F2F | PUSH OFFSET **009C44D4** ; ASCII "{}-{%s - Club(e.g.Newcastle)>{} are not allowed to loan more than two players at any one time."

Space is limited - make sure there is always a 00 between two pieces of text as that is how the game knows the text has ended. In the above example, you can remove the ' - Club(e.g.Newcastle)' if you need more space.

Could point, yes that will work fine. You may need to re-write the rest of the text to remove the space, then switch to the hex edit box to enter 00 to terminate the text.

This is a random patch I made. It makes dirtiness, free role, and versatility visible, and will hide determination, influence, and set pieces. I think determination is an overpowered attribute, so I like it to be hidden, but you can still find out about det, inf, and set using coach reports.

Positioning is up there with Determination if not more.

Versatility really only relates to whether a player will learn a new position.

Could probably hide teamwork since most just assume its the same as work rate.

Free role is rather interesting one. Having free kicks and corners visible kind of interesting too, since even though free kicks are labelled set pieces they dont include corners.

Dermotron

Is there an offset for Attribute Masking? If so what is the criteria a player is masked and partially masked? Be interesting to change it to fully mask all players under a certain world rep or current rep.

With the data and resources available to clubs nowaday even a promising young player in somewhere like Uruguay Second Division is going to be monitored by clubs even if most people haven't heard of him. There are rarely complete shock signings anymore and there is a massively cosmopolitan feel to most clubs in professional leagues nowadays. Any player with a bit of promise is picked up just in case by clubs nowadays as its such a cheaper option

greg

If you reduce this value the code that displays attributes on the player screen won't display all attributes.

i think this might do that, i'm curious how it works, let me know if it works

thanks - greg

Dermotron

I think JL added that as an option to his patches. Don't want to block more, just want to block less. A more sensible amount of players I guess. Generally everyone abroad not famous or capped has hidden attributes

Partially hiding all those normally blocked would be interesting

Johngall

Hi guys,

Anyone have the offsets for the mls. Looking to add teams to mls to reflect way it is today.

Thanks

Craig Forrest

MLS is difficult to change

but I will soon be releasing a MLS patch replacing Wales that has the proper teams :ok:

Johngall

No problem

Thanks

Easy Rider

Really? So I did good with Olly? :humble::clap::rockon::dance: That's awesome! :ok;

I tought the game would show the changed country's name instead of a number... and i also tought that even my greyed players would be New Zealanders instead of Australians. Do I still get NZL regens/newgens with this change or do I get Australian ones since I'm playing the Aussie league?

03-05-15, 10:47 PM

04-05-15, 02:05 AM

Guys you can not see the error match_eng?

well, not sure for regens...never actually bothered with it...try for a few seasons and share your results...

giovanisantana29

I've tested this and the regens still remain with the league nationality.

Easy Rider

Despite the club's nationality been changed to New Zealand, all the players that came from the youth ranks were Aussies :(

http://i58.tinypic.com/34zlz.png

Perhaps this offset editing can only be useful if creating a world league and then it might give that club priority to sign domestic players/coaching staff than foreign ones. Other than that is rather pointless to edit the clubs nationalities IMHO. :sad:

technoir

With the help of CF i managed to changed promotion structure in polish second division. Now i am trying to change relegation structure in first division. I need help to change relegation structure into 3 auto places

Here it is the file https://www.sendspace.com/file/rwlo6y this is the file.

and the expression to look for (i am not sure if that is right) 007c96ed

Hope that someone will help me :)

0092965A MOV WORD PTR DS:[ECX],3 > 2

With this modification the World Club Championship will no longer have the 3rd place playoff, thus will not happen again this bug.

I'm still not have 100% of sure about that, but I made very many tests and the bug seems to have disappeared.

Golly

I had a little tinker and I have worked out why certain tournaments suffer with the 3rd Place Play-off not taking place. It's to do with the draw dates.

Every round has a draw date. The game is quite happy for the Final draw to take place before both Semi-Finals are completed and will place the winners into the Final. BUT the same doesn't happen with 3rd/4th Place games. If the Semi-Finals aren't completed and the draw takes place the losers aren't put into the 3rd/4th Place Play-off and it doesn't take place. And as the tournament hasn't been completed the next tournament won't take place.

Using the equivalent offset in the English Championship I have altered the play-off to only 1 round and both "Semi-Final" winners are promoted.

If Pasquale is reading this, there's your answer- How to disable the Play-off. Change this offset to value 0!

Pasquale

I changed the value of this offset 0078BB33 MOV WORD PTR DS: [EAX],1 but the game crashes ... does anyone have any idea?

When did it crash? Did you remove the play-off places in the league & make the automatic promotion & relegation numbers between the league equal?

Pasquale

I changed the value of the offset, but after this season I get error Cup

Zé

Does anyone know the offset to make the attributes background darker?

http://en.zimagez.com/miniature/unti...973b233295.png

greg

As far as I know, there is only the one type of dark glass, you can't change the level of transparency. You could make it a solid color, or there are some gradient ones, but there are like black to grey. MVB had the offsets he was changing it in this post: http://www.champman0102.co.uk/showthread.php?t=5542

wayupna

Guys any links to where we can increase the amount of loan players in the English game from 2 to 5 ??

Fods

Tapani patch allows you to have more loans

wayupna

Oh right i have the latest one to be fair, i can see that other teams have more than 2 loan players in there squads ? i guess i will have wait to end of season see what happens.

I have been purchasing non league players to get me out of the sticky stuff at the moment

Zé

Code:

.1478],1

So here are the offsets following the Squad button. Can any help with which command sets the background to the button? Normally I would have expected to have seen PUSH 30 but that doesn't happen here.

Comments ; ASCII "Squad"

Comments ; ASCII "Squad"

09-06-15, 10:36 PM

As you can change the location of the final Asian Champions Cup and Asian Cup Winner Cup?

Zé

Change the following offsets to PUSH 2 to make the text fields flat:

Code:

#Add Manager Screen 00821313 0082120f 00821114 0082101f #Player Nickname Screen

0088bd33

http://en.zimagez.com/miniature/addmanager0.pnghttp://en.zimagez.com/miniature/nickname0.png

I can't however seem to change the opening screen buttons to be flat, any ideas?

Code:

0081BAB6 6A FF PUSH -1 0081BAB8 1.68 E9129600 PUSH 009612E9

09-06-15, 10:36 PM

Change the following offsets to PUSH 2 to make the text fields flat:

Code:

#Add Manager Screen
00821313
0082120f
00821114
0082101f
#Player Nickname
Screen
0088bd33

http://en.zimagez.com/miniature/addmanager0.pnghttp://en.zimagez.com/miniature/nickname0.png

I can't however seem to change the opening screen buttons to be flat, any ideas?

Code:

Giovani can you tell me how to completely disable indeed eliminate the Second Division Northern Ireland?

Golly

23-06-15, 08:37 AM

Here are a list of the dates that new seasons initialise in the game. Edit these & rewrite fixture dates for the competitions and you can totally change the calendar for a country. ie You could have Ireland playing Feb-Nov like real life or switch Russia to Aug-May.

NB. These don't control the date on which a new game initialises. If anybody manages to crack that please post it on here.

World Cup - 00830A62 (Jul 25th) Other Int Comps - 00830F8C (Aug 15th)

World Club Comps - 00831298 (Jun 20th) European Club Comps - 00831607 (Jun 21st) N.American Club Comps - 008318AA (Jan 21st) S.American Club Comps - 00831851 (Jan 10th) Asian Club Comps ? - 00831664 (Aug 28th) Asian Club Comps ? - 008320B7 (Jul 21st)

Argentina - 00832322 (Aug 1st) Australia - 00832574 (Jul 20th) Belgium - 0083290B (Jun 20th) Brazil - 00833052 (Jan 12th) Croatia - 0083339B (Jun 20th) Denmark - 008336E9 (Jun 20th) England - 00833C82 (Jun 20th) Finland - 00833F8B (Dec 27th) France - 00834380 (Jun 20th) Germany - 00834759 (Jun 20th) Greece - 00834AAB (Jun 20th) Holland - 00834DFB (Jun 20th) Ireland - 00835295 (Jun 20th) Italy - 0083588D (Jun 20th) Japan - 00835C37 (Jan 25th) N.Ireland - 00835FC8 (Jun 20th) Norway - 008362EC (Dec 10th) Poland - 0083668C (Jun 20th) Portugal - 00836A50 (Jun 20th) Russia - 00836D66 (Dec 27th) Scotland - 008371A3 (Jun 20th) South Korea - 08374E7 (Jan 20th) Spain - 00837985 (Jun 20th) Sweden - 00837D10 (Dec 27th) Turkey - 0083805B (Jun 20th) U.S.A. - 00838355 (Feb 20th) Wales - 0083869D (Jun 20th)

JohnLocke

23-06-15, 09:03 PM

No idea if they're related but the offsets needed to amend the start year (taken from Tapani's patch) are:

private static final int[] START_YEAR_OFFSETS = new int[] { 0x13386, 0x140e5, 0x224f0, 0x44270, 0x44297, 0x5f4ee, 0x5f97c, 0x5f981, 0x16fc63, 0x18b387, 0x1aee53, 0x1bab86, 0x1bac32, 0x1bb6ab, 0x1bc8b2, 0x1c3068, 0x1db242, 0x2673c3, 0x267495, 0x267582, 0x26766d, 0x26775a, 0x267829, 0x2678f8, 0x2679c6, 0x267aa1, 0x267b81, 0x267c6d, 0x267d5a, 0x267e55, 0x267f50, 0x268043, 0x268149, 0x268236, 0x268324, 0x268411, 0x268987, 0x268a77, 0x268b65, 0x2687ac, 0x268899, 0x268987, 0x268a77, 0x268b65, 0x2687ac, 0x268840, 0x268e2f, 0x268f1d, 0x26900b, 0x2690da, 0x37d858, 0x3d2410, 0x41b93d, 0x430591, 0x430598, 0x4305dc, 0x431608, 0x431622, 0x4318ad, 0x43129a, 0x4312b4, 0x431608, 0x431622, 0x4318ad, 0x43129a, 0x4332bc4, 0x43306b, 0x432657, 0x4320b3, 0x4332bc4, 0x43366, 0x43266, 0x4320b3, 0x4332bc4, 0x433660, 0x432677, 0x432597, 0x4335c39, 0x4357cd, 0x4334ad, 0x4346f1, 0x432577, 0x43865, 0x4371d5, 0x4374e9, 0x438055, 0x43668, 0x4371a5, 0x4371d5, 0x4374e9, 0x438054, 0x438357, 0x43869f, 0x456ce0, 0x4fdd2, 0x5041f3 }: private static final int[] MINUS_3_OFFSETS = new int[] { 0x3e6819 };

private static final int[] MINUS_1_OFFSETS = new int[] { 0x55fd1, 0xdc02c, 0x12d2e2, 0x3e68fe, 0x3e691f, 0x45e98f };

private static final int[] PLUS_1_OFFSETS = new int[] { 0xdc135 };

private static final int[] PLUS_2_OFFSETS = new int[] { 0x29e84e, 0x45b841, 0x45b898, 0x45c40c };

private static final int[] PLUS_3_OFFSETS = new int[] { 0xdc113, 0x19ba24 };

Offsets are literal (add 0x400000 to get Olly offsets).

Maybe nearby code covers the date in the year each competition / country starts.

Pasquale

When would you be able to also turn off the play-off / out would not be a bad idea :whistle:

Firstly, new games start on the following dates (2001/02 season):-

Argentina - 12.07.01 Australia - 04.09.01 Belgium - 07.07.01 Brazil - 21.12.01 Croatia - 23.06.01 Denmark - 01.07.01 England - 14.07.01 Finland - 30.03.02 France - 14.07.01 Germany - 30.06.01 Greece - 21.07.01 Holland - 21.07.01 Ireland - 01.07.01 Italy - 29.07.01 Japan - 09.02.02 Northern Ireland - 14.07.01 Norway - 17.03.02 Poland - 16.06.01 Portugal - 29.07.01 Russia - 23.02.02 Scotland - 07.07.01 South Korea - 24.02.02 Spain - 04.08.01 Sweden - 10.03.02 Turkey - 08.07.01 USA - 23.02.02

Thanks to JohnLocke pointing me in the right direction I have located the offsets which control the starting date for the game in each league. They appear in blocks like this...

http://i1218.photobucket.com/albums/...art%20date.png

The image above shows the offsets that control the England season dates. You might notice the reference to [9CF2E4] England & [9CF74C] English FA Cup.

Highlighted in grey are a group of date offsets. Arg4 = 5 (Saturday), Arg2 = 7 (August) & Arg1 = 0A (10th). So these offsets give the date Saturday 10th August. Don't ask me why, but these date offsets control the date a new game starts on.

From what I have worked out, and have confirmed by experimenting, a new game will start 28 days before the date given in that group of offsets for each nation.

So, for England the date is the closest Saturday to 10th August. In 2001 this was Saturday 11th August. 28 days before this was Saturday 14th July- the start date of a new game in England.

And, for Scotland the date of the equivalent offsets is the closest Saturday to August 2nd. In 2001 this was Saturday 4th August. 28 days before this was Saturday 7th July- the start date of a new game in Scotland.

And, for Poland the date of the equivalent offsets is the closest Saturday to July 17th. In 2001 this was Saturday 14th July. 28 days before this was Saturday 16th June- the start date of a new game in Poland.

Here is a list of the starting offset for this group of offsets for each nation in the game:-

Argentina - 0066794A Australia - 00667918 Belgium - 00667918 Brazil - 00667985 Croatia - 006678D6 Denmark - 00667D8C England - 00667D8C Finland - 00667D8C Germany - 0066816A Holland - 0066816A Holland - 00668268 Ireland - 00668268 Ireland - 0066850 Italy - 00668456 Japan - 00668520 Northern Ireland - 0066861E Norway - 00668713 Poland - 006687CD Portugal - 00668268 Russia - 006689A8 Scotland - 00668AC4 South Korea - 00668866 Spain - 00668265

Going back to the image above, the date offset starting at 00667E0C is interesting. Without wanting to guess I think it might be the date when teams in that nation stop training and players lose their fitness. The date referred to in the image is May 31st- this is traditionally the last day a domestic game will take place in England- the Championship Play-off Final when the End of May Bank Holiday falls on the 31st.

Golly

28-06-15, 08:42 PM

Also the date offsets for a new season initializing seem to reappear in these offsets. The ones I mentioned in post 1327 in this thread.

Without checking one might be for when a league is selected and the other when it is not a playable league and is in the background only.

Not entirely sure how these work, but I've found the offsets that decide the length of time it takes for players to gain second nationalities. As you can see in this post, it can take anywhere from 3 - 11 years to occur, or it may never occur at all. The leagues can be divided into four groups:

3 years: Portugal and Spain

5 years: England, N Ireland, R Of Ireland, Scotland, Wales 6 years: Belgium, Croatia, Denmark, France, Germany, Greece, Holland, Norway, Poland, Sweden, Turkey

11 years: Finland, Russia Never: Argentina, Australia, Brazil, Italy, Japan, South Korea, USA

More generally they can be grouped: 3 years: Portugal and Spain 5 years: UK & Ireland (I haven't found the code for this group) 6 years: Other European countries

11 years: Finland, Russia (and Italy)

Never: Countries outside Europe

The code is in a medium sized block beginning at 008C5880. The offsets that decide the length of time for each group are:

Code: 3 years: 008C5B8D ADD EAX,-2 years: Unknown 6 years: 008C5B7A ADD EAX,-5 11 years: 008C5BA8 ADD EBP,-0A

Never: 008C5C1F MOV EDX, DWORD PTR DS: [9CFA10] - Europe

I played around with it for a small bit and it seems like 3 years is the lowest amount of time you can set it to. I don't know why some other anomalies occur (like how it takes only two years for South American nationals in the three year group, or sometimes even just six months if you loan them, or why Italy never awards second nationalities despite being there in the code next to Russia and Finland), but the answers could be in that block of code.

Countries should be interchangeable where there's room - I swapped Greece for Portugal and it worked as expected. Hopefully others play around with this and we can gleam some more information.

Is there a way to disable transfers being cancelled because the board think it's unrealistic?

When us patchers come across information that might "harm" the game, should it still be made public?

At least I have kept my mouth shut about several things, there are things to be discovered that would many aspects of the game no fun. Once you know everything, it is no longer fun. The magic disappears. It is just mechanics. Once this knowledge is commonplace, there is no more community.

With great power comes great responsibility. Just because we can know things, one has to think if we really should tell the world.

This is a change I probably would not have published, at least without a reason. It is not a big deal. But generally I believe cheats ruin games, more than make them more fun.

Regarding to this issue. I agree with Tapani, but I'm not against this case in particular.

I've been testing this today and finding every players does not mean you get rid of fog of war, thus if not using the trial option YOU STILL NEED SCOUTS TO SEE THEIR STATS.

In another scope, I've always been supporter of game customizing. I think what makes solo games fun is to customize for max amusement. I know not everybody will disable trial like I do. I also know that there are those who use CM Scout and see every att, even PA and CA. So regarding to this case, I don't see where to complain (although like I said, I understand Tapani's concerns).

In any case, I used to CMScout nations for national teams, just like Derm, with hidden atts and CA/PA turned off. This change allows me to play the game without any need to save and scout every time I want to rebuild a national squad. Even more I've been using scouts more often because I have more for them to scout. Those who like me, used to scout specific players rather than using a general survey will find this feature very useful.

Sometimes a picture talks more than a million works.

Just started writting this during lunch. I'll update whenever I got something REALLY working but wanted to share the initiative.

If we somehow can recreate some SI code, we'll be pretty close to writting new leauges and competitions just from scratch and place them in the transfer window free space we are getting nowadays.

sashhead

Really stupid question but I'm using Olly and I can find and edit things no problem but how do you save your changes to the exe? Just exiting doesn't save the changes that I make ...

JohnLocke

Select the code you want to save > right click > Edit > Copy to executable > right click > save file

Fiestita

Code for CONCACAF champions fixtures with comments. Hope it will help those who are not used to olly.

Spoiler! Show

Fiestita

As most of you know, Copa Libertadores is annoyingly played twice every game start. Here's how to fix that.

25-07-15, 11:45 AM

25-07-15, 06:03 PM

27-07-15, 06:53 PM

28-07-15, 09:16 PM

First of all, we go to the instruction that copies current year to stack (it's already stored in AX). 004C2F9D MOV WORD PTR DS:[ESI+40],AX And we replace it with a jump to that offset. 004C2F9D JMP 004C118D

Already @ 004C118D we shall take in mind which year we are starting the game in. In my case it's 2001 as I love to buy young Ortegas, Verons, etc.

004C118D CMP AX,7D1 ; comparing year stored in AX with year of game start 004C1191 JE 004C3883 ; if equal we jump to 004C3883 With the previous, we are letting the game go on as usual if we are not in start game year. 004C1197 MOV WORD PTR DS:[ESI+40],AX ; otherwise we store current year in stack so it can be later incremented for next season 004C119B JMP 004C2FA5 ; we jump back to copa libertadores int function

If jumping on equal: 004C3883 INC AX ; we increment AX by one, so current year will be next year 004C3885 MOV WORD PTR DS:[ESI+40],AX ; stores next year in stack for later increment for next season 004C3889 JMP 004C2FA5 ; jumps back to copa libertadores int function

I'm hollydaying this right now to see if there's any issues.

Sorry Fiestita. I do not understand your post.

For example:

Code:

int Get ArgClubZone (CM3 CLUBS * club)

Where have we declared the variable?

Zé

0x431b54, 0x431b6d, 0x431e66, 0x431e80, 0x4320b3,
0x4320cd, 0x432324, 0x432577, 0x43290d, 0x433055,
0x43339d, 0x4336eb, 0x433c84, 0x433f8e, 0x434382,
0x43475d, 0x434aad, 0x434dfd, 0x435297, 0x435c39,
0x435fca, 0x43668e, 0x436a55, 0x436d68, 0x4371a5,
0x4371d5, 0x4374e9, 0x43805d, 0x438357, 0x43869f,
0x456ce0, 0x4fddd2, 0x5041f3
};
```

private static final int[] MINUS_3_OFFSETS = new int[] { 0x3e6819 };

private static final int[] MINUS_1_OFFSETS = new int[] { 0x55fd1, 0xdc02c, 0x12d2e2, 0x3e68fe, 0x3e691f, 0x45e98f };

private static final int[] PLUS_1_OFFSETS = new int[] { 0xdc135 };

private static final int[] PLUS_2_OFFSETS = new int[] { 0x29e84e, 0x45b841, 0x45b898, 0x45c40c };

private static final int[] PLUS_3_OFFSETS = new int[] { 0xdc113, 0x19ba24 };

Offsets are literal (add 0x400000 to get Olly offsets).

Maybe nearby code covers the date in the year each competition / country starts.

Thank you for this JL.

Do you have the section that write the new values? Interested in seeing how this works in C++.

I'm still building the	methods Zé. That's a .cpp file with just functions.	
There's no point in c	creating clubs in a main function if I do not have enough methods to play with.

Code:

public void setYear(final int year) {
 for(int i=0; i < START YEAR OFFSETS.length; i++) {
 raf.position(START_YEAR_OFFSETS[i]);
 raf.putShort(year);
 }
 for(int i=0; i < MINUS_3_OFFSETS.length; i++) {</pre>

```
raf.position(MINUS 3_OFFSETS[i]);
raf.putShort(year - 3);
}
for(int i=0; i < MINUS 1_OFFSETS.length; i++) {
raf.position(MINUS 1_OFFSETS[i]);
raf.putShort(year - 1);
}
for(int i=0; i < PLUS 1_OFFSETS.length; i++) {
raf.position(PLUS 1_OFFSETS[i]);
raf.putShort(year + 1);
}
for(int i=0; i < PLUS 2_OFFSETS.length; i++) {
raf.position(PLUS_2_OFFSETS[i]);
raf.putShort(year + 2);
}
for(int i=0; i < PLUS 3_OFFSETS.length; i++) {
raf.position(PLUS_3_OFFSETS[i]);
raf.putShort(year + 3);
}
```

Guys a question: I have changed the offset for enter teams B in other leagues, but I wondered: how do you not to promote team B?

Craig Forrest	31-07-15, 03:58 AM
Explain what you mean	

Pasquale

I try, for me it's hard to explain: I changed the offset to enter Team Reserves in other leagues, now I wondered: how do you tell the league that the team reserves should not be promoted to the top league?

Fiestita

FIND EVERY PLAYER stuff is good mates.

I'm finding scouts TRULLY USEFULL for the very first time. Every month I check for new players to show up and assign them scouts. It's sometimes a bit annoying as some times you get 20 or 30 pages to manually scout (scouts don't find every player when assigned).

Also if I did create a B team, does it remove Benfica's? Is there a B team limit? someone should create a new tutorial for adding B teams.

JohnLocke

Editing the B teams is easier than the guide makes out - you don't actually need to edit the capitalised name, i.e. you only need to edit 'Sport Lisboa e Benfica' and you can leave the 'SPORT_LISBOA_E_BENFICA' unchanged.

JohnLocke

I followed this guide to the letter (I think!) http://www.champman0102.co.uk/showthread.php?t=380

I am using the .68 database.

Have you any tips on an easily over looked step in creating a B team?

Also if I did create a B team, does it remove Benfica's? Is there a B team limit?

Tip: don't bother editing the uppercase name, just edit the regular name and that should do it.

That guide will replace Benfica's B Team - but you can pick a different club if you prefer.

You're limited to the number of clubs with B teams in the original game. You could, theoretically, add more but I've never seen it done.

It's a bit more complicated if you want to give a B team to a hard-coded club (if they don't have on already), I might write a tutorial for that when I have time (and can be bothered).

Craig Forrest

If you've linked the B teams to the proper A team (for example Glasgow Celtic A and Glasgow Celtic B) so that you can demote and promote your players properly, then the game knows they are a reserve team and won't promote them to a league where the A team is.

Bohemians

I've followed the advice here to change a lot of the game's offsets but I've never been able to get the add B team to work. I've tried a couple of times to add a B team to Rio Ave in Portugal.

Bohemians

JohnLocke,

Thank you for the advise; I was finally able to add Rio Ave B.

I think the problem was running the editor in admin mode rather than editing the offsets.

It's a shame that the B team can't be managed but at least I'll be able to stock it with young players.

Thanks again.

You'd need to add an extra manager but you can take control of a B team: http://www.champman0102.co.uk/showth...8247#post88247

Bohemians

Great John, I'll give that a go.

Re Fitness

I was thinking today that player fitness is probably linked to the start and end dates of the their domestic season. So, you often play summer tournaments like the club world cup with an unfit squad.

Would it be possible to knock out the offset for "stop training at end of season" and just have the players at maintain 100% fitness forever?

If anyone has any knowledge of which offsets to change I'll try and test this.

greg

02-08-15, 08:35 PM

02-08-15, 02:40 PM

Not positive, but I think that when default GK training is changed to (M,M,N,M,M) before starting a new game, that AI keepers perform better over the long run. Is there an easy way to track total goals in a season?

[ECX+4] = fitness [ECX+5} = tactic [ECX+6] = shooting [ECX+7] = skill [ECX+8} = gk

0 = none 0A = light 19 = medium 32 = intensive

This one is for default training regimes. I think the change has to be made before starting a new game, to take effect.

Craig Forrest

Saturn, JL, Greg, Fiestita, djole etc.....

Non-tapanified DB

I want to put playoffs in the English conference. I've amended the EXE to show 1 auto promotion and teams #2 - 5 in the playoffs. Is it possible to get the Conference to call the 3rd division fixtures or something? Or would I have to manually change all the offsets to match what Div 3 currently has?

help would be greatly appreciated :)

CF

JohnLocke

I don't know how to re-use the Div 3 code without copying it.

Craig Forrest

I thought as much... I was hoping there'd be some trick like the way Saturn played with the transfer windows and stuff..... but oh well, I'll keep plugging away :)

djole2mcloud

there is a trick.zozao helped me with it...but for me it only works for leagues where there is no playoffs...same trick for leagues with playoffs dont work,game crashes... here is the example how belgium div 1 using spanish 2nd division fixtures:

D1 will use Spanish D2 fixtures because we need 39 fixtures, therefore we need these modifications:

0041E010 . 8A4424 04 MOV AL,BYTE PTR SS:[ESP+4] 0041E014 . 81EC 08020000 SUB ESP,208 0041E01A . 3C FF CMP AL,OFF 0041E01C . 56 PUSH ESI 0041E01D . 57 PUSH EDI 0041E01D . 57 PUSH EDI 0041E020 . 0F85 9800000 JNZ cm0102.0041E0BE 0041E026 . 888424 2002000>MOV EAX,DWORD PTR SS:[ESP+220] 0041E026 . 888424 2002000>MOV EAX,DWORD PTR SS:[ESP+220] 0041E027 . 74 06 JE SHORT cm0102.0041E037 0041E037 > 888424 1802000>MOV EAX,DWORD PTR SS:[ESP+218] 0041E037 > 888424 1802000>MOV EAX,DWORD PTR SS:[ESP+218] 0041E037 > 888424 1802000>MOV EAX,DWORD PTR SS:[ESP+21C] 0041E037 > 66:C700 2700 MOV WORD PTR DS:[EAX],27 0041E04A . 66:C700 2700 MOV WORD PTR DS:[EAX],27 0041E054 . Craig Forrest

Thanks djole. I know you've given me this before as I've used it..... I'm just hoping that I can do something similar and modify an existing league to add playoff fixtures...

saturn

Sorry, I can't help either. Enabling/disabling the play-offs seems to be one of those things that should be easy to change but sadly isn't. I think even Tapani tried to disable them in Brazil but couldn't.

Craig Forrest

No worries guys. I'm painstakingly copying the D3 fixtures over to the conference fixtures section in the miniscule hope that it will work :P

I've got the table showing that teams 2,3,4 & 5 are in the playoffs and they get the little flags beside their names.... but the playoffs aren't scheduled so a second team never gets promoted and the game crashes

Jesus

Guys I've got an issue with the Swedish league in my current database. Building on the discussion me and CF had in his unofficial challenge thread (for reference), I took the .60 data and inserted my own players. When I went to start a new game with the Swedish league selected I got an error relating to the Swedish Second division (swe_second.cpp) which caused the game to force close. I then went on to compare the differences between the my update (.60) and the latest update (April 2015) and the only difference I could see was the minimum number of teams required in the Swedish Lower Division. In the .60 data it has 431 teams as a minimum where as the .68 data it has 436 as a minimum. Does anyone know how I can edit the data/exe to force it to allow 5 more teams in to that competition? I can't just move them with the official editor as it says the league is full...

Dermotron

CM Explorer will allow you force an extra 5 clubs in

Jesus

Could be Golly's post here, it explains a lot of cup offsets.

Pasquale

Since eliminating the play-off / out from North Ireland is impossible (or at least for the moment), I was wondering: You can disable the direct promotion from the First Division to the Premier Division? I tried to change the offsets in the First Division but the direct promotion remains ... how can disable?

vult

Here's how to change the Polish FA Cup offsets so there's no second leg match and only one match with a possible extra time and penalties

7C84D3, 7C8431, 7C8393, 7C82ED from BX to BP

7C8328, 7C83CB, 7C846C, 7C8511 from 2 to 1

7C832F, 7C83D2 from 0E to BL

7C8473, 7C8518 from 7 to BL

Again, that is what happened in real life. The old Wembley closed in October 2000 to be rebuilt. The original plan was for the new Wembley to be open for the 2003 FA Cup Final. But various delays in planning and further delays in construction meant the new Wembley didn't open until 2007.

Obviously, the game was released in 2001 and the was realistic to the rebuild.

Yea, I know all that. Now we can change it so that Wembley is used from the beginning for later start years. Finals are still played in Cardiff if you start in 2014 with Tapani's patches for example.

is there an offset that controls the length of a loan?

my idea is to make loan lasts more then 1 season...loan player for a 2 seasons for example... very useful for young players i think.

Good thinking djool, there must be an offset somewhere as you can set loans beyond a year in the editor right.?

djole2mcloud

yes, like in FM series...loan player for a more than 1 season...let's say 15 months, 18 months...

is there an offset that controls the length of a loan? my idea is to make loan lasts more then 1 season...loan player for a 2 seasons for example... very useful for young players i think.

Originally Posted by Fodster 🔊

Good thinking djool, there must be an offset somewhere as you can set loans beyond a year in the editor right.?

that's interesting, in 0001 you can set loans for 2 years as I always set Arteta for a 2 year loan at PSG to mirrior real life.

If the editor doesn't let you do it, have you tried just updating the notepad file? Set it to one year in editor then manually change the notepad, as think that would work.

Craig Forrest

The editor does let you do it #2.... Djole wants to do it in-game

Cam F

That will teach me not to speed glance at the forum in work.

Fods

Yeh in game cam get with it ;)

xeno

Hi from Turkey, I am using 2.20.1 Tapani patch

how to turn on below competitions. Mercoronte and Concacaf championship? I have tried several offsets , can not be succesful

E:\dev\CM3\cm3 00-01\cm3\code\comp\eurocomp\con_champ.cpp E:\dev\CM3\cm3 00-01\cm3\code\comp\eurocomp\con_merc_cup.cpp

My notes say that Merconorte was disabled because having it enabled caused crashes in MLS.

Wellcome back Tapani

saturn

The golden goal no longer exists today, so the following code removes it from the below competitions. If there's any other competitions that use it, let me know and I should be able to remove it from them too. In the cup offsets, look out for lines with [xxx+x],83 (sometimes 283, 383, but the 83 always signifies golden goals).

The competitions that it has been removed from are: Asian Club Championship Asian Cup Winners' Cup Asian Super Cup Australian League Final Dutch Cup Dutch Super Cup English Vans Trophy European Cup Final European Super Cup European Championship FIFA Club World Championship FIFA Confederations Cup Japanese Cup Japanese Emperor's Cup Japanese J-League 1 (games now just end in a draw after 90 minutes) Japanese J-League 1 Final Japanese J-League 2 (games now just end in a draw after 90 minutes) Korean FA Cup Korean League Cup Korean Super Cup OFC Champions Cup UEFA Cup Final US Open Cup World Cup The code:

The coue.

Spoiler! Show

Most competitions have been changed to [xxx+xx],203, which results in straightforward extra-time and penalties for one legged ties. Two legged ties are decided by away goals after 90 minutes, then extra-time (away goals won't count here), then penalties. Changing the 203 bit should allow different tie-breaks - try different combinations between 00 and 04. It should be noted that you're not entering two hundred and three for those tie-breaks, rather it's 03 and 02 (203 when written in little endian).

The international competitions were changed to [xxx+xx],303 because for some reason 203 caused some knockout rounds to be played at Unknown Stadiums on the same day.

Edit: A couple more competitions changed here.

sebastiankogut

What program I need to make changes???

sebastiankogut

I am looking for code associated with the Polish league

saturn

The American competitions were a bit of a mess in 2001. The following makes it a slightly less terrible league to play in.

0090701E MOV WORD PTR DS:[ESI+AB],0C2 -> 0 Disables MLS Regular Season golden goal extra-time (games now just end in a draw after 90 minutes).

00907FE7 MOV WORD PTR DS:[ESI+D],230 -> 0 00908003 MOV WORD PTR DS:[ESI+F],30 -> 3 00908009 MOV WORD PTR DS:[ESI+11],20 -> 0 The MLS Playoff Quarter Final becomes two legged instead of the best of three. If the scores are tied after both legs, away goals are used, then extra-time (where away goals no longer count), then normal penalties (as opposed to 35 yard ones).

00908068 MOV WORD PTR DS:[ESI+75],230 -> 0 0090808B MOV WORD PTR DS:[ESI+77],30 -> 3 00908091 MOV WORD PTR DS:[ESI+79],20 -> 0 The MLS Playoff Semi Final becomes two legged instead of the best of three. If the scores are tied after both legs, away goals are used, then extra-time (where away goals no longer count), then normal penalties (as opposed to 35 yard ones).

009081C2 MOV WORD PTR DS:[ESI+D],220 -> 203 The MLS Final uses extra-time after 90 minutes if scores are still level, then normal penalties.

0090A4FA MOV WORD PTR DS:[ESI+D],20 -> 1 The MLS All-Stars game uses normal penalties instead of 35 yard ones after 90 minutes if scores are still level.

0090869D MOV WORD PTR DS:[ESI+AB],0C2

Looks like another golden goal offset but I'm not sure what it would effect, so I just left it as is.

The code in .patch form:

Code:

0x507025 0xc2 0x0 0x507feb 0x2 0x0 0x507fec 0x2 0x0 0x508007 0x30 0x3 0x50800d 0x20 0x0 0x50806c 0x30 0x0 0x50806d 0x2 0x0 0x50808f 0x30 0x3 0x508095 0x20 0x0 0x5081c6 0x20 0x3

Added to the next patch, thanks.

Actually it is possible to use the long form of push instruction, to avoid the NOPs. I just replaced the two bytes "00 08" with "04 00" in the push instruction.

All other things equal, I prefer changes that modify less number of bytes. :-)

speaking for myself, I would love if you could consolidate the changes and post them in .patch form as you did for the removal of the golden goal above. with the jl patch being so easy to use it would allow anyone to create patch files for the changes they want, put them in a folder, and then not have to sift through other options in jl patch that they are not interested in.

Yes, please, that would be handy :-)

Inside the patcher I try to keep track of which blocks of changes do what, so a just long list of offsets (like a big .patch file as suggested above) probably gives me more work than "grouped" changes would. Even links to relevant posts is helpful.

Sometimes I can hesitate to incorporate something since I do not know if a suggested change is something someone has done for their own enjoyment, or if it is a change that has happened in real life. Good if someone else points out which ones to add :-)

See below for an example of a such change where I do not know if this is IRL or not.

Adding promotion/relegation to/from outside a league system is doable, but not easily. There are a few leagues where that has been added. Is this a change in the real world Scottish league, or just something for fun?

milo

if it's ok for you i think i will be able to do it after our release (should be on the 17th) cause there are so many things still to do...

unless someone else would like to help with this :ok:

Oh I do disagree, this is not a work of Jeffrey Archer, no this was introduced in Scotland - http://www.bbc.co.uk/sport/0/football/32632884 & https://en.wikipedia.org/wiki/Scotti..._league_system

Until recently Scottish football had no pyramid league system, and as a result it was near impossible for clubs at the bottom of the system to progress to the top, or for weak clubs to be relegated down the leagues. Progress towards creating a pyramid system began in 2008 under the tenure of Scottish Football Association (SFA) chief executive Gordon Smith, with discussions between the SFA and the regional and junior leagues.^[2] and on 7 May 2013 Scottish Premier League clubs unanimously agreed on the introduction of a pyramid structure to Scottish football along with the reintroduction of a single governing body for all 42 senior clubs, a revised financial distribution model, and the possibility of a pyramid number.

Basically Montrose won the play off in the summer to remain in Scottish leagues but this season the bottom team might not be so lucky.

...but in terms of priority for a new patch, way down list I would of thought.

Dermotron

Did not know about the relegation :ok:

Would make it a more interesting league to play with that in there

95% of all career games in 17 years of CM3 series start in there for me.

That's where the happening place is for me, then England and either Spain or Italy. Only other place I often go to is MLS but always have the odd random country where if approached I will go or if I fancy something different.

Northern Ireland springs to mind, had a good few seasons there recently before leaving for England when approached by Brentford.

this offsets posted by saturn are true gold...never swapp japan because that stupid rule of extra time in case of a draw...now, there is one more handy country useful for patching... and yes, i would be more than pleased to see relegation in Scottish 3rd div... awaiting new Tapani patch...

Cam F

08-10-15, 03:11 PM

08-10-15, 03:29 PM

I take it back, this would be amazing if added to the latest patch.

To think you could create your local amateur side in CM then watch as they entered the 3 division to the take them to champions league glory would be amazeballs.

djole2mcloud

Amen to that...

With this kind of description there is no chance I can do anything. The minimum is to let me know exactly what needs to be changed. And explain what changes are in real life (it has happened some has suggested changes for "fun", that are not real, and I have gone and added them... see Croatian league in 3.xx patches)

I really do not follow any football, so I have no idea what the differences between "Cup Mercosur 12 years ago" and "Copa Sudamericana".

Changing the number of teams in a league is a lot of hassle. While a patch can change the game to expect X teams in a league, it cannot magically know which teams belong to what league. This is a lot of database work.

milo

13-10-15, 02:54 PM

i think argentine top division is also something short living to be bothered with, from wikipedia:

In November 2014, the AFA announced the format for the next five seasons of the Primera División:[17]

- From February to December 2015, the league will be contested between thirty teams. Two teams will be relegated to and two teams will be promoted from Primera B Nacional.

- In the first half of 2016, the league will be contested between thirty teams. Three teams will be relegated to and one team will be promoted from Primera B Nacional.

- From August 2016 to June 2017, the league will be contested between twenty-eight teams. Four teams will be relegated to and two teams will be promoted from Primera B Nacional.

- From August 2017 to June 2018, the league will be contested between twenty-six teams. Four teams will be relegated to and two teams will be promoted from Primera B Nacional.

- From August 2018 to June 2019, the league will be contested between twenty-four teams. Four teams will be relegated to and two teams will be promoted from Primera B Nacional.

Rodry97

13-10-15, 07:50 PM

TAPANI...

Primera división argentina (30 teams) in 2001. 20 teams

Aldosivi, argentinos, arsenal de sarandi, Banfield, Belgrano, boca, central, Chicago, colon, crucero, Def y justicia, estudiantes LP, gimnasia LP, godoy cruz, huracán, independiente, lanus, newells, olímpo, quilmes, racing, Rafaela, river, san lorenzo, san martín sj, sarmiento, temperley, tigre, unión, velez.

The championship starts in February and ends in November. played 30 dates. all play against each and an extra time against arch-rivals.

Rodry97	13-10-15, 08:04 PM

Arch-rivals

Boca - River Independiente - racing San lorenzo - huracán Colon - unión Central - newells Banfield - lanus Estudiantes LP - gimnasia LP Aldosivi - olímpo Def y justicia - quilmes Rafaela - Belgrano Argentinos - velez Chicago - tigre Godoy cruz - san martín sj Arsenal de sarandi - temperley Sarmiento j - crucero

with rival classic two games are played per tournament. one visitor and one local. two teams descend and ascend two from the second division. promotion no longer exists

What I see about the Argentine league ... the mess in your league is beyond words. Not going to touch it.

Rodry97

Too bad ... if the organization is a disaster. thank you anyway.

cdewar19

What's the plan for when they get down to 24 teams? Double round robin? That might be easier to implement.

Rodry97

I honestly do not know, do not know or the leaders themselves ...

Rodry97

Can you create the under-20 world championship?

xeno

Merconorte cup can be used for U-21 championship as this cup is not in real life any more. In 2.21 beta , it is closed also as it causes game crash because of USA MLS league as Tapani say. Tapani can help to convert it .

i think the number of teams is different, it would be much easier to copy and paste a competition with the same format (2 groups of 4 or 3 groups of 4 starting in 2017)

MERCONORTE has 4 gruops of 4 teams, 16 teams totally which as OK , I think

milo

under 21 championship has 2 groups of 4 in real life and will have 3 groups of 4 in 2017

Fiestita

rodry97 I'm working myself on Argentinian league since a lot of time and so far couldn't change nothing but subs, windows, schedules.

What you can do about Copa Mercosur is raplace it with Concacaf Champions Cup and rename it Copa Sudamericana. Our brazilian fellow Giovanni Santana posted how to do that like 20 pages before. He even got Inter-American Cup to work as Recopa Sudamericana. You can PM me for details in code (I exchanged feedback with Giovanni before to get it done for Arg -he did it for Bra-).

What tapani states is totally understandable. It isn't worth until our league structure is fixed in real life. I would however try to change game to 2013 standards with 20 teams playing Opening-Closing in Primera A, and 20 teams playing 2 leg long tourney in Nacional B. Then again we would have to tell both Tapani and update teams which teams to include in each league. It wouldn't be a mess for 2001 .65 or 2002 .68 databases, but it would for an up to date one.

There's also an issue with wages and lot's of mediocre players rejecting to play in Nacional B. If you lift league's rep to 10 it's fixed. Most mid-end players would agree to join your club like it happens now.

Zé

25-10-15, 11:52 PM

Does anybody know what CALL 0066F4E0 does? I would like to eliminate the possibility that this defines button transparency.

If I look at the below button I cannot see where I could change the transparency. It would normally involve me changing a PUSH 30 to PUSH 2...

Code:

CPU Disasm			~ · ·
Address Hex c	iump	Command	Comments
00454F55 .	68 74E89800	PUSH OFFSET 0098E874	; ASCII "Next Match"
00454F5A .	50	PUSH EAX	
00454F5B .	E8 80A52100	CALL 0066F4E0	
00454F60 .	83C4 08	ADD ESP,8	
00454F63 .	8D8C24 940500) LEA ECX, [LOCAL.1370]	
00454F6A .	BF 03000000	MOV EDI, 3	
00454F6F .	89B424 880500) MOV DWORD PTR SS:[LOCAL.1373],ESI	

MarcoVanBast

26-10-15, 10:39 AM

what mov ecx coomdnd means?

e.g

MOV ECX,873F90

Tapani

26-10-15, 01:49 PM

Quote: Originally Posted by **Zé** Does anybody know what CALL 0066F4E0 does?

It's sprintf.

Quote:

Originally Posted by **MarcoVanBast** what mov ecx coomdnd means?

Code:

mov ecx, x

sets the value in ECX register to x.

Just a curiosity: for small values of x (-128 to 127) it is often better to do a

Code:

push x pop ecx

to save space. The latter is 3 bytes, the mov would be 5.

djole2mcloud

Tapani,can u tell what is the cpp 1583 error?I get it when i insert non players to DB vi JL tool...it doesen't crash the game,but it is annoying... thanks

MarcoVanBast

And what diference between PUSH 6DC5A0 CALL 6DC5A0

magpiemadman

What is the Offsets for changing the amount of teams in the Conference and Northern/Southern/Isthmian leagues? thank you :)

And1

Not sure when this problem happened for me, but anyone know how to make this work? There's an error because it's only 7 national teams and 1 club team for some reason in the Confederations cup.

v3.9.68T fifa_confed..cpp 881

saturn

Some more golden goal removals: 0088D001 MOV EBP,83 -> 3 0088D210 MOV EBP,83 -> 3 Swedish Cup

008FC75D MOV EBP,83 -> 3 Turkish Cup

Patch form: Code:

> 0x48d002 0x83 0x3 0x48d211 0x83 0x3 0x4fc75e 0x83 0x3

27-10-15, 02:04 PM

26-10-15, 10:21 PM

29-10-15, 03:16 PM

30-10-15, 04:26 PM

02-11-15, 10:05 PM

I think that's all the golden goals removed from domestic/continental/international cup competitions. If any other instances of it exist it will be in places like league promotion/relegation playoffs.

(The main golden goal removal post is here in case anyone missed it.)

saturn

007DF766 PUSH 0E -> 0

Suspensions in Ireland take effect immediately instead of after 14 days. (Thanks to Golly for finding something similar for England.)

And1

Had a look in the Flex 2, but couldn't disable the Swedish Cup. Is it possible to disable that without the game crashing? I mean regarding European places and such. The reason I want it gone is that it's too many games in it and a out of date system.

giovanisantana29

How to do the World Club Cup with 9 teams, 3 in each group, sorting the 6 continental champions + the last WCC champion + 2 representants of host country.

00929AA9 PUSH 0B1 00929AAE MOV WORD PTR DS:[ESI+3E],3

00929F61 PUSH 3 0092A06D PUSH 3

With this the WCC will already have 3 teams per group, but will show an error related with finances that I don't know exactly what it is. Aparently the error don't affect the game in nothing, but I managed a way to fix this:

0092A419 to 0092A692 > fill with NOP.

Now we need to adjust the participants:

Spoiler! Show

With this the participants teams will be exactly as I described in start: the 6 continental champions + the last WCC champion + 2 representants of host country.

Now I'll show an improvement (I believe that is an improvement) in host countries of WCC. Originally the WCC occurs in first edition in a predetermined country (originally is Spain) and in the following years occurs in nations like Brazil, Russia, Portugal, Germany etc. Well, if we do this. 005FAC7E MOV ECX,-1

005FAC83 NOP

The WCC only will occur in the predetermined country. Every year. We can change this predetermined country to Japan (005FA36C MOV EAX,DWORD PTR DS:[9CF36C], that is the most "traditional" host country of WCC. But we can do a most interesting thing...

We can use the host countries offsets of Inter-American Cup that are completly useless one time that the Inter-American is a 2 legs competition. These offsets have 6 predetermined host countries, that we can put nations like Japan, Morocco and UAE that is coutries that normally hosted the WCC.

Spoiler! Show

Kowalinho

Anyone have offset for resoultions? I want to play this http://www.champman0102.co.uk/showth...786#post265786 but using tapani patch to change crash the game.

Dermotron

It's crashing cos you are applying the 2.21.1 patch to an exe that has 2.21 patch already applied. Just don't apply the 2.21.1 patch

Kowalinho

Hello you all smart programmers out there, I want to try and mess with the original (untapanified) regens a bit. More specificly: In original game the regens have, Im guessing, 2 possibilities for having attributes assigned to them:

In original game the regens have, Im guessing, 2 possibilities for having attributes assigned to them: a) they inherit all (most?) attributes from their parent b) they get most attributes assigned randomly (exp. bravery, balance, flair and maybe smth else that they always inherit) Making a wild guess here, there should be an offset somewhere that sets the propability of either event A or B happening.

Question: Is it possible to change this propability by editing the .exe file with ollydbg? What is the offset value?

Coys

30-12-15, 06:33 PM

Tapani in patch 2.17 you made this change:

Youth player development has been tuned, instead of blooming pretty much instantly, now youngsters can take years to develop.

Is there a code for this? is it simple to change back to normal? I'm guessing you've kept the youth development speed pretty much the same even in your latest patch?

love your patches but i like players blooming and having OTT att's even at a young age.

Tapani

The difference between the original and the new one is a matter of months.

In the original game, a regen will boom and bloom in only a few months (say 3 months). So you know very quickly if that 16-year old you got is going to be anything. With the update.. it might take 6 months or so before they start showing signs of stardom.

53943b - 53945d resets anticipation, positioning and decisions.

Some attributes are just completely re-randomized (usually in a crude way), and some are based on the previous values (also in a crude way).

uhh ohh, Im trying to make sense of these offsets, but apparently, being able to write a couple of macros in excel does not make me a programmer. I surrender. : yield:

but let me see if I understood a couple of things correct:

Anticipation, positioning and decisions are either ALL reset, or ALL inherited from the parent? But this does not influence what happens to other attributes?

And how the hell do you make sense of that stuff?:)

I'm assuming this refers to the Irish suspensions? Never considered the effect it would have on appeals.

I guess you've to decide which one you prefer better: immediate suspensions or the ability to appeal. I might have a look and see if they're both implementable at the same time.

Pasquale

Someone can tell me where to change the fixture/round of Irish Premier Division and First Division?

Fods

thank you very much , do not install the patch me :(

http://oi66.tinypic.com/seq6vl.jpg

Fiestita

It could be either run it as administrator or check for cm0102.exe is running.

In spanish: fijate si no funciona al correrlo como administrador. También puede ser que tengas abierto el cm0102.exe al correr flex. Tenes que cerrarlo.

milo

An unlikely hero. Much appreciated!

Alan

Weird thing is, this will change in the game settings menu, but still show $\$ on the player value screen. Add also the below line to the patch text file:

0x58b3fc 0x24 0xA3

This will change the US\$ also to \pounds , and then the \pounds sign will show up when selecting Aus\$. No idea why but it works.

How did you go about finding the offset? I would love to know how you located it.

Also thank you providing the offsets in Flex format.

Alan

They are in this thread somewhere (or another thread perhaps). I saved them to a text file a few months ago

Jesus

CHANGE AUS\$ SYMBOL TO GBP£ SYMBOL

0x58B474 0x41 0xA3 0x58B475 0x75 0x0 0x58B476 0x73 0x0 0x58B477 0x24 0x0 0x58b3fc 0x24 0xA3

saturn

Here is an explanation for the offsets which exist in all fixture blocks for cup competitions. A lot of these were found by Golly but I've expanded on a few on a few of them.

Code:

MOV WORD PTR DS:[***+7],xxx	Round name
MOV WORD PTR DS: [***+9], xxx	Round number
MOV WORD PTR DS: [***+B], XXX	Round draw type
MOV WORD PTR DS: [***+D], xxx	Game 1 tiebreak
MOV BYTE PTR DS: [***+17], xxx	?
MOV WORD PTR DS: [***+18], xxx	Total teams in round
MOV WORD PTR DS: [***+1A], xxx	Ties
MOV WORD PTR DS: [***+1C], xxx	New teams entering round
MOV WORD PTR DS:[***+F], xxx	Game 2 tiebreak
MOV WORD PTR DS: [***+11], xxx	Game 3 tiebreak
MOV WORD PTR DS:[***+1E],xxx	Total teams already entered into cup
MOV BYTE PTR DS:[***+20],xxx	Replays
MOV BYTE PTR DS:[***+21],xxx	Legs
MOV BYTE PTR DS:[***+22],xxx	Days between legs or replays
MOV DWORD PTR DS:[***+5C],xxx	Prize money for reaching round
MOV DWORD PTR DS:[***+60],xxx	Prize money for winning this round
MOV DWORD PTR DS:[***+64],xxx	Prize money for losing this round

The offsets mightn't be written in this order in the code (especially after the first block), but they will all follow the same order (the offset with the lowest *** + x figure will be the Round name, the second lowest *** + x will be the Round number etc).

Now to explain each a bit further.

MOV WORD PTR DS:[***+7],xxx - Round name

The name of that cup competition's round, eg Qualifying Round, Second Round, Semi Final etc. A full list of available names can be located at 004B4919, but some of the main ones are below.

Spoiler! Show

07-04-16, 08:07 PM

10-04-16, 11:38 AM

12-04-16, 09:50 PM

These are easily changed. For instance we can give the English FA Cup Quarter Final round its older title by editing: 0056F8CD - MOV WORD PTR DS:[ESI+277],78 -> 3C

Spoiler! Show

Furthermore, we can create new round names by editing some unused ones that exist in the exe. At 004B627E we have the Interior Zone, a Round name used in Argentina from previous editions. The actual name Interior Zone is stored at 009A68C4, so by editing the ASCII here we can create...

Spoiler! Show

Codor

...through renaming the round and changing 0092C95D - MOV WORD PTR DS:[ESI+7],14 -> 436.

Somtimes, the game will use an additional name to prefix all the Round names. These can be located at the beginning of the cup fixtures block, and are alongside the offset that determines the number of rounds in the competition. For example, in the English First Division's cup fixtures (the playoffs), we can find:

00572A34	PUSH 0D0	; 208 (2*104)	
00572A39	MOV WORD PTR DS:[EAX],2	; Rounds	
00572A3E	MOV WORD PTR DS:[ECX],0A0	; Playoff	

These will be used alongside the Round name offsets at 00572AE5 - MOV WORD PTR DS:[ESI+7],82 and 00572B6E - MOV WORD PTR DS: [ESI+6F],96 to create the full Round names: Playoff Semi Final and Playoff Final.

The prefixed Round names are also located at 004B4919, a few of the most used ones are below:

Spoiler! Show

They are often used for league offsets too.

MOV WORD PTR DS:[***+9],xxx - Round Number

Simply the Round number of the competition. The number of rounds will be set at the beginning of the cup's fixture block, as mentioned above. The rounds progress in a chronological order as expected, apart from the Third Place Playoff which comes after the Final.

MOV WORD PTR DS:[***+B],xxx - Round draw type

Sets whether the draw for this round of the competition is completely open or not. Most rounds are open, ie a fully random draw where anyone can draw anyone. Others are seeded (European club competitions), while others are biased towards lower division teams (lower division teams will not be drawn away to higher division teams). These are roughly what the values here mean:

Code:

- 1 = Team from lower/equivalent division hosts
 3 = Team from lower/equivalent division hosts
- 4 = Seeded teams
- 8 = Higher placed league position hosts

There are probably differences between 1 and 3.

A list of competitions that use non-open draws (probably incomplete):

Spoiler! Show

MOV WORD PTR DS:[***+D],xxx - Game 1 tiebreak

This sets the tiebreak for games with one leg or no replays. The values are:

- 0 No tiebreaker, means that there is a second leg or replay set in an offset further down.
- 1 Penalties after 90 minutes
- 2 Extra-time (with no penalties usually means it will go to a replay AET if scores are still level).
- 3 Extra-time & penalties.
- 4 ? (Only in Copa Libertadores and Copa Mercosur might be why it goes straight to penalties in second leg)
- 83 Golden goal extra-time & penalties

MOV WORD PTR DS:[***+F],xxx - Game 2 tiebreak This sets the tiebreak for games with two legs or replays. The values are:

- 0 No tiebreaker, means that there is a second replay or a decider.
- 1 Penalties after 90 minutes of the second leg if scores and away goals are level (no extra-time used).

Penalties after 90 minutes of the second leg if scores are level (no away goals or extra-time used - Copa Libertadores and Copa Mercosur only). 3 - Away goals, extra-time and penalties.

7 - Extra-time and penalties used (no away goals)

83 - Away goals, golden goal extra-time and penalties.

MOV WORD PTR DS: [***+11], xxx - Game 3 tiebreak

This sets the tiebreak for games undecided after two legs or a replay. This offset will usually not be present as only two competitions actually use it - the English FA Trophy and the Copa Mercosur Final.

3 - Extra-time and penalties used.

For now this only covers actual cup competitions. League playoffs (which the game sees as cups) aren't covered yet, so tiebreakers like US style shootouts or teams winning because of higher league positions aren't included. Generally though the other tiebreakers stay the same from what I've seen.

There are also values within the (true) cup offsets that I don't understand yet. For example the Italian Super Cup has a +D value of 0302. The 03 bit is extra-time and penalties, but I don't know what the 02 part (+E essentially) is. I've seen values of 00-04 for +E.

MOV BYTE PTR DS:[***+17],xxx - ?

I don't know what this refers to. Its value can change within competitions from round to round, but I've noticed that it's always 0A for international competitions

MOV WORD PTR DS:[***+18],xxx - Total teams in round Self-explanatory

Number of ties (xxx vs xxx) in the round.

MOV WORD PTR DS:[***+1C],xxx - New teams entering round

Teams that are entering the competition without playing in a previous round, eg Premier League & First Division teams entering the FA Cup Third Round.

MOV WORD PTR DS:[***+1E],xxx - Total teams already entered into cup

I struggled to put a label on this offset but this is the closest I can think of. It's only a non-zero figure if new teams are entered into the current round, in which case the value given is the [New teams entering round] figure from the previous round. The next round the value is the [New teams entering round] figure from the previous round. The next round the value is the [New teams entering round] figure from the previous round. The next round the value is the [New teams entering round] figure from the previous round. This goes on until no new teams are entered into the cup, in which case the value given is simply the [Total teams already entered into cup] figure from the previous round. After that the value reverts to zero again. ...I wouldn't dwell too much on this.

MOV BYTE PTR DS:[***+20],xxx - Replays

Sets the number of replays.

MOV BYTE PTR DS:[***+21],xxx - Legs Sets whether a tie is one leg or two.

MOV BYTE PTR DS: [***+22], xxx - Days between legs or replays Self explanatory.

MOV DWORD PTR DS:[***+5C],xxx - Prize money for reaching round

Self-explanatory.

MOV DWORD PTR DS:[***+60],xxx - Prize money for winning this round

Self-explanatory for the most part. Sometimes this will be -1, which means the value will be a percentage of a prize pool set elsewhere in the competition's offsets.

MOV DWORD PTR DS:[***+64],xxx - Prize money for losing this round

Self-explanatory. Further information on competitions' prize money figures can be found here.

bine ye

Excellent work here. Just a question, under Round Draw Type, is there a number which determines if it is a group or knock out, or is this handled elsewhere?

saturn

I think it will be a knockout round always, as group stage rounds use league style fixtures code rather than cup style fixtures code. I don't know how group stage draws are done actually - good question!

Johngall

Hi guys,

Does anyone have the offsets for changing number of teams in Italian serie a from 18 to 20 and also French ligue 1 from 18 to 20? Thanks

Fods

Take a look here for Italy:

http://champman0102.co.uk/showthread...509#post250509

Cant find anything on France

saturn

The following determines which kind of description will be given to a club's training ground:

Spoiler! Show

Which basically translates into:

Code:

Top facilities plus youth academy
Good facilitiesClub's training facilities = 16-20
(Club's reputation / Club's training facilities) = 0-400
(Club's reputation / Club's training facilities) = 401-600
(Club's reputation / Club's training facilities) = 601-800
(Club's reputation / Club's training facilities) = 801-1,000
(Club's reputation / Club's training facilities) = 1,001+

Prob changing Aus\$ to € would be more realistic in terms of transfer values

Alan	05-05-16, 09:38 AM

Hi people...

Has anyone identified how to activate suspensions in England to start immediately rather than the 14 day delay? I've had a search through the forum but not found an answer, only an explanation as to why bans do not start instantly. TIA

Do you use Tapani's newest patch mate cos the suspensions on there in England are in line with today's rulings and happen immediately?

My only gripe with them is if you appeal and are successful they only take 1 game off of a 3 game ban, if you're innocent then surely the ban should be overturned completely.

Craig Forrest

That happens in the vanilla game too.... sometimes they drop a game, sometimes they overturn the entire suspension

fairedinkum

I recall in the original database they used to overturn the ban completely, I'm sure the word 'repeal' was used or something along them lines.

Craig Forrest

They do sometimes, other times they simply reduce it.... I only play vanilla.... I get far more reductions than complete revocations

Saturn,do u know how certain international club comps select teams? For example OFC champions league. There are references for 4 countries(australia,new zealand,tahiti and fiji and also for australian league and for oceania-continent),but for other four nations there are no straight references. I talk to other members about this,and they told me that game than picks clubs according to region and actual region (id 10 and id 18) I looked through code and there are dozens of offsets containing 10 and 18...(EDX,EAX commands) Any help is more then welcome.

totallyaddicted

Sorry, I don't understand the cup drawing process mode yet. I had a brief look at the OFC code and it seems even more complicated than normal cups (probably to be expected as it's a continental one). The only help I can offer is to look for [...+75],12 / [...+76],0A somewhere in the code for those region / actual region offsets.

Tapani probably disabled it for a reason on his 3.xx patches. There are too many changes on those patches for me to go searching for the cause I'm afraid.

saturn

I've tried it on both the .68 and 2.21.1 exes and it works for me. You're just renaming the Oceanic part in continent.dat, right?

djole2mcloud

yes,onlz that...but this is far as i can go...after that...game crashes...

Quote:

saturn

I don't know then. What new name are you giving it?

djole2mcloud

i'v tried various... Balkan, South European...etc..

saturn

I've no idea then, sorry.

djole2mcloud

just an idea...can it be due to 64 bit OS?

Quote:

Originally Posted by saturn 🔊 I've no idea then, sorry.

saturn

I don't know, perhaps. I'm guessing your trying to edit the continental.dat to play with an exe with some league swaps going on? Probably there's some issue there.

Try renaming on just a normal .68 / 2.21.1 exe - if that doesn't work it could be something OS related.

djole2mcloud

tried on normal update april 2016...same thing will try on xp to see if this is OS related

fairedinkum

Need a little help hopefully please. I want to turn off the English League Cup using the Big On/Off Switch but I know this will affect the Europa League because of the place that winning it gets you, has anyone got any what offsets I'd have to play around with (and how) so that the Europa League place goes to the next place down in the English Premier League instead?

Fods

Hey dink, try turning off the cup and run the game, see what happens. It might be clever enough to realize and pick the next in line anyway...?

fairedinkum

Quote:

You know what that's not a bad idea, I'll give it a go now and see what happens.

fairedinkum

That's that idea gone, English League Cup is not listed on the Big On/Off.

Fods

Maybe JL knew if it was turned off it would cause issues.

Hopefully someone can help with the offsets :ok:

No probs, I'll give it a go tonight mate.

saturn

26-05-16, 09:10 PM

A while back there was a thread about how the two Greek divisions have 16 teams in the editor, but only 14 in the exe. This means that four teams are cut adrift in the game, the last two alphabetically in each division (I'll use the .68 DB): Patraikos [GNB], Proodeftiki [GNA], Serres [GNB] and Xanthi [GNA].

Spoiler! Show

In the exe, a piece of code exists in setup.cpp that looks like this:

Code:

0082839A |. A1 1CF39C00 |. 8B15 A823AE00 |. 83C4 08 0082839F 008283A5 008283A8 |. 8D0CC0 008283AB |. C1E1 04 |. 03C8 |. 8A844A 1C010000 |. 84C0 008283AE 008283B0 008283B7 . 74 1E . A1 6CF89C00 00828389 008283BB

MOV EAX, DWORD PTR DS:[9CF31C] - GREECE MOV EDX, DWORD PTR DS:[AE23A8] ADD ESP,8 LEA ECX, DWORD PTR DS:[EAX+EAX*8] SHL ECX,4 ADD ECX,EAX MOV AL, BYTE PTR DS:[EDX+ECX*2+11C] TEST AL,AL JE SHORT cm0102.008283D9 MOV EAX, DWORD PTR DS:[9CF86C] - GREEK PREMIER DIVISION 26-05-16, 03:20 PM

26-05-16, 02:34 PM

26-05-16, 03:27 PM

26-05-16, 03:40 PM

008283C0	. 6A 0E
008283C2	. 50
008283C3	. E8 58150100
008283C8	. 8B0D 70F89C00
008283CE	. 6A 0E
008283D0	. 51
008283D1	. E8 4A150100
008283D6	. 83C4 10
008283D9	> E8 92C5D1FF

If we change 008283B9 JE SHORT cm0102.008283D9 to a JMP, the game will now load with the four clubs attached to their respective leagues. So the exe is now loading from the database the correct number of teams, as it always does.

Spoiler! Show

Unfortunately the code for the Greek competitions in the exe still only expects there to be 14 teams in each division, so the game again only leaves out the same four teams. Let's change that.

GNA # teams: 005EAD6B PUSH 33A -> 3B0 (826 {14*59} -> 944 {16*59}) 005EAD72 MOV WORD PTR DS:[ESI+3E],0E -> 10 (14 -> 16) Simply changing the number of teams.

GNA fixtures:

005EA705 PUSH 69A -> 79E (1690 {26*65} -> 1950 {30*65}) 005EA70A MOV WORD PTR DS:[EAX],1A -> 1E (26 -> 30) Simply changing the number of fixtures.

005EA755 MOV AX, WORD PTR DS:[EDI+40] -> JMP 005EB5F4 (after NOPing both lines) 005EA759 PUSH 0

There's no room to add four extra rounds of fixtures in the exe, so instead we JMP to the GNB's fixture block. That was still coded to have 30 fixtures despite only having 14 teams. I believe zozoa discovered this method and I'm not fully sure if you can do this for any fixture block, but it works here.

GNB # teams:

005EBCBB PUSH 33A -> **3B0** (826 {14*59} -> 944 {16*59}) 005EBCC2 MOV WORD PTR DS:[ESI+3E],0E -> **10** (14 -> 16) Simply changing the number of teams.

GNB fixtures: 005EB5A5 PUSH 79E 005EB5AA MOV WORD PTR DS:[EAX],1E As mentioned above, no need to change the fixtures as there's already 30.

Greek Cup:

005E9B86 CMP EAX,10 -> OC (16 -> 12)

Lastly, we need to adjust the Greek Cup numbers to allow the four added teams to enter. The above reduces the number of non-league teams entered. So now 12 non-league teams plus 32 leagues teams make up the 44 team Greek Cup. If we don't adjust this, the last four teams alphabetically in the GNA will not enter the cup.

So, there we have the two leagues restored to 16/16, as the database intended.

Spoiler! Show

26-05-16, 11:45 PM

Saturn, i need one more help with belgium 2nd division after reducing 1st and 2nd to 16 teams... now relegation playoff is little messed up...i see that 16th team from belgiumb 2nd goes to playoff instead direct relegation... i reckon thath 16th team was going to playoff with 18 teams in league...clearly there is code somewhere for it, but i can; locate it... 26-05-16, 09:35 PM

Does anyone get relegated directly from the Second Division? Have you adjusted the direct/playoff relegation spots below? Code: 0041FEEF MOV BYTE PTR DS:[ESI+C0],BL ; Relegation playoff places ; Relegation direct places 0041FEF5 MOV BYTE PTR DS:[ESI+C1],CL 27-05-16, 12:11 AM djole2mcloud 16th and 15th should relegate directly,14th should go to play of... (18th and 17th direct relegation,16th in play off with 18 teams) now 16th club instead of relegating directly goes to play off along with 3rd div clubs...wins playoff and stays in div 2... BL and CL command are related to some number somewhere in code right? Quote: Originally Posted by saturn Does anyone get relegated directly from the Second Division? Code: 0041FEEF MOV BYTE PTR DS:[ESI+C0],BL ; Relegation playoff places 0041FEF5 MOV BYTE PTR DS:[ESI+C1],CL ; Relegation direct places 27-05-16, 12:16 AM saturn Yes sorry, should have included them. BL=1, CL=2. So do two teams (14th and 15th) still get relegated directly - it's just not the right ones? 27-05-16, 12:34 AM djole2mcloud 15th was relegated...14th should go to playoff but it didn,t...16th should directly get relegated but instead goes to playoff and wins it and stayed clear of relegation. and winner of 3rd div A promoted but winner of 3rd div B did not... 27-05-16, 12:42 AM saturn Okay, I'll have a look tomorrow at the code and see if I can find anything. 27-05-16, 12:49 AM djole2mcloud thank you 27-05-16, 03:39 PM djole2mcloud http://s20.postimg.org/yv3siqxod/image.png http://s20.postimg.org/soxqy9ed9/image.png http://s20.postimg.org/tfv2hs64d/image.png http://s20.postimg.org/tv6cass1p/image.png http://s20.postimg.org/wnzjutse5/image.png here u can see that last team that should be directly relegated enters playoff...and team that should enter playoff does not...

saturn

27-05-16, 10:25 PM

Sorry, I can't see anything in the Belgian code relating to cup draws for the playoffs. No idea why the above happens, you'd expect a crash to be more likely than that. My guess is the code for all the +BE/BF/CO/C1 offsets is somewhere in the cup.cpp part of the code, which is huge.

About the Oceania Champions League team selection, at 007983CF and 007983F2 there's two calls up to blocks of code that contain the minor Oceanic nations. Those blocks are also called for the OFC Nations Cup (at 00799F12 and 00799F52) so any changes you make to one competition's participants will affect the other.

no worry...i just find a solution that suits...left 2nd with 18 teams and all is fine with playioffs

Quote:

28-05-16, 10:23 AM

I turned off the English Leagie Cup and got through a couple of seasons and all is good, I assume the coding automatically picks the next team down in the Premier League and they go into the Europa League the following season. Cheers for the help as well, much appreciated.

saturn

28-05-16, 01:38 PM

005448A4 TEST BYTE PTR DS:[EDX+11C],2 -> 0 005448AB JE SHORT 005448B2 -> JNZ

Clubs in background leagues will now hire new managers.

From some minimal testing it seems like you'll have to change a league to Foreground if you want a job in that league yourself. Another side effect is that the Select Team screen, which you see when you add a new manager, will show all available league clubs when you're choosing your team. There's a limit to the number of clubs the game can show (see below), but you can get to your desired club easily enough by clicking on the abbreviations to get to the league they're in.

Spoiler! Show

There could be other side effects too, overall I've done very little testing on this so far.

Hi guys, appreciate your help so far.

Is there any way to increase the south Korean league to 20 teams?

totallyaddicted

Also im really confused ive been messing around with the following offsets to try and reactivate the concacaf champions league but it keeps crashing the game, what am i doing wrong? thanks for your help.

Reactivating the CONCACAF competitions, that are disabled when you using CMPatcher 2.19:

00831719 JMP 008318C2 > MOV AX, WORD PTR DS:[DD6ECA]

North American club competitions:

29-05-16, 06:12 PM

29-05-16, 05:13 PM

thanks for the ofc info... and big thanks for all the help!

totallyaddicted

30-05-16, 08:54 PM

Thanks for all your help so far, so here's a question as I'm unable to re activate the concacaf champions league how would I get the winner of the USA league to qualify for the copa libertadores and the runners up of the USA league qualify for the merconorte cup?

00831802 00831856

I don't know the reason but changing compatibility mode to windows xp will solve your crash. I solved it like this.

totallyaddicted

No it won't because It won't let me input DD6ECA it says unknown identifier on olly

saturn

Enter 0DD6ECA. If you see Unknown Identifier after attempting to enter something in Olly, it means you need to put a 0 before that entry (which will usually begin with a letter).

31-05-16, 10:25 AM

At 007A09E0 there is a block of code which stores all the entrants for the 2000 Olympic Games (left over from a previous version of CM). The following .patch changes it so that the correct nations enter the 2016 version. Code

Code:		
0x3a09f4	Ovd0	0xe0
0x3a0a4e	0x24	
0x3a0a4f	0xf2	
0x3a0a41 0x3a0a72	0x60	0x80
0x3a0a72	0xf3	0x60 0xf4
0x3a0a96	0x0 (
0x3a0a90	0xf4	0xf2
0x3a0abb	0x3c	
0x3a0abc	0xf3	0xf2
0x3a0adf	0xf8	
0x3a0ae0	0xf4	
0x3a0b04	0xb8	
0x3a0b05	0xf2	0xf4
0x3a0b28	0x7c	
0x3a0b20	0xf2	
0x3a0b4d	0x80	0xa8
0x3a0b4e	0xf3	0xf4
0x3a0b71	0x80	0x84
0x3a0b96	0x6c	
0x3a0bba	0x60	0x14
0x3a0bbb	0xf2	0xf3
0x3a0bdf	0x70	0xf8
0x3a0be0	0xf4	0xf2
0x3a0c03	0x94	0x8
0x3a0c28	0xd8	0x34
0x3a0c29	0xf3	0xf4
0x3a0c4c	0x84	0x18
0x3a0c4d	0xf4	0xf2
0x3a0c71	0x88	0x3c
0x3a0c72	0xf4	0xf3

Best used with a 2015 start year.

totallyaddicted

Is there anyway to change an offset so that teams like Sparta Prague sack their managers and you can apply for their jobs? I know obviously you can't play the league but it would be good to be able to apply for the vacant jobs. I know u can make them manageable on the game but it would be a good addition to be able to apply for the jobs also. Thanks

totallyaddicted

If anyone ever wants to make the french league to real life eg. 20 teams in Ligue 1 then this is as follows:

open ollv

in the bottom left box click somewhere then hold ctrl + b this opens a box, in the top box type fra_fir scroll up till u see the E and click on it. then hit ctrl + r this shows up all the reference lines for the french first division.

ok so now double click that first line and it bring up all the lines for the french first division.

Now we need to find where it says the number of clubs that play in the french division scroll down until u find this line, if u are more familiar with olly then use ctrl + g and type 005BC2C5 this will take u to the line :005BC2C5 66:C746 3E 1200 MOV WORD PTR DS:[ESI+3E],12

ok so all u need to do here is change the 12 to 14. the 14 means there will be 20 teams in the division. double click where the 12 is and then change the 12 to a 14 and click assemble. this line is now changed.

the next thing we need to find is all the following lines below, this indicates 2015 so what i have done is changed it to 2014 and the league formats change to the right structures so the relegations all work etc.

03-06-16, 07:10 PM

04-06-16, 11:23 AM

005BB6A7 66:817B 40 DF07 CMP WORD PTR DS:[EBX+40],7DF 005BC2BD 66:817E 40 DF07 CMP WORD PTR DS:[ESI+40],7DF 005BC41C 66:817E 40 DF07 CMP WORD PTR DS:[ESI+40],7DF 005BC8AE 66:817B 40 DF07 CMP WORD PTR DS:[EBX+40],7DF

so again all u need to do is click where it says 7DF and change it to 7DE this changes it to 2014. this wont edit the year date the game starts i think its just meaning that its changing the league structure a year earlier as the french league structure changes after the first season on the game,

After u have done all those lines for the french first division you need to do the same with the french second division and third division but you dont need to add any teams to the second div or third div.

so just follow instructions above and search for fra_sec and fra_thir and find the 7DF lines and change them to 7DE.

once you have done all this on olly right click and click copy to executable and click all selections, a new box will appear then right click again and click save to file and overwrite ur exe, u might want to backup first incase u make a mistake.

the next step is crutial, download cm explorer and load the cm index file in the data folder.

u need to find two clubs that are in a lower division and add them to the french first division, then save it.

load the game and u now have 20 teams in ligue 1

please note i have only tried this for 2 seasons holidayed and also works only from 2015 start. it does work 2016 start but there is an error on 25th june 2017 wc_oceania which is i believe a tapani error from the patch fixture pile up, so there is nothing i can do with this unfortunaely.

enjoy.

saturn

04-06-16, 12:05 PM

Good work ta. This is the list of offsets I have for a 20/20/18 structure, pretty much all do what you say above - move the year changes forwards.

1. 005BB6A7 CMP WORD PTR DS:[EBX+40],7D1 -> 7D0 [First Division # of fixtures] 005BC2BD CMP WORD PTR DS:[ESI+40],7D1 -> 7D0 [First Division # of teams] 005BC41C CMP WORD PTR DS:[ESI+40],7D1 -> 7D0 [First Division # of relegation places]

2. 005BF0AA CMP WORD PTR DS:[ESI+40],7D1 -> 7D0 [Second Division # of promotion places]

3. 005BFE65 PUSH 9A6 -> PUSH 8A2 [National # of fixtures] 005BFE6A MOV WORD PTR DS:[EAX],26 -> 22 [National # of fixtures] 005C05DB PUSH 49C -> PUSH 426 [National # of teams] 005C05E2 14 -> 12 [National # of teams] 005C070A CMP WORD PTR DS:[ESI+40],7D1 -> 7D0 [National # of promotion places] NOP four fixture blocks and adjust other fixture blocks' Game #s accordingly *Leave 20 teams in division.

4. 005BC8B4 MOV AL,6 -> 4 (I think, can't remember) [CFA # of promotion places in first season]

5. 005BAB83 7D1 -> 7D0 [French Cup] 005BACE7 7D1 -> 7D0 005BACE5 7D1 -> 7D0 005BC8AE CMP WORD PTR DS:[EBX+40],7D1 -> 7D0

6. 005BD237 7D1 -> 7D0 [French League Cup] *Doesn't seem to work.

7. 005BF6C6 CMP WORD PTR DS:[EDI+40],7D1 -> 7D0 [Super Cup date change] 005BF6D3 PUSH 7D1 -> 7D0 [Super Cup date change]

The problems I still had were:

1. Two National clubs (the last two by Club ID) are in "club purgatory" from the first season.

2. Two First Division clubs (the last two by Club ID) do not enter the League Cup in the first season.

Problems that exist in v3.9.68

3. Two First Divison clubs (the first two by Club ID) enter the French Cup (first season onwards) two rounds earlier (Seventh Round instead of Ninth Round).

4. Two First Divison clubs (the first two by Club ID) enter the League Cup (second season onwards) a round earlier (First Round instead of Second Round).

5. Two Second Division clubs (the first two by Club ID) enter the League Cup (second season onwards) a round earlier (Preliminary Round instead of First Round).

totallyaddicted

thanks mate, my next objective is to increase the teams in the korean league

totallyaddicted

I have managed to change to Korean league from 10 teams to 14 teams I am going to try and add two more teams later to 16 so that I can swap the league with China In my database.

The only thing I haven't been able to do is add a relegation to the league does Anyone know how to do this in Korea?

I will post the offsets how to change the number of teams to the league later for anyone who wants to change Korea.

Dermotron

05-06-16, 12:54 PM

Tapani managed it in one of the test versions of 2.21.1 patch (should be in the Patches area) but it didn't relegate or promote anyone, just had a

05-06-16, 11:38 AM

04-06-16, 01:44 PM

djole2mcloud

that wont work m8..

number of fixtures for korea is 27 right? with 14 teams will be ok if u have two rounds and 26 fixtures,but increasing to 16 require 30 fixtures... u'll get same situation as before,few games will be already played when u start game,and game will crash... i did that with korea many times...i am not sure does korea can use spain 2nd division fixture system... if is so,than u can increase up to 22 teams...

- - Updated - - -

he replied at some framework problem with relegation/promotion...

totallyaddicted

Does that mean I won't be able to make Korean league 16 teams?

I've got 3 rounds of fixtures with 14 teams starting in May finish in may

djole2mcloud

no,it wont work..

that is 39 fixtures in total, and there is 27 scheduled...u must use some other country fixture schedule

totallyaddicted

Ok thanks mate saves me a lot of time

totallyaddicted

If anyone wants to increase the Korean league to 16 teams then I have done the following:

Go to line 0066BBB2 change the 0A to 10 this means 16 teams will play the division.

Two lines above that change it to Push 512

Go to cm explorer and put 6 teams in the Korean league.

I have holidayed two seasons and it's working fine, the only thing I haven't changed is The fixture schedule so they play 45 games per season, on my exe I have changed The Korean league so it plays from June - June so how significant that is to there being A fixture pile up on the original start dates I don't know.

I hope this helps I'm using this league to swap it with China.

saturn

Changing currency values

I was hoping to figure this out in time for the release of 2.21.1+: I didn't, but of course then figured it out the day after releasing all the exes. Just to note I've only tested the following on the IR£, but presume everything should be the same for other currencies.

At 0043F720, and moreso the larger block at 0043F7F0, there are references to all the currencies. The main thing to look for is the AD9CBC value of each:

Code:

 0043F82E
 Argentine
 Peso
 3FF7D70A

 0043F96F
 Australian
 Dollar
 4003EB85

 0043FA9C
 Belgian
 Franc
 405010A3

 0043FB9B
 Brazilian
 Real
 4005D70A

 0043FE06
 Croatian
 Kuna
 40283851

 0043FE06
 Danish
 Krone
 4027C28F

 0043FF33
 Euro (?)
 3FF8CCCC

05-06-16, 07:50 PM

06-06-16, 07:59 AM

06-06-16, 10:46 AM

08-06-16, 10:03 PM

00440060	Finnish Markka	4022F0A3
0044018D	French Franc	4024E666
0044028C	German Deutschmark	4008E147
0044038B	Dutch Guilder	400C147A
004403F6	Greek Drachma	4080B70A
00440517	Irish Pound	3FF40000
00440644	Italian Lira	40A817DC
00440771	?	409DC000
0044089E	Japanese Yen (?)	4063BE14
004409CB	Norwegian Krone	402A28F5
00440AEC	Polish Zloty	401A5C28
00440BEB	Portuguese Escudo	3FD46080
00440D18	Russian Ruble	4044DAE1
00440E45	Spanish Peseta	4070887A
00440F72	Śwedish Krona	40300000
0044109F	?	3FF00000
004411CC	Swiss Franc	4003AE14
004412F9	Turkish Lira	412C7727
004413F8	American Dollar (?)	3FF9EB85

Raising/lowering that value should inflate/deflate the currency's value. The currency I changed was the defunct Irish Pound (IR£), at 00440517: MOV DWORD PTR DS:[AD9CBC],3FF40000. I found that by changing the value to MOV DWORD PTR DS:[AD9CBC],**40000000**, the Irish Pound's value became roughly double that of the game's original British Pound (£) value, which seemed quite accurate to real life. People can continue to inflate/deflate the bolded figure above until they reach a value that satisfies them - I found that sorting by the highest wages in the Player Search screen was the best way to see how much difference a change would make. Adding 1 to the Irish Pound's 3FF4 inflates the figure by about £1.5m Irish Pounds.

After that we just need to alter the 'IR \pounds ' ASCII so that it becomes just a ' \pounds ', as well as changing the 'K.' for thousands to just 'K'. In XVI32, open cm0102.exe and CTRL+G to 58B3F4 (00958B3F4 in Olly) for both and overwrite them. You can also search for (CTRL+F) and change the 'IR \pounds ' in the currency list too if you wish. Check out the renaming tutorial for instructions on how to use XVI32 if it's new to you.

For non \pounds users, it's probably easier to just edit the currency you use directly, rather than adopting a different one like above. This is because the two above use roughly the same values in terms of thousands/millions/billions; you couldn't use the Irish Pound for Turkish Lira because of the differences in how those values are displayed (I think they're the other AD9*** values but I'm not sure).

The .patch of my 40000000 change above (includes IR \pounds/K . --> \pounds/K):

Code:

0x4051f 0xf4 0x0 0x40520 0x3f 0x40 0x58b325 0x2e 0x0 0x58b328 0x49 0xa3 0x58b329 0x52 0x0 0x58b32a 0x20 0x0 0x58b32a 0x0

milo

09-06-16, 09:36 AM

saturn, can you update all the currencies in game to current values? so you could add all of them in your new patch.

i don't think it's a hard work and it has to be done only once in a while.

p.s. what's DFI?

saturn

If they all work in the same manner as the IR£ inflation then yes, it should be possible.

The DFI (not DFI as I had it down as initially - no wonder I couldn't get any results googling it!) is the Dutch Guilder.

005C2180 |. E8 6B830000 CALL cm0102v3.005CA4F0

I don't remember exactly how I did in my tests, but I guess bypassing the call with a jump instruction should do the trick.

fairedinkum

Lovely job, appreciate you getting back to me mate, I'll have a look into it tonight.

giovanisantana29

MOV BYTE PTR DS:[ESI+52],2 This is the code that make a league having fixed squad numbers. You just need to fit it on the block that contains the amount of promotions/relegations of the league (ESI+BE, ESI+C1 etc.).

An example with MLS (that doesn't have fixed squad numbers originally): 00906F71 MOV BYTE PTR DS:[ESI+C1],BL 00906F77 MOV BYTE PTR DS:[ESI+52],AL 00906F7A JMP 0090705D

00907057 JMP 00906F71

Uninstall 2.21.1 patch before making the changes as the offsets are for when it isn't applied. You can re-install it afterwards

So all the offsets in this thread is supposed to be applied before the Tapani patch? I thought they were to be installed second.

Tapani

Usually the order should not matter. Unless my patch modifies the same bytes, it should make no difference. And in case the same bytes are modified whatever you apply last is in effect (there is always a chance for all kinds of problems appearing in this situation - the flex patches might not be 100% compatible with my patches).

00542865 JMP SHORT 0054288C

The first three will enable reserve teams in these countries, the last one will do it in all three with a single instruction. The reserves will only be accessible for team without a B team. Initially I though the only advantage would be a less cluttered squad screen but I eventually saw a fixture between my reserves (Eschborn) and a 2nd string (i.e. not the first team, nor their B team) team of Union Berlin.

This doesn't work for me, not sure what i'm doing wrong ...

saturn

It does work: 0x142865 0x74 0xeb is the Flex code.

New Italian Cup (using the Polish League Cup)

The format is not 100% equal to the current, but very close to it: without group phase, rounds with only one match (except the semifinal) and final played in Stadio Olimpico. Also some dates of Serie C Cup have been changed so as not to conflict.

I tried for a long time make this change without having to substitute another cup, but I could not.

Download: https://www.mediafire.com/?fdgmfhqe469v9hv

By the way: you can turn off the repeat Irish Challenge Cup?

Fods

You can

totallyaddicted

this is an interesting one, is there an offset that would enable you to take control of as many teams as you want? at the moment theres a maximum of 16 teams u can control.

it would be good to be able to take control of say 20 teams (the whole premier league) etc.

Dermotron

Nope, it would involve a coding re-write but we don't have the code (Tapani's answer to similar question)

totallyaddicted	31-08-16, 12:26 PM

ok thanks mate.

can anyone help me, ive just swapped denmark with russia which is successfully done.

I have now successfully made the danish premier league and second division to 14 and 12 teams. (remember this is the russian league)

The only issue i have now is the danish cup doesnt work (russian cup in olly).

ive looked at the number of teams it has participate which is 48 teams. I just need to narrow this down to 40 teams.

how would i do this? thanks

saturn

It's probably easier to keep it at 48 teams but slightly alter where certain teams will enter. The .68 Russian Cup's structure is: Code:

Total teams: [48]

Second Round: [32]

06-09-16, 08:55 PM

18*First Division clubs 14*Non-league clubs

Third Round: [32]

16 Second Round winners 16*Premier Division clubs

Fourth Round: [16]

16 Third Round winners

etc...

I'd suggest changing it to:

Code:

Total teams: [48]

22*Non-league clubs

Third Round: [32]

16 Second Round winners 14*Premier Division clubs 2*First Division clubs

Fourth Round: [16]

16 Third Round winners

etc...

All you'd have to do is change the number of non-league teams that enter. I *think* the code for that may be at:

Code: 007E9B74 PUSH 0E 007E9C73 CMP EDX,0E

Changing 0E (14) to 16 (22) might work.

If you really wanted 40 teams you'd have to do something similar to this, which is a bit trickier.

saturn

The odd time I play the Korean league, I'm always surprised at how low players' values are, given that the league is professional and of a decent reputation and standard. Similarly, it's quite easy to buy even the very best player - just bid 100k over his value and the AI will usually accept.

In contract_manager.cpp there are two pieces of code that reference South Korea:

Code:

004D1523	. A1 84F49C00	MOV EAX,DWORD PTR DS:[9CF484]- SOUTH_KOREA	
004D1528	. 3BD0	CMP EDX,EAX	
004D152A	. 75 6A	JNZ SHORT cm0102.004D1596	
004D41F3	. 8B15 84F49C00	MOV EDX,DWORD PTR DS:[9CF484]- SOUTH_KOREA	
004D41F9	. 3BC2	CMP EAX,EDX	
004D41FB	. 75 2D	JNZ SHORT cm0102.004D422A	

Change those JNZs to JMPs and you get a league that has players priced at a more realistic value. I think the first refers to the players' values, and the second makes AI clubs get better prices for their players.

For example, the most expensive players from .68 South Korea unpatched: http://i.imgur.com/H5fGz8p.png And patched: http://i.imgur.com/knmFZjC.png No other data etc has been touched, just those two JMPs.

Dermotron

07-09-16, 08:55 AM

08-09-16, 02:55 PM

Nice work Saturn.

Interestingly it was Korea where we made the breakthrough to determine our own wage / WR tables to prevent 1000's of clubs going broke. A player value going from 2.4m to 2.9m wasn't hugely noticeable, but a player going from 300k to 400k had huge changes in terms of a players status at a club.

totallyaddicted

thanks very much for the help saturn. done that now.

Ive got another issue that im trying to sort out.

Ive made the korean league 20 teams and managed to get it down to just 1 round, with 19 fixtures per season.

however im now having another issue which is the korean league cup....

i want to make it 2 groups with 10 teams in each group.....

any knowledge on how to do this? ive tried numerous things and ended up with 10 teams in 1 group and still just 5 in the other. thanks

08-09-16, 07:39 PM saturn Pasquale found some useful offsets a while back here for the Korean League Cup. 0066C77E MOV WORD PTR DS:[ESI+3E],5 (Group A) 0066CC7F PUSH 5 (Group B) 0066CF30 MOV DWORD PTR DS:[ESI+F2],0A (Numb of club) Additionally... 0066C898 MOV WORD PTR DS:[ESI+3C],CX (Group A) 0066CC7C PUSH 2 (Group B) ... are the number of times teams play each other. To fit the number of fixtures available, I'd recommend setting those values to 1. faz44 12-09-16, 02:08 AM Guys, I'm looking back at posts 452 and 453, I league swapped Denmark and the United States but it keeps putting Danish teams into Champions Cup and only puts Danish teams into the Merconorte Cup. Is there a list of hexidecimal codes for competition winners etc to replace these? 12-09-16, 02:01 PM guidocimm I'd like to achieve a retro 1970-71 season update. In Italy Serie A consisted of 16 teams: some time ago I tried to make this change, but the game was immediately crash. Any suggestions or help? 12-09-16, 02:28 PM Craig Forrest Quote: Originally Posted by faz44 题 Guys, I'm looking back at posts 452 and 453, I league swapped Denmark and the United States but it keeps putting Danish teams into Champions Cup and only puts Danish teams into the Merconorte Cup. Is there a list of hexidecimal codes for competition winners etc to replace these? This thread lists the 9CF*** values for nations and competitions. If you are swapping Denmark with USA, then you need to make sure the 9CF values for USA, MLS, and the US Open Cup are replaced by Denmark, the Danish Premier League, and the Danish Cup.

v130916

In all my save game (original game), Confederations Cup always stop at 2007 or 2009, any offset to fix it? (or it's just my game problem?)

And1

Any chance to disable Swedish Cup? It's out of date since many years so I prefer it disabled rather than having it in this old format. Thanks.

Fods

Has it not been changed in the latest patch?

Kowalinho

I asked this some time ago but maybe there was some advancements in offets. Is there offset for swapping qualification to Europe League from national cup to league cup or how to find it? For example in northern ireland. It would be awesome to me to create some small countries leagues which dont have more than 15 clubs. Thanks for any help and not hating because its northern ireland again ;)

is there any way to make winners of europa league play in next seasons champions league?

also ive made an australian cup with the northern irish league cup, how can i transfer this to the australian competition page? thanks

Pasquale

You tell me how to make the annual FIFA Club World Championship?

totallyaddicted

hi saturn

i have managed to get group a 10 teams but changing this to 0A does not work and group b continues with 5 teams.

0066CC7F PUSH 5 (Group B)

what should i input to make group b have 10 teams? thanks

saturn

I've never tried it so I don't know, I just had the offset noted down. Perhaps try asking Pasquale as he found it.

The offset +2C is located at the beginning of every competition's first block of code. It refers to how many stages (I use the term loosely) a competition has. The game considers a lot of things to be stages: a league season can be a stage, knockout rounds in a cup can be a stage, playoffs are a stage, group rounds in cup competitions are considered stages (each group being its own separate stage). Each competition will obviously have at least one stage of some sort, so you can consider the value '0' to really mean one stage. I'll give a few examples to illustrate it better.

Spoiler!	Show	

So what use does this have? A pretty big one: it allows us to remove playoffs in leagues. If we choose a league at random, ooooh let's say the Northern Ireland First Division, we can remove the playoffs by simply changing the value at 0078B07D - MOV DWORD PTR DS:[ESI+2C],1 --> 0 (the league table offsets for both divisions will need to be edited too, but that's just for appearance). Leagues with outdated and convoluted playoffs can hopefully be changed similarly.

No, unfortunately, I don't think it can. With Phase 2 in the middle of the competition's stages it can't be removed by this method.

Not really. Changing the +2C offset would be the first step in creating new playoffs, but you'd also need to write a huge amount of extra code (and fit it in somwhere).

07-11-16, 09:28 AM

08-11-16, 08:32 PM

07-11-16, 10:43 AM

Disabling Japanese league games' extra-time: 00663644 MOV WORD PTR DS:[ESI+AB],82 --> 0 (J1) 00665162 MOV WORD PTR DS:[ESI+AB],82 --> 0 (J2)

For the relegation places, Tapani wrote a lot of new code to implement them. I don't know where in 2.21.1 that new code is.

There is no equivalent code for other leagues. At a guess, I'd say this was added because of the rushed nature of adding South SI patches. The player values were probably wrong, so rather than changing thousands of player ratings in the data they just a instead.	
Pasquale	09-11-16, 11:44 PM
You can view with normal database, a larger number of released players?	
Pacino	21-11-16, 12:40 PM
Any good guy to give me offset for croatian league and cup schedule and format ?	
There should be some changes in next update for Croatia format in CM	
aturn	01-12-16, 11:53 PM
Croatian fixture blocks: First Division: 005140E0 Second Division North: 005155E0 Second Division South: 00516700 Cup: 00517740	
aturn	02-12-16, 12:20 AM
In the exe there is sometimes some code leftover from previous versions of the game. In the 1999/00 season, the Scottish Preview expanded from 10 teams to 12 via a three team playoff. The second last placed Premier Division team and the second and third Division teams played each other once, with the top two (re)gaining entry to the Premier Division for the next season.	
With a bit of editing we can re-enable the playoffs so that they occur every year. Code:	
007EE028 JNE 007EE033> NOP 007EEE26 JNE 007EEE26> NOP 007EEE26 MOV BYTE PTR DS:[ESI+C1],AL> CL 007EEF7C JNE 007EEF87> NOP 007EF106 JE 007EF129> JMP 007EF129 007EF363 MOV BYTE PTR SS:[ESP+18],2> 1 007F2980 JNE 007F29E2> NOP 007F2989 MOV WORD PTR DS:[ESI+3C],4> 3 007F29A1 MOV BYTE PTR DS:[ESI+4C],AL> BL 007F29A7 MOV WORD PTR DS:[ESI+47],0FFFF> 26 007F2A56 JE 007F2A5D> JMP 007F2A5D

Ravanelli

Is there an offset for the number of human managers? I would like to be able to play with more than 16 managers.

Schiavoni

What are the offsets for higher values? Thanks,

garydavis73

I wonder if anyone can help explain how one finds the appropriate offsets? Although all of the ones I want are in this thread, I play 00/01 and the offsets in that are different. Is there an easy way by finding the offset in 0102.exe I can then find same piece of code in 0001.exe without knowing the offset?

Alternatively is there anyone on this forum who could make some changes for me I would be happy to pay you for your time. I just love the 00/01 version but need to bring it up to date with some tweaks to league rules etc.

garydavis73

Want to change Japan league number of subs, number for foreign players, no golden goal. CM00/01 3.89. Anyone help please?

Pasquale

Hello,

How does the game chooses qualified in Asian Champions League? I noticed that the game does not involve the winning of Japan J-League but takes any team. You can change this?

Bhaalspawn

Hi,

I read somewhere in Saturn's post the offsets for reset the 2018 WC south american and european qualifiers. Did anybody knows that offsets?

saturn

For a 2016 start the changes are:

Code:

009182DB	MOV EAX,7D4	>	7E0
00918473	JL 0091847C	>	JMP
0092036D	MOV EAX,7D4	>	7E0
009204B8	JL 009204C1	>	JMP

05-03-17, 05:23 PM

16-03-17, 09:03 AM

Thank you very much :)

saturn

Teams in non-playable leagues never hire managers if their original ones move, retire, are sacked or aren't loaded by the game.

00482CA9 JNZ 00482D04 --> NOP 00482CB6 1F 00482D04 --> NOP

This allows human managers to apply for jobs at all clubs and nations (the "Apply for Job" tab will always be present on the squad screen - even your own!). Applying for a job will prompt that club to appoint a manager as if they were a club in a playable league (they may even offer you the job). If the club already has a manager and you apply, your application will be acknowledged but ultimately nothing will happen.

http://i.imgur.com/5vjbpPH.png

http://i.imgur.com/hftHYqs.png

So players can decide themselves which AI clubs they'd like to have managers, be they Champions League clubs or whatever. Alternatively you can try and "find" suitable clubs for unemployed staff, eg if a Brazilian retires with excellent non-playing stats you could try and get him a job at an unmanaged Brazilian club.

When applying for jobs at very small clubs or countries with not enough players, you'll receive an error message (manager_manager..cpp 12456). Managers won't be appointed for those clubs/nations but the error is harmless beyond that.

markuse

00482CA9 JNZ 00482D04 --> NOP 00482CB6 JE 00482D04 --> NOP

So, it means AI unemployed manager can take control non-playable leagues teams? Or just human manager?

saturn

Both AI unemployed (or employed) managers and human managers can take control, it depends on who the club offers it to. It works just like applying for a job in a playable league.

JL SHORT 0091847C ive got this at 00918473, and when i put JMP it doesnt let me enter it, any ideas?

faz44

Reading back (pages 42 & 43), nobody ever got to the bottom of the Turkish player restriction issue, did they? In the Turkish Second Division, you can play 2 overseas players in the team but you can neither buy nor loan an overseas player. I want the restriction on the matchday but I want to be able to buy players.

lucasdm

There used to be a tool that allowed us to change the foreign player limit in the leagues. Does anyone remember the name:

Dermotron

Flex 2 will allow it. There's a video tutorial on how to use it in Tech Support

saturn

00542819 JE 00542882 --> JMP 00542882

The game no longer loads any international B teams.

http://i.imgur.com/LBqFILX.png

hodgy

Is this fine to manually change ourselves on your latest patch? As in not causing errors.

saturn

Yes, it'll be fine. It will probably only take effect on new save games though.

HossamAllam

Disabling the error displayed when a hard-coded club name is changed

Code:

This disables the error message displayed when a hard-coded club name has been changed; i.e. you can rename Barcelona, Manchester United etc and not get an annoying error message when the game loads.

The official editor still won't let you make the changes so you'll have to use something like Tri Wasono's editor.

05-04-17, 01:45 PM

12-04-17, 08:33 PM

20-04-17, 06:39 PM

12-04-17, 08:44 PM

21-04-17, 10:44 AM

21-04-17, 06:13 PM

06-05-17, 09:34 AM

I have just noticed that editing Barcelona's name has broken the link with Barcelona B, i.e. you can't promote / relegate player between the two. So you might want to bear that in mind before renaming a club.

0x60d780: change from MOV EAX,DWORD PTR SS:[ESP+4] to: JMP 0060D800 (make sure Fill rest with NOPs is ticked, this will insert two lines of NOP).

Disabling the splash screen (untested)

Code:

0x5ccd3c - change JE 005cd0b3 to JMP 005cd0b3 NOP.

Names of continents

Code:

should anyone wish to rename them (.dat files would also need changing):

Africa - 0x5d9458 Asia - 0x5d9450 Europe - 0x5d9448 North America - 0x5d9438 Oceania - 0x5d9430 South America - 0x5d9420

Offsets are literal, add 0x400000 for Olly offsets.

Data directory name offset

Code:

0x9c3824

Not particularly important but it would allow one to run multiple databases without needing to swap data directories.

With the later versions of the Tapani patch there is no requirement for the exe to be called cm0102.exe. So you could have an exe called odb.exe that reads data from a directory call odbdata, an exe called sim.exe that reads data from a directory called simdata etc.

You could also have a different directory for Tapanified data, 3.9.60 data etc etc.

There is limited space available - only 8 bytes (enough for 7 characters and the null termination).

3 lines above each of the lower division names is a JNE instruction; change these to JMP and the lower division selection is removed from the list.

The following lines refer to specific nations (i.e. those that have selectable lower leagues).

00669FE1	1.	8B15 E4F29C00	MOV EDX,DWORD PTR DS:[9CF2E4] = England
0066A012	>	3B0D 14F39C00	CMP ECX,DWORD PIR DS:[9CF314] = Germany
0066A03C	>	3B0D 60F39C00	CMP ECX,DWORD PTR DS:[9CF360] = Italy
0066A062	>	3B0D 34F49C00	CMP ECX,DWORD PIR DS:[9CF434] = Portugal
0066A06A	1.	3B0D 88F49C00	CMP ECX,DWORD PTR DS:[9CF488] = Spain
0066A090	>	3B0D A8F49C00	CMP ECX,DWORD PTR DS:[9CF4A8] = Sweden

Star players also for user's team

Code:

"%s*" @ 0x98e8dc. %s is always replaced at run time by text.

0045B82C: JNE SHORT 0045B89F

Replace this line with NOP NOP.

00482A74: JE 00482D04

Fill with NOP and you can Take Control of a club even if it is in a 'non-playable' league.

How to use the Data directory name offset?

markuse

What is the offset for this feature? (from patch 2.21.1 + v3). Thanks.

Quote:

Squad numbers can now be issued in all leagues

The line MOV BYTE PTR DS:[ESI+52],2 needs to be inserted into a league's code for it to have squad numbers. It's placed amongst the code that controls relegation/promotion/play-off places and other things like points for a win/draw. To create space for the new line of code, some of these lines were combined together. For example, in the code for the MLS...

Code:		
00907044	C686 BE000000 01	MOV BYTE PTR DS:[ESI+BE],1
0090704B	889E BF000000	MOV BYTE PTR DS:[ESI+BF],BL

becomes

C - 1

Code:

00907044 66:C786 BE000000 0100 MOV WORD PTR DS:[ESI+BE],1

The second line combines both the +BE and +BF offsets as you're now using MOV WORD (two bytes) instead of MOV BYTE (one byte). This creates the space for the +52 offset line, which is added in the following line. In the Patches.zip collection from the +v3 thread, you can see the rough locations of where the code has been changed in this manner for various leagues.

Pasquale

Disable national friendly matches?

HossamAllam

i found this on the offsets thread but i want to know how to use it

Data directory name offset

Code: 0x9c3824

Not particularly important but it would allow one to run multiple databases without needing to swap data directories. With the later versions of the Tapani patch there is no requirement for the exe to be called cm0102.exe. So you could have an exe called odb.exe that reads data from a directory call odbdata, an exe called sim.exe that reads data from a directory called simdata etc. You could also have a different directory for Tapanified data, 3.9.60 data etc etc.

There is limited space available - only 8 bytes (enough for 7 characters and the null termination).

section of Credits		

NOP a CALL and that section won't appear in the Game Credits, creating a huge amount of space in the exe for other things. Probably best to leave a CALL to at least one section.

saturn

12-06-17, 10:29 PM

The following will show you how to make a certain nationality not be counted as a foreign player in a foreign league. The piece of code that we'll be using is the one which allows New Zealand players to not count towards the foreign quota in Australia (thanks to Craig Forrest for finding this): Code:

,		
0053DA6E	MOV EDX, DWORD PTR DS: [9CF224] (Australia)	
0053DA74	MOV ESI, DWORD PTR DS: [9CF3F4] (New Zealand	l)
0053DA7A	CMP EAX, EDX	
0053DA7C	JE 0053DA82	
0053DA7E	CMP EAX,ESI	
0053DA80	JNZ 0053DA95	
0053DA82	MOV ECX, DWORD PTR SS: [EBP]	
0053DA85	CMP ECX, EDX	
0053DA87	JE 0053DB2A	
0053DA8D	CMP ECX,ESI	
0053DA8F	JE 0053DB2A	
0053DA95	CMP EAX, DWORD PTR DS: [9CF360] (Italy)	

We'll simply be repeating this block of code, finishing with a Jump to the Italy line, with the 9CF*** values switched for our desired countries. I'm putting the new code in one of the Game Credit blocks, which you can safely NOP a call to:

Code:

00513341 CALL 004EDA90 --> NOP -0053DA6E MOV EDX,DWORD PTR DS:[9CF224] --> JMP 004EDA90

Now we enter the block of code for Australia and New Zealand and our new block after it :

ESI,DWORD	PTR	DS:[9CF3F4]	
EAX,EDX			
)4EDAA4			
EAX,ESI			
04EDAB7			
ECX, DWORD	PTR	SS:[EBP]	
ECX,EDX			
)53DB2A			
ECX,ESI			
)53DB2A			
EDX, DWORD	PTR	DS:[9CF4F8]	(USA)
ESI, DWORD	PTR	DS:[9CF280]	(Canada)
EAX,EDX			
4EDACF			
EAX,ESI			
053DA95			
ECX, DWORD	PTR	SS:[EBP]	
ECX, EDX			
)53DB2A			
ECX,ESI			
)53DB2A			
053DA95			
	SI, DWORD IAX, EDX JAEDAA4 IAX, EDX JAEDAA4 IAX, ESI JO4EDAB7 ICX, EDAB7 ICX, EDX J53DB2A ICX, ESI J53DB2A IDX, DWORD SI, DWORD ICX, EDX J4EDACF IAX, ESI J053DA95 ICX, EDX J53DB2A ICX, ESI J53DB2A	SI, DWORD PTR IAX, EDX VIEDAA4 IAX, ESI VIEDAA7 IAX, ESI VIAEDAB7 ICX, DWORD PTR ICX, EDX IDX, DWORD PTR ICX, ESI IDX, DWORD PTR IAX, ESI VIAEDACF IAX, ESI VICX, ESI VICX, EDX VISJDB2A ICX, EDX VISJDB2A	MEDAA4 MAEDAA4 MAEDAB7 CX, DWORD PTR SS: [EBP] CX, EDX 153DB2A CX, ESI 153DB2A 153DB2A 153DB2A 105, DWORD PTR DS: [9CF4F8] 105, DWORD PTR DS: [9CF4F8] 105, DWORD PTR DS: [9CF4F8] 105, DWORD PTR SS: [9CF4F8] 105, DWORD PTR SS [9CF4F8] 105, DWORD PTR SS [9CF4F8]

Note the two pairs of coloured commands: the jumps must always be to those respective lines. The red line will jump to the EBP line, the pink line to the first 9CF*** line in the next pair of countries. If there is no other pair of countries to follow, that line should jump to 0053DA95 (as it does at 004EDAC9). Here is a another block with three pairings in it: Code:

 004EDA90
 MOV
 EDX, DWORD
 PTR
 DS: [9CF224]

 004EDA96
 MOV
 ESI, DWORD
 PTR
 DS: [9CF3F4]

 004EDA9C
 CMP
 EAX, EDX
 O04EDA9E
 JE
 004EDA9A

 004EDA9C
 JN2
 004EDA9A
 CMP
 EAX, ESI

 004EDAA1
 JN2
 004EDA87
 O04EDAA4

 004EDAA4
 MOV ECX, DWORD PTR
 SS: [EBP]

 004EDAA7
 CMP
 ECX, EDX

004EDAB7 004EDABD 004EDAC3 004EDAC3 004EDAC5 004EDAC7 004EDAC9 004EDACB	CMP ECX,ESI JE 0053DB2A MOV EDX,DWORD MOV ESI,DWORD CMP EAX,EDX JE 004EDACF CMP EAX,ESI JNZ 004EDAE2 NOP NOP NOP			
004EDACF	MOV ECX, DWORD	PTR	SS:[EBP]	
	CMP ECX, EDX			
	JE 0053DB2A CMP ECX,ESI			
	JE 0053DB2A			
	MOV EDX, DWORD	PTR	DS:[9CF4F8]	(USA)
004EDAE8	MOV ESI, DWORD			
004EDAEE	CMP EAX, EDX			
004EDAF0	JE 004EDAFA			
004EDAF2	CMP EAX,ESI			
004EDAF4	JNZ 0053DA95			
004EDAFA	MOV ECX, DWORD	PTR	SS:[EBP]	
004EDAFD				
	JE 0053DB2A			
004EDB05				
	JE 0053DB2A			
004EDB0D	JMP 0053DA95			

The line at 004EDAC9 now jumps to the next pairing. You'll notice that it's four bytes shorter than the original jump (hence the four NOPs beneath it): this is because it's jumping a short distance to the next pairing instead of a long distance all the way back to the Italy line in the original block of code. I find it easier to NOP that line before changing it from a long jump to a short one.

The results:

http://i.imgur.com/2H0oxP8.png Interestingly it only seems to check a player's first nationality: Sequeira is Nicaraguan/Canadian but still counts as a foreigner.

Dermotron

Very nice work. There are a lot of nations like that (think we discussed it in the thread on foreign player rules)

Dermotron

You be able to make Cotonou style changes with the coding above saturn? Like discussed here http://champman0102.co.uk/showthread...406#post221406

Craig Forrest

Holy shit something I found was useful :ok:

EDIT: did you ever implement this http://champman0102.co.uk/showthread...946#post241946

Yes, I've done it for France in the + patches. I would like to do it for Spain too but no joy yet.

Langaro

Good evening, I would like to know the codes of the awards in the Brazilian league, and as I change the value of the TV income, in the code 042A461 - Brazilian First Division TV Money (\pounds) only appears INC EAX.

giovanisantana29

Some interesting things I discovered recently:

Code:

 00874A9A
 JL SHORT 00874AB9 >> JMP SHORT 00874AB9

 00874AA2
 JGE SHORT 00874AB9 >> JMP SHORT 00874AB9

Fill with NOP: 00874ABD, 00874ACA, 00874ACE, 00874CO3, 0087A670 and 0087DE27

And will be possible see "your" attributes in the game and "your" Transfer screen as well, which shows "your" fluent languages for example.

Code:

Fill with NOP: 0087D33D

And will be possible see the Squad Status of the AI players in their Contract screen.

For who don't play the game in the english language a "error Database" appears constantly in the game. Fill with NOP 0053585D to 005358BF will solve this.

Code:

30-06-17, 01:17 AM

03-07-17, 06:53 PM

Doing this will be possible change the Squad Status at any time when you try to sign a player. Explaining better: When we offer a contract to a player, before we offer salary and other things we have to choose their Squad Status. When choosing this cannot be changed for some time (about 2 weeks). With this modification you can change this at any time.

This one I don't know if has already been discovered, but I looked for something similar and I didn't find, so I guess not:

The "Disable Unprotected Contracts" option in CMPatcher disable not only the unprotected contracts rule, but others contracts rules as well like max 5 year contracts and a percentage of transfer value to the player's developer club. Well, if we disable only the unprotected contracts rule without disable the others rules?

In offset 00868307 have a number "2" which refers to the number of years that a contract becomes unprotected (this number is increased by 1 if the player is under 28). So if we change for a unreachable number like 15 (0F) in an .exe with the "Disable Unprotected Contracts" unchecked, the unprotected contracts rule will in practice be disabled since it will be impossible for a player to have more than a 15 years contract. But the other rules (max 5 year contract and % for the developer club) will hold.

Dermotron 04-07-17, 02:13 PM

They are all pretty epic finds Gio :clap:

Mark

Love the idea of seeing squad status for the AI and not being able to change the squad status when discussing contracts has always been a bugbear of mine :ok:

Alan

This is cool. Would be even better (more cheating maybe) if we coul see the players' squad status on the clubs' Contract Info page. Any chance on this?

giovanisantana29

This has already been posted: http://champman0102.co.uk/showthread...131#post336131

totallyaddicted

can the OFC Nations cup be swapped with the Gold cup somehow? so that you have North American teams playing in the competition instead of Oceanic? that way u could move australia to asia no problem and the confederations cup would not crash

Craig Forrest

The Gold Cup doesn't exist in the game the code is there and labelled, but I think it's used for the Copa America instead

totallyaddicted

yeah i know but what i mean is can u swap the 9CF values in the oceania nations cup code in olly to make north american teams qualify for it then change the competition name to gold cup???? if so how lol

Craig Forrest

You'd have to change the 9CF values in the Oceania Cup to those of the NA countries and/or the NA/CA/Caribbean region (and vice versa)... then use the names editor to change the name

You've done enough editing.... I'm sure you can figure it out :ok:

tried it buddy but it crashes when loading the game!

totallyaddicted

hi guys wonder if someone could help me:

recently swapped leagues South Korea to Indian league.....

and im having trouble now with the teams that enter the Asian champions league and the Asian CWC

these are the references for the asian champs league which qualify

0040BCC0 | > A1 84F49C00 MOV EAX, DWORD PTR DS:[9CF484] - S, KOREA

0040BCDE |. A1 00FA9C00 MOV EAX,DWORD PTR DS:[9CFA00]

0040BD0F | > A1 00FA9C00 MOV EAX,DWORD PTR DS:[9CFA00]

and these are the cwc refs:

0040DBDC | > A1 84F49C00 MOV EAX,DWORD PTR DS:[9CF484] - south korea 0040DBFE |. A1 04FA9C00 MOV EAX,DWORD PTR DS:[9CFA04] 0040DC3F | > A1 04FA9C00 MOV EAX,DWORD PTR DS:[9CFA04]

i havent changed anything as its just a league swap so india becomes korea.....

but now the teams that qualify are randomised and not the winners of the korean league or the cup.

can anyone shed any light on what i should do to fix this?

the japan refs all work.

Craig Forrest

So are you trying to get it to take indian teams? or korean teams?

The Asian competitions have this issue. When you load only Japan, the japanese clubs qualifing to competitions normally. When you load only Korea, korean clubs qualifing to competitions normally. But when you load both Japan and Korea, only the japanese clubs qualifing to competitions normally, the qualify for korean is randomized.

totallyaddicted

indian teams and giovanni is right this is the issue

The Loan Ranger

Apologies if this isn't the correct part of the forum.

I'm just getting back into the game after four or five years of not playing. One thing that I asked about a couple of times was if there is a way to get leagues such as the Welsh, Irish, Northern Irish Premier Divisions and the English Conference to use squad numbers.

Has anything happened on the subject while I've been away? It always confusing to me why the Irish and Northern Irish First Division had them but not the Premier Divisions.

Dermotron

Yep, this patch and database has them http://champman0102.co.uk/showthread...717#post340717

Look in the Tapani 2.19 thread. There might be some talk about it in there as he enabled it in that patch. I'm not sure it worked 100% though.

To bring this back up, as I'm revisiting the patch I've made. The changes you make in Flex have no bearing. You can either disable the restrictions completely (i.e. no foreigner limit, no restriction on signings, as shown earlier in this thread) or not at all (i.e. 2 players in the team but unable to sign any non-Turks).

New Italian Cup (using the Polish League Cup)

The format is not 100% equal to the current, but very close to it: without group phase, rounds with only one match (except the semifinal) and final played in Stadio Olimpico. Also some dates of Serie C Cup have been changed so as not to conflict.

I tried for a long time make this change without having to substitute another cup, but I could not.

I have seen your Polish League Cup > Italian/Argentinian Cup patches and I have a question if you don't mind?

I have had a play with changing the Polish League Cup and have successfully got the right clubs from the right leagues into the competition. So, I've successfully edited the offsets in the Polish League Cup offsets (007CA490 to 007CB1C1). But how do you get the Polish League Cup to move to being an Italian/Argentinian Competition in the game? Which offsets do you need to amend?

Many Thanks for any help you (or anyone) can offer.

I want to change around with the player restrictions within the game

I want it so that English clubs will only be able to buy English players

I have changed the restriction for the clubs only being able to play english players but they still buy foreign players even though they can only play them in European matches.

How do I stop them buying foreign players?

Is their an offset for disabling transfers, full stop?

saturn

Try adding the line MOV BYTE PTR DS:[ESI+13],0 to the end of the English transfer window code. They might still buy other UK & Irish players though.

Quote:

Originally Posted by eddieC Is their an offset for disabling transfers, full stop?

Do both the things JL suggests in the post here. It also stops any regens coming through so all clubs will eventually have squads full of greyed out players.

eddieC

Cool, cheers...

Clubs will only get the players that come through their youth team.

008CEBB5 A1 24F49C00 MOV EAX,DWORD PTR DS:[9CF424]

Change to: 008CEBB5 B8 FFFFFFF MOV EAX,-1

Making this change will probably get really boring as I suspect lots of clubs will have squads full of grey players as their players leave and don't get replaced.

When I try and do this on Ollydb, it wont let me enter "-1" as a valid expression.... anyone know what i'm doing wrong?

Yes. Add the line between the two bolded ones.

kikonm

Hi guys

about this :

Taking control of any club in game

Code: 00482A74: JE 00482D04

Fill with NOP and you can Take Control of a club even if it is in a 'non-playable' league.

How can i Take Control of all national teams (for example: hong kong) ?

04-10-17, 06:48 PM

Dermotron

Dirty Editor will allow it http://champman0102.co.uk/downloads.php?do=file&id=12

kikonm

Thank you very much, Dermotron ! it runs

I remember that, somewhere in this forum, i read about disable Copa Inter-Americana ...

Could someone tell me the correct page, or the way to do it?

I remember that i have to replace "je short xxxx" with "jmp short xxx", but i've forgotten the CODE.

Thank you all for the help

saturn

00831253 JE 00831289 --> JMP 00831289 to disable the Inter-American Cup.

kikonm

Thank you, Saturn !

kikonm

In FIFA CLUB WORLD CUP (see page 17 on this thread) the game uses PUSH -1 to signify that the club to pick is not based on a competition winner.

And if i want to force the CPU to pick a club based on a continental competition winner, what may i do ?

Write PUSH -2 ?

Thank you all for the help ...

lucasdm

How do I change the players restrictions in French league?

Pasquale

What is the non-promotion mechanism for B teams? Can you put it in another championship?

00482CA9 JNZ 00482D04 --> NOP 00482CB6 JE 00482D04 --> NOP

This allows human managers to apply for jobs at all clubs and nations (the "Apply for Job" tab will always be present on the squad screen - even your own!). Applying for a job will prompt that club to appoint a manager as if they were a club in a playable league (they may even offer you the job). If the club already has a manager and you apply, your application will be acknowledged but ultimately nothing will happen.

I try this one. I can take control non-playable club (work fine), but these club never "automatic" hire manager, they only do that when I apply for a job and then I reject them/they reject me. Is this normal or weird or I did something wrong?

saturn

No, this is how it's supposed to work. If it was automatic you'd have hundreds of non-league/amateur clubs etc hiring managers, probably in an unrealistic manner e.g. the same manager changing jobs every week. The game would also probably run out of suitable non-players for positions like coaches and scouts as they're now all managers.

Kowalinho

Sorry to ask this again (after few months ;)) Is there any new offset or a way to create san marino league (or andorra) with only 15-16 clubs? NI leagues requires more than 16 team for national cup and i couldn't find a way to replace qualification to europa league from NI national cup to NI league cup (and if it would work).

Pasquale

Hello,

Is it possible to eliminate players' loans when the transfer market is closed in Northern Ireland?

djole2mcloud

Because of game importance of nations is reversed in latest data updates (such as March 2018 Data Update) from the original 3.9.68 data, you can not arrange tour to major countries for pre-season. If you do below change, you can arrange tour now to major countries.

00471E65 JL SHORT 00471E88

Note: If you use 3.9.68 original database ODB, please don't use this change. Otherwise, you can not see major countries to arrange tour.

giovanisantana29

06-05-18, 11:51 PM

14-04-18, 11:28 PM

In the game, the Italian league still has the "spareggio", a play-off between teams that finished the league tied. After all, this still existed in 2001-02, but in the 2005-06 season onwards the spareggio was abolished and here is a way to update that in CM:

0064073D MOV DWORD PTR DS:[ESI+4C],1 >>> 0 006409C1 JNZ 006413C5 >>> JNZ 006413B9 0064179C MOV DWORD PTR DS:[ESI+4C],1 >>> 0

Fill with NOP: 006413C5 - 00641502 and 006416DE

Another interesting thing is update the rules for classification in case of a tie, which changed with the spareggio's abolition, making head-to-head points the first tiebreaker.

I realized the tiebreaker rules are in the block that contains the amount of promotions/relegations of the league (ESI+BE, ESI+C1 etc.) being ESI+C5 the first tiebreaker, ESI+C6 second and ESI+C7 third. And the values I was able to figure out were these: 1= goal difference 2= number of victories (?) 4= head-to-head points

So to update these criteria in Serie A just do this: 0064167A MOV BYTE PTR DS:[ESI+C5],BL >>> DL 00641680 MOV BYTE PTR DS:[ESI+C6],CL >>> BL 00641686 MOV BYTE PTR DS:[ESI+C7],DL >>> CL

Fiestita

I believe that one could add "spareggio" to other leagues like Argentina re-using some of that code huh?

Pasquale

Is there a criterion for choosing clubs in the AFC Champions League?

When you load only Korea, korean clubs qualifing to competitions normally. But when you load both Japan and Korea, only the japanese clubs qualifing to competitions normally, the qualify for korean is randomized.

On the other hand, how are the other clubs chosen? Since I have seen that it decides them in a random way (therefore not according to the criterion of who is stronger) it is possible to modify this?

giovanisantana29

Probably a mix of reputation/randomness.

mike6457

Is there any offset to increase the number of human managers from 16?

geppoilfolle85

sorry if I go off topic someone knows how you can change the start year of championship manager 0304 or the number of substitutes in the English premier league sorry for the trouble

saturn

Quote:

Originally Posted by mike6457

I doubt it, my guess would be that they're "extra hard-coded" like the 50 player squad limit.

Quote:

I've never played 03/04 so I've no idea even it even uses the same structure as 01/02 and other CM3 games. My suggestion would be to: 1. Open cm0304.exe in Olly debugger.

2. Click the first line, scroll down to the last line and while holding Shift click it too (so that all lines will be selected).

 Right click on the lines and select Copy --> To file and save it as cm0304.bt.
 Open cm0304.bt with Notepad. You now have a searchable version of the exe. The line of code for subs will probably look like "xxxxxxxx,7" so search for the ",7" bit in cm0304.bt. Similarly the start year will be stored as 7D3 (2003 as a hexadecimal value) throughout the game, so search for that in cm0304.txt too. You'll more than likely get loads of results for both so a lot of trial and error will be involved.

geppoilfolle85

27-05-18, 11:08 PM

first of all thank you for your kindness but the values 7 and 7D3 I have to find them to the ofsett? excuse the ignorance but and the first time I try with olly dbg since I'm updating cm0304 for 8 years I wanted to try to make it more realistic as possible

If the number of substitutes in the game for a competition is 7, then that 7 value will be stored somewhere in the exe so that's what you have to search for. Similarly for the year value of 2003 you need to search for 7D3. It's still a needle in a haystack really, and to change the year you'll probably need to edit numerous 7D3 values.

geppoilfolle85

have I come back to change the year of departure by setting value 7e1 ie 2017 the only thing and that when I load a championship that should start in 2018 this starts in 2017 because it does not start directly in the example date 25 January 2018? I should change all the values 7d3 and 7d4 that I find in the exe and make them 2017 and 2018 that you know?

cantal111

Hello. What do you mean "scroll up till u see the E and click on it" in your message ? https://champman0102.co.uk/showthrea...403#post298403

geppoilfolle85

sorry i do not speak english and the translator wrote so. Anyway i managed to change the start date of the game the only thing and that the leagues starting in 2004 do not have the date changed as ever?

saturn

Search for 7D4 values in the exe and change them to 7E2. If that doesn't work then I don't know.

geppoilfolle85

all done the only thing is that the Italian league season does not generate the calendar saturn I last question and then not bother you more, do you know why?

saturn

Sorry, no idea.

geppoilfolle85

does anyone know why changing the date of the game in 2017 after the first season no longer generates the calendars of the national championships?

geppoilfolle85

I managed to change the start date thanks for everything to saturn for your help

giovanisantana29

Italian league not only is there no limit to the number of non-EU players, but also all players who play there are not considered non-EU (You realize this by going to an Italian club > General Info > View > Stats. The number of non-EU players will always be 0).

This makes impossible for non-EU players takes Italian second nationality.

To change this:

0053D79B CMP ESI,DWORD PTR DS:[9CF360] >>> Change the 9CFxxx code to another country, preferably some disabled (ex 9CF50C - West Germany).

I know. A bit pointless since the Italian league has no limit of non-EU. But ... : P

saturn

25-07-18, 09:40 PM

Gio your post reminds me of something I initially had in +v5 but then took out:

008C5C39 JNZ 008C5CC4 --> NOP

Allows EU players playing in other EU countries to gain as a second nationality the nationality of that country.

Pretty much everybody playing in Portugal/Spain ended up having those as second nationalities. I added it to make EU players available for national teams in EU countries where they've been playing for a while, but the I don't think this happens too much IRL.

Dermotron

Thought you might be wrong on that but yes, this isn't common.

These are: Africa > EU Non-EU Euro > EU SA > EU EU > Africa (sort of)

It was the Serb/Swiss, Serb/Swedes etc. I was thinking of, basically Non-EU > EU

One that is maybe worth considering is US nationality for those who have been there 2 years or more (might be 3). Players are not considered foreigners even though they aren't considered citizens either. 50:50 whether to add it or not.

Note sure if you have it handy, but how long to get 2nd nationality in Russia? There's a lot of nationalized players these days, esp Brazilians and Nigerians. (Qatar probably not workable, they have basically imported a national team in recent years)

saturn

25-07-18, 11:15 PM

Ten years for Russia in the game, could easily make it like the rest of most of Europe (five).

saturn

International caps at under-21 level are no longer binding for a player, ie they can switch allegiance to the team of their second nationality later on in their career if they still have no senior caps.

I gave the changes a quick test with the .68 database, using a few young French players who also had African nationalities. I took over France and gave them all caps with the French Under-21s, but no full senior caps. A few years later they had each chosen various paths:

Spoiler! Show

Something to note is that Meghni is still in the French Under-21 squad. When in an under-21 squad, players can't be called up by a different nation's senior team (Algeria in his case).

Another minor thing is that you can't easily tell which nation a player has been capped by at under-21 level. In Meghni's case from the save game above, his profile screen reads 'French/Algerian (capped at under-21 level).', which makes it look like he's been capped by Algeria. So the '(capped at under-21 level)' line will always follow the second nationality, regardless of which nation actually capped him. Not really a huge issue.

saturn

005267ED JE 00527229 --> JMP 00527229

All clubs in the database will load when creating a new game (regardless of leagues selected or database size selected). The game seems to crash if you enter the Find Club screen, no idea if a long-term game can be safely played.

00524EA0 CALL 00527240 --> NOP

Prevents extra non-playing staff from being generated. The game creates made up Coaches/Scouts/Physios for clubs if they have none assigned to them in the database (and have a high enough reputation to warrant their creation). Could be useful for the Update Team's save game preview. The change seems stable, though gameplay wise there's a real scarcity of physios without it.

00524E0E JE 005267A1 --> JMP 005267A1

Loads everything. Every player, staff and club (but not the extra-non playing staff from above, the JMP skips over the CALL 00527240 command). Unfortunately it's not stable to play. Although the game doesn't load the extra non-playing staff from above, it does load some staff who have no names attached to them. Whenever you or an AI club tries to sign one, the game crashes. So you'll get about a week in before a crash. Could be useful for the save game preview again. Also I think this one only works on a non-Tapanified exe.

malyukasz

Hi, I have swapped English leagues with polish teams and it looks like vans trophy cup is not accepting swapped teams. Is there any offset to change the rules of vans trophy or switch it off ?

vult

Hey, I wonder if anyone knows the offsets to remove the non-eu players limit in the Spanish Second Division B? Changing these four 8595A5, 8595B9, 8595C9, 8595C1 works only for the first two divisions.

vult

Download flex2 and use the "Big on/off switch", it's in the download section>tools. Or just use Olly and change this offset 00833B8F from JE SHORT 00833B85 to JMP SHORT 00833B85 But i'm not sure if turning this competition off won't cause the game crashing so back up your exe file first.

Craig Forrest

Or find the code for the Vans Trophy, and tell it to take teams from different leagues instead

xeno

I think , this crash reason when you enter the Find Club Screen is that some clubs in the database have no nation . For example: In March 2018 database, there are 845 clubs without nation. In ODB , there are 1581 clubs without nation. If you modify another offset after club nation check, it will be ok. Or , all the clubs nation shall be inserted in the database.

If it's true it could be a fantastic added quality to the game, forcing it to load all players and staff.

005269EF JE 00526BCB --> JE 00527229

All the clubs in database which are with nation will load. I tested Find Club screen and did not see any crash yet. But, this does not makes all players load, only clubs with nation. So, no meaning without all players load.

Ratio

It would be great find the correct offset to load all players without crashes

xeno

30-08-18, 09:50 PM

Youths will promote in all clubs whose reputation is bigger than 2 over 20. Does not matter if club has a divison or not, nation is selected or not. As you know , in ODB, such as Romanian, Bulgarian , Uruguay, etc. regens are created as free transfers. With this offset modification, some of them will be created in clubs in their nations.

007AD088 --> JNZ SHORT 007AD08A 007AD08F --> JE SHORT 007AD091

Ratio

007AD088 --> JNZ SHORT 007AD08A 007AD08F --> JE SHORT 007AD091

And This is VERY good!!!

xeno

Regens will not promote if club squad is equal or more than 45 to keep AI squads free for other transfers. This will avoid clubs full of youngsters and will allow to make transfer more if clubs need

007AD1BD --> CMP BL,2D

unspace

28-09-18, 11:30 PM

31-08-18, 08:45 PM

Hello. I do not understand how to change the number of teams in the league? For example, i want to change number of teams in Russian Premier, so, i change value 10=18 (16=24), but during the start game crashed. Well, it logic, because I've made more teams, but there are still 16 left.

Craig Forrest

Adding teams is much more difficult than removing teams. Follow the league replacement guide tutorial

Ravanelli

Anyone found the offset for increasing manager's retirement age? Should be at least 70 in modern days (Lucescu, Semin, Hodgson, Tabarez, Warnock, Lagerback, O'Neill, Scolari,..., all still going strong). Chairmen retire at 75, so should certainly be possible.

xeno

Quote:

I agree, managers definitely retire too early in the game. As you say with some other staff retiring later it should be possible: is it only Chairmen who retire late or do General Managers/DOF do so too? In the regen code I did find a few lines which looked promising (checking a person's job and comparing them to the senior positions), but no luck. The code is at 007A6401 (checks if person is a manager) and 007A6423 and beyond (checks senior positions) if anyone wants to try something.

Quote:

Originally Posted by Ravanelli

Sometimes I wonder whether the restrictions SI put on some options are for the game's stability or for computers' limits 15 years ago. For instance could the matches stored option be set to 100,000 etc.

It won't be in the patches as it would force everyone to have an ultra-max database every game, regardless of leagues/database size selected. I agree it would be useful for preview saves, particularly with the edit to stop fake staff from being loaded. For me, getting the game to load everything was only really a novelty, I never thought it would be much fun to play such a save due to how slow it would be.

Ar mi Cz	ctually not so slow. I did not feel it. But, if you think that it will be slow, you can increase game speed x2 or more. Nother option is that. Instead of loading all players, you can adjust which players will load by adjusting minimum nation league standart and/or inimum club reputation. zech Republic, Bulgaria, Romania, etc. nations league standarts are below 10 in databases. I suggest to adjust minimum nation league standart i 7 to cover some nations.
Or	riginal section is below:
00 00)52562E . 80B9 85000000 >CMP BYTE PTR DS:[ECX+85],0A)525635 . 7E 2A JLE SHORT cm0102_2.00525661)525637 . 66:83B8 800000>CMP WORD PTR DS:[EAX+80],1D4C)525640 . 7C 1F JL SHORT cm0102_2.00525661

saturn

Code:

23-10-18, 09:44 PM

I'm probably the wrong guy to talk about game speed as I find the max db too slow on a x200 exe (I do always play with all leagues on though).

Changing the league standards/reputations mightn't necessarily mean that more players will now load, instead it could load the same amount of players but more from those nations (instead of some domestic players for example). Depending on where you're managing this mightn't be very useful, eg if you're managing in Argentina and there's now 1000 average Czechs/Romanians etc in the game instead of 1000 Argentinians, then it wouldn't be too useful when you can only have a few foreign players in your squad anyway.

But I might be wrong, those changes could load more players. I've a vague feeling the code below is related to how many players are loaded depending on the database size selected.

couc.			
00524DA9	. 83FB 02	CMP EBX,2	; Compares database
size to Min	imum		
00524DAC	. 894424 48	MOV DWORD PTR SS:[ESP+48],EAX	
00524DB0	. 894C24 68	MOV DWORD PTR SS: [ESP+68], ECX	
00524DB4	. 895424 40	MOV DWORD PTR SS: [ESP+40], EDX	
00524DB8	. 897C24 20	MOV DWORD PTR SS: [ESP+20], EDI	
00524DBC	. 897C24 58	MOV DWORD PTR SS: [ESP+58], EDI	
00524DC0	. 897C24 50	MOV DWORD PTR SS: [ESP+50], EDI	
00524DC4	. 897C24 30	MOV DWORD PTR SS: [ESP+30], EDI	
00524DC8	. 74 05	JE SHORT cm0102.00524DCF	
00524DCA	. 83FB 01	CMP EBX,1	; Compares database
size to Nor	mal		
00524DCD	. 75 12	JNZ SHORT cm0102.00524DE1	
00524DCF	> C74424 28 7B14AE47	MOV DWORD PTR SS:[ESP+28],47AE147B	; Sizes used for Minimum
& Normal da	tabases		
00524DD7	. C74424 2C E17A943F	MOV DWORD PTR SS:[ESP+2C],3F947AE1	
00524DDF	. EB 10	JMP SHORT cm0102.00524DF1	
00524DE1	> C74424 28 7B14AE47	MOV DWORD PTR SS:[ESP+28],47AE147B	; Sizes used for Maximum
databases			
00524DE9	. C74424 2C E17A843F	MOV DWORD PTR SS:[ESP+2C],3F847AE1	

The minimum/normal databases are a bit similar - in games with all leagues selected there'll be roughly the same amount of players regardless of whether you've selected a minimum or normal database.

Originally Posted by **saturn** 🔊

I'm probably the wrong guy to talk about game speed as I find the max db too slow on a x200 exe (I do always play with all leagues on though).

Changing the league standards/reputations mightn't necessarily mean that more players will now load, instead it could load the same amount of players but more from those nations (instead of some domestic players for example). Depending on where you're managing this mightn't be very useful, eg if you're managing in Argentina and there's now 1000 average Czechs/Romanians etc in the game instead of 1000 Argentinians, then it wouldn't be too useful when you can only have a few foreign players in your squad anyway.

Original exe loads 115000 staff in max database, 74000 staff in minimum database. With below change, maximum database selected game loads 137000 staff and all selectable leagues staff qty is still same or more, no one lost. With below change, minium database selected game loads 79000 staff. 005255FF CMP WORD PTR D5:[EAX+80],1D4C --> CMP WORD PTR D5:[EAX+80],1 00525637 CMP WORD PTR D5:[EAX+80],1D4C --> CMP WORD PTR D5:[EAX+80],1

MadScientist

Hey guys, i tested october 2018 database with this ultra max db from Xeno (I changed in Olly the two lines as he mentioned in post above), in tapani 2.22 exe.

It loaded 130k players. Without this change it loads a max of 100k players. Thats with all leagues selected, start date 2018, english league start date. I already holydayed 3 seasons until june 2021.

What is most important, I didnt notice any slow down in processing speed and didnt notice any issues!

I must say im loving it, because:

- The transfer market seem to get more dynamic in the whole world, with more players to choose from by AI.
- The teams from non playable leagues are much more complete (without this change, some important players are missing).
- These teams compete more realistically in international competitions, and its more fun now to play against them.
- Adds more realism to the game.
- Without this change about 30% of players added by update team is lost, so its lost work.
- · Nations from non-playable leagues load up to 5x more players. If you manage some of these nations, you will have a lot more players to choose. For example:

Romania (with change, loads 1400 players. Without, only 400) Bulgaria 900/300 Czech Rep 1300/350 Egypt 800/300 India 650/300 Estonia 1000/200 Mexico 1400/600 Fiji 250/100 Uruguay 1500/500

But as xeno mentioned, it has some downsides too. I think the downsides are:

- The save game file seem to be proportionally bigger, i.e. 30% bigger.
- As saturn said, "we dont know whether the restrictions SI put on some options are for the game's stability or for computers' limits 15 years ago", (so maybe we need more tests?)
 Some people may not like to be forced to use it (but they could choose min db if they dont like it, it seems to load only 70k players if
- min db selected in game options).
- We dont know if the update team would agree with this ultra max db, at least for this upcoming october 2018 update, because i dont know if the update was done and tested with this in mind.

So, maybe this ultra max db could be optional in the saturn patches, like the change in new values for currencies in v5? (unless that would result in much extra work for saturn)

Or maybe we better ignore this change in this update and test it more and maybe make it official in next updates?

Also, changing to x2 or even x200 game speed dont have any effect in processing time as far as i know, it only affects the speed of matches and reduces the small pauses that occur in holyday mode when u can stop holyday.

Hi,

New patch is below, also this time it works for the clubs with B-teams: Regens will not promote if club squad is equal or more than 45 to keep AI squads free for other transfers. This will avoid clubs full of youngsters and will allow to make transfer more if clubs need

007AD1BD --> CMP BL.2D 007A6F40 CMP EAX,32 007A6F45 CMP EAX,32 007A6F48 JNE SHORT 007A6F5F

Old patch we can cancel as clubs have to release if club gets youth promotion and player qty is more than 45 : 007A6F40 |. 83F8 2D |CMP EAX,2D 007A6F45 |> 83F8 2D CMP EAX,2D 007A6F48 |. 7C 15 JL SHORT 007A6F5F

And will be possible see the Squad Status of the AI players in their Contract screen.

Code:

004DDA31 JE SHORT 004DDA57 >>>> JMP SHORT 004DDA57

Doing this will be possible change the Squad Status at any time when you try to sign a player. Explaining better: When we offer a contract to a player, before we offer salary and other things we have to choose their Squad Status. When choosing this cannot be changed for some time (about 2 weeks). With this modification you can change this at any time.

I'm using the 2nd part of this on my own .exe, but I don't know how to do the first part (squad status of AI players) in Olly.

If I understand it correctly I need to go to 0087D33D and fill that with NOP. How do I do that? When I check the box "Fill with NOP's" nothing happens. Any help here?

Already found it. If you right click on the line and go to Binary you have an option Fill with NOP and the entire line will be filled. Thanks :)

I apologize if this message does not correspond to this topic.

My query is for the next topic. Directed to those who really know about programming

In the Copa Libertadores the fixture starts in February and ends in November. Now the final is a unique match in neutral status. Similar to the champions league

It also has players registration before starting the competition. 30 players can be chosen. And you can modify a maximum of 5 after the group stage

Could this be modified?

With respect to the Copa Sudamericana, the fixture is similar. February to November and the final is a unique match.

And the format of the comeptencia would be like this

32 teams

5 argentina

- 5 Brazil 4 uruguay
- 4 chile
- 3 colombia
- 3 Paraguay 2 ecuador
- 2 peru
- 2 bolivia
- 2 venezuela

Round of 16, round-trip matches, until the final that would be a unique match.

Player that has been registered for COPA LIBERTADORES will not be able to play in COPA SUDAMERICANA, identical if it were to the revez.

ARGENTINA

Could the SUPERCOPA ARGENTINA be created? It is disputed between the winner of the COPA ARGENTINA and the best of the league. Unique match in neutral stadium (generally played in may)

COPA ARGENTINA

Fixture from June to December

Thanks for coming and I hope you can make some changes, so the game has more realism

Goodbye!

I need to remove the restriction in Russia to buy a maximum of 10 foreign players. How to do this? I wrote this in the theme of patch v6 (by saturn), but he doesn't respond. It's just a perfect patch for me, something I've been dreaming about for 18 years (beginning of the championship in summer and end - spring), But the restriction on buying foreign players ruins the game (In reality, there is no such rule in Russia, in addition, in the CM it makes it impossible to compete with European top clubs)

Help me, please!

Dermotron

As far as I know it's a compromise. The restriction of buying foreign players cannot be removed so it's been extended to it's limit.

Dermotron

There is a program in Flex.bat called "Flex: Restrictions" which will allow you set player restrictions for Russia. I've no idea if this will work correctly so make a back up of your cm0102.exe first and then edit the copy - https://www.sendspace.com/file/28mgt1

Thank you, but you misunderstood. I know how to change the limit on the number of players. But in patch v6 there is a restriction on the buy of players! With Flex I can put 18 foreigners or remove the limit, but for some unknown reason Saturn made it so that I can't buy more than 10 foreigners. Obviously, this can only be changed in Olly, but I don't know where to do it ((

Is there an offset or way to change the maximum 25% of the next selling of a player? Sell on fee?

MadScientist

I found the formula that converts the intrinsic value of an attribute into the cosmetic in-game value that is displayed to the user: its in the function in **offset 00543540**.

This is how the formula would look like in a simplified high level code:

x = ((intrinsic + intrinsic + CA) / 20) + 10in_game = (((x * x) / 10) + x) / 3

Example:

Lets say the intrinsic value for Anticipation is -2 and the CA of the player is 150.

So we first calculate the x: x = ((-2 - 2 + 150) / 20) + 10 >>>> this results in **x = 17.3**

So now we calculate the in game value: in_game = (((17.3 * 17.3) / 10) + 17.3) / 3 >>>> this results in in_game = 15.743

Finally, we round the value to nearest integer and we get the 16 which is the cosmetic in-game value that is displayed to the user for Anticipation.

Note: If the resulting value is greater than 20 (or less than 1) then its capped to 20 (and 1).

We can easily patch this formula anyway we want, as it is purelly cosmetic anyway... For example, we can display the intrinsic value of the attribute instead of this cosmetic value, or we can include the decimal points of the value to display, or we can remove the CA factor from the formula (as it prevents doing a reliable comparison between the attributes of players of different CAs), or we can remove the 20 cap (which, in cases like Messi, who have many 20s, some of his 20s are stronger than the others, and if we remove this cap they will show as 21, 23 etc).

Note: I still didn't find the formula which im more interested with: the one which converts the in-editor values into the intrinsic values, it for sure is much more complex and takes much more parameters than just the CA (i can infer it even takes into account the non CA attributes), so im really interested in finding it too.

MadScientist

13-04-19, 06:48 PM

13-04-19, 06:54 PM

One more thought came to my mind: I always have a feeling the AI managers pick their players based on the cosmetic in-game values (which are CA oriented) rather than the intrinsic values, ignoring freak intrinsic players such as Tsigalko. If thats the case, then patching the formula above may also affect how AI managers pick the players. For example, if we patch it to return the intrinsic value (normalized in 1-20 range) rather than the cosmetic value, then the AI may become "smarter" giving less importance to CA and more importance to the real quality of the players.

Dermotron

I'm fairly certain Rating trumps CR and CA in terms of the AI picking a team e.g. the rating per position - hence Rafinha and Mariano Diaz get picked by the AI for Barca and RM more than players on paper are way ahead of them

The only programs that show Rating that I know of are Line-up Viewer and CMScout. Line-up Viewer is particularly evident as you can view clubs via preferred formations by either Rep or Rating. Rating tends to be wildy different (and infuriating) at some clubs vs rep

MadScientist

Dermotron

Look at a save in Lineup Viewer (Downloads > Tools), the choice is to either show the best team by reputation or rating.

It's the players rating for a position e.g. AML - who the AI thinks is best in terms of attributes for that (or any given) position. It's this rating that AI choses a team from what I can see, not current reputation or CA

MadScientist

Ouote:

Originally Posted by Dermotron

Yes, thats exactly what i mean. If the AI calculates those rattings in terms of the **cosmetic** attributes (like those tools do), instead of the **intrinsic** attributes, then it means the AI is biased towards higher CA players (because the cosmetic attributes are CA biased due to the CA factor in the formula I posted above), so the AI can't identify good players like tsigalgo because this CA factor in the formula causes the AI to "think" that some of his attributes are weaker than they really are. So, patching the formula I posted above to remove the CA factor from it will probably cause the AI to become smarter as it will calculate those rattings more preciselly.

MadScientist

15-04-19, 08:12 PM

I made experiment to see if the AI managers calculate the ratting (i.e. the quality) of a player in terms of cosmetic or in terms of intrinsic attributes: I changed the formula above, so that all players with CA below 50 show 20 for all their CA-related attributes, and all players with CA above 50 show 1 for all their CA-related attributes. That means I didn't made any change to the intrinsic value of the attributes, only to the cosmetic value of them. Holidayed 5 years.

I was expecting one of these results:

a) If the AI managers calculate in terms of cosmetic, then they would prefer those guys with 20s in all CA-related atts even if their intrinsics were shitty, so after 5 years big teams would have many of those guys.

b) Or, if they calculate in terms of intrinsic, then this experiment wouldn't affect the AI in any way as the AI would still prefer a Messi (good intrinsics) with 1s for all his CA-related attributes than a shitty intrinsic player with 20s for all CA-related attributes.

The result I got after the experiment finished was "b)". My conclusion to the experiment is: The AI managers ignore the cosmetic values of the CArelated attributes and use the intrinsic values, for calculating player ratiting (quality). I also didn't notice any change in any other parts of the game, so changing the formula above seem to have purelly cosmetic effect to be displayed to the user. However I put a breakpoint in the formula code, and I see sometimes this code gets called during processing (days passing), so there is a chance the game engine is using the cosmetic value of the CA-related attributes for something that isn't cosmetic, but i couldn't identify what exactly it is.

MadScientist

My bet before the experiment was that the result would be "a)", because the AI fails to find good players like Tsigalko and a reason would be the AI using cosmetics values rather than intrinsics. However the result was "b)", so I was wrong, so there must be some other reason why the AI managers don't tend to pick players as tsigalko.

Ratio

Saturn, is there a way (offest) to work with to obtain same traits values in regens? (Normally too low)

lucasdm

Hello,

I'm not sure if I'm in the right place to make this question, but I wanted to know if anyone can help me to modify the fixtures of Libertadores Cup that now goes from February until November.

The same would go for the Brazilian Cup that last from February until November aswell.

Is it possible? Anyone can help me?

djole2mcloud

So with a bit of your guidance I could do the ground work :)

First of all, I'd recommend using the Serie B's fixtures (00647321) as that was a 20 team division in 01/02. You'd need to change the ASCII of the Italian teams to match the March update's English teams' short names, so Vicenza would become Cardiff etc.

The easiest way to do this would be in XVI32: open cm0102 in it and CTRL+F Vicenza (make sure Text string is chosen) to see where all the Italian teams' ASCIIs are stored. From here you need to start overwriting the Italian teams with English ones. Select the V in Vicenza and then in the top-left part of XVI32, click Edit and select "Overwrite string". Select "Text string" and type Cardiff, then press the "Text -> Hex" button and select OK.

Note that it is essential that there is a 00 value after the new text has been entered. So it's fine to overwrite Vicenza with Cardiff (both seven letters) but you couldn't use Brighton (its eighth letter would overwrite the 00). Similarly for Pistoiese (nine letters) it would be safe to use an eleven letter team as there would still be a 00 value present after the eleventh letter. With a bit of luck all the English teams will have Italian teams of similar length, if not they would have to be stored elsewhere (easily done).

So should I open a cm0102.exe from the original ODB 01/02 or the one from your v7 patch?

saturn

It probably doesn't really matter, but go with one of the v7 ones.

Golly

QUESTION:

Did anyone manage to work out how to turn on play-offs? Specifically, the English Conference has offsets for 3 rounds of play-off fixtures but the play-off aren't turned on. Any solutions?

Did anyone manage to work out how to turn on play-offs? Specifically, the English Conference has offsets for 3 rounds of play-off fixtures but the play-off aren't turned on. Any solutions?

Maybe I'm dumb...., but can't you turn them on and off in the block of code that deals with number of teams promoted & relegated and subs and subs used during a match?

Golly

No, it makes the league table show the potential play-off teams but unfortunately doesn't trigger the play-offs taking place.

The Conference doesn't have a lot of code that other divisions with playoffs have.

It's similar to when there were attempts to add relegation places to the Northern Ireland First Division. The relegation offsets and how to point relegated teams to a lower division were known, but it was all futile as the extra relegation code was not there.

There needs to be code that tells the game that:

1. Relegation/Playoffs are going to occur 2. This is how to deal with those relegation/playoffs.

In both cases we have the second part in the code but not the first.

If you look at the code after the Conference's fixtures, you'll see that there's only three functions: 0056ECB0 (team selection); 0056EDE0 (league table stuff); 0056EE80 (comp stat related). After the English First Division's fixtures on the other hand, there are three extra functions: 00572BF0 (team selection);

00572D90 (league table stuff);

00572E30 (comp_stat related);

00572EF0 (not sure but it calls the next function); 00573EF0 (lot sure but it calls the next function); 00573080 (large function with calls to cup & cup_stage areas of code, which playoffs use);

00573260 (more comp_stat related).

ForzaJuve

In this thread I've seen an "Ultra-max" database mentioned. What is it and how would I enable it? I always use the ODB .68 with no patches.

Dermotron

You will need to tick the Force Load All Players option on this patch - https://champman0102.co.uk/showthrea...331#post434331

Kingsley

I have read through, but there is a lot of info in this thread, so apologies if I missed it.

Is it possible to stop relegation from English National North so as to make a closed league system ?

maurizio07

hi everyone, sorry for my bad english.

AI teams can bid loan players from other clubs, how can i close this?

World Cup Asian Qualifying...

Change the following offset...

00912F51 - MOV WORD PTR DS:[ESI+0B8],1 > 0

The Asian Qualifying draw date will now take place in early 2004, rather than 2005. It is now possible to edit the dates so that the 16+ game qualifying happens over 2 calendar years rather than compacted into 2005.

hello people

i would like to do a little request

the european awards are just for players with european nationality

i want to change this to every nationality but playing for a club in europe

thanks for the help

Pasquale

Is it possible to adjust the speed of the game to X6 using OllyDB?

LLLorenzo

Hello everybody!

Is it possible to change italian serie A place by place and specially season tickets price?

I mean... 1st place earn 30mln 2nd place 20mln ... step by step considering that teams take money even for TV rights!

That's why I think that the Italian teams take too much money...specially with season tickets! I know , in Premier League it's the truth, not in Italy and in many other europe countries (Holland, Portugal, France...)

e.q. : I'm managing Cremonese... 21000 places at the stadium... If everybody bought season tickets, (medium season ticket It could be 350 €) it's about 7mln euro ok?

In my first season, I earn about 32 mln euro for season tickets! And with Tv rights and money for 15th place, I took 72mln euro! Total 104mln euro! For a team like Cremonese? They could pay players for 10 years :D

So, I ask If I can modify from myself

Thank you so much and sorry for some English errors! :D

Nick+Co

26-08-19, 07:35 AM

More for my own records than anything, and I'm sure this has been done a million times before, but if you want to patch cm0102ed.exe so you can open multiple editors simultaneously:

Code:

0001DB6A: OF E9 0001DB6B: 84 94 0001DB6C: 93 00 0001DB6F: 00 90

Hi there is there anywhere on this website that shows me how I can change the rules in Australia, Russia, turkey, and the countries this effects. Basically I've used the flex editor to change the amount of foreigners can be used, this shows up on my game however when I go to sign foreigners for example with galatasary it won't let me sign anymore. Is there a way to change this?

what do u change japan to? i changed this CMP AL,5 to, CMP AL,14

is that wrong?

russia now works thank you, its now just japan. tried changing CMP AL, 5 to 14 and to 1 but still just lets me sign 5 foreigners.

Pasquale

Guys I have a question: I would like to change the number of teams in the Northern Ireland Cup. Instead of calling 10 clubs from the Premier Division, 10 from First Division and 12 from the Lower Division, I would like to do: 10 Premier Division, 14 First Division and 8 Lower Division . It's possible?

saturn

hi there thanks mate that would be much appreciated.

if you could send me for Northern ireland/rep of ireland and also denmark if thats ok?

also would be handy if you could find me the offsets to disable promotion/relegation in these leagues aswell?

ive been looking on here all morning couldnt find the line.

thanks mate much appreciated.

totallyaddicted

any luck at all djole buddy?

Pasquale

Guys can someone tell me the offset to change the start and end of the transfer market in Russia?

you looked wrong places:

Incresing number of clubs for the NIR premier:

offset 0078ec72 change 0A to 0C offset 0078ec6b change 24E to 2C4 offset 0078ed92 change 4 to 3 offset 0078e36a change 24 to 21

If you like you can change offset 0078ee26 change 5 to 7 in order to get 7 subs

after that change offsets:

0078ac9c set from 0C0 to PUSH 180 0078aca5 change 20 to 40

then with Tri Wasano editor add 2 more clubs to NIR premier league.

that is all.Now game will work with increased number of clubs for the NIR premier and both of cups will work

005522A2 - Changed number of teams to 20 (14 in hex) 0055229B - Changed PUSH value to 1180 (49C in hex = 20*59) 005519EA - Changed number of fixtures to 38 (26 in hex) 005519E5 - Changed PUSH value to 2470 (9A6 in hex = 38*65)

005523BC 66:894E 3C MOV WORD PTR DS:[ESI+3C],CX - number of rounds

denmark second:

005541A5 . 68 9E070000 PUSH 79E 005541AA . 66:C700 1E00 MOV WORD PTR DS:[EAX],1E

00554A4B | . 68 B0030000 PUSH 3B0 00554A50 | . 32DB XOR BL,BL 00554A52 | . 66:C746 3E 100>MOV WORD PTR DS:[ESI+3E],10 hi djole thank you buddy for finding those for me.

ive successfully swapped denmark with usa leagues.

only issue i now have is concacaf champions league does now not draw i swapped the us open cup and mls cup offsets in olly to the danish superleague and the danish cup so that those teams draw in the concacaf champions league.

but it does not draw.

any ideas.

i used these offsets

004C11AF - CONCACAF CHAMPIONS LEAGUE PARTECIPATED:

9CF3D0 - MEXICO 9CF4F8 - UNITED STATES 9CF2A8 - COSTA RICA 9CF4D4 - TRINIDAD TOBAGO 9CF2E0 - EL SALVADOR 9CF728 - WINNER US OPEN CUP 9CF590 - WINNER MLS

djole2mcloud

9CF4F8 - UNITED STATES

swapp this offset with Denmark offset, cause, now Dwnmark is USA.

Sent from my ELE-L29 using Tapatalk

Tried that doesn't work is it something to do with the region of the cups on the editor? Also my danish league I have now got 20 teams in that league for some reason i can't find the offset that changes the number of rounds the league plays, any idea?

Nick+Co

Been meaning to do this one for ages. I never play with Attribute Masking on, so it annoys me it is the default: Code:

0x5CC270 01 00 0x1AF646 74 90 0x1AF646 4F 90

Makes it so it's off by default :)

EDIT: If you turned Attribute Masking on, and then started a new game, it would work, but if you saved and loaded, attribute masking would be off. MrFoo discovered this. The above modification to the initial one byte patch should fix this.

Dermotron

Brilliant :clap:

Nothing worse when testing the database and spending 5-6 hours running a All Leagues, Max DB one season test only to realise you've forgotten to set this to No :doh:

does anyone know what i change this offset to Poland 007CD93C MOV BYTE PTR DS:[ESI+13],AL (AL=5)

im trying to make polish league be able to sign unlimited foreigners or at least 18.

007CD93C |, 8846 13 MOV BYTE PTR DS:[ESI+13],AL 007CD93F |. 8846 14 MOV BYTE PTR DS:[ESI+14],AL

We can combine the two MOV BYTE lines into one MOV WORD line. You can only do combining of lines when there are consecutive offsets (xxx+13 & xxx+14 or xxx+DD & xxx+DE etc) and they're both the same size (two BYTEs can be combined into one WORD, two WORDs can be combined into one DWORD).

So at 007CD93C enter MOV WORD PTR DS:[ESI+13],532. The order the offset values (32 and 05) are displayed in this line goes from right to left so can be a little confusing to enter. The easiest way to enter them is to do so via the second column (66:C746 13 3205) as the order there is more straighforward. To edit that line, right click on in, select Binary --> Edit and edit the values in the HEX box.

Hi there would it Be possible if anyone could tell me how I would make Swedish and Norwegian league start 18/19 like it has the Russian league in the newest patch? It would be most helpful. Thanks guys

If I could get them both to start seasons in august would be brilliant

any ideas on this guys?

also does anyone know how to make it available that you can control more than 16 team on the game?

Schiavoni

I'm trying to add some extra clubs to the Greek league. The problem is that the number off teams stays at max. 14. I have edited the offsets and add the extra teams with explorer, but the number of teams stays at 14.

I have seen that someone replaced the Greece league with the Chinese Super League and that the number of teams is 16. How can I increase the number of teams with the Greek League?

Is it possible to change italian serie A place by place and specially season tickets price?

I mean... 1st place earn 30mln 2nd place 20mln ... step by step considering that teams take money even for TV rights!

That's why I think that the Italian teams take too much money...specially with season tickets! I know, in Premier League it's the truth, not in Italy and in many other europe countries (Holland, Portugal, France...)

e.g. : I'm managing Cremonese... 21000 places at the stadium... If everybody bought season tickets, (medium season ticket It could be 350 €) it's about 7mln euro ok?

In my first season, I earn about 32 mln euro for season tickets! And with Tv rights and money for 15th place, I took 72mln euro! Total 104mln euro! For a team like Cremonese? They could pay players for 10 years :D

So, I ask If I can modify from myself

Thank you so much and sorry for some English errors! :D

I have the same problem with Turkish leagues

Need your support to find how "signing on fee" is calculated . I found offsets about how to limit during contract offer . But although I found logic how it is calculated based on squad status set during contract offer, I could not find offsets. Signing on fees is the biggest part which clubs budget is mostly consumed. Clubs are paying %20 of player value as signing on fee if you set player squad as indispensible or important player during contract offer , this is too much . I think %10 is reasonable. If you say that signing fee as %20 of player value is reasonable , I will close and forget this improvement. ***Max signing on fee in the game is set to 5M Pounds (8M USD). (Note: Original 3.9.68, without saturn's amount increase patch) 004DE3B3 CMP EAX,4C4B40 004DE3B8 JLE SHORT 004DE3BF 004DE3BA | MOV EAX,4C4B40 004DE3BF | PUSH 0 004DE3C1 | PUSH EAX 004DE3C2 | PUSH 15 ***If you do below, it cancels the limit so that you or game choose any signing fee without limit: (Note: Original 3.9.68, without saturn's amount increase patch) 004DE3B3 | CMP EAX,4C4B40 004DE3B8 | JMP SHORT 004DE3BF 004DE3BA | MOV EAX,4C4B40 004DE3BF | PUSH 0 004DE3C1 | PUSH EAX 004DE3C2 | PUSH 15 ***If you do below, Max signing on fee in the game is set to 2,5M Pounds (4M USD). I don't know the location for any signing-on fee calculations, but I might be able to tell you what to look out for. The offset +4F relates to squad status, so that should be your first thing to search for in cm0102.exe.bt. I don't really know how the +4F offset works: it's not as straightforward as +4F = 1 is Indispensable, +4F = 2 is Important etc, but it shouldn't be too difficult to figure out. Anyway, once the +4F offset is in the code, I'd imagine there'll be some checking of its value and subsequent jumps to different floating point numbers depending on that value. Code at 00402A16 is what I'd imagine the calculations to look like, so maybe try there first (though there is similar looking code beyond that too).

Originally Posted by **xeno** 🔤

I'm not really sure what the real life signing-on fees are for players. 20% does seem way too high though, there's no way that £100m+ valued players like Harry Kane get a £20m+ signing on fee every new contract.

saturn

Code:			
00524DCF	> C74424 28 7B14AE47	MOV DWORD PTR SS:[ESP+28],47AE147B	; Sizes used for Minimum
& Normal dat	tabases		
00524DD7	. C74424 2C E17A943F	MOV DWORD PTR SS:[ESP+2C],3F947AE1	; 1.16
00524DDF	. EB 10	JMP SHORT cm0102.00524DF1	
00524DE1	> C74424 28 7B14AE47	MOV DWORD PTR SS:[ESP+28],47AE147B	; Sizes used for Maximum
databases			
00524DE9	. C74424 2C E17A843F	MOV DWORD PTR SS:[ESP+2C],3F847AE1	; 1.035

The above code seems to relate to the amount of "pregens" that the game creates in each save game. Pregens are young, free transfer players generated by the game, usually found on the last page of the Find --> Player screen. The players are not loaded from the database and instead are entirely created by the game.

The decimal values (1.16 for Minimum / Normal databases, 1.035 for Maximum databases) are represented in hexadecimal form (3F947AE1 and 3F847AE1). Equivalent values can be calculated here. By increasing the values, we can increase the amount of pregens created by the game.

On a .68 minimum database Northern Ireland only game, there are 156 players on a free transfer with the normal 1.16 value.

Spoiler! Show

Increasing the value to 1.32 sees the number of free transfer players rise to 293.

Spoiler! Show

Increasing it to 1.96 sees the number of free transfer players rise to...

Spoiler! Show

The increased pool of players seems to fit the leagues chosen too - in the 1.96 test almost half the players were Northern Irish. So, increasing this value should solve the problem of no regens being promoted to your reserve teams.

Dermotron

Semi ironic you found this code given Tapani's patches remove the ability to find these players due to them being sub 100 in World Rep (or something along those lines)

This is awesome :) I gave it a try with just the English league. Without modification I had 1350 players 19 and younger who were on Free Transfers. Modding it to 1.9 I got 47307! Some proper wonderkids in that lot too!

Nick+Co

23-12-19, 06:23 PM

For those interested, Tapani's patcher could shift the start year and although it shifted the player histories, it never did the same for the Club + National histories. Wrote a rough lazy patch today to do that:

Cod	0.

00539AE9 00539AEE And then	E9 12D44200 90	JMP 00966F00 NOP
00966F16	8B35 D423AE00 60 31C0 66:8346 08 15 83C6 1A 40 39C8 75 F3 61 E9 D32BBDFF	MOV ESI,DWORD PTR DS:[0AE23D4] PUSHAD XOR EAX,EAX ADD WORD PTR DS:[ESI+8], 12 ADD ESI,1A INC EAX CMP EAX,ECX JNE SHORT 00966F09 POPAD JMP 00539AEF

That will push histories out by 18 years (the ADD..., 12 line above). I've had for a while all the tapani code for doing the rest of the year changing, so now I could make my patcher change the year without changing any of the data files. I've also added code into my patcher to load the exe and then do the patches in memory, so never even changing the exe. So with this I might take my patcher in a new direction. Or I might do nothing with it :) So thought I should post here rather than the info just get lost....

Nick+Co

23-12-19, 07:32 PM

Oh and xeno:

The code to calc the signing on fee is a bit complicated.....far as I can work out: Code:

004DECCA |. E8 810F3800 CALL 0085FC50

Is the call to calc it. If you just wanted to do a messy hack, you could just divide the int32 at EDI+8 after the call by 2 and that would make all signing on fees 50% less ? Probably not what you're after - but 85FC50 is a bit of a beast and I think the signing on fee depends on a lot of factors, so it's not just a case of changing one float or similar....

EDIT: Here's an example to try: Code:

	004DECCF 004DECD4 004DECD5	/E9 9C814800 90	JMP 00966E70 NOP		
--	----------------------------------	---------------------	---------------------	--	--

Code:

^ that will right shift it by 1 (i.e. divide the number by 2) therefore cutting all signing on fees by half. (I think this works! Hopefully I'm not just changing the signing on fee that gets displayed ;))

Thanks Nick+Co.

This will improve club finances a lot. The reason of bankrupt clubs is mostly paying high signing fees to their own players. Also, transfer ability of all clubs will improve . Note: I did not try it yet.

Dmitri

Anyone tried to research screens drawing? Can we change layout? Add new screens? New elements (club, player pictures)?

Nick+Co

Ahhh, my patch will just affect the player's negotiations - as 0085FC50 is called from many places. if you want signing on fees lower for all then, hooking the end of the 0085FC50 is the best bet so:

Code:

00862682	E9 E9471000	JMP 00966E70
00862687	90	NOP
00966E70	\57	PUSH EDI
00966E71	8B7CE4 24	MOV EDI,DWORD PTR SS:[ESP+24]
00966E75	D16F 08	SHR DWORD PTR DS:[EDI+8],1
00966E78	5F	POP EDI
00966E79	81C4 64020000	ADD ESP,264
00966E7F	C2 1C00	RETN 1C

EDIT: Fixed the above - originally assumed it was always in EDI for every call. Stooopid.

0069CA55 JE 0069CC92 --> JMP Code:

)x29ca55 0xf 0xe9)x29ca56 0x84 0x38	2
0x29ca57 0x37 0x2	5
0x29ca58 0x2 0x0 0x29ca5a 0x0 0x90	

The above will stop you from suffering board confidence and loyalty penalties when applying for jobs elsewhere. Useful for when you're applying to managerless clubs in unselected leagues just to get them to hire a manager.

04-01-20, 10:02 PM

Nice! I like these type of things :) Here's one, just for fun:

Code:

0x2b89c4 0x2b89c5 0x2b89c6 0x2b89c7 0x2b89c9 0x3273ae 0x3273af 0x3273b0 0x3273b1	0x0 0x0 0x0 0x0 0x0 0x0 0x0	0xe9 0x15 0x01 0x00 0x90 0xe9 0x33 0x01 0x00	
0x3273b1 0x3273b3		0x00 0x90	

^ That will make it so you no longer have to field 11 players. Although just fielding a goalie can crash it, but tried with 3 and it worked fine. Might have good testing purposes. https://i.imgur.com/JcgiuhQ.png

Nick+Co

This game has always been prejudice against Prince, Cher and Madonna ;) In that it forces you always to put in a second name when creating a new game:

Code:

0x421656 0xf 0x90 0x421657 0x84 0x90 0x421658 0x6d 0x90 0x421659 0x1 0x90 0x42165a 0x0 0x90 0x42165b 0x0 0x90

Means you can just play using a single first name :)

Nick+Co

Been wanting to do this one for ages. Anyone else get annoyed by this when you want to compare two players?:

https://i.imgur.com/y5fMRtC.png

This patch gets rid of this screen so you don't get asked if you really want to set a player for comparison.

Code:

004F4210: 81 C3 004F4211: EC 90 004F4212: 9C 90 004F4213: 01 90 004F4214: 00 90 004F4215: 00 90 004F4598: 75 EB 004F45AF: 6A 53 004F45B0: 01 90 004F45D1: 66 50 004F45D2: 83 6A 004F45D3: FE 01 004F45D3: FE 01 004F45D4: FF B9 004F45D5: 74 50 004F45D6: 25 44 004F45D7: 0F B7 004F45D8: BF 00 004F45D9: C2 E8 004F45DA: OF 32 004F45DB: BF AA 004F45DC: CE F0 004F45DD: 8D FF 004F45DE: 14 89 004F45DF: 40 C3 004F45E0: 8B 58 004F45E1: C1 EB 004F45E2: C1 B7 004F45E3: E0 90 004F45E4: 05 90

saturn any idea on how to control more than 16 teams on game?

Golly

Anybody know how to change how many days before an international fixture that a squad has to be picked. It's 14 days which is a bit too long in advance in my opinion.

Dmitri

Something from screens research: **AREA**

Code:

0x403C80 AREA::draw_scrollbar 0x403760 AREA::get_menu_position 0x403350 AREA::init_area 0x403A70 AREA::move_area 0x403EE0 AREA::scroll_area

DISPLAY

Code:

0x564080	DISPLAY::receive
0x55F990	DISPLAY::create button
0x55F300	DISPLAY::draw
0x55F620	DISPLAY::monitor
0x561050	DISPLAY::monitor screen drag scrollbar
0x5621F0	DISPLAY::move cursor
0x562370	DISPLAY::send
0x5622A0	DISPLAY::send all
0x5617C0	DISPLAY::update editbox
0x561F10	DISPLAY::update_scrollbar

SCREEN_MANAGER

Code:

0x7FC380 SCREEN_MANAGER::SCREEN_MANAGER 0x7FF5F0 SCREEN_MANAGER::clear 0x7FC5E0 SCREEN_MANAGER::close 0x8040A0 SCREEN_MANAGER::create_button 0x7FE80 SCREEN_MANAGER::get_current_background_path 0x7FF010 SCREEN_MANAGER::get_data 0x7FEB0 SCREEN_MANAGER::is_first 0x7FEB0 SCREEN_MANAGER::is_modal 0x7FC7E0 SCREEN_MANAGER::is_modal 0x7FC7C7E0 SCREEN_MANAGER::monitor 0x803390 SCREEN_MANAGER::move_cursor 0x7FE600 SCREEN_MANAGER::nowe_cursor 0x7FF270 SCREEN_MANAGER::put_data

Code:

0xB74450 SCREEN_MANAGER instance

Code:

0x5E2EB0 blit_to_front 0x5E3DD0 capture_region 0x55FBA0 create_label 0x5E42E0 darken_screen 0x5E3730 draw_line 0x5E3506 draw_rectangle 0x5E30E0 fade_to_front 0x5E2620 initialise_graphics 0x5C26D0 initialise_graphics 0x5C26D0 initialise_system 0x5E44D0 load_font 0x5E40D0 load_region 0x7E090 player_contract_screen 0x885820 player_history_screen 0x587D0 restore_region 0x77B60 screen_buffer::screen_buffer 0x5E4580 set_drawing_rect 0x41B3D0 setup_background_system 0x41BC20 verify_background_config Hi!

I play with 3.68 and my charity ended draw, but not replayrd, nor golden goal or penalties applied, just draw and neithet team won the cup.

Whats the offset for use golden goal and penalties ?

Thanks in advance !

saturn

Try the following for golden goal and penalties: 0078A19B MOV WORD PTR DS:[ESI+0D],200 --> 83

Bhaalspawn

Thanks so much.

How would I go about changing the number of subs allowed in the First/Second/Third Divisions where no offset is listed? I'm trying to change it to 2 to go along with the 1989/90 data update.

I'm struggling to add lines in where there is no 'NOP' space directly below the Subs named line :redface:

Rodry97

Is there a way for the "copa libertadores" to start in February and end in November? As it happens in real life

Bhaalspawn

Do you know the northern irish cup offsets to not be replayed each draw ? And the first division prize money is also not here in the offsets. Thanks a lot

Rodry97

The "Copa Libertadores" begins in February and ends in late November. Before the start of the club world cup.

The "Copa Sudamericana" is also played in the same period as the "Copa Libertadores"

Can anyone make a patch for this?

Bhaalspawn

n.irish charity stadium offset ?

Hi !

I want to use Nir charity as other league super cup, and want to play at the other nations national stadium. What should be the offset ? How the exe handle stadiums ?

Thanks a lot!

Bhaalspawn

So there is the fifth round code of NIR cup. Following Golly's solution about FA cup replays, i can change the 0078A963 to -BP 0078A983 to BX 0078A988 to 0 It of course remove replays, but there is a strange w and ww symbol in the right and left sides of teams when wins, and automaticly goes penalties the games, but without penalty icon. If i try to use the correct value to 0078A963 to 3, (as Saturn's thread) it doest wok because there is a 0078A967 B8 2000000 MOV EAX,20 code below it and it changes instantly. What should be the solution to abolish replays in NIR cup ?

Here is one of the code block.

0078A953 |. 66:C746 07 32 MOV WORD PTR DS:[ESI+7],32 0078A959 |. 66:B95E 09 MOV WORD PTR DS:[ESI+9],BX 0078A950 |. 66:C746 0B 08 MOV WORD PTR DS:[ESI+0],BX 0078A963 66:895E 0D MOV WORD PTR DS:[ESI+0],BX 0078A967 88 2000000 MOV EAX,20 0078A967 C646 17 04 MOV BYTE PTR DS:[ESI+17],4 0078A970 66:8946 18 MOV WORD PTR DS:[ESI+17],4 0078A970 66:8946 18 MOV WORD PTR DS:[ESI+18],AX 0078A974 66:C746 1A 10 MOV WORD PTR DS:[ESI+16],AX 0078A974 66:B946 1C MOV WORD PTR DS:[ESI+16],AX 0078A975 66:8946 1C MOV WORD PTR DS:[ESI+16],BX 0078A983 66:8966 0F MOV WORD PTR DS:[ESI+1C],AX 0078A983 66:895E 1E MOV WORD PTR DS:[ESI+1C],BX 0078A988 C646 20 01 MOV BYTE PTR DS:[ESI+20],1 0078A987 66:895E 1E MOV WORD PTR DS:[ESI+21],1 0078A987 6646 21 01 MOV BYTE PTR DS:[ESI+21],1 0078A997 895E 5C MOV DWORD PTR DS:[ESI+2],4 0078A997 895E 5C MOV DWORD PTR DS:[ESI+2],4 0078A998 895E 60 MOV DWORD PTR DS:[ESI+6],EBX 0078A990 895E 64 MOV DWORD PTR DS:[ESI+6],EBX 0078A940 895E 64 MOV DWORD PTR DS:[ESI+40],EBX 0078A940 895E 64 MOV DWORD PTR DS:[ESI+41],EBX 0078A9A0 0FBF57 40 MOVSX EDX,WORD PTR DS:[ESI+41],EBX 0078A9A4 83C4 40 ADD ESP,40 0078A9A7 52 PUSH EDX

Nick+Co

It means return near (that's what the n means) and move the stack pointer (ESP) by that many bytes to clean up the stack (i.e. if you've push'd eax and ecx onto the stack, instead of popping them off in a function to return with the ESP register (aka stack pointer) exactly the same as when it was called, you could call RETN 8).

Bhaalspawn

I really try to find out, after using tapanyfied exe, northern ireland fitst division has relegation to lower div and promotion from it. What offset handle the leagues from what league to promote and what to relegate ? I created an easy patch file to change offsets from northern irish leagues to austria (as Saturn's thread: https://champman0102.co.uk/showthrea...361#post442361) everything works, but promotion and relegation i not.

thanks for help me!

What offset handle the leagues from what league to promote and what to relegate ? I created an easy patch file to change offsets from northern irish leagues to austria (as Saturn's thread: https://champman0102.co.uk/showthrea...361#post442361) everything works, but promotion and relegation i not.

thanks for help me!

I found it:

and

007EBEAC | > 3B05 E4F39C00 CMP EAX,DWORD PTR DS:[9CF3E4] to CMP EAX,DWORD PTR DS:[nation cf code you want to use]

007EBEB4 |. FF35 B8F89C00 PUSH DWORD PTR DS:[9CF8B8] to PUSH value the lower league competition value either in cf, or hex value.

Also i found the northern irish cup replay abolish code in saturn's exe, so you are the best!!

toguchi

Hi guys! Does anyone have any idea how to enable mouse scrolling in CM 00/01?

Tiax

Is it possible to change the system of matches from the Polish League to the Belgian League?

Nick+Co

- - - ,

Just a quick brain dump of info from Tapani's patch:

So in a normal 3.9.68 game the player has attributes like any other manager. And key to this is their Current Ability and their Potential Ability. In the original game, these are random and tend to be quite low. And even worse, they never change. This used to, amongst other things, affect the players chance of getting other managerial jobs. The way Tapani fixed this was firstly with this:

Code:

005FBAFE 60 . 005FBAFF 8D7E 36 . 005FBB02 8D7424 66 005FBB06 6A 18 . 005FBB08 59 005FBB09 F3:A4 . 005FBB0B 61 005FBB0C 8B4C24 08 . 005FBB10 81F9 0000F000 . 005FBB16 7C 3C

PUSHAD LEA EDI,[ESI+36] LEA ESI,[ESP+66] PUSH 18 POP ECX REP MOVS BYTE PTR ES:[EDI],BYTE PTR DS:[POPAD MOV ECX,DWORD PTR SS:[ESP+8] CMP ECX,0F00000 JL SHORT 005FBB54

005FBB18 . 8B49 69	MOV ECX, DWORD PTR DS: [ECX+69]	< ECX Holds the "Staff" data, +69
holds the pointer to the "Player" dat	a	
005FBB1B . E3 3D	JECXZ SHORT 005FBB5A	
005FBB1D . 66:C741 04 0100	MOV WORD PTR DS:[ECX+4],1	< Make CA = 1 for the player
005FBB23 . 66:C741 06 C800	MOV WORD PTR DS:[ECX+6],0C8	< Make PA = 200 for the player

But, if we just used this code, the player's PA would be 200, but it's CA would forever stay 1.

-				
Sn	Tapani	added	thic	call

Code:				

006B5CD7 |. E8 6CD0F4FF CALL 00602D48

Which fires at the end of each day and recalibrates the players CA based on things like reputation.

After some checks/jumps it then does:

Code:

00602C9D > 8B7E 69	/MOV EDI,DWORD PTR DS:[ESI+69]	< Get player data
00602CA0 . 85FF	TEST EDI,EDI	
00602CA2 . 74 2A	JZ SHORT 00602CCE	
00602CA4 . 0FB747 08	[MOVZX EAX, WORD PTR DS: [EDI+8]	< Get Home Rep
00602CA8 . 66:0347 0A	ADD AX, WORD PTR DS: [EDI+0A]	*
00602CAC . 66:0347 0C	ADD AX, WORD PTR DS: [EDI+0C]	
00602CB0 . 0FB757 04	MOVZX EDX, WORD PTR DS: [EDI+4]	< Get CA
00602CB4 . 83C0 60	ADD EAX, 60	
00602CB7 . C1F8 07	SAR EAX,7	
00602CBA . 3BC2	CMP EAX, EDX	
00602CBC . 72 03	JB SHORT 00602CC1	
00602CBE . 42	INC EDX	
00602CBF . EB 03	JMP SHORT 00602CC4	
00602CC1 > 74 0B	JE SHORT 00602CCE	
00602CC3 . 4A	DEC EDX	
00602CC4 > 66:3B57 06	CMP DX, WORD PTR DS: [EDI+6]	< Get PA
00602CC8 . /73 04	JAE SHORT 00602CCE	
00602CCA . 66:8957 04	MOV WORD PTR DS:[EDI+4],DX	< Set CA
00602CCE > \83EE 6E	SUB ESI,6E	
00602CD1 .^ E2 CA	LOOP SHORT 00602C9D	

The other function that he added that gets called every day is at 00602CD9 (which I think affects player development). It certainly looks up a player's club details. But not sure on that one yet.

Bhaalspawn

bTW if i swap two nations, i swapped Denmark with Hungary, with mass swap etc, all my hungarian staff got the norways and sweden language. What offset handle that?

I found a Scandinavia offset: 0083941D |. 3B05 C0F29C00 CMP EAX, DWORD PTR DS:[9CF2C0] -denamrk but that not stop to give two languagaes to Hungarian players after swap.

Auch

Fixing the modern formats for Champions League and Europe League would be really good. I hate the second group stage and UEL that was in 2002.

Alan

Don't hold your breath. It's been 18 years and the biggest connundrum of them all remains unsolved.

Bhaalspawn

I found the offset for northern irish charty shield venue : 0078A16D

0078A16D 6A 04 PUSH EBX - change to PUSH 4 (neutral ground, the national stadium of the nation). The tricky is to need to copy paste the whole next commands until 0078A1D1 \. C2 1000 RETN 10

Bhaalspawn

Golly previously posted some cup fixture venue offsets and values. Here is is what i found, if it was alread posted sorry. Northern Irish cup semi final venues offsets: 0078AB14 6A 28 PUSH 40 0078AB24 6A 28 PUSH 80

the 40 and 80 can be changed to 0(home team stadium), 4 (country's national stadium), 40 (biggest stadiums in country that not the national), 28 (random stadiums from country). Unfortunately the 40 and 80 are change the following line, so you need to copy the next command down to the next retn 10 command and paste

behind the changed lines.

i just want to make a few minor changes for the original game. for now i'm trying to disable 3rd place playoffs game of confed cup and fifa club world cup because i know it's a bug that made those competitions stop happening somewhere around 2007-2009.

®usso

I've got an Austrian league patch pending for release, swapped with the Nortern Irish leagues and with an extended format of 12+16 teams instead of the basic 10+10.

Once i increased the number of teams, the cup doesn't load all teams from the top two tiers. It only loads 8 from the premier and 12 from the first division, always the same ones no matter last year's final position in the db.

Do you have any idea which offsets i'm looking for?

Tiax

Is it possible to remove the rematch match from the Polish Cup final? How to do it?

Wembley is used for English cup finals, playoffs and England internationals from the start of the game.

Spoiler! Show

For some reason a couple of England games in late 2002/early 2003 (Euro 2004 qualifers) are played in club grounds (mostly Old Trafford but others too), seems to revert back to Wembley afterwards.

Sorry for dragging up the old post, but I couldn't find anything else on this.

Would I need to do anything different when starting the game in 1989? I've tried making the change but the Charity Shield and finals are still in Wales in the first season.

Alan

7D1 is 2001 in HEX 7D3 is 2003 in HEX and... 7C5 is 1989

the moment when you realize that its enough .exe exploring for today :wacko:

[https://i.ibb.co/9s71FSj/001.jpg

utek

Hello good guys! I'm trying to change Turkish league foreign player restrictions. I'm on Mac and using VMware fusion & windows 98, flex and other tools didn't work for me. please help?

dw82

Does anyone know what offsets I'd need to patch/edit to amend the summer transfer window dates in England? The transfer window opens on 1st June in England, I want to change it to 1st July.

fairedinkum

@dw82

This patch has 2 windows in England (the correct ones):-

Summer - July 1st to August 31st Winter - January 1st to January 31st

0x179c0b 0x5 0x6 0x179c13 0x3 0xff 0x179c14 0x11 0x1f

0x179c0b 0x5 0x6 0x179c13 0x3 0xff 0x179c14 0x11 0x1f

Thanks man - is this just as simple as copying that code into notepad and applying that as a patchfile using Nick's Patcher? I've done this with a couple of other thing easily enough but just want to check.

Also, on a related note, do you or anyone have any idea why it has been set to 1st June in the latest Saturn patch?

fairedinkum

12-05-20, 06:13 PM

Yes mate, just save it as a .patch and patch it in using Nick's patcher.

In regards to Saturn's v9 patch I had the correct windows other than it shutting a little earlier in August as it was last season.

@Nick+Co @fairedinkum

Thanks guys, that's interesting to read why the windows were set as they are in the Saturn patch; I already understood about the early August end, so that you can't buy players in England once the season has kicked off. The opening in early June I guess just seems odd to me bearing in mind that all the other big leagues can't transfer til the 1st July, and more so because even in England transfers aren't actioned until 1st July either, even though the window is technically open before. This is generally due to the fact that, with free transfers at least, you have to wait until the player's contract expires on 30th June, which all players have and is something I've asked Nick if it's possible to patch with regards player contracts.

So in theory what would be a patch just for the changing the *start date* of the English summer transfer window from 1st June to 1st July? And not changing anything else?

Tiax

How to remove groups from the Polish First League?

Nick+Co

14-05-20, 06:41 PM

14-05-20, 02:31 PM

@M.C.F.C: Never looked into how that benchmark version was done - but there's numerous ways you could do it. You can look at 0AE2C90 for the current date and hook something onto the end of the function that ends at 006B5CD7 (like the Tapani patches do) to do a check at the end of each day. So you could hook that, check the date, and then do whatever on a specific date.

EDIT: So I had a look just now at what he actually did change when benchmark mode is on, I was pretty close:

Code: From: 004033FE |. 8D8C24 1C010000 LEA ECX, [LOCAL.63] 004033FE \. /EB 54 JMP SHORT 00403454 ^ Not sure why he does this little jump? From 00544899 |. 8B0A MOV ECX, DWORD PTR DS:[EDX] CMP DWORD PTR DS:[ECX*4+EAX],0 JE SHORT 005448B2 0054489B i. 833C88 00 0054489F |. 74 11 To: 00544899 |. 8B0A MOV ECX, DWORD PTR DS: [EDX] 0054489B 90 NOP 1. 0054489C 1. 90 NOP 0054489D |. 90 NOP 0054489E 1. 90 NOP 0054489F 74 11 TZ SHORT 005448B2 ^ Not sure why he removes this compare either (I've never run benchmark mode - so don't actually know what it does :)) Then we have two little functions he added (he put them in the space he made in the Credits section: 00603685 . 90 NOP 00603686 90 NOP 00603687 90 NOP 00603688 \$ 60 PUSHAD 8B0D 983CB600 MOV ECX, DWORD PTR DS:[0B63C98] 00603689 . 0060368F A1 3DB98100 MOV EAX, DWORD PTR DS: [81B93D] . 66:3905 922CA CMP WORD PTR DS:[0AE2C92],AX 00603694 . <--- checking the year 74 09 JE SHORT 006036A6 0060369в . ; /Arg2 = 0 ; |Arg1 = 0 ; \cm0102.005FD2F0 0060369D 6A 00 PUSH 0 . 0060369F 6A 00 PUSH 0 · 006036A1 E8 4A9CFFFF CALL 005FD2F0 <---- this is the 006036A > 61 POPAD 006036A6 > 61 006036A7 . There that's all the changes benchmark mode makes :)

GFRay

When you start a game on ODB (.60 or .68) the teams DO NOT get season tickets income for the first season whilst on the saturn patches they do start generating season ticket income.

Does anyone know the offsets or the code that I need to change on a .68 .exe to turn on the season ticket income for the first season?

Thought about the same when i saw Nick hidden atts (useless for me, but interesting in terms of coding)

well, in theory, and if Nick have time - i think its an option to make facepacks for cm0102.

18-05-20, 04:15 PM

15-05-20, 01:13 PM

Make extra column (what nick already done)
 Make game load .his (written history bmp file which is connected to player) in that area

but i am afraid it is plenty of coding, and much more difficult than hidden attributes

morais

This problem was problably already covered here. I gave a quick look and didn't find something about this, however...

There is a possibility of enable relegation in Irish First Division (second level of their football tier)??

clipeus

great work!!!

Marco do u ever tried to change serie C in Lega Pro?

other question :)

nobody has the offsets to change italian league structure? or how can identify them? the index search in the first post doesn't work

clipeus

other questions....

if i don't find the offset to change the number of club and fixtures of a lower division (italian c2 and portugal lower) maybe they are the default one... but how can i find them? someone can help me? where is the default block of informations ?

clipeus

ok ok always me....

i tried to change chinese structure from 16 to 18 teams, changed number of fixture but league load with 3 games already played how can i fix the date?

thanks a lot Marco

i follow the guide, but i don't understand the difference about increasing fixture and changing fixture... when the first and when the second?

clipeus

Could someone fix so the new Champions league and Europa league fixtures? Like the group stages in Europa league for instance? Also if it's possible add the new numbers from 1-99 not 55 on squad numbers on players. And also add league cup tournament on Portuguese league?

And1

When starting in 2019, Confederations Cup always get played that year and then 2023 etc. Did the changes in this thread with having it every four year and so on, but is it possible to have it 2021, 2025 and so on? Or disable it totally as its not played anymore.

Nick+Co

Saturn made a patch for turning it off in v8 (and in v6 for changing what years it runs). Using my patcher, go into Tools -> Misc Patches -> Saturn Patches v8 and you'll see Confederations Cup disable.patch

Nick+Co

Some interesting offsets regarding work permits:

Code:

CMP WORD PTR DS:[ESI+0D],2134	< Check World
JG 008C7A0D	
MOV EAX, DWORD PTR SS: [ARG.3]	
TEST EAX, EAX	
JZ SHORT 008C7C05	
CMP DWORD PTR DS: [EAX+0C],88B7	< Check if the wage is
JG 008C7A0D	
	JG 008C7A0D MOV EAX,DWORD PTR SS:[ARG.3] TEST EAX,EAX JZ SHORT 008C7C05 CMP DWORD PTR DS:[EAX+0C],88B7

^ This code checks if the wage is 35,000 or more (of if World Rep is over 8500). If it is, then the work permit will go through.

Code:

008C31C4 . 6A 07	PUSH 7	; /Arg1 = 7	<
Argument for Random function	(i.e. pick a number between 0-6)		
008C31C6 . C647 2C 0A	MOV BYTE PTR DS:[EDI+2C], OA	;	
008C31CA . E8 F19D0400	CALL 0090CFC0	; \cm0102.0090CFC0	<
This is the Random function.	Called each time CM0102 wants a random number		
008C31CF . 83C4 04	ADD ESP,4	;	
008C31D2 . 04 12	ADD AL, 12	; <	Add
0x12 (18) to the random number	er received. This is the total number of days.		

^ This code calculates the number of days until you hear if the work permit went through or not

Was thinking about changing this to keep work permits in, but make them less annoying. Like maybe make it take a fortnight each time and have a 50/50 chance of going through regardless of wage. Not sure yet.

EDIT: D'oh - Saturn + JL had already worked out most of this at: https://champman0102.co.uk/showthrea...713#post219713

djs_298

I seem to remember the .68 patch 'hard coding' the qualifiers and group stage fixtures for the 2002 world cup in. Is it possible to do this for another tournament in the same way, and if so, how would I go about it?

Ideally i'd like to replay Euro 96 on the 95/96 season update.

MadScientist

Nice finding.

That gave me an idea for a side project> remove randomness from the game (like, if you go holiday mode for several seasons you would get

09-07-20, 07:22 PM

01-07-20, 08:25 PM

identical results as if you repeat the same test again and again). Thats most for fun but would be helpful for doing some experiments so would remove the random factor from the experiments.

So I noticed the 0090CFC0 random function relies on two things: it uses the C lib rand() function, but it also reads some random memory addresses that are filled with garbage that is used in the randomness.

So I found the C lib srand (009469FA) and rand (00946A04) functions. I changed it to use a fixed random seed, instead of using the current local time. And I also removed the logic for using those garbage memory addresses.

That worked, I holidayed a month in the future, then closed the game, then holidayed again 1 month, and all the match results, transfers, injuries, etc, everything was identical.

However there was a bug, after a month it enters an infinite loop, because there are some silly functions which do basically: Code:

while (getRandomNumber(10) != 5)

As the random number will always be the same from the same input, it stays in infinite loop :)

When I find all the places which does this silly thing I can get a stable version.

Actually a better way to remove randomness from the game would be if I could store the garbage memory address and random seed in the savegame file and then load it again when savegame loaded, this way the random number would be different from the same inputs but still would cause all repetitions of holidays to be identical (I tested it with in memory hacks and it worked, but i dont know how to save/read to savegame file)

13-07-20, 09:38 AM

Hey guys,

Couple of questions:

1- With the bidding to host either the Euros or the WC and the bidding is dual is it possible to make it just a single country to bid? Let's say for example Scotland/Wales and make it just Scotland? And what about the the other way: Scotland to Wales/Scotland?

2- Regarding the Champions League and Uefa Cup venues for the finals. Can we set them for the years to come? Or is it completely random? Because the game always seems to pick the same places so I assume this is coded somewhere. I'm having lots of fun editing the 1989 update and would like to add this to the exe.

Nick+Co

@jukilo1888: For question 1 - yes it is possible. My notes on this are rubbish and based on when I was doing it for the '93 00/01 version. But as far as I can tell from my notes, there's a flag that gets set while setting the host and it can be 0xFD or 0xFE and that states whether it is dual host or not. Not much use I know! But hopefully might give you a clue while stepping through the code. I might try it out today and write some notes up here on how to do it.

jukilo1888

@Nick: When I was setting Italy to be the single organizer of the 1990, using what JL wrote in his thread, I wrote something you did in your 93 exe. As this was a co-host (Japan and South Korea) I changed the South Korea value to put the Italy one and with Japan I wrote MOV ECX, -1 and it worked that way.

But when I tried to do the same for the 1996 Euros for the co-host bidding, Olly simply said "no room for this command" and I had to leave it with Scotland and England. And set the other 2 bids as England. Maybe this is because the hosts aren't set yet in this case and the game still needs to go through the bidding process.

So that's why I was wondering if it would be possible to put a single bid instead of a dual.

This is just a small detail as the exe is perfect for me as it is but I think it would be nice to know if folk would like to do other retro DB.

Nick+Co

13-07-20, 12:21 PM

@jukilo1888: Ahh I understand the bit you are trying to change. From your '89 exe:

Code:	
-	

005F9CE5 . 8B0E	MOV ECX, DWORD PTR DS:[ESI]	
005F9CE7 . 8B15 5CF49C00	MOV EDX, DWORD PTR DS: [9CF45C]	< Scotland (as per the
original)		
005F9CED . 8991 5A010000	MOV DWORD PTR DS:[ECX+15A],EDX	
005F9CF3 . 8B06	MOV EAX, DWORD PTR DS:[ESI]	
005F9CF5 . 8B0D E4F29C00	MOV ECX, DWORD PTR DS: [9CF2E4]	< You've changed this
to England now		
005F9CFB . 8988 5E010000	MOV DWORD PTR DS:[EAX+15E],ECX	
005F9D01 . 8B16	MOV EDX, DWORD PTR DS: [ESI]	
005F9D03 . A1 E4F29C00	MOV EAX, DWORD PTR DS: [9CF2E4]	< You've changed this
to England now		
005F9D08 . 8982 62010000	MOV DWORD PTR DS:[EDX+162],EAX	
005F9D0E . 8B0E	MOV ECX, DWORD PTR DS: [ESI]	
005F9D10 . 89B9 66010000	MOV DWORD PTR DS:[ECX+166],EDI	
005F9D16 . 8B16	MOV EDX, DWORD PTR DS: [ESI]	
005F9D18 . A1 E4F29C00	MOV EAX, DWORD PTR DS: [9CF2E4]	< You've changed this
to England now		~
005F9D1D . 8982 6A010000	MOV DWORD PTR DS:[EDX+16A],EAX	
005F9D23 . 8B0E	MOV ECX, DWORD PTR DS: [ESI]	
005F9D25 . 89B9 6E010000	MOV DWORD PTR DS:[ECX+16E],EDI	
005F9D2B . 8B16	MOV EDX, DWORD PTR DS: [ESI]	
005F9D2D . 889A 72010000	MOV BYTE PTR DS: [EDX+172], BL	

The patch I just tried was:

Code:

005F9CE7	C781 5A010000 3D000000	MOV DWORD PTR DS: [ECX+15A], 3D	< 3D is the number that's held
005F9CF1	B3 FD	(done this way to save byte space) MOV BL,0FD	< BL is currently, 0xFE, needs to be
changed to	0xFD for single host		
005F9CF3	C781 5E010000 FFFFFFFF	MOV DWORD PTR DS:[ECX+15E],-1	< Move -1 into this rather
than Scotla	and		
005F9CFD	90	NOP	
005F9CFE	90	NOP	
005F9CFF	90	NOP	
005F9D00	90	NOP	

Should do what you need.

jukilo1888

@Nick: thank you so much!! I'll put it in Olly and apply it to exe. I feel like a kid in a candy shop, discovering all this amazing new things and learning how much the exe can be modified. Lots of trials and errors but that's the fun of it.

nik21

Does anybody know how i can make greek national A division matches to be separated in Saturday and Sunday and NOT only Sunday?

For example, i want 3 matches to be played in Saturday and for matches to be played in Sunday

David00C

Hello

Anyone have the offset for the Turkish Premier Division prize money? I can only find the tv money at :008FDF5F

Thanks

totallyaddicted

Hi guys just a couple of questions is there any way to re activate the cup winners cup competition?

Thank you

Ratio

Nick, is there a way to set at zero, I mean: no relegations at all in the bottom of Italian serie c1? and making Serie c2 a level WITHOUT promotions and relegations? Thank you.

John Locke

004F45E2:	C1	Β7
004F45E3:	E0	90
004F45E4:	05	90

Nice.

Can you do something similar for adding/removing some from the shortlist? And sending a scout to watch the player? And the confirmation screen to confirm trial invites?

Speaking of trial invites, could they default to 1 week in duration rather than 2 weeks?

John Locke

Original: 006A88BB 75 1A JNZ SHORT cm0102.006A88D7 006A88BD 80FB 05 CMP BL,5 006A88C0 74 15 JE SHORT cm0102.006A88D7 006A88C2 6A 0C PUSH 0C

Result: the club agreed with my request to expand the stadium which they were otherwise refusing.

I don't know exactly how it works. The NOPs are needed to ensure the PUSH instruction happens.

Edit: or not, the stadium expansion never happened when I holidayed the game. :(

septimus

Free transfers after the summer window is closed are posiible only in Italy....

Why doesn't it work in other European leagues?

Those marked with a * indicate they appear twice but I don't know why. Possibly because the competition has two stages which can be edited independently?

Did see this now, and after todays news that you can name 12 subs and use 5 for the rest of the season in CL and EL, is it possible to find the allowed code for European CL and Uefa Cup to change from 3 to 5 subs used?

David00C

Hello

I am trying to change the start year of the FIFA WCC in the .68 version.

I change this offset : 009291B2 |. 66:3D CE07 |CMP AX,7D1

but i can only have it start in odd years, never in even years.

Can anyone help me if i want it to start in 2002 or 2000?

Thank you

John Locke

0058383F | . C646 49 07 MOV BYTE PTR DS:[ESI+49],7 00583843 | . 8846 4A MOV BYTE PTR DS:[ESI+4A],AL

Subs allowed is hard-coded as AL, so changing it isn't as simple as editing a number. Try this (untested, but it looks right to me):

0058383F 66:C746 49 0905 MOV WORD PTR DS:[ESI+49],509 00583845 90 NOP

This is using a useful hack of setting a 1 byte location with a 2 byte (WORD) value - which forces the extra byte to go into the next byte, luckily for us the two values are adjacent. Geek bit - notice how the assembly instruction uses '509' but the actual bytes are '0905' - this is because numbers are 'little endian' and we want +49 to be 9 subs and +4A to be 5 allowed subs.

Golly

16-10-20, 12:07 AM

NOP this and 'Sedgeford' will return employed as well as unemployed players.

All untested.

Can any1 explain what ST(1)...ST(6) means?

i find that player value stack in ST(6) but couldnt find it anywhere around code, only ST(1)

IIRC, dates are stored as: 2 bytes for day of year (0-364), 2 bytes for year, then 4 bytes for something I don't remember - in the back of my mind it is something to do with leap years (I recall thinking it was very inefficient, as 1 byte would suffice for that).

Means nothing to me.

If it helps, here are all matches for "ST(6)" in the exe.

009505C8 . D9CE FXCH ST(6) 009505F2 . D9CE FXCH ST(6) 009505F2 . D9CE FXCH ST(6) 00950656 . D9CE FXCH ST(6) 00950666 . D9CE FXCH ST(6) 00950665 . D9CE FXCH ST(6) 00950685 . D9CE FXCH ST(6) 009506AC . D9CE FXCH ST(6) 009506C4 . D9CE FXCH ST(6) 009506C4 . D9CE FXCH ST(6) 009506C8 . D9CE FXCH ST(6) 009506C9 . D9CE FXCH ST(6)

After a bit of time experimenting with Olly (I'm a complete amateur with it and just going by searching for coding that has been found by people on

19-10-20, 12:25 AM

19-10-20, 12:36 PM

this forum over the years) - I have managed to alter the Inter-Toto Cup.

There is coding in the game to tell the UEFA coefficients that Liechtenstein and Moldova should not have any teams in the Inter-Toto. I changed Moldova to Iceland and now Moldova have 1 team in the competition while Iceland have none.

I also found coding that seemed to say that there are 60 teams in the competition (in the game if you count the number of teams per country it is 61, though only 60 clubs would actually compete), the country that is at the bottom of the UEFA coefficients is Luxembourg, they don't have a team compete even though it says 1 for Inter Toto Cup. The code I changed is found at 00905083 and 00905003 - need to change the 3C value.

I increased the number of competing teams to 66 and then altered the code in the first three rounds of the competition so that 66 teams would compete (and still have 6 in the final playoff). All has worked perfectly with Luxembourg now having their 1 team competing. The extra 5 teams have come from; England (usually 1, now 2 and it was Wrexham that was the extra team - along with usual Wolves - ...:noidea:), Spain (extra 2) and Italy (extra 2) - this means Spain and Italy now have 11 teams in Europe - I was hoping to get the extra teams from the smaller nations who never have anyone in Europe, however on the coefficients list they still have 0 beside them so need to figure out how to increase this to 1.

There seems to be code that points to the number of European nations used for selections, this has always been 50 (I've never seen more than 50 countries have clubs involved in European competition each season). Tried changing it to 55 but does not seem to have impacted the selection process, will keep working. The lines of code I changed were;

009057EF - CMP CL, 32 (hex value for 50, changed the 32 to 37 - 55 as 55 European countries in the game now) 0090570E - CMP EAX, 32 009056FB - PUSH 32 00905483 - CMP EAX, 32 00905470 - PUSH 32

EDIT

Ignore those lines of code above. They seem to do more than I realised (in fairness I was having a stab in the dark as the hex value equalled 50 so I surmised it was to do with number of European nations). The game loaded up fine after I made those changes. But once saved it would not reload, kept crashing. No such issues when I changed them back thankfully. If anyone has any idea what those lines of code do it would be great to know.

FURTHER EDIT

I have tried changing the coefficients for each country in the official game editor so that the bottom 8 or so nations have identical ratings, however the 5 nations now at the bottom of the rankings still have no clubs involved in European competitions, so there must be some code that tells the game there are only 50 European nations.

footballer

21-10-20, 05:39 PM

As a further update, the changes to the Inter-Toto Cup all work fine, game has updated without errors from first season into second and on. However, it is still selecting extra teams from England, Spain and Italy. In England teams that came 8th and 10th in Premier League have entered the competition. I can only guess that was from invite into Inter-Toto Cup, so perhaps now rather than one invite it is 2.

On the UEFA coefficients list it still has only 1 place for England (there's been no overall change to numbers displayed even though there are now 6 extra clubs in the competition). Between the 3 competitions there are 252 qualifying places/allotted places for clubs (72 CL, 117 EL, 61 ELQ) although the actual numbers now participating through the rounds totals 274 (71 CL, 137, 66ELQ). Would be good to discover what code changes the display on the rankings for numbers of teams. - Interestingly in season 2 an extra 2 allotted places appeared in the list for EL bringing this to 119 (alloeit still 137 clubs competing across the rounds). Possible that this always occurs and I've just never noticed before.

Looking at the Uefa Coefficient rankings 51 nations out of 55 have clubs involved in one of the 3 european competitions but with the bottom nations in the rankings this seems to be very random (some nations have 1 place allotted to them in say the UEFA Cup yet they have no club in any qualifying round, and then there will be a club involved from a nation with 0 allotted places...)

Have tried adding more teams to the Champions League but not going as easy. Check out following offsets;

00904252 - MOV BYTE PTR DS:[ESP+21],10 - refers to number of teams that join the qualified teams for group stage. The lines directly beneath have values for 18, 19 and 18, which is the number of new teams in each round, working backwards. Have tried adding 9 new teams to the competition and then changed the values to match in the Champions League coding for the first, second and third qualifying rounds.

I then found a piece of code at 0058499F which relates to number of teams in a competition - but the value is only 55, which strangely enough is the number of teams involved in the first 3 qualifying rounds. There is a PUSH value above this too. Changed these to match the extra 9 teams I added but game still crashes when loading with a Comp_Stats error.

Stumped now as to what else needs to be changed to add the extra teams to the Champions League qualifying rounds.

EDIT**

After some more editing, realised that the number of new teams entering each round is also the number of seeded teams at each stage - so until we find how to change the number of seeded teams we will not be able to change the overall number of teams in the competition.

yokofoxes

Hi all

I downloaded Nick's patch for 3.9.68 (thanks, Nick, it's excellent for getting jobs abroad!) but the Confed Cup, Asian Cup Winners, and Aussie League still break. Confed and Asian have the 3rd/4th place issue, and the Aussie League has the closing stage problem. I had previously found olly offsets to fix them for them but now I can't. Any help locating them?

I'll keep looking but any help would be much appreciated.

On a quick search the important lines appear to be: 00595D08 |. A1 F8F79C00 MOV EAX,DWORD PTR DS:[9CF7F8] 00595D0D |. 8946 20 MOV DWORD PTR DS:[ESI+20],EAX

How I found this:

Went into the 9CF thread to get the value for Finnish First Division, searched Olly for all references, then looked for the +20 line (which is where the game stores the 'relegate to' division - 'promote to' is +1C).

Replace both lines with: MOV DWORD PTR DS:[ESI+20],-1

[Untested]

10-11-20, 01:22 PM

Apologies if I've posted this query in the wrong thread.

I'm sure I've previously seen a post about player fitness levels during the game and how to stop players losing fitness in April.

From what I can see clubs in non-playable European leagues ie Ukraine, Czech Rep, Israel, Cyprus etc, players lose their fitness levels in April, so any clubs from these countries who manage to make it to the quarter finals of European competitions are unable to perform.

Anyone know how to fix/patch this?

fairedinkum

@Footballer

I had an old patch Fiestita created that sorted fitness levels and Nick elaborated and improved on it and it's built into Nick's patcher. Whether it covers them leagues or not I couldn't tell ya but I imagine it would do. If you use Nick's patcher it's in the 'Apply Misc. Patch' under FitnessPatch.

footballer

Okay, that's great, thanks, will give that a try and see if it sorts it - had never even thought about it until I saw Shakhtar Donetsk make the QF of Europa and get hammered, then realised why and spotted this was the case for all non-playable leagues.

hodgy

@footballer: the one in Nick's Misc patches definitely works. I've played a good 4-5 seasons with it now.

footballer

Thanks Hodgy, the Misc patch Nick has for the fitness sorted that out.

Does anyone have a full list of the ESI+50 offsets? Am I right that this refers to league rules? There seems to be a different value used for each set of leagues/cups. The list I've been able to sort out myself is;

 $\bar{2} = ??$ 3 = Argentina 4 = Belgium 5 = ?? 6 = Brazil 7 = 8 = Denmark9 = England0A = Finland & Australia 0B = 0C = France 0D = Germanv0E = 0F = Holland 10 = Ireland11 = Italy 12 = 13 = Japan 14 =15 = Norway16 =17 = Portugal

[ESI+50],1 = Europe

18 = Scotland

Nick+Co

Fed up of your board cancelling your transfers at the last minute because they deem they are unrealistic?

Code:

004CDC56: 01 00

With that patch, if you want to pay 50m for an untested 17 yr old regen, now you can without your board interfering :)

This would make for a very interesting economic change globally :)

Not sure if this has been fixed/noted elsewhere, but just in case:

Some managers/non-players you might want to include from real-life, but the game might consider them too old or too young (and therefore changes their age for you). This is the code that checks it:

Code:

00537C71	>	\3C 1D	CMP AL,1D	< 1D = 29
00537C73	1.	7C 04	JL SHORT 00537C79	< If less than 29 reject
00537C75		3C 4B	CMP AL,4B	< 4B = 75
00537C77	١.	7E 4A	JLE SHORT 00537CC3	< if older than 75 reject

These limits are probably in for good reason (to not allow anything too wacky through) - but young managers are all the rage nowadays (and having old managers still lingering in the database would be good), so a patch to expand it a little would be:

Code:

00137C72: 1D 14 00137C76: 4B 5A

This way managers ranging from age 20 to 89 will be loaded with the correct age.

Can you give instructions for Olly what to change?

Sent from my VOG-L29 using Tapatalk

Nick+Co

@djole: copy and paste the file offset 004CDC56 into my patcher -> tools -> offset calculator. The olly offset it gives you in hex go to in Olly (Ctrl+G to go there direct). Should be pretty obvious what's being changed by doing that.

hodgy

Has anyone got the offset for number of subs you are allowed to make in a match? Everything I'm finding is only referring to number of subs named in the squad.

Nick+Co

@hodgy: https://champman0102.co.uk/showthrea...653#post468653 <--- not what you're looking - but might get you looking in roughly the right direction.</p>

EDIT

Some other help :)

The code for the English Premier League "named" subs is here:

Code:

Code:

00574BF3	.	8BCE
00574BF5	.	FF52 3C
00574BF8	.	8986 BA000000
00574BFE	.	B8 01000000
00574C03	.	C646 49 07
00574C07	.	5E
00574C08	\backslash .	C3
00574C09		90

MOV ECX,ESI CALL DWORD PTR DS:[EDX+3C] MOV DWORD PTR DS:[ESI+0BA],EAX MOV EAX,1 MOV BYTE PTR DS:[ESI+49],7 <--- Named Subs is 7 POP ESI RETN NOP

The code for the Asian Club Championship tournament is:

used			C646 49 05 C646 4A 03	MOV BYTE PTR DS:[ESI+49],5 MOV BYTE PTR DS:[ESI+4A],3	; < Named Subs ; < Subs allowed to be
------	--	--	--------------------------	--	--

From this one could infer that +49 is the offset for Named Subs and +4A is for the number that's allowed to be used. So you could add: Code:

,		
00574C03 .	. C646 49 07	MOV BYTE PTR DS:[ESI+49],7
00574C07	C646 4A 05	MOV BYTE PTR DS:[ESI+4A],5
00574C0B	5E	POP ESI
00574C0C	C3	RETN

To the above code and the English Premier League (and others that use this function) will now be allowed 5 subs to be used out of the 7 named.

Retirement has always felt a little young to me - basically from 30 onwards your players could retire. There's lots of other factors at play, but there is a first check here: Code:

007A5A8B 007A5A8D	CMP AL,1E JGE SHORT 007A5ABF	
So the patch: Code:		

003A5A8C: 1E 23

Will raise that to 35, which might be more palatable for some. (I picked 35 from here: https://www.thepfa.com/equalities/commitment-to-all/age - although that might a bit high to set as that's the average. So change to whatever you want :))

i didn't understood quite:

004CDC56 is 5037142 8cdc56 is 9231446

8cdc56 is nowhere to be found in exe through olly.

Nick+Co

Really?

The whole pressing Ctrl+G in Olly, typing in 8cdc56 and pressing enter. You did that right? Or maybe even just scrolled down? Scroll to the bottom to find 00966FFF....

Admittedly the line actually starts at 8cdc55, but once you go to 8cdc56 just scrolling a bit will with the mouse wheel will correct the disassembly:

The line you are looking for is: 008CDC55 B8 01000000 MOV EAX,1

Which is setting the return value of the function to 1. Setting that to 0 means the offer won't be rejected by the board.

Will raise that to 35, which might be more palatable for some. (I picked 35 from here: https://www.thepfa.com/equalities/commitmentto-all/age - although that might a bit high to set as that's the average. So change to whatever you want :))

Thanks Nick,

will this solve also not retiring problem? Some players dont retire even after 40 years old

@xeno: No this just raises the age at which players might retire. And even this could do with some more testing! Not come across the issue where players do not retire at all - so hard for me to fix.

EDIT: Ahhh, this patch needs looking into - I think it could possibly cause what you're stating (i.e. players never retiring). Will look into it and come up with another patch.

EDIT2: Erased

EDIT3:

This has been waaaay trickier than I thought it would be - this is a little bit of a hack, but does work and forces the earliest retirement age that can occur to be 34 (that's the 0x22 at offset 003A65C9 if you want to change to a different number). But at least this patch for it works! :) Code:

003A6585: 88 EB 003A6586: 08 3F 003A65C6: 90 80 003A65C7: 90 7F 003A65C8: 90 FE 003A65C9: 90 22 003A65CA: 90 7C 003A65CB: 90 BB 003A65CC: 90 88 003A65CD: 90 08 003A65CE: 90 EB 003A65CF: 90 B7

Pasquale

Guys where do I find the offset to limit loan in Northern Ireland? It is not very realistic to make loans outside the transfer market....thanks for help

Craig Forrest

Hey my genius friends, give your Canuck buddy a hand

I want to load the Brazilian Champions Cup instead of the CONCACAF CL.

I change the call function for the CONCACAF CL (00831821) to 004259A0 so it calls the Brazilian Champions Cup instead

But it doesn't. I load USA, and in the North American comps it just shows the normal 2. CONCACAF CL and Merconorte.... except the CONCACAF never schedules or draws

Is it because the Brazilian Champions Cup is a competition tied to Brazil and I'm tryin to force it to load in a continental competition's spot?

Any help?

hodgy

Has anyone found the offset for removing European squad ineligibility? It's annoying not having a player available all season because he played a first round match before signing
